1. Pursuant to authority found in sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Commmunications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assigments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in intial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[MM Docket No. 83-358; RM-4374]

FM Broadcast Stations in Juneau, Alaska; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign FM Channel 292Ato Juneau, Alaska, in response to a petition filed by KINY Associates. The proposal could provide a fourth FM service to that community.

DATES: Comments must be filed on or before May 31, 1983, and reply comments must be filed on or before June 15, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Radio broadcasting.

Proposed Rule Making

In the matter of an amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Juneau, Alaska); MM Docket No. 83–358, RM–4374.

Adopted: March 23, 1983.
Released: April 14, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed January 28, 1983, by KINY Associates ("petitioner") seeking the assignment of FM Channel 292A to Juneau, Alaska, as its fourth FM assignment.[1] Petitioner submitted information in support of its proposal and expressed an interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements.

2. Since the proposed assignment of Channel 292A to Juneau, Alaska, is within 320 kilometers (200 miles) of the U.S.-Canadian border, Canadian concurrence must be obtained.

3. In view of the fact that the proposed assignment could provide a fourth FM service to Juneau, the Commission believes it is appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with respect to the following community.

City	Channel No.	
	Present	Proposed
Juneau, Alaska	282, 286	264, 282, 286, 292A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

[1] A proposal to assign Channel 264 as a third FM assignment is now pending (RM–4323).

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before May 31, 1983, and reply comments on or before June 15, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification That Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making To Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules,* 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[MM Docket No. 83-367; RM-4380]

FM Broadcast Stations in East Grand Forks, Minnesota; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule.

SUMMARY: This action proposes to substitute Class C FM Channel 282 for Channel 280A in East Grand Forks, Minnesota, and to modify the Class A license for Station KRRK-FM accordingly, in response to a petition filed by KRAD, Inc.

DATES: Comments must be filed on or before May 31, 1983, and reply comments must be filed on or before June 15, 1983

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau, (202) 634-6530.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

Proposed Rule Making

In the matter of an amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (East Grand Forks, Minnesota); MM Docket No. 83-367, RM-4380.

Adopted: March 23, 1983.
Released: April 14, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed February 8, 1983, by KRAD, Inc.[1] ("petitioner"), which seeks to substitute Class C Channel 282 for Channel 280A at East Grand Forks, Minnesota, and to modify the license for Station KRRK-FM (Channel 280A) to specify operation on Class C Channel 282.

2. Petitioner submitted information in support of the petition. It noted that the substitution of Class C Channel 282 for Channel 280A would enable the station to better serve the audience in this thinly populated agricultural area.

[1] Petitioner is the licensee of Station KRRK-FM (Channel 280A) at East Grand Forks, Minnesota.

3. We believe that the petitioner's proposal warrants consideration. The channel can be substituted in compliance with the minimum distance separation requirements. In accordance with our established policy, we shall propose to modify the license of Station KRRK-FM to specify operation on Channel 282. However, if another party should indicate an interest in the Class C assignment, the modification could not be implemented. Instead, an opportunity for the filing of a competing application would be provided. See *Cheyenne, Wyoming*, 62 F.C.C. 2d 63 (1976).

4. Since the proposed channel substitution in East Grand Forks, Minnesota, is within 320 kilometers (200 miles) or the U.S.-Canadian border, Canadian concurrence must be obtained.

5. In view of the apparent need for a wide coverage area FM station, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules, as it pertains to the following community.

City	Channel No.	
	Present	Proposed
East Grand Forks, Minnesota	280A	282

6. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before May 31, 1983, and reply comments on or before June 15, 1983, and are advised to read the Appendix for the proper procedures.

8. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

9. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

List of Subjects in 47 CFR Part 73

Television broadcasting.

Proposed Rule Making

In the Matter of an amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Santa Barbara, California); MM Docket No. 83-366, RM-4285.

Adopted: March 23, 1983.

Released: April 14, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed December 29, 1982, by William V. Johnson ("petitioner"), seeking the assignment of UHF Television Channel 38 to Santa Barbara, California, as that community's fifth television allocation. Petitioner indicated that he, or an entity of which he is a part, will apply for the channel, if assigned.

2. Santa Barbara (population 74,542),[1] the seat of Santa Barbara County (population 298,660), is located approximately 135 kilometers (85 miles) northwest of Los Angeles. At the present time, Channels 3-(Station KEYT), 14 *20, and *32 are assigned to Santa Barbara.

3. We believe the petitioner's proposal warrants consideration. The channel can be assigned in conformity with the minimum distance separation requirements of § 73.610 of the Commission's Rules. However, since Santa Barbara is located within 199 miles of the common Mexican-U.S. border. Mexican concurrence in the proposal is required.

4. In view of the foregoing, the Commission finds it would be in the public interest to seek comments on the proposal to amend the Television Table of Assignments, § 73.606(b) of the Commission's Rules, with regard to Santa Barbara, California, as follows:

[1] Population figures were extracted from the 1980 U.S. Census, Advance Reports.

City	Channel No.	
	Present	Proposed
Santa Barbara, California	3-, 14,[1] *20,[1] *32	3-, 14,[1] *20,[1] *32, 38

[1] Following the decision in Docket No. 18261, channels so indicated will not be available for television use until further action by the Commission.

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before May 31, 1983, and reply comments on or before June 15, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend § 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Television broadcasting.

Proposed Rule Making

In the Matter of an Amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations, (Paducah, Kentucky); MM Docket No. 83-362, RM-4349.

Adopted: March 23, 1983.

Released: April 14, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed January 14, 1983, by William T. Conner ("petitioner") seeking the assignment of UHF television Channel 49 to Paducah, Kentucky, as that community's third commercial television allocation. Petitioner indicated that he, or an entity of which he is a part, will apply for the channel, if assigned.

2. Paducah (population 29,315),[1] the seat of McCracken County (population 61,310), is located in western Kentucky, approximately 285 kilometers (178 miles) southwest of Louisville. Presently, Paducah is assigned two commercial television channels.

3. UHF television Channel 49 can be assigned to Paducah consistent with the minimum distance separation requirements of § 73.610 of the Commission's Rules. Therefore, we believe the petitioner's proposal warrants consideration since the proposed assignment could provide Paducah with its third commercial television broadcast service. Accordingly, the Commission proposes to amend the Television Table of Assignments, § 73.606(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Paducah, Kentucky	6+, 29	6+, 29, 49+

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before May 31, 1983, and reply comments on or before June 15, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

---

[1] Population figures were extracted from the 1980 U.S. Census, Advance Reports.

7. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the dicision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[MM Docket No. 83–361; RM–3626]

TV Broadcast Stations Cleveland, Tennessee; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign UHF Television Channel 53 to Cleveland, Tennessee, as its first television assignment, in response to a petition filed by Peggy Ann Rothchild.

DATES: Comments must be filed on or before May 31, 1983, and reply comments must be filed on or before June 15, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau, (202) 634–6530.

List of Subjects in 47 CFR Part 73

Television broadcasting.

In the Matter of an amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Cleveland, Tennessee); MM Docket No. 83–361, RM–4336.

Proposed Rule Making

Adopted: March 23, 1983.

Released: April 14, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making, filed January 6, 1983, by Peggy Ann Rothchild ("petitioner"), seeking the assignment of UHF Television Channel 53 to Cleveland, Tennessee, as its first television assignment.

2. Cleveland (population 26,415),[1] seat of Bradley County (population 67,547), is located in southeastern Tennessee, approximately 200 kilometers (125 miles) southeast of Nashville, Tennessee.

3. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. A site restriction of 9.7 miles southeast of Cleveland is required to avoid short-spacing to Station WKGB (Channel 53) in Bowling Green, Kentucky.

4. In view of the fact that Cleveland could receive its first local television service, the Commission finds that it would be in the public interest to seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) for the following community.

City	Channel No.	
	Present	Proposed
Cleveland, Tenn.		53

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note. A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before May 31, 1983, and reply comments on or before June 15, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in intital comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate it present intention to apply for the channel if it is assigned, and, if authorized, to build a station promply. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this preceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in intitial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See §1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rule and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Rely comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rule and Regulation, and original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of an amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Novato, California); MM Docket No. 83–360, RM–4369.

Adopted: March 23, 1983.

Released: April 14, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed February 1, 1983, by Stephen J. Mewhort ("petitioner") seeking the assignment of UHF Television Channel 68 to Novato, California, as that community's first television assignment.

2. Novato (population 43,916)[1], in Marin County (population 222,952), is

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

located approximately 35 kilometers (22 miles) north of San Francisco, California.

3. Petitioner submitted information in support of the proposal and expressed his interest in applying for the channel, if assigned. A site restriction of 2.4 miles northeast of Novato is required in order to avoid short-spacing to Station KTEH (Channel 54) in San Jose, California, and to applications for Channel 66 in Vallejo, California.

4. In view of the fact that Novato could receive a first local television service, the Commission finds that it would be in the public interest to seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) for the following community:

City	Channel No.	
	Present	Proposed
Novato, Calif		66

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before May 31, 1983, and reply comments on or before June 15, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

FM Broadcast Stations Baker, Montana; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to substitute Class C Channel 263 for Channel 265A in Baker, Montana, and to modify the permit for Station KFLN-FM accordingly, in response to a petition filed by the permittee, Empire Broadcasting Corporation.

DATES: Comments must be filed on or before May 31, 1983, and reply comments must be filed on or before June 15, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Radio broadcasting.

Proposed Rule Making

In the matter of an amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Baker, Montana); MM Docket No. 83–359, RM–4375.

Adopted: March 23, 1983.

Released: April 14, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed February 2, 1983, by Empire Broadcasting Corporation[1] ("petitioner"), which seeks to substitute Class C Channel 263 for Channel 265A in Baker, Montana, and to modify the construction permit for Station KFLN–FM (Channel 265A) to specify operation on Channel 263. Petitioner has submitted information in support of its proposal noting that the proposed Class C FM station would serve a large rural area.

2. We believe that the petitioner's proposal warrants consideration. The channel can be substituted in compliance with the minimum distance separation requirements. In accordance with our established policy, we shall propose to modify the permit of Station KFLN–FM (Channel 265A) to specify operation on Channel 263. However, if another party should indicate an interest in the Class C assignment, the modification could not be implemented. Instead, an opportunity for the filing of a competing application must be provided. See, *Cheyenne, Wyoming*, 62 F.C.C. 2d 63 (1976).

3. Since the proposed channel substitution is within 320 kilometers (200 miles) of the U.S.-Canadian border, Canadian concurrence must be obtained.

4. In view of the apparent need for a wide coverage FM station, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Rules, for the following city:

City	Channel No.	
	Present	Proposed
Baker, Mont.	265A	263

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

[1] Petitioner is the permittee of Station KFLN(FM) (Channel 265A) at Baker, Montana.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before May 31, 1983, and reply comments on or before June 15, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisons of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 734–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to the Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or

other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 227

Review of Regulations Concerning the Taking of Sea Turtles for Subsistence Purposes

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Review of regulations concerning the taking of sea turtles for subsistence purposes.

SUMMARY: The Service has been requested by residents and the Governments of Guam and Hawaii to review the regulations prohibiting taking of sea turtles for subsistence purposes, except for the taking of the green sea turtles (*Chelonia mydas*) by residents of the Trust Territory of the Pacific Islands. In response to those requests the Service announces its intent to review Special Rule 50 CFR Part 227 Subpart D to determine whether the subsistence regulations for the Trust Territory of the Pacific Islands should be modified and whether the taking of sea turtles for subsistence purposes should be allowed in other areas of the Central and Western Pacific Ocean. To ensure that this review is comprehensive the Service is soliciting comments and information on all aspects of the use of sea turtles for subsistence purposes and will conduct several public meetings as specified below. The Service will determine if it is appropriate to modify existing regulations based upon the following: comments, information, and testimony received; review of the administrative record compiled prior to promulgation of the existing regulations; and a legal analysis of the subsistence issue being prepared by the National Oceanic and Atmospheric Administration's Office of General Counsel.

DATES: Comments and information must be received by June 20, 1983. Public meetings will be held as follows:

May 10, 1983—Hilo, Hawaii, County Council Room, 2nd Floor, 25 Aupuni St. 7–9 p.m.
May 11, 1983—Kailua-Kona, Hawaii, Kona Hilton, Endeavor Room, 7–9 p.m.
May 12, 1983—Wailuku, Maui, Baldwin High School, Multipurpose Bldg., Lecture Hall, Kaahumanu Highway, 7–9 p.m.
May 16, 1983—Lanai City, Lanai, ILWU Hall, 840 Ilima Avenue, 7–9 p.m.
May 17, 1983—Kaunakakai, Molokai, Kaunakakai Elementary School Cafeteria, Kamehameha V Highway, 7–9 p.m.
May 18, 1983—Honolulu, Oahu, Prince Jonah Kuhio Federal Building, 5th Floor Cafeteria, 300 Ala Moana Blvd., 7–9 p.m.
May 19, 1983—Lihue, Hawaii, Kauai Regional Library, 4344 Hardy Street, 7–9 p.m.
June 6, 1983—Agana, Guam, Guam Reef Hotel, 7–9 p.m.
June 7, 1983—Saipan, Northern Mariana Islands Saipan Grand Hotel, 7–9 p.m.
June 8, 1983—Pago Pago, American Samoa, Rainmaker Hotel, Convention Center, 5:30–7:30 p.m.

Public meetings may be held in the Trust Territory of the Pacific Islands in June 1983. The dates and locations of those public meetings will be published in the **Federal Register** as an addendum to this notice at least 30 days prior to the first meeting.

ADDRESS: Please address correspondence to Mr. Alan W. Ford, Regional Director, Southwest Regional Office, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

FOR FURTHER INFORMATION CONTACT: Alan W. Ford, Regional Director, Southwest Regional Office, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731, telephone (213) 548–2575 or FTS–796–2575; or Doyle E. Gates, Administrator, Western Pacific Program Office, Southwest Region, National Marine Fisheries Service, P.O. Box 3830, Honolulu, Hawaii 96812, telephone (808) 955–8831.

SUPPLEMENTARY INFORMATION:

Background

The Endangered Species Act (ESA) of 1973, as amended, is administered jointly by the Departments of the Interior (Fish and Wildlife Service) and Commerce (NMFS). In general, the Department of Commerce is responsible for listed marine species and the Department of the Interior for terrestrial and aquatic species. The two Departments share jurisdiction of sea turtles with Interior having responsibility for sea turtles in the terrestrial environment and Commerce have responsibility for sea turtles in the marine environment. On July 28, 1978, pursuant to the authority of section 4 of the ESA, NMFS and the Fish and Wildlife Service published in a Final Rule in the **Federal Register** listing and protecting loggerhead sea turtles (*Caretta caretta*), as threatened species and populations of green (*Chelonia mydas*) and olive ridley (*Lepidochelys Olivacea*) sea turtles as threatened or endangered species. Breeding populations of green sea turtles in Florida and on the Pacific Coast of Mexico and of olive ridley sea turtles on the Pacific Coast of Mexico are listed as endangered species; the remaining population of both species are listed as threatened species.

The Final Rule also amended 50 CFR by adding a new Part 227, which, with few exceptions, prohibits commercial trade in and the taking of threatened species of sea turtles. Among the exception to the prohibition on takings is the taking of "any member of the species of the green sea turtle (*Chelonia mydas*) in waters seaward of mean low tide for personal consumption by residents of the Trust Territory of the Pacific Islands if such taking is customary, traditional, and necessary for the subsistence of such resident and his immediate family." The existing regulations do not allow any other taking of sea turtles for subsistence purposes. The exception was founded on information submitted by the Government of the Trust Territory of the Pacific Islands which documented the traditional use of green sea turtles by natives of the Trust Territory. This exception was not extended to other areas of the Central and Western Pacific because NMFS thought a complete prohibition was necessary in the other areas to control commercial trade in turtle shells, meat, and other products. Also, evidence was presented indicating that the green sea turtle population in Hawaii had declined, and NMFS concluded that a subsistence take in Hawaii might contribute to a further decline of that population.

Purpose of Review

The Service received requests from residents and the Governments of Guam and Hawaii to review existing regulations that prohibit the taking of sea turtles for subsistence purposes in Guam and Hawaii. The requests indicate that the regulations may discriminate against residents of Guam and native Hawaiians. The Service is responding to those requests by

reviewing the existing regulations to determine whether the subsistence regulations for the Trust Territory of the Pacific Islands should be modified and whether the taking of sea turtles for subsistence purposes should be allowed in other areas of the Central and Western Pacific Ocean.

Scope of Review

Because of the shared jurisdiction of sea turtles under the Endangered Species Act, during this review the Service will consider only the subsistence take of green sea turtles in the marine environment (seaward of mean low tide). Subsistence taking of green sea turtles or eggs on beaches is under the jurisdiction of the Department of the Interior and will not be considered. The Service will coordinate this review with the Department of the Interior.

Information Solicited

To ensure that the review is complete and based upon the best available information, the Service is soliciting information concerning all aspects of subsistence use(s) of green sea turtles including, but not limited to, the need for subsistence taking for nutritional reasons, the historical use(s) of green sea turtles in the areas in question, and the impact(s) of subsistence taking on the affected populations and their recovery. The Service requests that comments and information be accompanied by supporting documentation such as maps, bibliographic references, or reprints of pertinent publications. All correspondence should include the author's name, address, and any association, institution or business affiliation being represented. This request pertains only to information that was not considered during the rulemaking process leading to the Final Rule published in the **Federal Register** on July 28, 1978 (pp 32800–32811).

Wednesday, April 20, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Coronado National Forest Grazing Advisory Board; Meeting

The Coronado National Forest Grazing Advisory Board will meet at 10:00 a.m., May 17, 1983, at the Federal Building, 301 West Congress, Room 7X, Tucson, Arizona. The purpose of this meeting is to discuss allotment managment planning including the Coronado National Forest Plan and EIS, and the use of range betterment funds.

The meeting will be open to the public. Persons who wish to attend should notify Larry Allen, Coronado Supervisor's Office, telephone 602–629–6418. Written statements will be filed with the board before or after the meeting.

The board has established the following rule for public participation: Nonmembers are asked to withhold comments until the close of business.

Larry S. Allen,

Acting Forest Supervisor.

Office of the Secretary

Forms Under Review by Office of Management and Budget

April 15, 1983.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) an indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Comments and questions about the items in the listing should be directed to the agency person named at the end of each entry. If you anticipate commenting on a form but find that preparation time will prevent you from submitting comments promptly, you should advise the agency person of your intent as early as possible.

Copies of the proposed forms and supporting documents may be obtained from: Marshall L. Dantzler, Acting Department Clearance Officer, (202) 447–6201.

BILLING CODE 6335–01–M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket No. 9–83]

Proposed Foreign-Trade Zone Wilmington and Kent County, Delaware; Application and Public Hearing

Notice is hereby given that an application has been submitted to the Foreign-Trade Zones Board (the Board) by the State of Delaware through the Delaware Development Office (DDO), requesting authority to established a

general-purpose foreign-trade zone with sites in the City of Wilmington and in Kent County, adjacent to the Wilmington Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on April 5, 1983. The applicant is authorized to make this proposal under Chapter 75, Title 6 of the Delaware Code.

The proposed foreign-trade zone will involve two separate sites totaling 660 acres. Site 1 would encompass the 615-acre Port of Wilmington, which is owned and operated by the City of Wilmington. A 144,000 square foot building near the terminal area will be made available for initial zone activity. Operation of the project will be a cooperative effort between DDO and the City and Port of Wilmington.

Site 2 involves an industrial area covering 45 acres on Southern Boulevard in and adjacent to the Town of Wyoming, Kent County. DDO will assume jurisdiction and control of the site from the owner, Quality Kitchen Foods, Inc., and develop the facility as a public industrial park in cooperation with the Town of Wyoming and Kent County. An existing 30,000 square foot structure is currently being renovated as a refrigerated warehouse to be used by Quality Kitchen for storage of orange juice concentrate. Public warehouse facilities are planned.

The application contains evidence of the need for zone services in Delaware. Several firms have indicated an interest in using zone procedures for warehousing/distribution operations involving orange juice concentrate, seafood and other food products, machinery and components, electronic products, medical equipment, and vaccines. No approvals are being requested for manufacturing at this time. Such requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones staff, U.S. Department of Commerce, Washington, D.C. 20230; Edward A. Goggin, Assistant Regional Commissioner, U.S. Customs Service, Northeast Region, 100 Summer Street, Boston, Massachusetts 02110; and Lt. Colonel Roger L. Baldwin, District Engineer, U.S. Army Engineer Distict Philadelphia, 2nd and Chestnut Streets, Philadelphia, Pennsylvania 19106.

As part of its investigation, the examiners committee will hold a public hearing on May 4, 1983, beginning at 9:00 a.m., in the City Council Chambers of the City-County Building, Wilmington. Interested parties are invited to present their views at the hearing. Persons wishing to testify should notify the Board's Executive Secretary in writing at the address below or by phone (202/377–2862) by May 2. Written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through June 3, 1983. A copy of the application will be available during this time for public inspection at each of the following locations:

Port Director's Office, U.S. Customs Service, New Federal Bldg., Room 1218 F, 844 King Street, Wilmington, Delaware 19801

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Pennsylvania, N.W., Washington, D.C. 20230

Dated: April 15, 1983.

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-25-M

DEPARTMENT OF COMMERCE

International Trade Administration

Certain Steel Pipes and Tubes From Japan; Allowance of Security in Lieu of Estimated Duty Pending Early Determination of Antidumping Duty

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of allowance of security in lieu of estimated duty pending early determination of antidumping duty.

SUMMARY: The Department of Commerce has determined that, on the basis of information received from the only manufacturer currently subject to the antidumping duty order on certain steel pipes and tubes from Japan, Sumitomo Metal Industries, Ltd., we have a sufficient basis to conduct an expedited review of the order. The Department will determine the appropriate foreign market values and United States prices by May 30, 1983. We will permit Sumitomo Metal Industries, Ltd. to post bonds or other security in lieu of the cash deposit of estimated antidumping duties for merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and before May 30, 1983.

EFFECTIVE DATE: April 20, 1983.

FOR FURTHER INFORMATION CONTACT: Jonathan Seiger or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 377–5255/3601.

SUPPLEMENTARY INFORMATION: On March 1, 1983, the Department of Commerce ("the Department") published in the **Federal Register** an antidumping duty order on certain steel pipes and tubes ("CSPT") from Japan (48 FR 8522). The Department announced that, in addition to deposits of estimated normal customs duties, Customs officers were to require a cash deposit of estimated antidumping duties on all merchandise entered, or withdrawn from warehouse, for consumption on or after March 1, 1983.

On February 25, 1983, Sumitomo Metal Industries, Ltd. ("SMI") requested that the Department waive the requirement for cash deposit of estimated antidumping duties and conduct an expedited review pursuant to section 736(c) of the Tariff Act of 1930, as amended ("the Tariff Act").

Before granting a waiver of cash deposits of estimated antidumping duties we must be satisfied that, based upon the information presented by SMI, we will be able to determine the appropriate foreign market values and United States prices within 90 days after the date of publication of the order.

After reviewing the information submitted by SMI, the Department is satisfied that it will be able to determine the appropriate foreign market values and United States prices.

Accordingly, the Department is instructing the Customs Service to waive cash deposits of estimated antidumping duties and accept bonds or other security for entries of CSPT manufactured by SMI entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

Interested parties may submit written comments within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days after the date of publication. The Department will publish the results of this expedited review by May 30, 1983, including the results of its analysis of any such comments or hearing.

This notice is published in accordance with section 736(c)(2)(A) of the Tariff Act (19 U.S.C. 1675(c)(2)(A)).

April 7, 1983.

Gary N. Horlick,

Deputy Assistant Secretary, Import Administration.

[FR Doc. 83-10501 Filed 4-19-83; 8:45 am]

BILLING CODE 3510-25-M

Leather Wearing Apparel From Colombia; Preliminary Results of Administrative Review of Suspension Agreement

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of suspension agreement.

SUMMARY: The Department of Commerce has conducted an administrative review of the agreement suspending the countervailing duty investigation on leather wearing apparel from Colombia. The review covers the period September 1, 1981 through June 30, 1982. As a result of the review, the Department has preliminarily determined that Confecciones Amazonas Orinoco, a Colombian exporter of leather wearing apparel to the United States, has complied with the terms of the suspension agreement. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: April 20, 1983.

FOR FURTHER INFORMATION CONTACT: Susan Silver or Joseph Black, Office of Compliance, Room B099, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On September 15, 1982 the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 40679) the final results of its last administrative review of the agreement suspending the countervailing duty investigation on leather wearing apparel from Colombia (46 FR 19963, April 2, 1981) and announced its intent to conduct the next administrative review by the end of April 1983. As provided for in section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Merchandise covered by the review includes men's, boys', women's, girls' and infants' leather coats and jackets and other leather wearing apparel (such as vests, pants and shorts), as well as parts and pieces thereof. Such imports are currently classifiable under items 791.7620, 791.7640 and 791.7660 of the Tariff Schedules of the United States Annotated. The review covers the period September 1, 1981 through June 30, 1982 and the only program found to constitute a subsidy in the preliminary affirmative determination in the original investigation, the Tax Reimbursement Certificate Program ("CAT").

Analysis of Program

Under the CAT program, exporters of leather wearing apparel receive tax certificates equal to a percentage of the domestic value-added content of each shipment. Since our last review, the value-added content as a percentage of total value declined significantly. The potential rate of subsidy under this program was 6.48 percent *ad valorem* during the review period.

Compliance with Agreement

In the suspension agreement, Confecciones Amazonas Orinoco ("CAO") renounced all CAT benefits associated with exports of leather wearing apparel to the United States, and agreed not to accept substitute or equivalent benefits. On the basis of information provided by the Banco de la Republica (the Central Bank of Colombia) and the Colombian government, we have found that CAO did not apply for nor has it received benefits under the GAT program during the review period. The government has also certified that no substitute or equivalent benefits were available to CAO either directly or indirectly. The agreement can remain in force only so long as the shipments covered by the agreement account for at least 85 percent of exports of such merchandise to the United States. Our information indicates that CAO continued to account for at least 85 percent of U.S. imports during the period of review.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that CAO has complied with the terms of the suspension agreement for the period September 1, 1981 through June 30, 1982.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review, including the results of its analysis of any issues raised in such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: April 13, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 83-10500 Filed 4-19-83; 8:45 am]

BILLING CODE 3510-25-M

Perchlorethylene From France; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final results of administrative review of antidumping finding.

SUMMARY: On November 17, 1982, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on perchlorethylene from France. The review covers the only known exporter of this merchandise to the United States, Chloe Chimie, and the period May 1, 1981 through April 30, 1982. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

Interested parties were given an opportunity to submit oral or written comments on the preliminary results. Chloe Chimie submitted one comment. Based on our analysis of the comments, the final results of review are unchanged from those presented in the preliminary results of review.

EFFECTIVE DATE: April 19, 1983.

FOR FURTHER INFORMATION CONTACT: Arthur N. DuBois or Susan Crawford, Office Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-3601.

SUPPLEMENTARY INFORMATION:

Background

On May 18, 1979, the Treasury Department published in the **Federal Register** (44 FR 29045) a dumping finding with respect to perchlorethylene from France. On November 17, 1982, the Department of Commerce ("the Department") published in the **Federal Register** (47 FR 51779) the preliminary

results of its last administrative review of the finding. The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are shipments of perchlorethylene, including technical grade and purified grade perchlorethylene. Perchlorethylene is a clear water-white liquid at ordinary temperature with a sweet order and is completely capable of being mixed with most organic liquids. It is a chlorinated solvent used mainly for day cleaning of clothing, but is also used in other applications such as vapor degreasing of metals. Perchlorethylene is currently classifiable under item 429.3400 of the Tariff Schedules of the United States Annotated.

The review covers the one known exporter of French perchlorethylene to the United States, Chloe Chime, and the period May 1, 1981 through April 30, 1982. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

Analysis of Comments Received

Interested parties were given an opportunity to submit oral or written comments on our preliminary results. We received one comment from Chloe Chimie.

Comment: Chloe Chimie argues that the Department's policy of minimum time requirements for revocation, as described in the preliminary results of review, is arbitrary and capricious, wholly unexplained, and unsupported by law or fact. Chloe Chimie contends that, because it has not shipped for three years and seven months (from February 2, 1979, the date of suspension of liquidation through August 31, 1982, the date Chloe Chimie first requested revocation), it has met all statutory and regulatory conditions for revocation. Our refusal to consider its application for revocation at this time will create substantial prejudice to it because, under our existing practice, we are not required to conduct our next administrative review until May 1984.

Department's Position

The Commerce Regulations do not establish minimum time requirements for revocation in cases where a firm ceased exporting to the United States for a number of years. Section 353.54(b) of the Commerce Regulations provides only that a firm selling to the U.S. must have two years of sales at not less than fair value before it is eligible for revocation. It is within the Department's discretion to establish a similar eligibility requirement for firms with no exports.

We disagree that our refusal to consider Chloe Chimie's request at this time creates any prejudice to the firm. We will consider its request in our next administrative review. We expect to complete the next review in an expeditious manner.

Final Results of the Review

Based on our analysis of the comment received, the final results of our review are the same as those presented in the preliminary results of review.

As provided for § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties of 47.82 percent, based on the most recent margin calculated for the firm, shall be required on all shipments of French perchlorethylene entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

This deposit requirement shall remain in effect until publication of the final results of the next administrative review. The Department intends to begin immediately the next administrative review. The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information during the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Dated: April 13, 1983.

Gary N. Horlick

Deputy Assistant Secretary for Import Administration.

[FR Doc. 83-10602 Filed 4-19-83; 8:45 am]

BILLING CODE 3510-25-M

Pig Iron From Canada; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on pig iron from Canada. The review covers the six known exporters of this merchandise to the United States and the period July 1, 1981 through June 30, 1982. The review indicates the existence of a *de minimis* dumping margin in the period for one exporter.

As a result of the review, the Department has preliminarily determined to assess dumping duties for that firm equal to the calculated differences between United States price and foreign market value on each of its sales during the period of review. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: April 20, 1983.

FOR FURTHER INFORMATION CONTACT: Alfredo Montemayor or Susan Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On August 23, 1982, the Department of Commerce ("the Department") published in the Federal Register (47 FR 36683) the final results of its last administrative review of the antidumping finding on pig iron from Canada (36 FR 13780, July 24, 1971) and announced its intent to conduct the next administrative review by the end of July 1983. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of pig iron, currently classifiable under item numbers 606.1300 and 606.1500 of the Tariff Schedules of the United States Annotated.

The review covers the six known exporters of Canadian pig iron to the United States and the period July 1, 1981 through June 30, 1982. Two exporters did not export Canadian pig iron to the United States during the review period. The estimated antidumping duty cash deposit rates for these exporters will be the most recent information for each exporter.

United States Price

In calculating United States price the Department used purchase price as defined in section 772 of the Tariff Act. Purchase price was based on the ex-mill price or FOB price to the first unrelated purchaser in the United States. Where applicable, deductions were made for Canadian inland freight and freight equalization. Freight equalization is a price adjustment that allows a manufacturer to sell at the same price to customers located at different distances from that manufacturer. No other adjustments were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used home market price, as defined in section 773 of the Tariff Act, since sufficient quantities of such or similar merchandise were sold in the home market to be used as a basis of comparison. Home market price was based on the ex-mill price of FOB price to the first unrelated purchaser. Where applicable, deductions were made for Canadian inland freight and freight equalization. No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminary determine that the following margins exist for the period July 1, 1981 through June 30, 1982:

Manufacturer/Exporter	Margin (%)
Abex Industries, Limited	[1]0
Algoma Steel Corporation, Ltd	0
Dofasco Inc	0
Stelco Inc /Hickman Williams Canada, Ltd	0
Philip Brothers (Canada), Ltd	[1]7.30
Stelco Inc	0.007

[1] No shipments during the period.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made within 5 days after the date of publication.

The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries made with purchase dates during the time period involved. Individual differences between United States price and foreign market value may vary from the percentage stated above. The Department will issue appraisement instructions directly to the Customs Service.

Further, as provided for by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based upon the above margins shall be required on all shipments of Canadian pig iron from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. Since the margin for Stelco, Inc. is less that 0.5 percent and, therefore, *de minimis* for deposit purposes, the Department waives the requirement of a cash deposit for Stelco, Inc. on future entries. No cash deposit shall be required for any future shipment from a new exporter not covered in this or prior reviews, whose first shipments occurred after June 30, 1982 and who is unrelated to any reviewed firm. These deposit requirements and the waiver for Stelco shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

April 13, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

Portland Cement, Other Than White, Nonstaining Portland Cement From the Dominican Republic; Preliminary Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of preliminary results of administrative review of antidumping finding.

SUMMARY: The Department of Commerce has conducted an administrative review of the antidumping finding on portland cement, other than white, non-staining portland cement from the Dominican Republic. The review covers the only known exporter of this merchandise to the United States and the period June 1, 1981 through May 31, 1982.

As a result of the review, because the firm failed to respond to our questionnaire, the Department has preliminarily determined to assess dumping duties on the firm's sales during the period of review using the best information available. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: April 20, 1983.

FOR FURTHER INFORMATION CONTACT: Al Jemmott or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-5255/3601.

SUPPLEMENTARY INFORMATION:

Background

On August 2, 1982, the Department of Commerce ("the Department") published in the Federal Register (47 FR 33307-8) the final results of its last administrative review of the antidumping finding on portland cement, other than white, non-staining portland cement from the Dominican Republic (28 FR 4507-8, May 4, 1963) and announced its intent to conduct the next administrative review by the end of May 1983. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of portland cement, other than white, non-staining portland cement, currently classifiable under item numbers 511.1420 and 511.1440 of the Tariff Schedules of the United States Annotated.

The review covers the only known exporter of portland cement, other than white, non-staining portland cement from the Dominican Republic to the United States, Fabrica Dominicano de Cemento, C. por A., and the period June 1, 1981 through May 31, 1982. The exporter failed to respond to our questionnaire. For this non-responsive firm the Department will use the best information available for assessment and estimated antidumping duty cash deposit purposes. The best information available is the most recent rate for the firm.

Preliminary Results of the Review

As a result of our review, we preliminarily determine that a margin of 10.33 percent exists for the period June 1, 1981 through May 31, 1982.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. The Department will publish the final results of the administrative review including the results of its analysis of any such comments or hearing.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries made with purchase dates during the time period involved. The Department will issue appraisement instructions directly to the Customs Service.

Further, as provided for in § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties of 10.33 percent shall be required on all shipments of portland cement, other than white, non-staining portland cement from the Dominican Republic entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (9 CFR 353.53).

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

April 13, 1983.

BILLING CODE 3510-25-M

Applications For Duty-Free Entry of Scientific Instruments

The following are notices of the receipt of applications for duty-free entry of scientific instruments published pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

Interested persons may present their views with respect to the question of whether an instrument or apparatus or equivalent scientific value for the purposes for which the instrument is intended to be used is being manufactured in the United States. Comments must be filed in accordance with § 301.5(a) (3) and (4) of the regulations. They are to be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register**.

A copy of each application is on file in the Department of Commerce, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, Room 1523, 14th and Constitution Avenue NW., Washington, D. C. 20230.

Docket No. 83-162. Applicant: University of Southern California, University Park, Los Angeles, CA 90089-0482. Instrument: Circular Dichroism Spectropolarimeter, Model #J500C. Manufacturer: Japan Spectroscopic Co., Ltd., Japan. Intended use of instrument: The instrument is intended to be used for studies of primarily chemical and biochemical solutions. Experiments will be conducted to obtain circular dichroism spectra of various materials at various temperatures. The objectives of these experiments are: (i) to develop quantitative methods of assessing the structure of the molecules under study; (ii) to study subtle changes in the structure with temperature; and (iii) to compare predicted and experimental structures. Application received by Commissioner of Customs: March 30, 1983.

Docket No. 83-166. Applicant: State University of New York, Downstate Medical Center, 450 Clarkson Ave., Brooklyn, NY 11203. Instrument: Electron Microscope Model #EM 109 complete with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: The instrument is intended to be used for the following purposes:

(1) Investigation of human renal biopsy material,

(2) Study of human solid and lymphoid tumors,

(3) Study of human renal allografts,

(4) Investigation of the occurrence, evolution, and response to, therapy of lesions in renal biopsies from children with recently diagnosed diabetes,

(5) Examination of human bronchial biopsies from patients with bronchiectasis to identify ultrastructural abnormalities e.g., Immotile-Cilia Syndrome, and

(6) Examination of human biopsies of warts, condylomas, and dysplasias to identify etiologic agents, e.g., viruses.

In addition, the instrument will be used in the training of residents in anatomic pathology. Application received by Commissioner of Customs: March 30, 1983.

Docket No. 83-169. Applicant: President and Fellows of Harvard College, 9 Oxford Street, Gordon McKay Lab, Cambridge, MA 02138. Instrument: Electron Microscope, Model #EM 420T with Accessories. Manufacturer: N.V. Philips, Electronic Instruments, The Netherlands. Intended use of instrument: The instrument is intended to be used to obtain real space images and diffraction information of a broad range of materials—including semiconductors, superconductors, and metallo-organics, polymers, metallic alloys, ceramics and compositionally modulated compounds. In the process of obtaining the broad range of research objectives, the instrument will be used to train graduate students in chemistry, materials science, geology and applied physics—the techniques of electron optics, imaging and analysis. Instruction will be formally presented in the courses Applied Physics 210, Engineering Science 190, and Physics 247. Application received by Commissioner of Customs: March 31, 1983.

Docket No. 83-170. Applicant: University of Wisconsin—Madison, Chemistry Department, 1101 University Avenue, Madison, WI 53706. Instrument: Excimer Laser, Model TE-861T-4 with Standard Multigas Electrode Assembly and Model 727 Capacitor. Manufacturer: Lumonics, Canada. Intended use of instrument: The instrument will be used to excite six dye lasers that will excite nonlinear processes of atoms in flames and of low temperature organic samples with the purpose of performing a qualitative analysis of those samples. The instrument will be required by six students who are studying for their doctorates in a course labeled Chemistry 992—Research in Analytical Chemistry. Application received by Commissioner of Customs: April 5, 1983.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

Richard M. Seppa,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-25-M

National Bureau of Standards

National Voluntary Laboratory Accreditation Program; Quarterly Report (January 1-March 31, 1983)

AGENCY: National Bureau of Standards, Commerce.

ACTION: Publication of NVLAP quarterly report.

SUMMARY: The National Bureau of Standards (NBS) announces laboratory accreditation actions for the first quarter of 1983. In addition, the status of all NVLAP laboratory accreditation programs (LAPs) is summarized.

FOR FURTHER INFORMATION CONTACT: Mr. John W. Locke, Manager, Laboratory Accreditation, National Bureau of Standards, TECH B141, Washington, D.C. 20234, (301) 921-3431.

SUPPLEMENTARY INFORMATION: This report has been prepared in accordance with §§ 7a.17(a), 7b.17(a), and 7c.17(a) of the National Voluntary Laboratory Accreditation Program (NVLAP) Procedures (15 CFR Parts, 7a, 7b, and 7c). In addition, to fulfill NVLAP

requirements for monthly reporting of accreditation actions, notice of such actions taken under NVLAP for the month of March is included in this report.

NVLAP accreditation does not relieve the laboratories from the necessity of observing and complying with existing Federal, State, and local statutes, ordinances, and regulations that may be applicable to their operations, including consumer protection and antitrust laws.

Accreditation is granted for a period of one year. However, before expiration, accreditation may be terminated at the request of the laboratory or may be revoked due to violation of the accreditation criteria or other conditions of the laboratory's accreditation. The criteria are described in §§ 7a.19–7a.30 of the NVLAP Procedures (15 CFR Parts 7a, 7b, and 7c).

New Accreditations Granted

Six laboratories were newly accredited during March 1983. The name and address of each laboratory, the test methods and the accreditation renewal date for which accreditation was granted are listed below.

Gold Bond Building Products, A National Gypsum Division Research Center

[Attn: Joseph Volk, 1650 Military Road, Buffalo, NY 14217, Phone: (716) 873–9750. Accreditation renewal date: April 1, 1984]

NVLAP code	Designation	Short title
08/E21	AMA–1–II–67	Ceiling sound Transmission Test by Two-Room Method.

Jim Walter Research Corporation

[Attn: Alan P. Conroy, 10301 9th Street North, St. Petersburg, FL 33702, Phone: (813) 576–4171. Accreditation renewal date: January 1, 1984]

NVLAP code	Designation	Short title
08/P03	ANSI/ASTM C423–81	Sound Absorption and Sound Absorption Coefficients.

Manville Corporation R & N Center

[Attn: Robert L. Mason, P.O. Box 5108, Denver, Colorado 80217, Phone: (303) 978–5553. Accreditation renewal date: January 1, 1984]

NVLAP code	Designation	Short title
08/P02	ANSI/ASTM C384–77	Impedance and Absorption of Acoustical Materials.
08/P04	ASTM C522–80	Airflow Resistance of Acoustical Materials.

Owens-Corning Fiberglas Corp., Technical Center Laboratory

[Attn: Harland E. Fargo, P.O. Box 415, Route 16, Granville, OH 43023, Phone: (614) 587–7010. Accreditation renewal date: January 1, 1984]

NVLAP code	Designation	Short title
08/P01	ANSI/ASTM C367–78	Strength Properties, Prefabricated Architectural Acoustical Materials.
08/P02	ANSI/ASTM C384–77	Impedance and Absorption of Acoustical Materials.
08/P03	ANSI/ASTM C423–81	Sound Absorption and Sound Absorption Coefficients.
08/P04	ASTM C522–80	Airflow Resistance of Acoustical Materials.
08/P05	ASTM C523–68 (81)	Light Reflectance of Acoustical Materials.
08/P06	ANSI/ASTM E90–82	Airborne Sound Transmission Loss of Building Partitions.
08/P10	ANSI S1.31–80	Sound Power Levels, Broad-Band Noise Sources in Reverberation Rooms (100 to 10,000 Hz).
08/P13	ANSI S1.32–80	Sound Power Levels, Discrete-Frequency and Narrow-Band Noise Sources in Reverberation Rooms (100 to 10,000 Hz).
08/E21	AMA–1–II–67	Ceiling Sound Transmission Test by Two-Room Method.

Riverbank Acoustical Laboratory

[Attn: Owen J. Viergutz, P.O. Box 189, 1512 Batavia, Geneva, IL 60134, Phone: (312) 567–4703. Accreditation renewal date: April 1, 1984]

NVLAP code	Designation	Short title
08/P03	ANSI/ASTM C423–81	Sound Absorption and Sound Absorption Coefficients.
08/P05	ASTM C523–68 (81)	Light Reflectance of Acoustical Materials.
08/P06	ANSI/ASTM E90–82	Airborne Sound Transmission Loss of Building Partitions.
08/P07	ANSI/ASTM E492–82	Impact Sound Transmission Through Floor-Ceiling Assemblies.
08/P10	ANSI S1.31–80	Sound Power Levels, Broad-Band Noise Sources in Reverberation Rooms (100 to 10,000 Hz).
08/P17	ISO 3741–75	Sound Power Levels, Broad-Band Sources in Reverberation Rooms (direct method only) (100 to 10,000 Hz).
08/E01	ANSI B71.1–80 (para. 9 and 21).	Sound Level Tests; Power Lawn Mowers, Lawn and Garden Tractors and Lawn Tractors.

Virginia Concrete Laboratory

Attn: Richard A. Buckelew, Box 666, Springfield, VA 22150, Phone: (703) 354–6111. Accreditation renewal date: April 1, 1984]

NVLAP code	Designation	Short title
02/M01	ASTM C31	Making and Curing Concrete Test Specimens in the Field.
02/M03	ASTM C172	Sampling Fresh Concrete.
02/P01	ASTM C143	Slump of Portland Cement Concrete.

Virginia Concrete Laboratory—Continued

Attn: Richard A. Buckelew, Box 666, Springfield, VA 22150, Phone: (703) 354–6111. Accreditation renewal date: April 1, 1984]

NVLAP code	Designation	Short title
02/W01	ASTM C138	Unit Weight, Yield, and Air Content (Gravimetric) of Concrete.
02/A01	ASTM C231	Air Content of Freshly Mixed Concrete by the Pressure Method.
02/S01	ASTM C39	Compressive Strength of Cylindrical Concrete Specimens.
02/A02	ASTM C173	Air Content of Freshly Mixed Concrete by the Volumetric Method.

Jim Walter Research Corporation, Manville Corporation R&D Center, and Owens-Corning Fiberglas Corp. Technical Center are also accredited for certain test methods in the Insulation LAP.

Accreditation for STS Consultants, LTD, Raleigh, North Carolina expired on April 1, 1983, because it did not complete the evaluation process.

Accreditation for Additional Test Methods

Two previously accredited laboratories added a test method to their list of accredited test methods. The laboratories and the test methods are:

Jim Walter Research Corporation, St. Petersburg, FL previously accredited under the Thermal Insulation Materials LAP added ASTM E84, Surface burning characteristics; building materials, to their test method list.

Salem Carpet Laboratory, Chatsworth, GA previously accredited under the Carpet LAP added ASTM E648, Radiant Panel (Carpet) to their test method list.

Renewed Accreditations

The following laboratories were reaccredited during the first quarter of 1983 for one or more test methods available under NVLAP. Each laboratory received a certificate of accreditation and a corresponding list of test methods for which each is accredited. Anyone wishing to know the test methods for which each laboratory has been reaccredited should request the listing from the laboratory directly or from Mr. Locke at the address given above. Note that laboratories may change the test methods for which they are accredited from year to year, so the user should secure the current list of accredited test methods.

A & H/Flood Engineering, Hillside, IL
American Testing Laboratories, Inc., Lancaster, PA
Arizona Sand & Rock Company, Phoenix, AZ
Associated Testing Laboratories, Wayne, NJ

Atlantic Testing Laboratories, Inc., Cicero, NY
Engineering Testing Laboratory, City of Akron, Akron, OH
West Virginia Department of Highways, Materials Control, Soil and Testing, Charleston, WV

Insulation LAP Status

The LAP for thermal insulation materials has 63 test methods for which accreditation may be granted. 33 laboratories are currently accredited to perform one or more of these test methods.

Concrete LAP Status

The LAP for freshly mixed field concrete has two groups of test methods and one optional test method for which accreditation can be granted. 47 laboratories are currently accredited under the Concrete LAP.

Carpet LAP Status

The LAP for carpet has 12 test methods for which accreditation may be granted. 23 laboratories are currently accredited for one or more of these test methods.

Stove LAP Status

The LAP for solid fuel room heaters has 21 test methods in three categories for which accreditation may be granted. Six laboratories are currently accredited for one or more of these test methods.

Acoustics LAP Status

The LAP for acoustical testing services has 49 test methods for which accreditation may be granted. Accreditation certificates were issued to the first group of laboratories listed above under *New Accreditations Granted.* The evaluation of other laboratories which have applied for accreditation is proceeding. Plans for proficiency testing for ASTM Test Method C423 and E90 are being drafted.

LAPs under Development

Dosimetry LAP—Comments have been received from the industry overview committee on the draft LAP Handbook. Responses to the request for proposal (RFP) for procuring the services of a testing laboratory have been received and are being evaluated. An award is expected to be made during the second quarter of 1983. Fifty-one persons have indicated interest in serving as technical experts, and evaluation of these is presently in progress. We expect to announce the formal establishment of this LAP during the second quarter of 1983.

Electromagnetic Calibration Services LAP—A draft LAP Handbook is expected to be ready during the third quarter of 1983. Final details for the proficiency testing and the relationship of a Measurement Assurance Program are still being developed.

Dated: April 15, 1983.

Ernest Ambler,

Director, National Bureau of Standards.

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

National Marine Fisheries Service; Extension of Comment Period on Permit Application

On March 17, 1983, Notice was published in the **Federal Register** (48 FR 11310) that an application was received from Sea World, Inc., 1720 South Shores Road, Mission Bay, San Diego, California 92109, for a Scientific Research/ Public Display Permit under the Marine Mammal Protection Act of 1972 to take killer whales (*Orcinus orca*).

On April 5, 1983, Sea World, Inc. requested an extension of the comment period to allow more time for all interested parties to submit comments.

Notice is hereby given that the comment period for this application is extended until May 19, 1983. Written data or views should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Washington, D.C. 20235. Information concerning this notice or the application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.; Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731; and Regional Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802.

Dated; April 14, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83-10510 Filed 4-19-83; 8:45 am]

BILLING CODE 3510-22-M

National Marine Fisheries Service; Issuance of Permit

On February 18, 1983, Notice was published in the **Federal Register** (48 FR 7244), that an application had been filed with the National Marine Fisheries Services by Dr. Bruce R. Mate, Oregon State University, Newport, Oregon 97365 to take by acoustic harassment up to 35,000 pinnipeds and cetaceans over a five year period for scientific research.

Notice is hereby given that on April 12, 1983, and as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), the National Marine Fisheries Service issued a Permit to Dr. Bruce R. Mate, to take the marine mammal species requested subject to certain conditions set forth therein.

The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Northwest Region, 7600 Sand Point Way, N.E. BIN C15700, Seattle, Washington 98115; Regional Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1688, Juneau, Alaska 98802; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731..

Dated: April 12, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species & Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Receipt of Application for Permit; Dr. Daniel P. Costa

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name, Dr. Daniel P. Costa (P227F).

b. Address, Center for Coastal Marine Studies, University of California, Santa Cruz, California 95064.

2. Type of permit, Scientific Research.

3. Name and Number of Animals: Stellar sea lion (*Eumetopias jubatus*), 70.

4. Type of take: Forty (40) adult females will be paint marked; and thirty (30) suckling pups will be captured, held a short period for energy transfer studies, tagged, released and recaptured up to three (3) times.

5. Location of activity: Ano Nuevo, California.

6. Period of activity: 2 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. This holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.; and Regional Director, Southwest Region, National Marine Fisheries Service, 300 South Ferry Street, Terminal Island, California 90731.

Dated: April 12, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Receipt of Application for Permit; John M. Francis etc.

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mannal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name Mr. John M. Francis, Ms. Carolyn B. Heath, and Dr. Daniel Costa (P227E).

b. Address, Center for Coastal Marine Studies, University of California at Santa Cruz, Santa Cruz, California 95064.

2. Type of permit; Scientific Research.

3. Name and number of animals: California sea lions (*Zalophus californianus*); 260.

4. Type of take: Capture, tissue sample, radio tag and recapture and release 25 animals per year. Capture stomach lavage and release 60 over 4 years.

5. Location of activity: Channel Islands, California.

6. Period of activity: 4 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commeroe, Washington, D.C. 20235, within 30 days of the publication of this notice. BILLING CODE 3510-22-M

Issuance of Permit; Maine Department of Marine Resources

On March 11, 1983, Notice was published in the **Federal Register** (48 FR 10421), that an application has been filed with the National Marine Fisheries Service by the Maine Department of Marine Resources, State House Station 21, Augusta, Maine 04333, for a permit to take shortnose sturgeon (*Acipenser brevirostrum*) for scientific purposes.

Notice is hereby given that on April 12, 1983, and as authorized by the provisions of the Endangered Species Act of 1973 (16 U.S.C. 1531-1543), the National Marine Fisheries Service issued a Scientific Purposes Permit for the above taking to the Maine Department of Marine Resources subject to certain conditions set forth therein.

Issuance of this Permit, as required by the Endangered Species Act of 1973, is based on the finding that such Permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of the Permit; and (3) will be consistent with the purposes and policies set forth in Section 2 of the Act.

The Permit is available for review in the following offices: Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.; and Regional Director, Northeast Region, National Marine Fisheries Service, Federal Building, 14 Elm Street, Gloucester, Massachusetts 01930.

Dated: April 12, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Request for a Modification to a General Permit

On February 22, 1983 (48 FR 8113, February 25, 1983) a Category 1 General Permit was issued to the German Democratic Republic authorizing the taking of 4 cetaceans and 9 phocid seals during 1983 in the North Atlantic Ocean within the U.S. fishery conservation zone. .

The vessels operating under this general permit are also licensed to participate in the joint venture fishery for squid. As a result of this joint venture fishery, the vessel *Stubnitz* has reported a highter than anticipated incidental take under its quota. Although U.S. vessels are considered to be doing the taking of marine mammals, in transferring their cod ends to the GDR vessel, any marine mammals taken in the net land onboard the processing vessel, a taking under the MMPA. General Permit Holders have the option of including this incidental take under their quota.

For that reason, on March 14, 1983, the Joint Trawlers (North America) Limited, acting as agent for vessels for the German Democratic Republic, requested a take for an additional 20 small cetaceans during 1983 to account for their joint venture operations.

Interested parties may submit written comments on this request for permit modification. Comments must be received within 30 days of the date of this notice and should be addressed to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235.

Dated: April 12, 1983.

Richard B. Roe,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF Scientific Advisory Board; Meeting

April 8, 1983.

The USAF Scientific Advisory Board Logistics Cross-Matrix Panel will meet at Andrews Air Force Base, DC on May 25–27, 1983. The purpose of the meeting will be to review selected AFSC projects related to logistics and supportability of weapon systems. The meeting will convene at 8:30 a.m. and adjourn at 5:00 p.m. each day.

The meeting concerns matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at 202–697–8845.

Winnibel F. Holmes,

Air Force Federal Register Liaison Officer

BILLING CODE 3910-01-M

Department of the Army

Army Science Board; Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (92–463), announcement is made of the following Committee Meeting:

Name of Committee: Army Science Board (ASB).

Dates of Meeting: Thursday and Friday, 5–6 May 1983.

Times: 0830–1700 hours (closed) both days.

Place: 5 May 1983—Chemical Systems Laboratory, Aberdeen Proving Ground, MD

6 May 1983—Pentagon, Washington, DC

Agenda: The Army Science Board Ad Hoc Subgroup on the Decontamination Program will meet for classified briefings and discussions on decontamination materiel research, development, testing and acquisition programs, and chemical warfare threat. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5, U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C. App. 1, subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Helen M. Bowen, may be contacted for further information at (202) 695–3039 or 697–9703.

Helen M. Bowen,

Administrative Officer.

Public Information Collection Requirement Submitted to OMB for Review

The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Extension

Application for Department of the Army Permit.

The regulatory program concerns not only the integrity of navigation channels but also the quality of U.S. inland waters. Public completes the application to obtain permission to alter U.S. waters.

Individuals or firms making structural changes affecting the navigational waters of the U.S.; 16,000 responses; 80,000 hours.

Forward comments to Edward Springer, OMB Desk Officer, Room 3235, NEOB, Washington, D.C. 20503, and John V. Venderoth, DOD Clearance Officer, OASD(C), DIRMS, IRAD, Room 1A658, Pentagon, Washington, D.C. 20301, telephone (202) 697–1195.

A copy of the information collection proposal may be obtained from David O. Cochran, DAAG–OPI, Room 1D667, Pentagon, Washington, D.C. 20310, telephone (202) 695–5111.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3710–08–M

Department of the Army; Corps of Engineers

National Dredging Study

AGENCY: Water Resources Support Center, U.S. Army Corps of Engineers, Defense.

ACTION: Announcement of study.

SUMMARY: The U.S. Army Corps of Engineers has asked the National Research Council of the National Academy of Sciences, through its Marine Board, to undertake a study of national needs and capabilities for dredging of ports and harbors and of navigational channels.

DATES: Comments must be received by May 23, 1983.

ADDRESSES: Send written comments to Aurora Gallagher, Staff Officer, Study of National Dredging Issues, Marine Board, National Academy of Sciences, 2101 Constitution Avenue, NW., Washington, D.C. 20418.

SUPPLEMENTARY INFORMATION: A committee appointed by the National Research Council will undertake an interdisciplinary assessment of national needs for improvement and maintenance dredging in coastal ports and harbors, including their navigational channels. These needs will be evaluated as a function of (1) demands for shipborne trade, (2) likely trends in the world shipping fleet to carry that trade, (3) relationship of inland and marine transportation systems, (4) design criteria for safe and efficient navigation of the projected ship types and levels of traffic, (5) identification of opportunities for improvement dredging or development or alternatives such as deepwater ports, ships of high beam-to-draft ratios, and others, as well as critically needed maintenance dredging. The period covered by the study is the near-term and mid-term future (to about the year 2000).

In making its assessment, the committee will consider the likelihood and value of trade for various channel and port configurations, appropriateness of various institutional and financial arrangements, design criteria and disposal plans for dredge materials, mutual implications of port development and the physical and biological environment, and needed research and development.

Of particular interest of the Marine Board in the conduct of this study are the judgments of those with interests in the navigational channels and other facilities of the coastal ports created or maintained by dredging. Examples of areas to be addressed include (1) the extent of the current and future national dredging needs, (2) whether existing regulatory and institutional arrangements for dredging are adequate, and (3) the implications for the marine and inland environment of dredging operations and disposal of dredged materials.

Comments may be general or directed to specific concerns: general comments should be supported by facts or examples. Interested people are invited to participate in this study by submitting written data, views, suggestions, or other statements, or by offering to make their expertise available in the course of the study. Commentators should include their affiliation and reasons for comments.

Dated: April 13, 1983.

John O. Roach II,

DA Liaison Officer with The Federal Register.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

AGENCY: National Commission on Excellence in Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule of a full meeting of the National Commission on Excellence in Education. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act.

DATE: April 26, 1983 (Time 2:00 p.m.-3:00 p.m.).

LOCATION: Ramada Renaissance Hotel, 1143 New Hampshire Avenue, N.W., Washington, D.C., New Hampshire Ballroom.

FOR FURTHER INFORMATION CONTACT: Milton Goldberg, Executive Director, 1200 19th Street, N.W., Washington, D.C. 20208, (202) 254-7920 or Penny McDonald.

The National Commission on Excellence in Education is governed by the provisions of Part D of the General Education Provisions Act (Pub. L. 90-247 as amended; 20 U.S.C. 1233 *et seq.*) and the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. Appendix I) which set forth standards for the formation and use of advisory committees. The Commission is established to advise and make recommendations to the nation and to the Secretary of Education.

The meeting of the Commission is open to the public. The agenda will include:

- Completion of the Commission's work;
- Discussions of Plans for Dissemination and Follow-up of Commission's work.

The public is being given less than fifteen days notice because the work of the Commission has only recently progressed to the point at which this meeting is warranted.

Records are kept of all Commission proceedings and are available for public inspection at the office of the National Commission on Excellence in Education, 1200 19th Street, N.W., Room 222, from the hours of 8:00 a.m. to 5:00 p.m

Dated: April 18, 1983.

Fred Decker,

Deputy Assistant Secretary for Educational Research and Improvement.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Hideca Petroleum Corp.; Proposed Remedial Order

Pursuant to 10 CFR 205.192(c), the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby gives Notice of an Amended Proposed Remedial Order which was issued to Hideca Petroleum Corp. (Hideca), One Riverway, Suite 2480, Houston, Texas 77056. This Amended Proposed Remedial Order alleges violations in the pricing of crude oil of 10 CFR 212.186, 212.183, 210.62(c), and 205.202 during the period October 1978 through November 1979. The Amended Proposed Remedial Order also alleges violations in the pricing of crude oil of 10 CFR 212.183 during the period December 1979 through December 1980. The principal amount of the alleged violations for the period October 1978 through December 1980 is $14,358,652.48.

A copy of the Amended Proposed Remedial Order, with confidential information deleted, may be obtained from: U.S. Department of Energy, Economic Regulatory Administration, ATTN: Sandra K. Webb, Director, One Allen Center, Suite 610, 500 Dallas Street, Houston, Texas 77002.

Within fifteen (15) days of publication of the Notice any aggrieved person may file a Notice of Objection with the Office of Hearings and Appeals, U.S. Department of Energy, Room 3304, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C 20461, in accordance with 10 CFR 205.193.

Issued in Houston, Texas, on the 8th day of April, 1983.

Sandra K. Webb,

Director, Houston Office, Economic Regulatory Administration.

Magnetic Fusion Advisory Committee; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Magnetic Fusion Advisory Committee.

Date and Time: Tuesday, May 3, 1983—9:00 a.m. to 5:00 p.m. Wednesday, May 4, 1983—9:00 a.m. to 5:00 p.m.

Place: Princeton Plasma Physics Laboratory, Princeton University, M. A. Gottlieb Auditorium, Princeton, NJ 08540.

Contact: Lenore R. Ledman, Office of Fusion Energy, ER-50.2, U.S. Department of Energy, Mail Stop—G-226, Washington, DC 20545, Telephone: 301-353-3598.

Purpose of the Committee: To provide advice to the Secretary of Energy on the Department's Magnetic Fusion Energy Program, including periodic reviews of elements of the program and recommendations of changes based on scientific and technological advances or other factors; advice on long-range plans, priorities, and strategies to demonstrate the scientific and engineering feasibility of fusion; advice on recommended appropriate levels of funding to develop those strategies and to help maintain appropriate balance between competing elements of the program.

Tentative Agenda: Briefings and discussions of:

- Review of Charges to MFAC Panels Reviewing MFTF-B Upgrade Options (Panel #4) and the Long-Range Role of Universities in the Fusion Program (Panel #5)—Davidson
- Interim Report by Panel #5—Gross.
- Panel #4 Findings and Recommendations—Forsen, Gilleland and Morgan.
- Discussion.
- Formulation of MFAC Findings and Recommendations.
- New Charge Areas—Davidson.
- Public comment (10 minute rule).

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Lenore R. Ledman at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes: Minutes of the meeting will be available for public review and copying at the Freedom of Information Public Reading Room, 1E-190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC on April 15, 1983.

Howard H. Raiken,

Deputy Advisory Committee Management Officer.

[Docket Nos. RP77-62-018, RP80-97-013, RP81-54-002, RP82-10-003, RP82-12-004, RP81-80-000 (Phase I)]

Tennessee Gas Pipeline Co., a Division of Tenneco, Inc., and Consolidated Gas Supply Corp., Oral Argument

Issued: April 15, 1983.

The captioned proceedings involve certain rate filing by Tennessee Gas Pipeline Company (Tennessee) and Consolidated Gas Supply Corporation (Consolidated) which were permitted to become effective subject to refund and are pending before the Commission for final decision. In both proceedings the return to be allowed on invested capital is a contested issue. In *Tennessee* the parties agree on the capital structure but contest the return on equity while in *Consolidated* capital structure and return on debt and equity are at issue.

The parties in both proceedings have requested oral argument before the Commission on the rate of return issue. The Chairman has determined that oral argument limited to this issue, including the capital structure to be used in *Consolidated*, may be beneficial in its resolution of these cases.

Notice is hereby given that an oral argument will be heard in these proceedings in Hearing Room A of the Commission's offices at 825 North Capitol Street, NE., Washington, D.C., on Friday May 13, 1983, commencing at 9:00 a.m. Argument will be scheduled for approximately one and one-half hours.

By April 25, 1983, the parties desiring to participate shall submit a statement indicating the amount of time requested. Because of the number of parties involved and the time available for oral argument, parties with similar interests are urged to arrange common representation for purposes of the oral presentations. Final determination of the division of time and order of presentation will be set out in a subsequent notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5238-001]

Vidler Tunnel Water Co., Surrender of Preliminary Permit

April 15, 1983.

Take notice that Vidler Tunnel Water Company, Permittee for the proposed Snake River Hydro Power Project No. 5238, has requested that its preliminary permit be terminated. The permit was issued on March 17, 1982, and would have expired on August 31, 1983. The project would have been located on the Snake River in Summit County, Colorado.

Vidler Tunnel Water Company has determined that the lack of flow at the site and the difficulty of construction and operation of this project make the economics very poor. It was concluded that this project would be economically unfeasible at this time.

The Permittee filed its request on March 17, 1983. The surrender of the preliminary permit for Project No. 5238

is deemed accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

Pacific Gas & Electric Co., et al. Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1. a. Type of Application: Revised Exhibit S.

b. Project No: 96-003.

c. Date Filed: December 13, 1982.

d. Applicant: Pacific Gas and Electric Company.

e. Name of Project: Kerckhoff.

f. Location: On San Joaquine River in Fresno and Madera Counties, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. W.M. Gallavan, Vice President, Rates and Valuation, Pacific Gas and Electric Company, 77 Beale Street, Room 1087A, San Francisco, California 94106.

i. Comment Date: June 2, 1983.

j. Description: PG&E filed a revised Exhibit S on December 13, 1982, pursuant to Article 44 of the license for the Kerckhoff Projects, FERC Project No. 96. The revised Exhibit S includes fish, and wildlife mitigation plans, agreements with the California Department of Fish and Game, costs of implementing the plans, and a listing of dates of consultation with the appropriate state and Federal agencies.

k. This notice also consists of the following standard paragraphs: B, C and D2.

2a. Type of Application: Amendment of License (Revised Exhibit).

b. Project No: 2157-012.

c. Date Filed: February 9, 1983.

d. Applicant: Public Utility District No. 1 of Snohomish County and the City of Everett, Washington.

e. Name of Project: Sultan River.

f. Location: On Sultan River in Snohomish County, Washington.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. W.G. Hulbert, Jr., Manager, Public Utility District No. 1 of Sonohomish County, P.O. Box 1107, Everett, Washington, 98206.

i. Comment Date: June 1, 1983.

j. Description: The revised Exhibit S was filed by the Licensee pursuant to Article 53 of the Commission Order issued October 16, 1981, authorizing Stage II of the Sultan River Project, FERC No. 2157. The Exhibit S was prepared in consultation with the State and Federal fish and wildlife agencies and the Tulalip Tribes, and contains measures to mitigate the impacts of the Sultan River Project on aquatic and terrestrial resources. These measures include: changes in project design, erosion control and water quality control plans during construction, instream flow releases, fish stocking, long-term preservation and enhancement of terrestrial habitat, and additional studies to further refine specific mitigative measures. Many of the measures proposed to protect and enhance aquatic resources were contained in a settlement agreement approved by the Commission on February 3, 1983. The Licensee's proposed mitigation for terrestrial resources has not yet been agreed to by the resource agencies, and remains a point of contention.

k. This notice also consists of the following standard paragraphs: B, C and D2.

3a. Type of Application: Application for License (under 5 MW).

b. Project No: 3450-001.

c. Date Filed: February 22, 1983.

d. Applicant: Beaver Falls Municipal Authority.

e. Name of Project: Eastvale Water Power Project.

f. Location: Beaver River in Beaver County, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Charles M. Andrews, Beaver Falls Municipal Authority, 1425 Eighth Avenue, P.O. Box 400, Beaver Falls, Pennsylvania 15010.

i. Comment Date: June 13, 1983.

j. Description of Project: The proposed project would be run-of-the-river and would consist of: (1) an existing dam, approximately 490 feet long and 12.4 feet high, constructed of rock-filled timber cribs and concrete with an overflow crest elevation at 730.7 feet m.s.l.; (2) a reservoir having minimal pondage; (3) an existing intake structure, at the left river bank, containing 7 gates preceded by a fish deflector; (4) an existing headrace channel, 75 feet long and 45 feet wide, leading to (5) separate gated channels integral with an old powerhouse to be equipped with 4 new turbine-generator units rated at 110 kW each for a total rated capacity of 440 kW; (6) a tailrace returning flow to Beaver River approximately 90 feet downstream of the dam; (7) a new transmission line, approximately 100 feet long; and (8) appurtenant facilities. The applicant estimates that the average annual energy output would be 3,220,000 kWh. Project energy would be sold to the Duquesne Light Company. Project facilities are owned by the Applicant.

k. This notice also consists of the following standard paragraphs: A2, B, C and D.

4a. Type of Application: Application for License (5 MW or Less).

b. Project No: 3459-001.

c. Date Filed: February 28, 1983.

d. Applicant: Cascade Water Power Development Corporation.

e. Name of Project: Mason Dam Hydroelectric.

f. Location: On the Powder River in Baker County, Oregon at the U.S. Bureau of Reclamation's Mason Dam.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: George L. Smith, Vice President, National Hydro Corporation, P.O. Box Box 1016, Idaho Falls, Idaho 83402 with a copy to: Brian French, Manager of Engineering, National Hydro Corporation, 77 Franklin Street, Boston, MA 02110.

i. Comment Date: June 20, 1983.

j. Description of Project: The proposed project would consist of: (1) a 48-inch-diameter, 100-foot-long penstock connected to the existing 56-inch-diameter outlet pipe 35 feet upstream of the existing valve house; (2) a powerhouse containing a single 2.6-MW generating unit capable of an average annual generation of 7,000 MWh; (3) a substation adjacent to the powerhouse; and (4) a 280-foot-long, 24.9-kV transmission line. Applicant estimates that construction of the project will cost $2,280,000.

k. Purpose of Project: Project power would be sold.

l. This notice also consists of the following standard paragraphs: A2, B, C, and D1.

5a. Type of Application: Application for License (under 5 MW).

b. Project No: 3603-001.

c. Date Filed: February 25, 1983.

d. Applicant: The City of Aspen and Pitkin County, Colorado.

e. Name of Project: Ruedi.

f. Location: On the Fryingpan River in Pitkin and Eagle Counties, Colorado.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Curtis Steward, County Manager, Pitkin County, 506 E. Main, Aspen, Colorado 81611 and Wayne Chapman, City Manager, City of Aspen, 130 South Galena, Aspen, Colorado 81611.

i. Comment Date: June 20, 1983.

j. Description of Project: The proposed project would utilize the U.S. Bureau of Reclamation's Ruedi Dam and would

consist of: (1) a 54-inch-diameter penstock about 130 feet long connected to the existing outlet structure; (2) a powerhouse with two turbine-generator units with a total installed capacity of 3,200 kW and provisions for future installation of a third unit; (3) a tailrace; (4) a transmission line; and (5) other appurtenances. Applicants estimate an average annual generation of 20,000,000 kWh. This application was filed during the term of Applicants' preliminary permit for Project No. 3603.

k. Purpose of Project: Project energy would be sold to the Public Service Company of Colorado or distributed to local customers.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

6 a. Type of Application: License (under 5 MW).

b. Project No.: P–4037–001.

c. Date Filed: January 31, 1983.

d. Applicant: Richard Charles Young and George Robert Young.

e. Name of Project: Montgomery Creek Project.

f. Location: On Montgomery Creek, near Taylorsville, in Plumas County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Richard C. Young, P.O. Box 32, Taylorsville, California 95983.

i. Comment Date: June 20, 1983.

j. Description of Project: The proposed run-of-the-river project would consist of: (1) a 20,000 gallon infiltration galley diversion system on Montgomery Creek; (2) a 30-inch-diameter, 4,970-foot-long, steel penstock; (3) a powerhouse containing two generating units with a total installed capacity of 1,100 kW and an average annual generation of 4.0 GWh; (4) a concrete tailrace returning flows to Indian Creek; and (5) appurtenant facilities. Project power would be sold to Pacific Gas and Electric Company. The project would affect 12.0 acres of Plumas National Forest Lands.

k. This notice also consists of the following standard paragraphs: A2, B, C and D1.

7 a. Type of Application: Exemption (5MW).

b. Project No.: 4293–001.

c. Date Filed: March 17, 1983.

d. Applicant: Christopher M. Anthony.

e. Name of Project: Waverly Avenue.

f. Location: Sebasticook River, Town of Pittsfield, Somerset County, Maine.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980, Pub. L. 96–294, 94 Stat. 611 (16 U.S.C. 2705 and 2708 as amended).

h. Contact Person: Christopher M. Anthony, 46 Somerset Avenue, Pittsfield, Maine 04967.

i. Comment Date: May 31, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing 11-foot-high, 220-foot-long, concrete encased, timber crib dam; (2) an existing 40-foot-long gate section at the west dam abutment; (3) a 560 acre reservoir with a storage capacity of 560 acre-feet at elevation 213.0 feet M.S.L.; (4) an existing forebay/intake structure; (5) a new powerhouse located at the south forebay wall containing turbine-generators with a total rated capacity of 700 kW; (6) a 200-foot-long transmission line; and (7) appurtenant facilities. The project would generate up to 2,500,000 kWh annually. The dam is owned by the Town of Pittsfield.

K. This notice also consists of the following standard paragraphs: A1, B, C and D3a.

8 a. Type of Application: License (Minor).

b. Project No.: 4539–001.

c. Date Filed: Feburary 28, 1983.

d. Applicant: Yakima-Tieton Irrigation District.

e. Name of Project: Clear Lake Hydroelectric.

f. Location: On North Fork Tieton River partially within the Wenatchee National Forest in Yakima County, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Warren E. Dickman, Manager, Yakima-Tieton Irrigation District, Route 6, Box 193, Yakima, Washington 98908

i. Comment Date: June 17, 1983.

j. Description of Project: The proposed project would entail tapping into the southern gravity abutment of the existing United States Bureau of Reclamation's Clear Lake Dam, with 78-inch-diameter steel penstock. The project would consist of: (1) a powerhouse at the foot of the dam, containing a single generating unit with a rated capacity of 1,230 kW; (2) a 900-foot-long, 7.2-kV transmission line; and (3) an existing 4,500-foot-long transmission line to be upgraded. The estimated 3.9 million kWh of annual project energy would be partially used by the Applicant with the remainder sold to a local utility or the Bonneville Power Adminstration.

k. This notice also consists of the following standard paragraphs: A2, B, C and D1.

9a. Type of Application: Exemption from Licensing.

b. Project No: 4739–001.

c. Date Filed: February 28, 1983.

d. Applicant: Mac Hydro-Power Company, Inc.

e. Name of Project: East Fork Stuart Fork Creek Hydroelectric.

f. Location: On East Fork Stuart Fort Creek, within the Shasta-Trinity National Forest, near Weaverville, Trinity County, California.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980, 16 U.S.C. 2705 and 2708 *as amended.*

h. Contact Person: Mr. H. L. "Pete" Childers, Mac Hydro-Power Company, Inc., 9200 Shanley Lane, Auburn, California 95603.

i. Comment Date: June 20, 1983.

j. Description of Project: The proposed project would consist of: (1) a 4-foot-high, 30-foot-long concrete diversion structure at elevation 3,850 feet; (2) a 4,000-foot-long, 30-inch-diameter low pressure conduit; (3) a 1,200-foot-long, 30-inch-diameter penstock; (4) a powerhouse containing one generating unit with an installed capacity of 910 MW; and (5) a 2.5-mile-long, 12.5kV transmission line from the powerhouse to an existing PG&E transmission line. The Applicant estimates the average annual energy production at 6.5 million kWh.

k. Purpose of Project: Project power would be sold to Pacific Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A1, B, C, and D3a.

10a. Type of Application: License Minor.

b. Project No: 4948–002.

c. Date Filed: March 10, 1983.

d. Applicant: Energeology, Inc. and Lower Powder River Irrigation District.

e. Name of Project: Thief Valley Dam.

f. Location: At Thief Valley Dam and Reservoir, on Powder River in Union and Baker Counties, Oregon, under the jurisdiction of the Bureau of Reclamation.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: James L. Cannon, Energeology, Inc., 7525 W. Deschutes Place, Suite 2–D, Kennewick, Washington, 99336.

i. Comment Date: June 20, 1983.

j. Description of Project: The proposed project would consist of: (1) an intake structure and a 170-foot-long, 54-inch-diameter steel penstock to be installed in the existing 73-foot-high concrete Thief Valley Dam owned by the Bureau of Reclamation; (2) a powerhouse containing 5 generating units, one rated at 112 kW and four rated at 150 kW each; (3) a tailrace; and (4) a 10.616-mile-long transmission line. The average

annual energy generation is estimated to be 2.9 million kWh at a head of 40 feet.

k. Purpose of Project: Energy will be sold to C.P. National, a local utility.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

11a. Type of Application: Exemption of Conduit Hydroelectric Facility.

b. Project No: 5163–000.

c. Date Filed: July 31, 1981.

d. Applicant: California Department of Water Resources.

e. Name of Project: Sutter-Butte Project.

f. Location: On the Sutter-Butte Canal in Butte County, California.

g. Filed Pursuant to: Section 30 of the Federal Power Act, 16 U.S.C. 823(a).

h. Contact Person: Mr. Ronald B. Robie, Director, Department of Water Resources, P.O. Box 388, Sacramento, California 95802.

i. Comment Date: June 1, 1983.

j. Competing Application: Project No. 4490–001. Date Filed: March 19, 1982.

k. Description of Project: The proposed project would consist of: (1) a transition structure connecting to the existing outlet structure; (2) two 102-inch-diameter penstocks; (3) a powerhouse containing two 1,200-kW generating units; and (4) a 1-mile-long transmission line. Applicant estimates the project would have an average annual energy production of 9,650 MWh.

l. Competing Applications: Any qualified license, conduit exemption, or small hydroelectric exemption applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, either a competing license, conduit exemption, or small hydroelectric exemption application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing license, conduit exemption, or small hydroelectric exemption application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A notice of intent must conform with 18 CFR 4.33 (b) and (c) and 18 CFR 4.104(d).

m. Filing and Service of Responsive Documents: Any filings must bear in all capital letters the title "NOTICE OF INTENT TO FILE COMPETING APPLICATION" or "COMPETING APPLICATION" as applicable, and the Project Number of the particular application to which the filing is in response. Either of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Project Management Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent or competing application must also be served upon each representative of the Applicant specified in the particular application.

12a. Type of Application: Major License (Over 5 MW)—Existing Dam.

b. Project No: 5922–001.

c. Date Filed: July 29, 1982.

d. Applicant: Cordua Irrigation District.

e. Name of Project: DaGuerre Point Water Power Project.

f. Location: On Yuba River in Yuba County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Charles Mathews, Director, Cordua Irrigation District, Box 110, Marysville, California 95901.

i. Comment Date: June 17, 1983.

j. Description of Project: The proposed project would consist of: (1) a gated intake structure at the existing Corps of Engineers' 30-foot-high concrete DaGuerre Point Dam; (2) a 12-foot-diameter, 150-foot-long penstock; (3) a powerhouse containing two generating units with a total installed capacity of 6.48 MW and an estimated average annual energy production of 29.34 million kWh; and (4) appurtenant facilities. The project would be located on lands administered by the U.S. Corps of Engineers.

k. Purpose of Project: Power would be sold to a local utility.

l. This notice also consists of the following standard paragraphs: A2, B, C, D2.

13a. Type of Application: Exemption (5 MW or Less).

b. Project No: 6390–001.

c. Date Filed: December 8, 1982.

d. Applicant: Lawrence J. McMurtrey.

e. Name of Project: Sloan Creek.

f. Location: Sloan Creek within Snoqualmie-Mt. Baker National Forest in Snohomish County, Washington.

g. Filed Pursuant to: Energy Security Act of 1980, Section 408 (16 U.S.C. 2705 and 2708 as amended).

h. Contact Person: Lawrence J. McMurtrey, 12122—196th, N.E., Redmond, Washington 98052.

i. Comment Date: June 2, 1983.

j. Competing Application: Project No. 6531–000. Date Filed: July 16, 1982. Notice Issued: October 19, 1982.

k. Description of Project: The proposed project would consist of: (1) two 2-foot-high diversion structures on Sloan Creek; (2) a 36-inch, and 18-inch-diameter, 12,000-foot and 4,000-foot-long penstock respectively; (3) a powerhouse containing a generating unit with a rated capacity of 3.62 MW; and (4) appurtenant facilities. The Applicant estimates a 19.04 GWh average annual energy production.

l. Purpose of Project: Power would be sold to local utilities.

m. This notice also consists of the following standard paragraphs: A1, B, C and D3a.

14a. Type of Application: Major License (Under 5 MW).

b. Project No: 6515–001.

c. Date Filed: September 10, 1982, and revised on January 24, 1983.

d. Applicant: SNC Hydro Inc. and Adirondack Hydro Inc.

e. Name of Project: Boyd Dam.

f. Location: on East Branch Fish Creek, Town of Lewis, Lewis County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Christopher McGill, P.O. Box 145, Wilmington, New York 12997.

i. Comment Date: May 20, 1983.

j. Competing Application: Project No. 6484. Date Filed: 7/6/82.

k. Description of Project: The proposed project would utilize existing facilities owned, operated, and maintained by the City of Rome, New York, consisting of: (1) the 525-foot-long, 85-foot-high, Boyd Dam having a 440-foot-long concrete-gravity section with a 150-foot-long ogee-type spillway and an 85-foot-long earthfill section; (2) the separate 7-foot-high, 310-foot-long, earth dike located along the reservoir left (east) bank; (3) the Tagasoke Reservoir having a surface area of 210 acres and a storage capacity of 4,300 acre-feet at spillway crest elevation 1,280 feet M.S.L.; and (4) a gated intake structure and two 36-inch outlet conduits.

Applicant proposes to: (1) repair the dam; (2) modify the dike; (3) modify the intake structure; (4) install a 7-foot-diameter, 300-foot-long penstock; (5) construct a powerhouse on the right bank containing a generating unit having a rated capacity of 1,800 kW operated at a 65-foot net head and a flow of 412 cfs; (6) excavate a tailrace; (7) install a 120-foot-long buried 4.8-kV power cable; (8) install a 1,600-foot-long, 4.8-kV transmission line; (9) convert a 4.2-mile-long single-phase transmission line to a

three-phase 4.8-kV transmission line; and (10) construct a 1,600-foot-long access road.

Applicant estimates that the proposed project would cost $4,000,000.

l. Purpose of Project: Project energy would be sold to Niagara Mohawk Power Corporation. Applicant estimates that the average annual energy output would be 7.3 million kWh.

m. This notice also consists of the following standard paragraphs: A2, B, C and D1.

15 a. Type of Application: License (under 5 MW).

b. Project No: 6779–000.

c. Date Filed: October 19, 1982.

d. Applicant: Enviro Hydro, Incorporated.

e. Name of Project: Soda Creek Water Power.

f. Location: on Soda Creek near the town of Belden within the Plumas and Lassen National Forests in Plumas County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. H. L. "Pete" Childers, President, Enviro Hydro, Inc., 9200 Shanley Lane, Auburn, California 95603.

i. Comment Date: June 20, 1983.

j. Description of Project: The proposed project would consist of: (1) a 3-foot-high diversion structure with crest elevation of 4,400 feet (mean sea level); (2) a 10,000-foot-long, 36-inch-diameter low pressure pipe/penstock combination; (3) a powerhouse containing a single generating unit with a rated capacity of 1,700 kW; (4) a 3-mile-long, 12-kV transmission line to connect the powerhouse to an existing Pacific Gas and Electric Company's (PG&E) line near the Butte Valley Reservoir Road; and (5) appurtenant facilities.

k. Purpose of Project: The estimated 6 million kWh project energy would be sold to PG&E.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

16 a. Type of Application: License (5 MW or Less).

b. Project No: 6781–000.

c. Date Filed: October 19, 1982.

d. Applicant: Enviro Hydro, Incorporated.

e. Name of Project: Grizzly Creek Water Power.

f. Location: on Grizzly Creek near the town of Belden within the Plumas and Lassen National Forests in Plumas County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Mr. H. L. "Pete" Childers, President, Enviro Hydro, Inc., 9200 Shanley Lane, Auburn, California 95603.

i. Comment Date: June 20, 1983.

j. Description of Project: The proposed project would consist of: (1) a 3-foot-high concrete diversion structure with crest elevation of 5,360 feet (mean sea level); (2) a 20,000-foot-long, 36-inch-diameter low pressure pipe/penstock combination; (3) a powerhouse containing a single generating unit with a rated capacity of 3,500 kW; (4) a 3-mile-long, 12-kV transmission line connecting the powerhouse to an existing Pacific Gas and Electric Company's (PG&E) line southeast of the powerhouse; and (5) appurtenant facilities.

k. Purpose of Project: The estimated 11.9 million kWh project energy would be sold to PG&E.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

17 a. Type of Application: License (5 MW or Less).

b. Project No: 6782–000.

c. Date Filed: October 20, 1982.

d. Applicant: Enviro Hydro, Incorporated.

e. Name of Project: Fall River Water Power.

f. Location: on Fall River near the town of Feather Falls within the Plumas National Forest in Butte County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. H. L. "Pete" Childers, President, Enviro Hydro, Inc., 9200 Shanley Lane, Auburn, California 95603.

i. Comment Date: June 23, 1983.

j. Description of Project: The proposed project would consist of: (1) a 3-foot-high concrete diversion structure with crest elevation of 3,000 feet (mean sea level); (2) a 5,300-foot-long, 48-inch-diameter low pressure pipe/penstock combination; (3) a powerhouse containing a single generating unit with a rated capacity of 4,900 kW; (4) a 4.5-mile-long, 12-kV transmission line connecting the powerhouse with an existing Pacific Gas and Electric Company's (PG&E) line near Feather Falls; and (5) appurtenant facilities.

k. Purpose of Project: The estimated 17.5 million kWh project energy would be sold to PG&E.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

18a. Type of Application: Exemption Under 5 MW.

b. Project No.: 6791–000.

c. Date Filed: October 25, 1982.

d. Applicant: Stony Creek Hydro Company.

e. Name of Project: Stony Creek Project.

f. Location: On Stony Creek, near Paradise, in Butte County, California.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980, 16 U.S.C. 2705 and 2708 *as amended.*

h. Contact Person: Mr. James E. Helmich, California Hydro Systems, Inc., 1330—21st Street, Suite 105, Sacramento, California 95814.

i. Comment Date: May 31, 1983.

j. Description of Project: The proposed run-of-the-river project would consist of: (1) a 32-inch-high, 30-foot-long, concrete diversion structure; (2) a 5,964-foot-long, 16-inch-diameter steel flume; (3) a 3,633-foot-long, 16-inch-diameter steel penstock; (4) a powerhouse containing two generating units with a total installed capacity of 1,350 W and producing an estimated annual generation of 8.8 GWh; (5) a 3-foot-wide, 30-foot-long concrete tailrace; and (6) appurtenant facilities. Project power would be sold to Pacific Gas and Electric Company. The project would affect Plumas National Forest lands.

An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

k. This notice also consists of the following standard paragraphs: A1, B, C and D3a.

19a. Type of Application: Exemption Under 5 MW.

b. Project No.: 6793–000.

c. Date Filed: October 25, 1982.

d. Applicant: Stony Creek Hydro Company.

e. Name of Project: Dogwood Creek Project.

f. Location: On Dogwood Creek, near Paradise, in Butte County, California.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980, 16 U.S.C. 2705 and 2708 *as amended.*

h. Contact Person: Mr. James E., Helmich, California Hydro Systems, Inc., 1330—21st Street, Suite 105, Sacramento, California 95814.

i. Comment Date: May 27, 1983.

j. Description of Project: The proposed run-of-the-river project would consist of: (1) a 4-foot-high, 40-foot-long, concrete diversion structure; (2) a 2,640-foot-long, 24-inch-diameter steel flume; (3) a 1,955-foot-long, 24-inch-diameter steel penstock; (4) a powerhouse containing two generating units with a total installed capacity of 2,025 kW and producing an estimated annual generation of 7.0 GWh; (5) a 3-foot-wide,

30-foot-long concrete tailrace; and (6) appurtenant facilities. Project power would be sold to Pacific Gas and Electric Company. The project would affect Plumas National Forest lands.

An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

k. This notice also consists of the following standard paragraphs: A1, B, C and D3a.

20a. Type of Application: Small Conduit Exemption.

b. Project No.: 6812–000.

c. Date Filed: November 1, 1982.

d. Applicant: Sheep Creek Irrigation Company.

e. Name of Project: Upper Antelope.

f. Location: On Sheep Creek, Daggett County, Utah.

g. Filed Pursuant to: Section 30 of the Federal Power Act [16 U.S.C. 823(a)].

h. Contact Person: Mr. Albert H. Neff, Executive Secretary, Sheep Creek Irrigation Company, Manila, Utah 84046.

i. Comment Date: May 31, 1983.

j. Description of Project: The proposed project would consist of: (1) a new canal headworks structure, approximately 15 feet high and 17 feet long; (2) a new trapezoidal canal section, 15,030 feet long and 12 feet wide at the bottom; (3) three new low head pipeline sections, totaling 3,080 feet long and 60 inches in diameter; (4) a new 1,480-foot-long, 48-inch diameter steel penstock; (5) a new 23 by 63-foot powerhouse containing three turbine/generator units with a total capacity of 1550 kW at an average head of 153 feet; (6) either a 0.5-mile long, 14.4-kV or a 1.0-mile long, 69-kV transmission line; and (7) appurtenant facilities.

k. Purpose of Project: The average annual generation of 3.35 million kWh will be sold to the Bridger Valley Electric Association.

l. This notice also consists of the following standard paragraphs: A3, B, C and D3b.

21 a. Type of Application: Small Conduit Exemption.

b. Project No. 6813–000.

c. Date Filed: November 1, 1982.

d. Applicant: Sheep Creek Irrigation Company.

e. Name of Project: South Valley.

f. Location: on Sheep Creek, Daggett County, Utah.

g. Filed Pursuant to: Section 30 of the Federal Power Act [16 U.S.C. 823(a)].

h. Contact Person: Mr. Albert H. Neff, Executive Secretary, Sheep Creek Irrigation Company, Manila, Utah 84046.

i. Comment Date: May 31, 1983.

j. Description of Project: The proposed project would consist of: (1) a new intake structure, measuring approximately 10 feet wide and 10 feet high; (2) a new earth-lined trapezoidal canal 1500 feet long and 8 feet wide at the bottom; (3) a steel or RPM penstock, 6,075 feet long and 48 inches in diameter (4) a new powerhouse 23 by 64 feet in plan and housing three turbine-generator units with a total capacity of 1780 kW at an average head of 273 feet; (5) either a 0.5-mile, 14.41-kv or a slightly longer 69-kV transmission line; and (6) appurtenant facilities.

k. Purpose of Project: The average annual generation of 3.98 million kWh will be sold to the Bridger Valley Electric Association.

l. This notice also consists of the following standard paragraphs: A3, B, C and D3b.

22a. Type of Application: Small Conduit Exemption.

b. Project No. 6814–000.

c. Date Filed: November 1, 1982.

d. Applicant: Sheep Creek Irrigation Company.

e. Name of Project: Lower Antelope.

f. Location: on Sheep Creek, Daggett County, Utah.

g. Filed Pursuant to: Section 30 of the Federal Power Act [16 U.S.C. 823(a)].

h. Contact Person: Mr. Albert H. Neff, Executive Secretary, Sheep Creek Irrigation Company, Manila, Utah 84046.

i. Comment Date: May 27, 1983.

j. Competing Application: Project No. 5037–001. Date Filed: 1/19/82.

k. Description of Project: The proposed project would consist of: (1) a new intake structure measuring approximately 13 feet wide and 13 feet high; (2) a new earth-lined trapezoidal canal 1250 feet long and 13 feet wide at the bottom; (3) a steel or RPM penstock 1460 feet long and 48 inches in diameter; (4) a new reinforced concrete powerhosue, measuring 23 by 63 feet, containing three turbine/generator units with a total installed capacity of 1425 kW at an average head of 140 feet; (5) either a 0.5-mile, 14.41-kv or a slightly longer 69-kV transmission line; and (6) appurtenant facilities.

l. Purpose of Project: The average annual generation of 3.05 million kWh will be sold to the Bridger Valley Electric Association.

m. This notice also consists of the following standard paragraphs: A3, B, C and D3b.

23a. Type of Application: 5 MW or Less Exemption.

b. Project No. 6824–000.

c. Date Filed: November 3, 1982.

d. Applicant: Colenergy, Inc.

e. Name of Project: Silver Creek Hydroelectric.

f. Location: On Silver Creek, within Mt. Baker National Forest, near Greenwater, in Pierce County, Washington.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980, 16 U.S.C. 2705 and 2708 as amended.

h. Contact Person: Mr. Robert C. Cole, Colenergy, Inc., 1555 Union Avenue, N.W. No. 65, Renton, Washington 98056.

i. Comment Date: June 2, 1983.

j. Description of Project: The proposed project would consist of: (1) a 9-foot-high, 10-foot-long concrete diversion structure at an elevation of 3,760 feet; (2) a 14,950-foot-long, 36-inch-diameter conduit; (3) A powerhouse containing two generating nits with a total rated capacity of 3,200 kW; and (4) a 500-foot-long, 12.5-kV trnasmission line connecting the powerhouse to an existing Puget Sound Power and Light Company transmission line. The applicant estimates the average annual energy production at 13.09 million kWh.

k. Purpose of Project: Project power would be sold to Puget Sound Power and Light Company.

l. This notice also consists of the following standard paragraphs: A1, B, C, and D3a.

24a. Type of Application: 5 MW or Less Exemption.

b. Project No.: 6825–000.

c. Date Filed: November 3, 1982.

d. Applicant: Colenergy, Inc.

e. Name of Project: Goat Creek Hydroelectric.

f. Location: On Goat Creek, within Mt. Baker National Forest, near Greenwater, in Pierce County, Washington.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980, 16 U.S.C. 2705 and 2708 as amended.

h. Contact Person: Mr. Robert C. Cole, Colenergy, Inc., 1555 Union Avenue, N.E., No. 65, Renton, Washington 98056.

i. Comment Date: June 2, 1983.

j. Description of Project: The proposed project would consist of: (1) a 5-foot-high, 10-foot-long concrete diversion structure at an elevation of 3,680 feet; (2) a 5,700-foot-long, 27-inch-diameter conduit; (3) a powerhouse containing one generating unit with a total rated capacity of 1,800 kW; and (4) a 600-foot-long, 12.5-kV transmission line connecting the powerhouse to an existing Puget Sound Power and Light Company transmission line. The Applicant estimates the average annual energy production at 8.88 million kWh.

k. Purpose of Project: Project power would be sold to Puget Sound Power and Light Company.

l. This notice also consists of the following standard paragraphs: A1, B, C, and D3a.

25a. Type of Application: 5 MW Exemption.

b. Project No.: 6878–001.

c. Date Filed: January 27, 1983.

d. Applicant: Taft Hydro Power Co., Inc.

e. Name of Project: Adams Power Project.

f. Location: Sandy Creek, Jefferson County, New York.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980 (Act), 16 U.S.C. 2705 and 2708 as amended, and part I of the Federal Power Act.

h. Contact Person: Lawrence R. Taft, 10315 Caughdenoy Road, Central Square, New York 13036.

i. Comment Date: May 27, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing concrete gravity dam, 9 feet high and 135 feet long; (2) a reservoir having a storage capacity of 16.75 acre-feet, a surface area of 3.7 acres, and a normal water surface elevation of 610 feet m.s.l.; (3) a new intake structure; (4) a new powerhouse with 4 generating units with a total capacity of 358 kW; (5) an existing tailrace; (6) a new 13.2-kV transmission line 400 feet long; and (7) appurtenant facilities. The existing dam is owned by the Applicant. The Applicant estimates the average annual energy production would be 1,200,000 kWh. All project power would be sold to the Niagara Mohawk Power Corporation.

k. Purpose of Project: All project power would be sold to the Niagara Mohawk Power Corporation.

l. This notice also consists of the following standard paragraphs: A1, B, C, and D3a.

m. Purpose of Exemption: An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

26a. Type of Application: License (under 5 MW).

b. Project No.: 7021–000.

c. Date Filed: January 24, 1983, and revised on March 11, 1983.

d. Applicant: Auburn Hydro, Inc.

e. Name of Project: Shoe Form.

f. Location: On the Owasco Lake Outlet in the City of Auburn, Cayuga County, New York.

g. Filed Pursuant to: 16 U.S.C. 791(a)–825(r).

h. Contact Person: James J. Glass, P.O. Box 845, Auburn, New York 13021.

i. Comment Date: May 23, 1983.

j. Competing Application: Project No. 6784–000. Date Filed: October 20, 1982.

k. Description of Project: The proposed project would consist of the following existing facilities: (1) a 14-foot-high 80-foot-long stone and concrete dam and a 30-foot-long breached section at the left (west) bank; (2) an inoperative waste gate; (3) an intake structure and powerhouse at the right (east) bank; (4) a tailrace; and (5) appurtenant facilities.

Applicant proposes to redevelop the existing facilities and would: (1) repair the dam intake structure, and powerhouse; (2) construct a new 30-foot-long dam section; (3) replace the waste gate; (4) recreate a reservoir with a surface area of 1.5 acres and a gross storage capacity of 7.5 acre-feet at spillway crest elevation 596.5 feet m.s.l.; (5) install a new generating unit having a rated capacity of 450-kW under a 15-foot head and at a flow of 460 cfs; (6) install new electrical switchgear; and (7) construct a 300-foot-long 15-kV transmission line. Applicant estimates that the proposed project would cost $1,593,000.

l. Purpose of Project: Project energy would be sold to New York State Electric and Gas Corporation. Applicant estimates that the average annual energy output would be 1,960,000 kWh.

m. This notice also consists of the following standard paragraphs: A2, B, C, and D1.

27a. Type of Application: Preliminary Permit.

b. Project No: 7032–000.

c. Date Filed: January 28, 1983.

d. Applicant: Richard R. Gresham.

e. Name of Project: Gresham Brothers Lake Creek #3.

f. Location: Shoshone County, Idaho; Lake Creek.

g. Filed pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Contact Person: Richard R. Gresham, P.O. Box 52, Kellog, Idaho 83837.

i. Comment Date: June 13, 1983.

j. Description of Project: The proposed project would consist of: (1) a 2.9-foot-high diversion structure; (2) a 3,500-foot-long, 10-inch-diameter pipe; (3) a powerhouse with a total installed capacity of 185 kW; (4) a substation; and (5) an 1,100-foot-long underground cable connecting the substation with an existing 13-kV transmission line owned by Washington Water Power Company. The proposed project would affect United States lands within Coeur'Alene National Forest. A preliminary permit does not authorize construction. The Applicant seeks a 24-month permit to study the feasibility of constructing and operating the project. These studies are estimated to cost $13,000 and would not require construction of any new roads.

k. Purpose of Project: The estimated annual output of 1.1 million kWh would be sold to the Washington Water Power Company.

l. This notice also consists of the following standard paragraphs: A4b, A4c, A4d, B, C, D2.

28a. Type of Application: Preliminary Permit.

b. Project No: 7056–000.

c. Date Filed: February 9, 1983.

d. Applicant: Walker River Irrigation District.

e. Name of Project: West Branch Walker River.

f. Location: On West Branch Walker River, within Toiyabe National Forest, near Bridgeport, in Mono County, California.

g. Filed pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Contact Person: Jim Weishaupt, Walker River Irrigation District, P.O. Box J, Yerington, Nevada 89447.

i. Comment Date: June 13, 1983.

j. Description of Project: The proposed project would contain three facilities known as the Upper, Middle and Lower Facility. The Upper Facility would consist of: (1) a 40-foot-high, 200-foot-long concrete diversion dam creating a reservoir with a storage capacity of 69 acre-feet; (2) a 5000-foot-long, 60-inch-diameter conduit; (3) a powerhouse containing 2 generating units with a total rated capacity of 6.48 MW and (4) a 7000-foot-long, 12-kV transmission line. The Middle facility would consist of: (1) a 40-foot-high, 300-foot-long concrete diversion dam creating a reservoir with a storage capacity of 1,660 acre-feet; (2) a 10,000-foot-long, 60-inch-diameter conduit; (3) a powerhouse containing a single generating unit with a rated capacity of 1.94 MW; and (4) a 0.5-mile-long, 12-kV transmission line. The Lower Facility would consist of: (1) a 80-foot-high, 250-foot-long concrete diversion dam; (2) a 26,000-foot-long, 72-inch-diameter conduit; (3) a powerhouse containing three generating units with a total rated capacity of 14.1 MW; and (4) a 100-foot-long, 12-kV transmission line. The Applicant estimates that the average annual energy production from the three facilities would be 167 million kWh.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which it would conduct technical, environmental and economic studies. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of

undertaking these studies would be $200,000.

k. Purpose of Project: Project power would be utilized by the Applicant. Any surplus power would be sold to a local utility.

l. This notice also consists of the following standard paragraphs: A4b, A4c, A4d, B, C, and D2.

29a. Type of Application: Preliminary Permit.

b. Project No: 7060–000.

c. Date Filed: February 8, 1983.

d. Applicant: Greene County Electric Co., Inc.

e. Name of Project: Burgess Falls Dam Hydro Project.

f. Location: Cookvile, Putnam County, Tennessee on the Falling Water River.

g. Filed pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Contact Person: Daniel E. Burgner, Rt. 10, Box 183A, Greenville, Tennessee 37743.

i. Comment Date: June 13, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing concrete dam approximately 369 feet long and 40 feet high; (2) an existing reservoir with a surface area of 25 acres and storage capacity of 250 acre-feet; (3) a proposed powerhouse with a total installed capacity of 450 kW; (4) new transmission lines; and (5) appurtenant facilities. Applicant estimates the average annual generation to be 1.3 GWh. All power generated would be sold to a local utility.

l. This notice also consists of the following standard paragraphs: A4a, A4c, A4d, B, C, and D2.

30a. Type of Application: Preliminary Permit.

b. Project No: 7061–000.

c. Date Filed: February 8, 1983.

d. Applicant: American Hydro Power Company.

e. Name of Project: Cowanesque.

f. Location: On the Cowanesque River near Lawrenceville in Lawrence and Nelson Townships, Tioga County, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Peter A. McGrath, Two Aldwyn Center, Villanova, Pennsylvania 19085.

i. Comment Date: June 24, 1983.

j. Description of Project: The proposed project would utilize the existing Corps of Engineers Cowanesque Dam and would consist of: (1) a 950-foot long 12-foot wide, 14-foot high horseshoe-shaped outlet tunnel converted to use as a penstock; (2) a new powerhouse containing four generating units having a total rated capacity of 1,875 kW under an 80-foot head and at a flow of 250 cfs; (3) a tailrace; (4) a 2,000-foot long 34.5–kV Transmission line; and (5) appurtenant facilities.

k. Purpose of Project: Project energy would be sold to Pennsylvania Electric Company/General Public Utilities Corp. Applicant estimates that the average annual generation would be 11,122,820 kWh.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

m. A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 18 months, during which time it would perform studies and, if feasible, would prepare an application for an FERC license. Applicant estimates the cost of the work under the permit would be $50,000.

31a. Type of Application: Preliminary Permit.

b. Project No: 7062–000.

c. Date Filed: February 8, 1983.

d. Applicant: Olympus Energy Corporation.

e. Name of Project: Pine Mountain Project.

f. Location: South Fork Soleduck River, near Fairholm, within Olympic National Forest, in Clallam County, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r)

h. Contact Person: Mr. Jerome E. Livingston, President, Olympus Energy Corporation, 201 215 St. SE., Bothell, Washington 98011.

i. Comment Date: June 13, 1983.

j. Description of project: The proposed project would consist of: (1) a 5-foot-high, 75-foot-long diverson structure on South Fork Soleduck River; (2) a 48-inch-diameter, 15,000-foot-long pipeline/penstock; (3) a powerhouse with a total installed capacity of 4.5 MW; and (4) a 35-kV, 7,500-foot-long transmission line. The Applicant estimates that the average annual energy production would be 28 million kWh and would be sold to the Bonneville Power Administration or to other service utilities.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a 30-month preliminary permit to conduct technical, environmental and economic studies, and also prepare an FERC license application at an estimated cost of $150,000.

k. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

32a. Type of Application: Preliminary Permit.

b. Project No. 7082–000.

c. Date Filed: February 14, 1983.

d. Applicant: Fall Creek Associates

e. Name of Project: Fall Creek Hydroelectric Project.

f. Location: Fall Creek Reservoir, on Fall Creek, in Lane County near Eugene, Oregon.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contract Person: Mr. Tom Forbes, P.O. Box 421, Mercer Island, Washington 98040.

i. Comment Date: June 23, 1983.

j. Description of Project: the proposed project would consist of a powerhouse at the base of the existing Corps of Engineers' Fall Creek Reservoir dam. The powerhouse would have an installed capacity of 6 MW, generating about 29.5 million kWh under a head of 175 feet. An existing 2-mile-long transmission line would be upgraded to interconnect with the Pacific Power and Light Company's system or the Bonneville Power Administration's system. The Applicant seeks a 36-month permit to study the feasibility of constructing and operating the project and to prepare and FERC license application. No new road would be required to conduct the studies.

k. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

33a. Type of Application: Exemption (5 MW or Less).

b. Project No.: 7089–000.

c. Date Filed: February 18, 1983.

d. Applicant: Alfred Teufel Nursery.

e. Name of Project: Alfred Teufel Nursery.

f. Location: On Cedar Mill Creek, near Cedar Mill, in Washington County, Oregon.

g. Filed Pursuant to: Energy Security Act of 1980, Section 408, 16 U.S.C. 2708 and 2708 *as amended*.

h. Contact Person: Thomas Teufel, Alfred Teufel Nursery, 12345 NW Barnes Road, Portland, Oregon 97229.

i. Comment Date: May 31, 1983.

j. Description of Project: The proposed project would consist of: (1) a 4-foot-high, 45-foot-long concrete diversion dam; (2) a 30-inch-diameter, 45-foot-long steel penstock; (3) a powerhouse containing two generating units, each rated at 20 kW; and (4) a short transmission line. The average annual generation is estimated to be 87,000 kWh.

k. Purpose of Project: Power will be sold to Portland General Electric Company.

l. This notice also consists of he following standard paragraphs: A1, B, C and D3a.

34a. Type of Application: License (over 5 MW).

b. Project No.: 7093–000.
c. Date Filed: February 18, 1983.
d. Applicant: Hydro Development Group, Inc. and the Shelton Canal Company.
e. Name of Project: Derby-Shelton.
f. Location: Housatonic River, in the towns of Derby, Shelton, Monroe, Oxford and Seymour, Fairfield and New Haven counties, Connecticut.
g. Filed Pursuant to: 16 U.S.C. 791(a)—825(r).
h. Contact Person: Mark E. Quallen, V.P., Hydro Development Group, Inc., Box 58, Dexter, New York 13634.
i. Comment Date: May 23, 1983.
j. Competing Application: Project No. 6066–001; Date Filed: May 21, 1982.
k. Description of Project: The proposed project would consist of: (1) an existing 26–foot-high, 675–foot-long concrete capped, stone masonry, spillway dam with 1.4–foot-high flashboards; (2) an existing 382 acre reservoir with a usable storage capacity of 500 acre-feet at elevation 25.1 feet N.G.V.D.; (3) an existing gatehouse and the 2,135-foot-long, 40-foot-wide Derby Canal; (4) an existing 400-foot-long earth dike with a maximum height of 10 feet, located at the east dam abutment oriented in a northwest-southeast direction; (5) an existing gatehouse and 1,960-foot-long, 90-foot-wide section of the Shelton Canal; (6) an existing navigation lock located at the Shelton Canal; (7) a new powerhouse located at the head of the Derby Canal and adjacent to the east dam abutment containing two turbine-generators with a total rated capacity of 6.5 MW; (9) a tailrace channel; (10) a 500-foot-long, 13.8-kV transmission line. The existing Derby Canal would be modified for its first 180 feet to a 15-foot-wide, 10-foot-deep concrete lined section of which 80 feet would be underground. The project would produce up to 27,400,000 kWh annually. The existing project works are owned by the Shelton Canal Company.
l. Purpose of Project: Energy produced at the project would be sold to Connecticut Light and Power Company
m. This notice also consists of the following standard paragraphs: A3, B, C and D2.
35a. Type of Application: Preliminary Permit.
b. Project No.: 7107–000.
c. Date Filed: February 24, 1983.
d. Applicant: F & T Services Corporation.
e. Name of Project: Felsenthal Project.
f. Location: On the Ouachita River in Union County, Arkansas.
g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).
h. Contact Person: Mr. Ralph L. Laukhuff, Jr., P.O. Box 64844, Baton Rouge, Louisiana 70896.
i. Comment Date: June 13, 1983.
j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers existing Felsenthal Dam and Reservoir and would consist of: (1) a new power inlet channel, approximately 25 feet wide and 400 feet long; (2) a new generating station housing, either a five meter bulb turbine or two tube turbines with a total rated capacity of 5,000 to 8,000 kW; (3) a new tailrace channel approximately 300 feet in length; (4) a proposed transmission line approximately 1,200 feet long; and (5) appurtenant facilities. Applicant estimates that the average annual energy generation would be 18,000,000 kWh.
k. Purpose of Project: The proposed market for the generated energy is the Arkansas Power & Light Company.
l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.
m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months, during which time the Applicant would perform studies, investigations and tests, would prepare required plans, and specifications that are necessary to determine the feasibility of the project, and, if feasible would prepare an application for FERC License.
36a. Type of Application: 5 Megawatt Exemption.

i. Comment Date: May 27, 1983.
j. Description of Project: The proposed project would consist of: (1) an existing concrete gravity dam, 6 feet high and 200 feet long; (2) a small impoundment covering 4 acres and having a storage capacity of about 20 acre-feet; (3) two renewed 5 by 4-foot wooden head gates; (4) a refurbished mill race, 200 feet long, 6 feet deep and 15 feet wide; (5) a new small wooden shed to house the single 94 kW turbine/generator unit operating under a head of 8 feet; (6) an existing tailrace extending 200 feet before rejoining the river; (7) a new 7.2-kV transmission line 75 feet long; and (8) appurtenant facilities.
k. Purpose of Project: The average annual generation of 520,000 kWh will be sold to the Virginia Electric Power Company.
l. This notice also consists of the following standard paragraphs: A1, B, C and D3a.
m. Purpose of Exemption: An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.
37a. Type of Application: Preliminary Permit.
b. Project No.: 7109–000.
c. Date Filed: February 28, 1983.
d. Applicant: F & T Services Corporation.
e. Name of Project: Calion Project.
f. Location: On the Ouachita River in Union County, Arkansas.
g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).
h. Contact Person: Mr. Ralph L. Laukhuff, Jr., P.O. Box 64844, Baton Rouge, Louisiana 70896.
i. Comment Date: June 22, 1983.
j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers Calion Dam and Reservoir (now under construction and scheduled for completion in 1985) and would consist of: (1) a new power inlet channel, approximately 25 feet wide and 400 feet long; (2) a new generating station housing, either a five meter bulb turbine or two tub turbines with a total capacity of 3,000 to 5,000 kW; (3) a new tailrace channel approximately 300 feet in length; (4) a proposed transmission line approximately 1,200 feet long; and (5) appurtenant facilities. Applicant estimates that the average annual energy generation would be 8,000,000 kWh.
k. Purpose of Project: The proposed market for the generated energy is the Arkansas Power & Light Company.
l. This notice also consists of the following standard paragraphs: A4b, A4d, B, C and D2.
m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months, during which time the Applicant would perform studies, investigations and tests, and would prepare required plans and specifications that are necessary to determine the feasibility of the project, and, if feasible would prepare an application for FERC license.

38a. Type of Application: Preliminary Permit.

b. Project No.: 7111–000.

c. Date Filed: February 28, 1983.

d. Applicant: Chris Williams.

e. Name of Project: Wright Creek.

f. Location: On Wright Creek in Grays Harbor County and the Olympic National Forest near the Town of Quinalt, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Paul M. Williams, Williams and Marts, Attorneys at Law, 143—5th Avenue N., Edmonds, Washington 98020.

i. Comment Date: June 13, 1983.

j. Description of Project: The proposed project would consist of: (1) a 5-foot-high, 12-foot-long concrete and stone diversion structure on Wright Creek at elevation 775 feet; (2) a 3,000-foot-long, 12-inch-diameter steel penstock; (3) a powerhouse containing a single 200-kW generating unit; (4) a short tailrace discharging flows back into Wright Creek at elevation 380 feet; and (5) a 0.6-mile-long, 12.5-kV transmission line. Applicant estimates that the project would have an annual energy output of 876,000 kWh.

A preliminary permit, if issued, does not authorize any construction. During the term of the preliminary permit Applicant would conduct environmental, economic, and engineering feasibility studies and prepare an FERC license application. No new roads would be required to conduct the studies.

k. Purpose of Project: Project energy would be sold to Grays Harbor County Public Utility District.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

39 a. Type of Application: Preliminary Permit.

b. Project No: 7119–000.

c. Date Filed: March 3, 1983.

d. Applicant: Rick K. Bennetts.

e. Name of Project: Dale Creek Project.

f. Location: On Dale Creek in Siskiyou County near the Town of Weed, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Rick K. Bennetts, 15A West Lake Street, Weed, California 96094.

i. Comment Date: June 17, 1983.

j. Description of Project: The proposed project would consist of: (1) a diversion structure on Dale Creek at elevation 3,900 feet; (2) a 4,000-foot-long, 24- to 36-inch-diameter steel penstock; (3) a powerhouse containing a generating unit with a total capacity of 200 to 400 kW; and (4) a 3,400-foot-long transmission line. Applicant estimates that the project would have an annual generation of 1,700 MWh.

A preliminary permit, if issued, does not authorize construction of the project. Applicant has requested a preliminary permit with a term of 36 months during which period Applicant would study the economic, environmental, financial, and engineering feasibility of the project.

k. Purpose of Project: Project energy would be sold to the Pacific Power and Light Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

40 a. Type of Application: Preliminary Permit.

b. Project No: P–7121–000.

c. Date Filed: March 3, 1983.

d. Applicant: Mr. Lawrence Leland Johnson.

e. Name of Project: Goodyear Bar, Rock Creek.

f. Location: On Rock Creek in Sierra County, California, within the Tahoe National Forest near the town of Downieville.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Bart M. O'Keeffe, President, Mutual Energy Company, Inc., 1250 Pine Street, Suite 100, Walnut Creek, California 94596.

i. Comment Date: June 24, 1983.

j. Description of Project: The proposed project would consist of: (1) a 5-foot-high, 30-foot-long diversion-intake structure at elevation 3,960 feet; (2) a 27-inch-diameter, 2,800-foot-long pipeline; (3) a 22-inch-diameter, 3,600-foot-long penstock; (4) a powerhouse containing a single generating unit with a rated capacity of 1,700 kW, operating under a head of 1,220 feet; and (5) a 2-mile-long, 12-kV transmission line tying into an existing Pacific Gas and Electric Company line. The average annual energy output would be 4,470,000 kWh.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks a 36-month permit to study the feasibility of constructing and operating the project. No new access roads will be required for the purpose of conducting these studies. Applicant estimates that the cost for conducting these studies ranges between $75,000.00 and $100,000.00.

k. Purpose of Project: Project power will be sold to one of California's private utility companies.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

41a. Type of Application: Preliminary Permit.

b. Project No: 7135–000.

c. Date Filed: March 10, 1983.

d. Applicant: Mountain West Hydro, Inc.

e. Name of Project: Lemiti Hydroelectric.

f. Location: On Clackamas River, within Mt. Hood National Forest near Estacada, Marion County, Oregon.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. David L. Browning, Mountain West Hydro, Inc., 2155 Christina N.W., Salem, Oregon 97304.

i. Comment Date: June 17, 1983.

j. Description of Project: The project would consist of: (1) an 8-foot-high, 50-foot-long concrete diversion structure at an elevation of 3,680 feet; (2) a 7,260-foot-long, 34-inch-diameter pipeline; (3) a powerhouse containing one generating unit with an installed capacity of 1,230 kW; and (4) a 19,800-foot-long, 69-kV transmission line. The Applicant estimates that the average annual energy production would be 6.92 million kWh.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for period of 36 months during which it would conduct technical, environmental and economic studies. No new roads would be needed for conducting these studies. The Applicant estimates that the cost of undertaking these studies would be $83,000.

k. Purpose of Project: Project power would be sold to Portland General Electric Company.

l. This notice also consists of the following standard paragraphs: A4b, A4c, A4d, B, C and D2.

42a. Type of Application: Preliminary Permit.

b. Project No: 7149–000.

c. Date Filed: March 16, 1983.

d. Applicant: Brazos River Authority.

e. Name of Project: De Cordova Bend Project.

f. Location: On Brazos River, Hood County, Texas

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Carson H. Hoge, General Manager, Brazos River Authority, 4400 Cobbs Drive, P.O Box 7555, Waco, Texas 76710.

i. Comment Date: June 20, 1983.

j. Description of Project: The proposed project would consist of: (1) the existing De Cordova Bend Dam, an earthfill dam with a total length (including a 691-foot-long spillway) of 2,220 feet and a height of 84 feet; (2) Lake Granbury which at the normal maximum operating level of 693 feet m.s.l. has a total storage

capacity of 153, 485 acre-feet and covers 8,700 acres; (3) a new intake facility; (4) a new penstock; (5) a new reinforced concrete powerhouse containing turbine/generator units with a total rated capacity of 16,200 kW; (6) either a 1.0-mile-long, 138-kV or a 0.5-mile-long, 69 or 345-kV transmission line; and (7) appurtenant facilities.

k. Purpose of Project: The average annual generation of 31 million kWh would be sold to either the Texas Power and Light Company or the Brazos Electric Power Cooperative, Inc.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

m. Proposed Scope of Studies under Permit: Applicant seeks issuance of a preliminary permit for a period of three years, during which time it would perform surveys and geological investigations, determine the economic feasibility of the project, reach final agreement on sale of project power, secure financing commitments, consult with Federal, State, and local government agencies concerning the potential environmental effects of the project, and prepare an application for FERC license, including an environmental report. Applicant estimates the costs of studies under the permit would be $50,000.

43a. Type of Application: Preliminary Permit.

b. Project No: P–7164–000.

c. Date Filed: March 21, 1983.

d. Applicant: The Grisdale Hill Company.

e. Name of Project: Hidden Dam Hydro.

f. Location: On the Fresno River in Madera County, California.

g. Fileld Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Ms. Joy Leong, Morrison, and Foster, 1920 N Street N W., Washington, D.C. 20036.

j. Description of Project: The proposed project would consist of a powerhouse, containing a single generating unit with a rated capacity of 2,100 kW, located at the existing outlet of the U.S. Army Corps of Engineers' Hidden Dam and appurtenant facilities.

Applicant requested a 24-month preliminary permit to perform feasibility studies.

k. Purpose of Project: The estimated 6 million kWh of energy produced by the project would be sold to local utilities.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

44a. Type of Application: License (Over 5 MW).

b. Project No: 3109–001.

c. Date Filed: September 29, 1982.

d. Applicant: Eugene Water and Electric Board.

e, Name of Project: Blue River Dam.

f. Location: On Blue River, near Blue River, in Lane County, Oregon.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Keith Parks, General Manager, Eugene Water & Electric Board, 500 East 4th Avenue, P.O. Box 10148, Eugene Oregon 97440.

i. Comment Date: June 6, 1983.

j. Description of Project: The proposed project would consist of: (1) the modification of the intake structure and outlet tunnel of the existing 270-foot-high rockfill Blue River Dam, owned and operated by the U.S. Army Corps of Engineers; (2) a 600-foot-long, 10-foot-diameter steel penstock; (3) a powerhouse containing two generating units, each rated at 7,325 kW; (4) a tailrace; (5) an access road; and (6) a 1.5-mile-long transmission line. The average annual energy generation is estimated to be 34.5 million kWh utilizing only flows released from the dam for other beneficial uses.

k. Purpose of Project: The energy generated by the project will be used to serve Applicant's customers.

l. This notice also consists of the following standard paragraphs: A2, B, C, and D2.

45 a. Type of Application: Major License (5 MW or less).

b. Project No: P–3991–002.

c. Date Filed: December 28, 1982, and revised on February 22, 1983

d. Applicant: Energenics Systems, Inc.

e. Name of Project: Cross Cut Diversion.

f. Location: On Henry's Fork of the Snake River near St. Anthony Fremont County, Idaho.

g. Filed Pursuant to: 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Granville J. Smith II, 1717 K Street, N.W., Suite 706, Washington, D.C. 20006.

i. Comment Date: June 6, 1983.

j. Description of Project: The proposed run-of-river project would utilize the existing Cross Cut Diversion Dam facilities constructed by the Bureau of Reclamation and operated by the Fremont Madison Irrigation District and would consist of: (1) a new 63-foot-long 91-foot wide forebay at the left (east) bank; (2) a new powerhouse containing two generating units having a total rated capacity of 1, 754-kW operated at a 10.5-foot head and a flow of 2,300 cfs; (3) a new 15-foot-long tailrace; (4) a new 4.16/12.47–kV switchyard; (5) a new 0.6-mile-long 12.47–kV transmission line; and (6) appurtenant facilities.

Applicant would relocate the existing Cross Cut Canal intake structure. Hydroelectric power production would be subordinate to the facility's primary purpose of irrigation water diversion. Applicant estimates that the proposed project would cost $5,382.000. The application was filed during the term of the Applicant's preliminary permit for Project No. 3991.

k. Purpose of Project: Project energy would be sold to Utah Power & Light Company or to Idaho Power Company. Applicant estimates that the average annual energy output would be 10,851,600 kWh.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

46 a. Type of Application: License (Under 5 MW).

b. Project No: 4202–001.

c. Date filed: November 24, 1982.

d. Applicant: Pumkin Hill Power Company.

e. Name of Project: Lowell Tannery Dam.

f. Location: Passadumkeag River, Town of Lowell, Penobscot County, Maine.

g. Filed Pursuant to: 16 U.S.C. 791(a)–825(r).

h. Contact Person: Robert G. Kelly, Manager, Pumpkin Hill Power Company, Pumpkin Hill Farm, RFD Box 147, Enfield, Maine 04433.

i. Comment Date: June 6, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing 230-foot-long, 17.4-foot-high concrete gravity dam, including 30 and 80-foot-long spillway sections topped by 3-foot-high flashboards; (2) a 68.5-acre reservoir with a usable storage capacity of 100 acre-feet at elevation 187.5 feet M.S.L.; (3) an existing powerhouse located near the north abutment containing two new turbine-generators with a total rated capacity of 875 kW; (4) a fishway located adjacent to the powerhouse; (5) a tailrace channel; (6) an 8.5-mile long, 12–kV transmission line; and (7) appurtenant facilities. The project would generate up to 4,466,000 kWh annually. The project dam is owned by Lincoln Pulp and Paper Company.

k. Purpose of Project: Energy produced by the project would be sold to Bangor Hydro-Electric Company.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

47. a. Type of Application: Preliminary Permit.,

b. Project No: 7116–000.

c. Date Filed: March 1, 1983.

d. Applicant: China Flat Company.

e. Name of Project: Kirkham Creek Power Project.

f. Location: On Kirkham Creek in Humboldt County in the Six Rivers National Forest near the Town of Willow Creek, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Albert E. Hodgson, Chairman, China Flat Company, P.O. Box 269, Willow Creek, California 95573.

i. Comment Date: June 8, 1983.

j. Description of Project: The proposed project would consist of: (1) a 4-foot-high, 40-foot-long natural rock and concrete diversion structure at elevation 1240 feet; (2) a 5,000-foot-long, 24-inch-diameter low pressure conduit; (3) a 1,700-foot-long, 20-inch-diameter steel penstock; (4) a powerhouse containing generating units with a total generating capacity of 500 kW; and (5) a 700-foot-long, 12.5-kV transmission line. Applicant estimates that the project would have an annual energy output of 4.4 million kWh.

A preliminary permit, if issued, does not authorize any construction. Applicant has requested a 36-month preliminary permit during which period Applicant would conduct economic, environmental, and engineering feasibility studies and prepare an FERC license application. No new roads would be required to conduct the studies. Applicant estimates that the studies conducted during the term of the permit would cost between $10,000 and $15,000.

k. Purpose of Project: Project energy would be sold to the Pacific Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

48 a. Type of Application: 5MW Exemption.

b. Project No.: 6643–001.

c. Date Filed: January 24, 1983.

d. Applicant: Lee R. & A. Leon Thayn.

e. Name of Project: Thayn Hydroelectric Project.

f. Location: The Green River in Emery and Grand Counties, Utah.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980 (Act) (16 U.S.C. 2705 and 2708 *as amended).*

h. Contact Person: George L. Smith, Monana Hydro, P.O. Box 1016, Idaho Falls, Idaho 83402.

i. Comment Date: May 31, 1983.

j. Description of Project: The proposed run-of-river would consist of: (1) an existing rock and timber crib diversion dam, approximately 840.0 feet long and 8.0 feet high; (2) an existing canal extending from the diversion dam to the pumping plant approximately 2500 feet long; (3) an existing upper slide gate structure with 8 wood leaf gates, each 6.0 feet long and 6.0 feet high; (4) an existing lower slide gate structure with 2 wood leaf gates, each 5.0 feet long and 5.0 feet high; (5) a proposed powerhouse, approximately 114.0 feet long and 63.0 feet wide, containing two generating units of 1800 kW each, giving a total installed capacity of 3600 kW; (6) proposed 12.5-kV transmission lines, approximately 6.0 miles long; and (7) appurtenant facilities. Project power would be sold to the Utah Power and Light Company. The Applicant estimates that the average annual energy output would be 22,490 MWh. Parcels of land within the project boundaries are owned by the Applicant, Lee R. & A. Leon Thayn, the Green River Canal Company, the U.S. Bureau of Land Management, and the State of Utah.

k. This notice also consists of the following standard paragraphs: D3a, A1, B and C.

l. Purpose of Exemption: An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, the protects the Exemptee from permit or license applicants that would seek to take or develop the project.

49a. Type of Application: License (5 MW or Less).

b. Project No.: 6712–000.

c. Date Filed: September 23, 1982.

d. Applicant: Gold Run Hydro Associates.

e. Name of Project: Gold Run Pipe Power.

h. Contact Person: Richard R. Gresham, P.O. Box 52, Kellog, Idaho 83837.

i. Comment Date: June 15, 1983.

j. Description of Project: The proposed project would consist of: (1) a 2.9-foot-high diversion structure; (2) a 4,100-foot-long, 16-inch-diameter pipe; (3) a powerhouse with a total installed capacity of 300 kW; (4) a substation; (5) a 300-foot-long underground cable connecting the substation with an existing 48-kV transmission line owned by Washington Water Power Company. The proposed project would affect United States lands within Coeur D'Alene National Forest. A preliminary permit does not authorize construction. The applicant seeks a 24-month permit to study the feasibility of constructing and operating the project. These studies are estiamted to cost $13,000 and would not require construction of any new roads.

k. Purpose of Project: The estimated annual output of 1.1 million kWh would be sold to the Washington Water Power Company.

l. This notice also consists of the following standard paragraphs: A4b, A4c, A4d, B, C, and D2.

51a. Type of Application: License (5 MW or Less).

b. Project No.: 6716–000.

i. Comment Date: May 25, 1983.

j. Competing Application: Project No. 6046. Date Filed: February 26, 1982. Notice Issued: March 24, 1982.

k. Description of Project: The proposed project would consist of: (1) a 20-foot-long, 30-inch-diameter bifurcation section connected to an existing unpressurized 30-inch-diameter penstock, and the new powerhouse; (2) a powerhouse containing a turbine-generating units with a rated capacity of 136 kW; (3) a 100-foot-long transmission line connecting to an existing Pacific Gas and Electric line; and (4) a 20-foot long tailrace feeding into Lower Boardman Canal. The Applicant estimates a 833,950 kWh annual energy production.

l. Purpose of Project: Power will be sold to local utilities.

m. This notice also consists of the following standard paragraphs: A2, B, C, D1.

53a. Type of Application: Exemption of a 5MW or less Hydroelectric facility.

b. Project No.: 7077–000.

c. Date Filed: February 14, 1983.

d. Applicant: Frontier Land and Power.

e. Name of Project: Genesee Power.

f. Location: On Little Grizzly Creek in Plumas County, California within Plumas National Forest, near the town of Genesee.

g. Filed Pursuant to: Energy Security Act 1980 (16 U.S.C. 2705 and 2708 as amended).

h. Contact Person: Mr. Bruce McDowell, Vice-President, Frontier Land and Power, P.O. Box 131, Taylorsville, California 95983.

i. Comment Date: May 25, 1983.

j. Description of Project: The proposed project would consist of: (1) a 5-foot-high, 12-foot-long diversion structure at elevation 4,180 feet; (2) a 42-inch-diameter, 7,000-foot-long partially buried penstock; (3) a powerhouse contianing four generating units with a combined rated capacity of 2,000 kW, operating under a head of 380 feet; (4) a tailrace; and (5) a transmission line to tie into an existing Pacific Gas and Electric Company line. The average annual energy output would be 5,935 million kWh.

Purpose of Exemption—An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

k. Purpose of Project: Project power will be sold to Pacific Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A1, B, C, and D3a.

54a. Type of Application: Exemption for a Small Conduit Hydroelectric Facility.

b. Project No.: 7058–000.

c. Date Filed: February 7, 1983.

d. Applicant: Wolf Creek Highway Water District.

e. Name of Project: Wolf Creek Power Generation Project.

f. Location: On a water conduit from the City of Portland, near Beaverton, in Washington County, Oregon.

g. Filed Pursuant to: Section 30 of the Federal Power Act [16 U.S.C. 823(a)].

h. Contact Person: Mr. Gene A. Seibel, Administrator, Wolf Creek Highway Water District, 1850 S.W., 170th Avenue, Beaverton, Oregon 97006.

i. Comment Date: May 12, 1983.

j. Description of Project: The proposed project, to be located on the existing 54-inch-diameter water conduit conveying potable water from the City of Portland to the Applicant, would consist of a powerhouse to contain one 120-kW generating unit operating under a head of 67 feet and producing about 545,000 kWh annually; and appurtenant facilities.

k. This notice also consists of the following standard paragraphs: D3b, B and C.

55a. Type of Application: Preliminary Permit.

b. Project No.: 7041–000.

c. Date Filed: February 1, 1983.

d. Applicant: Potter Township, Pennsylvania.

e. Name of Project: Emsworth Hydroelectric Project.

f. Location: On the Ohio River in Allegheny County, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Dennis M. DiMartini, Esq., Gee Bee Plaza, Monaca, Pennsylvania 15061.

i. Comment Date: June 2, 1983.

j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers Emsworth Dam and Reservoir and would consist of: (1) an approach channel leading from the upper pool above the existing dam to the powerhouse; (2) a proposed powerhouse containing two horizontal shaft bulb-type turbine-generators, each rated at 10,000 kW, giving a total installed capacity of 20,000 kW; (3) an outlet channel leading from the powerhouse to the lower pool; (4) a proposed 138,000-volt transmission line; and (5) appurtenant facilities. Applicant estimates that the average annual energy output would be 122,000,000 kWh.

k. Purpose of Project: The most likely market for the energy produced at the proposed project would be Duquesne Light Company and adjacent public utility companies.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months during which time the Applicant would perform studies to determine the feasibility of the project and, if feasible, prepare an application for FERC license. Applicant estimates the cost of these studies would be $150,000.

56a. Type of Application: License (Over 5 MW).

b. Project No.: 5841–001.

c. Date Filed: September 21, 1982.

d. Applicant: County of Sierra.

e. Name of Project: North Yuba River Water Power project.

f. Location: On North Yuba River, within Sierra National Forest, near Downieville, in Sierra County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Frank B. Clendenen, Sierra Hydro, Inc., 12405 Locksley Lane, Auburn, California 95603.

i. Comment Date: June 3, 1983.

j. Description of Project: The proposed project would consist of: (1) a 6-foot-high, 80-foot-long concrete diversion

structure; (2) a 3,200-foot-long, 58-inch-diameter low pressure conduit; (3) a 7,300-foot-long, 54-inch-diameter steel; penstock; (4) a powerhouse containing one generating unit with an installed capacity of 7,500 kW; (5) a 45-foot-long tailrace conduit; (6) a 1.3-mile-long, 12-kV underground transmission line connecting the powerhouse to a proposed Southern Pacific Land Company 60-kV transmission line and (7) appurtenant facilities. The Applicant estimates that the average annual energy production would be 16 million kWh.

k. Purpose of Project: The project power will be sold to the Pacific Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A2, B, and C.

57a. Type of Application: License (5 MW or Less).

b. Project No: P–4450–002.

c. Date Filed: January 13, 1983.

d. Applicant: North Valley Land Corporation.

e. Name of Project: Hatchet Creek.

f. Location: Shasta County, California; on Hatchet Creek near Town of Montgomery Creek.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Contact Person: C. Donald Nelson, North Valley Land Corporation, 50 Wilshire Drive, Redding, California 96002 with a copy to Ronald F. Ott, Ott Water Engineers, 2334 Washington Ave., Redding, California 96002.

i. Comment Date: June 2, 1983.

j. Description of Project: The proposed project would consist of: (1) a 65-foot-long, 8-foot-high grouted rock diversion structure on Hatchet Creek at elevation 2,268 feet; (2) a screened intake structure; (3) a 9,000-foot-long, 51-inch-diameter low pressure buried pipeline; (4) a 2,500-foot-long, 48-inch-diameter elevated steel penstock; (5) a powerhouse containing two generating units, rated at 3.3 MW and 1.7 MW respectively, discharging into Roaring Creek near its confluence with the Pit River; (6) a switchyard adjacent to the powerhouse; (7) a 1.4-mile-long, 12.3-kV transmission line; and (8) 7,800 feet of gravel surfaced access roads from Cove Road to the diversion structure and the powerhouse. Applicant estimates that the average annual generation of the project would be 19,000 MWh.

k. Purpose of Project: Project power would be sold to the Pacific Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

58a. Type of Application: Preliminary Permit.

b. Project No: 7036–000.

c. Date Filed: 1/31/83.

d. Applicant: Great Northern Hydro Company.

e. Name of Project: Stillaguamish Tributaries Hydropower.

f. Location: Stillaguamish River Tributaries (Rotary, Hawthorn, Triple, Heather, Twentytwo, Hemple, Black and Bear Creeks) in Snohomish County, Washington.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Contact Person: Ed Grant, President, Great Northern Hydro Company, 210 10th Street, Gold Bar, Washington 98251.

i. Comment Date: June 2, 1983.

j. Description of Project: The proposed project would consist of seven sites. Site 1 on Rotary Creek would consist of: (1) a diversion structure with a maximum height of 4 feet; (2) a 24-inch-diameter, 9,000-foot-long penstock; and (3) a powerhouse containing a generating unit with a maximum rated capacity of 1,600 kW. Site 2 on Hawthorn Creek would consist of: (1) a diversion structure with a maximum height of 4 feet; (2) a 24-inch-diameter, 9,500-foot-long penstock; and (3) a powerhouse containing a generating unit with a maximum rated capacity of 1,575 kW. Site 3 on Triple Creek would consist of: (1) a diversion structure with a maximum height of 2 feet; (2) a 12-inch-diameter, 9,500-foot-long penstock; and (3) a powerhouse containing a generating unit with a maximum rated capacity of 840 kW. Site 4 on Heather Creek would consist of: (1) a diversion structure with a maximum height of 56 inches; (2) a 28-inch-diameter, 9,500-foot-long penstock; and (3) a powerhouse containing a generating unit with a maximum rated capacity of 2,050 kW. Site 5 on Twentytwo Creek would consist of: (1) a diversion structure with a maximum height of 56 inches; (2) a 28-inch-diameter, 7,500-foot-long penstock; and (3) a powerhouse containing a generating unit with a maximum rated capacity of 1,810 kW. Site 6 on Hemple Creek would consist of: (1) a diversion structure with a maximum height of 4 feet; (2) a 24-inch-diameter, 9,000-foot-long penstock; and (3) a powerhouse containing a generating unit with a maximum rated capacity of 2,340 kW. Site 7 on Black and Bear Creeks would consist of: (1) two diversion structures with a maximum height of 4 feet, and 6 feet, respectively; (2) a 24 and 36-inch-diameter, 6,000 and 6,500-foot-long penstock, respectively; and (3) a powerhouse containing a generating unit with a maximum rated capacity of 3,580 kW. The Applicant estimates a maximum combined total of 62.60-GWh of average annual energy production from the project. The Applicant has requested a 36-month permit in which to do feasibility studies and prepare a license application at a cost of $100,000.00.

k. Purpose of Project: Power would be sold to local utilities.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, & D2.

59a. Type of Application: License (Over 5 MW).

b. Project No.: 7022–000.

c. Date Filed: January 25, 1983.

d. Applicant: Malta Irrigation District, et al.

e. Name of Project: Tiber Dam Power Project.

f. Location: On the Marias River in Liberty County, Montana.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Sever Enkerud, Tampico Route, Glasgow, Montana 59230.

i. Comment Date: May 13, 1983.

j. Competing Application: Project No. 6432–001 Dated Filed: July 13, 1982.

k. Description of Project: The proposed project would utilize the existing U.S. Bureau of Reclamation Tiber Dam and consist of: (1) an existing 1,600-foot-long, auxilliary outlet works; (2) a proposed powerhouse containing an installed generating capacity of 12 MW; (3) a proposed 7-mile-long, 115kV transmission line; and (4) appurtenant facilities. The project would utilize approximately 12 acres of U.S. Government land. The Applicant estimates that the average annual energy generation will be 75,020 MWh.

l. The notice also consists of the following standard paragraphs A3. B, C, and D1.

60a. Type of Application: Preliminary Permit.

b. Project No.: 6967–000.

c. Date Filed: December 27, 1982.

d. Applicant: California Hydroelectric.

e. Name of Project: Fall Creek Project.

f. Location: On Fall Creek in Nevada County, California within the Tahoe National Forest.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. James R. Doolittle, 18611 Pebble Place, Nevada City, California 95959.

i. Comment Date: June 3, 1983.

j. Description of Project: The proposed project would consist of: (1) a 6-foot-high, 23-foot-long diversion structure; (2) a 36-inch-diameter, 5,287-foot-long buried pipeline; (3) a 24-inch-diameter, 3,300-foot-long penstock; (4) a powerhouse to contain a single

generating unit with a rated capacity of 4,900 kW, operating under a head of 2,000 feet; and (5) a 1-mile-long, 69-kV transmission line to tie into the existing Pacific Gas and Electric transmission line. The average annual energy output is 11 million kWh.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months to study the feasibility of constructing and operating the project. The estimated cost for conducting these studies is $40,000. No new access roads will be required for the purpose of conducting these studies.

k. Purpose of Project: Project power will be sold to Pacific Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

61a. Type of Application: Exemption of a 5 MW or Less Hydroelectric Facility.

b. Project No.: 7057–000.

c. Date Filed: February 7, 1983.

d. Applicant: Mega Hydro, Inc.

e. Name of Project: Clover Leaf Ranch.

f. Location: On Clover Creek in Shasta County, California near the town of Oak Run.

g. Filed Pursuant to: Energy Security Act 1980 (16 U.S.C. 2705 and 2708 as amended).

h. Contact Person: Mr. Richard L. Bean, 2576 Hartnel Ave., Redding, California 96002.

i. Comment Date: June 2, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing 4-foot-high, 28-foot-long diversion structure owned by the applicant (to be rebuilt) at elevation 2,594 feet; (2) an existing 1,994-foot-long ditch owned by the applicant; (3) an intake structure; (4) a 24-inch-diameter, 738-foot-long penstock; (5) a powerhouse containing two generating units with a combined capacity of 200 kW, operating under a head of 127 feet; and (6) a 1,764-foot-long, transmission line tying into an existing Pacific Gas and Electric Company line. The average annual energy output would be 861,800 kWh.

Purpose of Exemption: An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

k. Purpose of Project: Project power will be sold to the Pacific Gas and Electric Company.

l. This notice also consists of the following standard paragraphs: A1, B, C and D3a.

62a. Type of Application: Preliminary Permit.

b. Project No: 7081–000.

c. Date Filed: February 14, 1983.

d. Applicant: County of Mono, California.

e. Name of Project: Leavitt Meadows Hydroelectric.

f. Location: On the West Walker River, within the Toiyabe National Forest in Mono County, California.

g. Filed Pursuant to: Federal Power Act, (16 U.S.C. 791(a)–825(r)).

h. Contact Person: Dr. Roy McDonald, Project Manager, County Courthouse, Bridgeport, California 93517.

i. Comment Date: June 6, 1983.

j. Description of Project: The proposed project would consist of: (1) a 96-foot-high, 1,150-foot-long concrete gravity or rock fill dam; (2) a reservoir with 26,000 acre-feet storage at normal pool elevation 7,211 feet; (3) a 5,500-foot-long pipeline; (4) a 60-inch-diameter, 650-foot-long penstock; (5) a powerhouse at approximate elevation 6,700 feet containing one or more generating units with a total capacity of 6.2 MW and an average annual output of 37 GWh; and (6) an approximately 3-mile-long transmission line.

A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a 36-month preliminary permit to conduct engineering, economic and environmental studies to ascertain project feasibility and to support an application for a license to construct and operate the project. Those studies would include core borings and test pits at the dam site, penstock route and powerhouse site. The Applicant has stated that new access roads are not necessary and that all disturbed lands would be restored. The estimated cost of the above activities is $200,000.

k. This notice also consists of the following standard paragraphs: A4b, A4c, A4d, B, C, and D2.

63a. Type of Application: Preliminary Permit.

b. Project No: 7087–000.

c. Date Filed: February 1, 1983.

d. Applicant: Southern Hydro Systems.

e. Name of Project: Startex Hydro Project.

f. Location: Startex, Spartanburg County, South Carolina.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: George Cooper, Route 1, Box 303, Piedmont, South Carolina 29673.

i. Comment Date: June 2, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing concrete dam approximately 54-foot high and 183-foot long; (2) a reservoir with an estimated storage capacity of 7 acres; (3) a steel penstock; (4) a powerhouse with a total installed capacity of 250 kW; (5) new transmission lines; and (6) appurtenant facilities. The Applicant estimates the average annual generation to be 1.0 GWh. All power generated would be sold to Duke Power Company.

k. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

Competing Applications

A1. Exemptions for Small Hydroelectric Power Project under 5MW Capacity—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, either a competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1982). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d).

A2. Applications for License—Anyone desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, either the competing application itself (see 18 CFR 4.33 (a) and (d), and Part 16, where applicable) or a notice of intent (see 18 CFR 4.33 (b) and (c)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or §§ 4.101 to 4.104 (1982).

A3. Public notice of the filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for license, exemption or preliminary permit, or notices of intent to file competing applications, will be accepted for filing in response to this notice (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate).

Any application for license or exemption from licensing, or notice of intent to file a license or an exemption application, must be filed in accordance with the Commission's regulations (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate).

Preliminary Permits

A4a. Existing Dam or Natural Water Feature Project—Anyone desiring to file a competing application for preliminary permit for a proposed project at an existing dam or natural water feature project, must submit the competing application to the Commission on or before 30-days after the specified comment date for the particular application (see 18 CFR 4.30 to 4.33 (1982)). A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

A4b. No Existing Dam—Anyone desiring to file a competing application for preliminary permit for a proposed project where no dam exists or there are proposed to be major modifications, must submit to the Commission on or before the specified comment date for the particular application, the competing application itself, or a notice of intent to file such an application (see 18 CFR 4.30 to 4.33 (1982)).

A4c. The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before the specified comment date for the particular application. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate).

A4d. Submission of a timely notice of intent to file an application for preliminary permit allows an interested person to file an acceptable competing application for preliminary permit no later than 60 days after the specified comment date for the particular application.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR §§ 385.210, 385.211, 385.214 (1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

Agency Comments

D1. License applications (5 MW or less capacity)—Federal, State, and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. No. 88-29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D2. Preliminary permit applications—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. Exemption applications (5 MW or less capacity)—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 408 of the Act, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. Exemption applications (Conduit)—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's

comments must also be sent to the Applicant's representatives.

Dated: April 15, 1983.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Energy Information Administration

Publication of Alternative Fuel Price Ceilings and Incremental Price Threshold for High Cost Natural Gas

The Natural Gas Policy Act of 1978 (NGPA) (Public Law 95-621) signed into law on November 9, 1978, mandated a new framework for the regulation of most facets of the natural gas industry. In general, under Title II of the NGPA, interstate natural gas pipeline companies are required to pass through certain protions of their acquistion costs for natural gas to industrial users in the form of a surcharge. The statute requires that the ultimate costs of gas to the industrial facility should not exceed the cost of the fuel oil which the facility could use as an alternative.

Pursuant to Title II of the NGPA, Section 204(e), the Energy Information Administration (EIA) herewith publishes for the Federal Energy Regulatory Commission (FERC) computed natural gas ceiling prices and the high cost gas incremental pricing threshold which are to be effective May 1, 1983. These prices are based on the prices of alternative fuels.

FOR FURTHER INFORMATION CONTACT:

Leroy Brown, Jr. Energy Information Administration, 1000 Independence Avenue SW., Room BE-034, Washington, D.C. 20585, Telephone: (202) 252-6077.

Section I.

As required by FERC Order No. 50, computed prices are shown for the 48 contiguous States. The District of Columbia's ceiling is included with the ceiling for the State of Maryland. FERC, by an Interim Rule issued on March 2, 1981, in Docket No. RM79-21, revised the methodology for calculating the monthly alternative fuel price ceilings for State regions. Under the revised methodology, the applicable alternative fuel price ceiling published for each of the contiguous States shall be the lower of the alternative fuel price ceiling for the State or the alternative fuel price ceiling for the multistate region in which the State is located.

The price ceiling is expressed in dollars per million British Thermal Units (BTU's). The method used to determine the price ceilings is described in Section III.

State	Dollars per million Btu's
Alabama	3.48
Arizona [1]	3.52
Arkansas [1]	3.43

[2] Region based price computed as the weighted average price of Regions E, F, G, and H.

Section II. Incremental Pricing Threshold for High Cost Natural Gas

The EIA has determined that the volume-weighted average price for No. 2 distillate fuel oil landed in the greater New York City Metropolitan area during February 1983 was $33.68 per barrel. In order to establish the incremental pricing threshold for high cost natural gas, as identified in the NGPA, Title II, Section 203(a)(7), this price was multiplied by 1.3 and converted to its equivalent in millions of BTU's by dividing by 5.8. Therefore, the incremental pricing threshold for high cost natural gas, effective May 1, 1983, is $7.55 per million BTU's.

Section III. Method Used To Compute Price Ceilings

The FERC, by Order No. 50, issued on September 29, 1979, in Docket No. RM79-21, established the basis for determining the price ceilings required by the NGPA. FERC also, by Order No. 167, issued in Docket No. RM81-27 on July 24, 1981, made permanent the rule that established that only the price paid for No. 6 high sulfur content residual fuel oil would be used to determine the price ceilings. In addition, the FERC, by Order No. 181, issued on October 6, 1981, in Docket No. RM81-28, established that price ceilings should be published for only the 48 contiguous States on a permanent basis.

A. Data Collected

The following data were required from all companies identified by the EIA as sellers of No. 6 high sulfur content (greater than 1 percent sulfur content by weight) residual fuel oil: for each selling price, the number of gallons sold to large industrial users in the months of December 1982, January 1983, and February 1983.[1] All reports of volume sold and price were identified by the State into which the oil was sold.

B. Method Used To Determine Alternative Price Ceilings

(1) Calculation of Volume-Weighted Average Price. The prices which will become effective May 1, 1983, (shown in Section I) are based on the reported price of No. 6 high sulfur content residual fuel oil, for each of the 48 contiguous States, for each of the 3 months, December 1982, January 1983, and February 1983. Reported prices for sales in December 1982 were adjusted by the percent change in the nationwide volume-weighted average price from December 1982 to February 1983. Prices for January 1983 were similarly adjusted by the percent change in the nationwide volume-weighted average price from January 1983 to February 1983. The volume-weighted 3-month average of the adjusted December 1982 and January 1983, and the reported February 1983 prices were then computed for each State.

(2) *Adjustment for Price Variation.* States were grouped into the regions identified by the FERC (see Section III.C.). Using the adjusted prices and associated volumes reported in a region during the 3-month period, the volume-weighted standard deviation of prices was calculated for each region. The volume-weighted 3-month average price (as calculated in Section 11. B. (1) above) for each state was adjusted

[1] Large Industrial User—A person/firm which purchases No. 6 fuel oil in quantities of 4,000 gallons or greater for consumption in a business, including the space heating of the business premises. Electric utilities, governmental bodies (Federal, State, or Local), and the military are excluded.

downward by two times this standard deviation for the region to form the adjusted weighted average price for the State.

(3) *Calculation of Ceiling Price.* The lowest selling price within the State was determined for each month of the 3-month period (after adjusting up or down by the percent change in oil prices at the national level as discussed in Section III.B (1) above). The products of the adjusted low price for each month times the State's total reported sales volume for each month were summed over the 3-month period for each State and divided by the State's total sales volume during the 3 months to determine the State's average low price. The adjusted weighted average price (as calculated in Section III. (2)) was compared to this average low price, and the higher of the values was selected as the base for determining the alternative fuel price ceiling for each State. For those States which had no reported sales during one or more months of the 3-month period, the appropriate regional volume-weighted alternative fuel price was computed and used in combination with the available State data to calculate the State alternative fuel price ceiling base. The State's alternative fuel price ceiling base was compared to the alternative fuel price ceiling base for the multistate region in which the State is located and the lower of these two prices was selected as the final alternative fuel price ceiling base for the State. The appropriate lag adjustment factor (as discussed in Section III.B .4) was then applied to the alternative fuel price ceiling base. The alternative fuel price (expressed in dollars per gallon) was multiplied by 42 and divided by 6.3 to estimate the alternative fuel price ceiling for the State (expressed in dollars per million BTU's).

There were insufficient sales reported in Region G for the months of December, January 1983, and February 1983. The alternative fuel price ceilings for the States in Region G were determined by calculating the volume weighted average price ceilings for Region E, Region F, Region G, and Region H.

(4) *Lag Adjustment.* The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which ceiling prices become effective. It was determined that *Platt's Oilgram Price Report* publication provides timely information relative to the subject. The prices found in *Platt's Oilgram Price Report* publication are given for each trading day in the form of high and low prices for No. 6 residual oil in 21 cities throughout the United States. The low posted prices for No. 6 residual oil in these cities were used to calculate a national lag adjustment factor was obtained by calculate a national and a regional lag adjustment factor. The national lag adjustment factor was obtained by calculating a weighted average price for No. 6 high sulfur residual fuel oil for the ten trading days ending April 14, 1983, and dividing that price by the corresponding weighted average price computed from prices published by Platt's for the month of February 1983. A regional lag adjustment factor was similary calculated for four regions. These are: one for FERC Regions A and B combined; on for FERC Region C; one for FERC Regions D, E, and G combined; and one for FERC Regions F and H combined. The low of the national or regional lag factor was then applied to the alternative fuel price ceiling for each State in a given region as calculated in Section III.B. (3).

Listing of States by Region

States were grouped by the FERC to form eight distinct regions as follows:

Region A	*Region B*
Connecticut	Delaware
Maine	Maryland
Massachusetts	New Jersey
New Hampshire	New York
Rhode Island	Pennsylvania
Vermont	

Region C	*Region D*
Alabama	Illinois
Florida	Indiana
Georgia	Kentucky
Mississippi	Michigan
North Carolina	Ohio
South Carolina	West Virginia
Tennessee	Wisconsin
Virginia	

Region E	*Region F*
Iowa	Arkansas
Kansas	Louisiana
Missouri	New Mexico
Minnesota	Oklahoma
Nebraska	Texas
North Dakota	
South Dakota	

Region G	*Region H*
Colorado	Arizona
Idaho	California
Montana	Nevada
Utah	Oregon
Wyoming	Washington

Issued in Washington, D.C., April 19, 1983.

Albert H. Linden, Jr.,
Deputy Administrator, Energy Information Administration.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Cases Filed; Week of March 25 Through April 1, 1983

During the Week of March 25 through April 1, 1983, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under DOE procedural regulations, 10 CFR Part 205, any person who will be aggrieved by the DOE action sought in these cases may file written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of the regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20461.

Dated: April 14, 1983.

George B. Breznay,
Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS

[Week of March 25 through April 1, 1983]

Date	Name and location of applicant	Case No.	Type of Submission
Mar 28, 1983	Cape Cod Hospital, Hyannis, Massachusetts	HEE-0064	Exception to the Energy Conservation Program. If granted: The Cape Cod Hospital would receive an exception from the provisions of 10 CFR Part 455, the Institutional Conservation Grant Program, regarding its application for an energy conservation grant.
Mar 28, 1983	Economic Regulatory Administration/Don's Shell, San Francisco, California	HRW-0015	Remedial Order, Finalization. If granted: A Proposed Remedial Order issued to Don's Shell on March 31, 1981, would be issued as a final Remedial Order.
Mar 28, 1983	Economic Regulatory Administration/Gorman Mobil, San Francisco, California.	HRW-0010	Remedial Order, Finalization. If granted: A Proposed Remedial Order issued to Gorman Mobil on January 17, 1981, would be issued as a final Remedial Order
Mar 28, 1983	Economic Regulatory Administration/Joe's Service Station—Mobil, San Francisco, California.	HRW-0012	Remedial Order, Finalization. If granted: A Proposed Remedial Order issued to Joe's Service Station—Mobil on March 26, 1981, would be issued as a final Remedial Order
Mar 28, 1983	Economic Regulatory Administration/Mac Brown Shell Service, San Francisco, California.	HRW-0014	Remedial Order, Finalization. If granted: A Proposed Remedial Order issued to Mac Brown Shell Service on May 29, 1981, would be issued as a final Remedial Order
Mar 28, 1983	Economic Regulatory Administration/Perkins Chevron Service, San Francisco, California.	HRW-0013	Remedial Order, Finalization. If granted: A Proposed Remedial Order issued to Perkins Chevron Service on May 29, 1981, would be issued as a final Remedial Order
Mar 28, 1983	Economic Regulatory Administration/Ray's Auto Service Center, San Francisco, California.	HRW-0016	Remedial Order, Finalization. If granted: A Proposed Remedial Order issued to Ray's Auto Service Center on March 31, 1981, would be issued as a final Remedial Order
Mar 28, 1983	Economic Regulatory Administration/William Blue, d.b.a. ARCO Service, San Francisco, California.	HRW-0011	Remedial Order, Finalization. If granted: A Proposed Remedial Order issued to William Blue d.b.a ARCO Service on March 26, 1981, would be issued as a final Remedial Order
Mar 28, 1983	Tommy Oil Company, Washington, D.C.	HRH-0120, HRD-0120.	Motions for Discovery and Evidentiary Hearing. If granted: Discovery would be granted and an evidentiary hearing would be convened in connection with the Statement of Objections submitted by Tommy Oil Company in response to a Proposed Remedial Order issued to the firm (Case No. HRO-0120)
Mar 29, 1983	Sigmund Diamond, New York, New York	HFA-0132	Appeal of an Information Request Denial. If granted: The March 14, 1983, Freedom of Information Request Denial issued by the Pennsylvania Section of the DOE Records Management Division would be rescinded and Sigmund Diamond would receive access to certain DOE information.
Mar 31, 1983	Office of Special Counsel, Washington, D.C.	HRZ-0141	Interlocutory Order. If granted: Texaco Inc. would be required to file a Statement of Legal Objections to the May 1, 1979, Proposed Remedial Order issued to the firm (Case No. DRO-0199).
Mar 31, 1983	W.R. Thomason, Inc., Martinez, California	HFA-0133	Appeal of an Information Request Denial. If granted: The March 9, 1983, Freedom of Information Request Denial issued by the DOE Idaho Operations Office would be rescinded and W.R. Thomason, Inc. would receive access to the certified payroll records of Bingham Mechanical and Metal Products, Inc., a DOE subcontractor
Apr. 1, 1983	Consolidated Materials, Inc., New Orleans, Louisiana	HRD-0121, HRH-0121	Motions for Discovery and Evidentiary Hearing. If granted: Discovery would be granted and an evidentiary hearing would be convened in connection with the Statement of Objections submitted in response to the Proposed Remedial Order issued to Consolidated Materials, Inc. (Case No. HRO-0107).

REFUND APPLICATIONS RECEIVED

[Week of March 25 to April 1, 1983]

Date	Name of refund proceeding/name of refund applicant	Case No.
Mar. 30, 1983	Richardson/Enterprises, Products, Inc.	RF26-3.
Mar. 28, 1983 through Apr. 1, 1983	Amoco Refund Applications	RF21-5237 through RF21-5716.

[FR Doc. 83-10460 Filed 4-19-83; 8:45 am]

BILLING CODE 6450-01-M

Establishment of New Subsystem of Records

AGENCY: Energy Department.

ACTION: Notice of Proposal to Establish a New Subsystem of Records.

SUMMARY: This Notice states the intent of the Department of Energy (DOE) to add a new subsystem to an existing system of records. The new Subsystem C, entitled Residential Energy Consumption Surveys (RECS), will be a part of DOE's system of records DOE-67, Participants in Experiments, Studies, and Surveys. DOE-67 was last published in full on April 2, 1982, at 47 FR 14325.

DATE: May 20, 1983.

ADDRESS: Written comments should be forwarded to Wendel Thomson, EI-621, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Joseph F. Harris, FOI and Privacy Acts Branch, MA-232, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-5955

Barbara Sherman, Office of General Counsel, GC-41, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-8618

SUPPLEMENTARY INFORMATION: The new subsystem is part of the Residential Energy Consumption Survey (RECS) currently being performed by the Energy Information Administration (EIA). The survey involves interviewing households regarding their energy consumption and contacting the household's fuel suppliers. The EIA has contracted with Response Analysis Corporation to collect the data. The authority for the RECS is Section 52 of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 *et seq.*; Pub. L. 93-275), as amended. The information from RECS will be used by the government and private groups for monitoring, modeling, and policymaking regarding energy consumption in U.S. households. In order to preserve the confidentiality of the data and to protect the privacy of the respondents, the contract provides that no individually identifiable data will be turned over to the EIA. The EIA will receive the detailed information for each household but without names, addresses, and other potentially identifying information. The data will be collected on Form EIA-457A-H; these forms have been approved by the Office of Management and Budget. In order to

collect additional data on household energy consumption and to identify changing patterns of enregy use, the collected data must be maintained in name retriveable form so as to allow for follow-up interviews.

Issued in Washington, DC, April 13, 1983.

William S. Heffelfinger,

Director of Administration.

DOE–67

SYSTEM NAME:

Participants in Experiments, Studies and Survey

* * * * *

Subsystem C: EIA–457 Survey Reports (Residential Energy Consumption Survey)

SYSTEM LOCATION:

* * * Subsystem C: Response Analysis Corporation, Route 206, Research Park, Princeton, NJ 08540. Portions of the system may be located with contractors or other entities involved in conducting the experiments, studies, or surveys, or in any DOE office. The contract with Response Analysis Corporation provides for the transfer of the subsystem directly to another contractor in the event the contract changes hands.

SECURITY CLASSIFICATION:

* * * Subsystem C: Unclassified.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

* * * Subsystem C: Persons responding to the Form EIA–457 (Residential Energy Consumption Survey) or a subsample thereof.

CATEGORIES OF RECORDS IN THE SYSTEM:

* * * Subsystem C: Name, age, sex, home address and telephone number, education, income, family size and composition, characteristics of housing unit and household vehicles, name and address of landlord, name and address of fuel suppliers and records of energy purchases.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

* * * Subsystem C: 5 U.S.C. 301, Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*, including authorities transferred to, and vested in, the Secretary of Energy under Title III of the Department of Energy Organization Act; Executive Order 12009; and Section 13(b) of the Federal Energy Administration Act of 1974.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

* * * Subsystem C: The records are used by EIA to analyze energy consumption in U.S. households. Information in this system may be disclosed to Federal agencies as well as other entities which are participating in research in connection with which the data were obtained. Information in the possession of the EIA must be disclosed upon request to any DOE office which determines that the information relates to its functions.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

* * * Subsystem C: Paper records, magnetic tape

RETRIEVABILITY:

* * * Subsystem C: By name, identification number and geographic location.

SAFEGUARD:

* * * Subsystem C: The paper records are kept in a secured building with access limited to those whose official duties require access; the building is locked during non business hours. Use of the records is permitted only to authorized employees of the contractor who sign an agreement that they will not disclose the records unless authorized to do so. In addition, access to the records on magnetic tape is controlled by a password known only to authorized employees who must work with the records.

RETENTION AND DISPOSAL:

* * * Subsystem C: It is expected that identification of individuals will be destroyed five (5) years after the information is collected under EIA–457.

SYSTEM MANAGER(S) AND ADDRESS:

* * * Subsystem C: Administrator, Energy Information Administration (or designee), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585.

NOTIFICATION PROCEDURES:

* * * Subsystem C:

a. Requests by an individual to determine if a system of records contains information about him/her should be directed to the Freedom of Information and Privacy Acts Branch, Department of Energy, Washington, DC 20585 in accordance with DOE's Privacy Act Regulations (10 CFR Part 1008 (45 FR 61576, September 16, 1980)).

b. Required identifying information: Complete name at the time of study, current name, address, and telephone number.

RECORDS ACCESS PROCEDURES:

* * * Subsystem C: Same as notification procedures above.

CONTESTING RECORD PROCEDURES:

* * * Subsystem C: Same as notification procedures above.

RECORDS SOURCE CATEGORIES:

* * * Subsystem C: The subject individual and utility companies authorized by the individuals to disclose consumption and bill information.

SYSTEM EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

* * * Subsystem C: None.

New System Report—New System of Records Subject to the Privacy Act

Residential Consumption Surveys Description of the Purpose of the Proposed System of Records:

Description of the Purpose of the Proposed System of Records: This system of records is the principal data collected by the Energy Information Administration (EIA) to satisfy the needs of the U.S. Government, State governments, industry, and the public for information at the national and subnational levels on the consumption and expenditures for fuels used by American homes. The data also include energy-related housing characteristics, appliance use, thermal characteristics of the housing unit, conservation measures taken by the household, demographic features of the household, weather conditions, vehicles and their use (mileage and fuel purchased). The EIA disseminates these data through published reports used by a wide range of public and private groups, special statistical reports to U.S. Government agencies, and distribution of the basic data on computer data files properly edited to protect the identity of the household.

Authority Under Which System Will Be Maintained: 5 U.S.C. 301, Department of Energy Organization Act, 42 U.S.C. 7101 *et seq.*, including authorities transferred to, and vested in, the Secretary of Energy under Title III of the Department of Energy Organization Act; Executive Order 12009; and Section 13(b) of the Federal Energy Administration Act of 1974.

Effect of the System on the Privacy of Individuals: The data in the system of records will be collected by Response Analysis Corporation. The information will be used by government and private groups for monitoring, modeling and policymaking regarding energy use in U.S. households. In order to preserve the confidentiality of the data and to protect the privacy of the respondents, the contract provides that no individually identifiable data will be turned over to EIA. The data received by EIA will be detailed for each household but without names, addresses or other potentially identifying information.

Risk of Unauthorized Disclosure: The paper records are kept in a secured building with access limited to those whose official duties require access; the building is locked during nonbusiness hours. Use of the records is permitted only to authorized employees of the contractor who sign an agreement that they will not disclose the records unless authorized to do so. In addition, access to the records on magnetic tape is controlled by a password known only to authorized employees who must work with the reports

BILLING CODE 6450-01-M

DEPARTMENT OF ENERGY

NUCLEAR REGULATORY COMMISSION

Compliance With Section 223 of the Nuclear Waste Policy Act of 1982

Correction

In FR Doc. 83-8149 beginning on page 13253 in the issue of Wednesday, March 30, 1983, the heading should have carried the names of the two agencies as set forth above. This was a joint document issued by the Department of Energy and the Nuclear Regulatory Commission.

BILLING CODE 1505-01-M

ENVIRONMENTAL PROTECTION AGENCY

[PF-322; PH-FRL 2350-3]

Certain Companies; Pesticide and Feed Additive Petitions; Ciba-Geigy Corp. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide and feed additive petitions relating to the establishment of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to: Product Manager (PM) 21, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 227, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency, the comments are to be identified by the document control number [PF-322] and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Henry Jacoby, (703-557-1930).

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide and feed additive petitions relating to the establishment of tolerances for residues of certain pesticide chemicals in or on certain commodites in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

A. Initial Filing

1. *FAP 3H5389.* Ciba-Geigy Corp., PO Box 18300, Greensboro, NC 27419. Proposes amending 21 CFR 561.273 by establishing a regulation permitting the combined residues of the fungicide metalaxyl [*N*-(2,6-dimethylphenyl)-*N*-(methoxyacetyl)alanine methyl ester] and its metabolites containing the 2,6-dimethylaniline moiety, and *N*-(2-hydroxymethyl-6-methylphenyl)-*N*-(methoxyacetyl)alanine methyl ester each expressed as metalaxyl in or on the commondities apple pomace, wet at 0.4 parts per million (ppm) and apple pomace, dry at 2.0 ppm.

2. *PP 3F2847.* Ciba-Geigy Corp. PO Box 18300, Greensboro, NC 27419.Proposes amending 40 CFR 180.408 by establishing a tolerance for the combined residues of the fungicide metalaxyl and the metabolites in or on the raw agricultural commodity apples at 0.2 ppm. The proposed analytical method for determining residues is gas chromatography with an alkali flame ionization detector.

3. *PP 3F2848.* Ciba-Geigy Corp. Proposed amending 40 CFR 180.408 by establishing a tolerance for the combined residues of the fungicide metalaxyl and the metabolites in or on the raw agricultural commodity raspberries at 0.5 ppm. The proposed analytical method for determining residues is gas chromatography with an alkali flame ionization detector.

4. *PP 3F2854.* Mobay Chemical Corp., PO Box 4913, Hawthorn Road, Kansas City, MO 64120. Proposes amending 40 CFR Part 180 by establishing tolerances for the combined residues of the fungicide beta-(4-chlorophenoxy-alpha-(1,1-dimethylethyl)-1*H*-1,2,4-triazole-1-ethanol and its metabolite 4-(4-chlorophenoxy)-2,2-dimethyl-4-(1*H*-1,2,4-triazol-1-yl)-1,3-butanediol in or on the raw agricultural commodities corn fresh (including sweet) (K+CWHR), grain of barley, corn, (including field and popcorn), oats, rye, and wheat, meat, fat, and meat byproducts of poultry at 0.05 ppm; green forage of barley, oats, rye, and wheat at 2.5 ppm; corn forage at 1.0 ppm; corn fodder, straw of barley, oats, rye, and wheat at 0.1 ppm; meat, fat, and meat byproducts of cattle, goats, hogs, horses, and sheep at 0.2 ppm; eggs at 0.005 ppm; and milk at 0.01 ppm. The proposed analytical method for determining residues is gas chromatography with an alkali flame detector.

(Sec. 408(d)(1), 68 Stat. 512 (7 U.S.C. 136)), (Sec. 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348))

Dated: April 11, 1983.

Robert V. Brown,

Acting Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[OPP-240030; PH-FRL 2350-4]

State Registration of Pesticides; Arizona et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received notices of registration of pesticides to meet special local needs under section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) from 17 States. A registration issued under this section of FIFRA shall not be effective for more than 90 days if the Administrator disapproves the registration or finds it to be invalid within that period. If the Administrator disapproves a registration or finds it to be invalid after 90 days, a notice giving that information will be published in the **Federal Register**.

DATE: The last entry for each item is the date the State registration of the product became effective.

FOR FURTHER INFORMATION CONTACT: Sandra English, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1122, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-2126).

SUPPLEMENTARY INFORMATION: Most of the registrations listed below were received by EPA in December, 1982. Receipts by EPA of State registrations will be published periodically. Except as indicated by (CUP) in 6 of the registrations listed below, there is no charged use pattern involved in any of these registrations.

Arizona

EPA SLN No. AZ 82 0021. Sandoz, Inc. Registration is for Thuricide HP WP, to be used on basil and coriander to control cabbage loopers. December 22, 1982.

EPA SLN No. AZ 82 0022. Sandoz, Inc. Registration is for Thuricide HPC, to be

used on basil and coriander to control cabbage loopers. December 22, 1982.

EPA SLN No. AS 82 0023. Sandoz, Inc. Registration is for Thuricide 32B, to be used on basil and coriander to control cabbage loopers. December 22, 1982.

Arkansas

EPA SLN No. AR 82 0032. FMC Corp. Registration is for Furadan 15G, to be used on soybeans to control nematodes. December 3, 1982.

EPA SLN No. AR 82 0034. FMC Corp. Registration is for Furadan 15G, to be used on young pine plantations and pines planted for Christmas trees to control Nantucket pine tip moths. December 3, 1982.

California

EPA SLN No. CA 82 0118. California Dept. of Health Services. Registration is for Baytex 4 Emulsifiable Insecticide, to be used on mosquito breeding areas to control mosquitoes. December 1, 1982.

EPA SLN No. CA 82 0119. Mallinckrodt, Inc. Registration is for Ornalin Contact Fungicide, to be used on roses to control gray mold. (CUP). December 20, 1982.

EPA SLN No. CA 82 0120. E. I. du Pont de Nemours and Co. Registration is for Du Pont Benlate Fungicide, to be used on seed crops to control powdery mildew. (CUP). December 30, 1982.

Florida

EPA SLN No. FL 82 0092. Rohm and Haas Co. Registration is for Dithane FL with Zinc, to be used on corn (field and popcorn) to control *Helminthosporium* leaf blight. (CUP). December 1, 1982.

EPA SLN No. FL 82 0093. Fairfield American Corp. Registration is for Permanone Tick Repellent, to be used on clothing to control ticks. December 7, 1982.

EPA SLN No. FL 82 0094. Gustafson, Inc. Registration is for Vitavax=200 FL Fungicide, to be used on rye to control seed and seedling diseases and loose smut. (CUP). December 7, 1982.

Georgia

EPA SLN No. GA 82 0020. FMC Corp. Registration is for Furadan 15 GR, to be used on young southern pine plantations and pines planted for Christmas trees to control Nantucket pine tip moths. December 15, 1982.

Louisiana

EPA SLN No. LA 82 0037. FMC Corp. Registration is for Furadan 15G, to be used on soybeans to control nematodes. December 13, 1982

EPA SLN No. LA 82 0038. FMC Corp. Registration is for Furadan 15G, to be used on pine Christmas trees to control Nantucket pine tip moths. December 13, 1982.

Minnesota

EPA SLN No. MN 82 0014. Ciba-Geigy Corp. Registration is for Princep 4G Herbicide, to be used on tree plantations for timber to control annual weeds. December 3, 1982.

EPA SLN No. MN 82 0015. ICI Americas Inc. Registration is for Gramoxone Paraquat Herbicide, to be used on Kentucky bluegrass seed fields for desiccation to facilitate burning. December 21, 1982.

EPA SLN No. MN 82 0016. Diamond Shamrock Corp. Registration is for Ectrin Insecticide 10 Water Dispersible Liquid, to be used on livestock and their premises to control flies, lice, and ticks. December 21, 1982.

Mississippi

EPA SLN No. MS 82 0047. Platte Chemical Co. Registration is for Clean Crop Methyl Parathion 4–E, to be used on cottonwood plantations to control cottonwood borers. December 6, 1982.

Nebraska

EPA SLN No. NE 82 0023. O. M. Scott and Sons Co. Registration is for Scotts Proturf Insecticide 4, to be used on golf course fairways, tees, greens, and roughs to control white grubs, sod webworms, chinch bugs, mole crickets, and *Hyperodes* weevils. December 21, 1982.

EPA SLN No. NE 82 0024. Helena Chemical Co. Registration is for Aatram 20G, to be used on sorghum to control weeds. December 21, 1982.

New Jersey

EPA SLN No. NJ 82 0023. ICI Americas Inc. Registration is for Ectiban EC, to be used on dairy cattle, goats, horses, sheep, poultry, and swine and their premises to control flies, mosquitoes, ticks, lice, sheep keds, ear ticks, northern fowl mites, and manage. December 10, 1982.

EPA SLN No. NJ 82 0024. E.I. du Pont de Nemours and Co. Registration is for Du Pont Sinbar Weed Killer, to be used on alfalfa to control weeds. December 20, 1982.

New Mexico

EPA SLN No. NM 82 0023. E.I. du Pont de Nemours and Co. Registration is for Du Pont Velpar L Weed Killer, to be used on rangelands to control undesirable woody plants. December 23, 1982.

New York

EPA SLN No. NY 82 0012. E.I. du Pont de Nemours and Co. Registration is for Du Pont Benlate Fungicide, to be used on *Brassica* crops to control seed-borne blacklegs. (CUP). December 21, 1982.

Oklahoma

EPA SLN No. OK 82 0029. Ciba-Geigy Corp. Registration is for Bicep Herbicide, to be used on Bermuda grass along highways to control annual weeds. December 9, 1982.

Tennessee

EPA SLN No. TN 82 0025. FMC Corp. Registration is for Furadan 15G, to be used on soybeans to control nematodes. December 14, 1982.

EPA SLN No. TN 82 0026. FMC Corp. Registration is for Furadan 15 GR, to the used on young southern pine plantations and pines planted for Christmas trees to control Nantucket pine tip moths. December 22, 1982.

EPA SLN No. TN 82 0027. FMC Corp. Registration is for Furadan 15 GR, to the used on dark-fired tobacco to control flea beetles. December 22, 1982.

Texas

EPA SLN No. TX 82 0061. FMC Corp. Registration is for Pounce 3.2, to be used on spinach to control cabbage loopers and other insects. December 15, 1982.

EPA SLN No. TX 82 0062. ICI Americas Inc. Registration is for Ambush EC, to be used on spinach to control cabbage loopers and other insects. December 15, 1982.

EPA SLN No. TX 82 0063. Valley Co-op Oil Mill. Registration is for Methyl Parathion 4–EC, to be used on cotton to control thrips, yellow-striped armyworms, cotton leafworms, boll weevils, and bollworms. December 17, 1982.

Virginia

EPA SLN No. VA 82 0038. Olin Corp. Registration is for Terraclor 10% GR, to be used on peanuts to control *Sclerotinia* blight (*Sclerotinia minor*). (CUP). December 29, 1982.

Washington

EPA SLN No. WA 82 0074. FMC Corp. Registration is for Thiodan 50 W, to be used on Douglas fir Chirstmas trees, seed orchards, and nurseries to control colley spruce gall aphids, and Douglas fir needle midges. December 6, 1982.

Dated: April 11, 1983.

Robert V. Brown,

Acting Director, Registration Division.

[FR Doc. 83–10454 Filed 4–19–83; 8:45 am]

BILLING CODE 6560–50–M

[PF-321; PH FRL 2348-5]

Certain Companies; Pesticide, Food and Feed Additive Petitions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide, food, and feed additive petitions relating to the establishment and/or amendments of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to: Product Manager (PM) 12, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending before the Agency. The comments are to be identified by the document control number [PF-321] and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Jay Ellenberger, 703-557-2386.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following pesticide, food, and feed additive petitions relating to the establishment and/or amendments of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

Initial Petitions

1. *PP 3F2843.* E.I. du Pont de Nemours & Co., Wilmington, DE 19898. Proposes amending 40 CFR 180.253 by establishing tolerance for the residues of the insecticide methomyl (S-methyl *N*-[(methylcarbamoyl)oxyl] thioacetimidate in or on the commodities; pineapples at 0.2 part per million (ppm), and pineapple forage at 1.0 ppm. The proposed analytical method for determining residues is microcoulometric gas chromatography.

2. *FAP 9H5217.* ICI American Inc., Wilmington, DE 19897. Proposes amending 21 CFR Part 561 by establishing a regulation permitting residues of the insecticide pirimiphos-methyl, *O*-(2-diethylamino-6-methylpyrimidin-4-yl) *O,O*-dimethylphosphorothioate, the metabolite *O*-2-ethylamino-6-methylpyrimidin-4-yl) *O,O*-dimethylphosphorothioate and in free and conjugated form the metabolites 2-diethylamino-6-methylpyrimidin-4-ol, 2-ethylamino-6-methylpyrimidin-4-ol and 2-amino-6-methylpyrimidin-4-ol on the commodities rice hulls at 60.0 ppm, rice milling fractions at 50.0 ppm, and wheat milling fractions at 50.0 ppm.

3. *FAP 9H5217.* ICI Americas Inc. Proposes amending 21 CFR Part 193 by establishing a regulation permitting residues of pirimiphos-methyl and the above metabolite in or on the commodities rice milling fractions at 50.0 ppm, and wheat milling fractions at 50.0 ppm.

Amended Petitions

1. *PP 2F2631.* Shell Oil Co., 1025 Connecticut Ave., NW., Washington, D.C. 20036. EPA issued a notice published in the **Federal Register** of March 3, 1982 (47 9068) that announced that Shell Oil Co. had submitted pesticide petition 2F2631 to the Agency proposing to amend 40 CFR 180.362 by increasing tolerances for the combined residues of hexakis (2-methyl-2-phenylpropyl)distanoxane and its organotin metabolite calculated as haxakis (2-methyl-2-phenylpropyl)-distanoxane in or on raw agricultural commodities apples, pears, and citrus fruits from 4.0 to 15.0 ppm.

Shell has amended the petition further by increasing the tolerance on citrus fruits from 15.0 to 20.0 ppm. The proposed analytical method for determining residues is gas-liquid chromatography using a tin selective flame photometric detector.

2. *FAP 2H5336.* Shell Oil Co. EPA issued a notice published in the **Federal Register** of March 3, 1982 (47 FR 9068) that announced that Shell had submitted a feed additive petition 2H5336 to the Agency proposing to amend 21 CFR 561.255 by increasing tolerances for the established tolerance levels for the combined residues of hexakis and its organotin metabolites in or on the commodities dried apple pomace from 20.0 to 75.0 and dried citrus pomace from 7.0 to 30.0 ppm.

Shell now amends the petition by increasing the tolerance level on dried citrus pomace from 30.0 ppm to 35.0 ppm.

3. *PP 3F2778.* Dow Chemical Co., P.O. Box 1706, Midland, MI 48640. EPA issued a notice published in the **Federal Register** of December 22, 1982 (47 FR 57128), that announced that Dow Chemical Co. had submitted pesticide petition 3F2778 to the Agency proposing to amend 40 CFR 180.342 by establishing tolerances for the combined residues of the insecticide chloropyrifos (*O,O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothioate) in or on the commodities almonds at 0.05 ppm, walnuts at 0.2 ppm, and almond hulls at 12.0 ppm.

Dow has amended the petition by increasing the tolerance level on almonds from 0.05 to 0.2 ppm. The proposed analytical method for determining residues is gas chromatography using electron capture detector.

4. *PP OF2423.* Dow Chemical Co. EPA issued a notice published in the **Federal Register** of October 23, 1980 (45 FR 70312) that announced that Dow Chemical Co., has submitted pesticide petition OF2423 to the Agency proposing to amend 40 CFR 180.342 by establishing tolerances for the combined residues of the insectide chloropyrifos-methyl [*O,O*-dimethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothioate] and its metabolite 3,5,6-trichloro-2-pyridyinol in or on the following raw agricultural commodities: barley, corn, oats, rice, sorghum, and wheat grain at 6.0 ppm; eggs at 0.05 ppm; milk, fat at 0.1 ppm; milk, whole at 0.02 ppm; meat of cattle, goats, hogs, horses, and sheep at 0.1 ppm; fat of cattle, goats, and sheep at 0.2 ppm; fat of hogs and horses at 0.3 ppm; meat byproducts of cattle, goats, and sheep at 1.0 ppm; meat byproducts of hogs and horses 0.5 ppm; and meat fat and meat byproducts of poultry at 0.05 ppm.

Dow has amended the petition by increasing the tolerances on poultry fat from 0.05 to 0.1 ppm, and milk fat from 0.1 to 0.5 ppm. The proposed analytical method for determining residues is by liquid chromatography.

(Sec. 408(d)(1), 68 Stat. 512, (7 U.S.C. 136); 409(b)(5), 72 Stat. 1786, (21 U.S.C. 348))

Dated: April 7, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

Certain Pesticide Products; Intent To Cancel Registration: Shell Oil Co. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice lists the name of firms requesting voluntary cancellation of registration of their pesticide products in compliance with section 6(a)(1) of the

Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended. Production of these products after the effective date of cancellation will be considered a violation of the Act unless continued registration is requested.

EFFECTIVE DATE: May 20, 1983.

ADDRESS: Written comments to: Program Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202

FOR FURTHER INFORMATION CONTACT: Lela Sykes, Process Coordination Branch (TS–767C), Registration Division, Office of Pesticide Programs, Environmental Protection Agency, Rm. 706, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–7406).

SUPPLEMENTARY INFORMATION: EPA has been advised by the following firms of their intent to voluntarily cancel registration of their pesticide products.

Registration No.	Product name	Registrant	Date registered
201–350	Shell D–D/PIC Soil Fumigant	Shell Oil Company, 1025 Connecticut Ave. NW., Washington, D.C. 20036	Nov. 6, 1973.
279–2222	PCNB 10ZINEB 10 Soil Treater	FMC Corporation, 2000 Market Street, Philadelphia, PA 19103	June 8, 1965.
279–2354	Lanstan 10 PCNB 4 Granular	do	Dec. 9, 1965.
279–2975	Captan Terraclor 10–10 Soil Treater	do	Oct. 31, 1968.
299–122	Martin's Wettable Dusting Sulfur	C. J. Martin Company, P.O. Box 1089, Nacogdoches, TX 75961	Apr. 25, 1967.
399–5	Triple-X Sulphur Candles	Triple X Chemcial Lab., 841 Skokie Road, Lake Bluff, IL 60044	Jan. 31, 1973.
400–338	TH Servin 5 Thiodan 1.5 Dust	Uniroyal Chemical, 74 Amity Road, Bethany, CT 06525	May 16, 1969.
400–342	TH Thiodan Miscible with Pyrenone Insecticide.	do	Apr. 21, 1972.
524–303	Granular Ramrod Atrazine 24	Monsanto Company, 1101 17th St. NW., Suite 604, Washington, D.C. 20036	Jan. 22, 1973.
539–67	Sears Wettable Dusting Sulphur	Sears Roebuck & Company, Sears Tower, Department 766, 68th Floor, Chicago, IL 60684.	July 21, 1949.
557–1458	Vigoro Rose & Floral Spray	Estech General Chemicals Corp., 30 N. LaSalle Street, Chicago, IL 60602	Jan. 27, 1964.
595–268	Haviland Atrazine Linuron Weed Killer	Haviland Agricultural Chem. Co., 1845 Sterling, NW, Grand Rapids, MI 495502	Mar. 21, 1966.

8501–17	Moss Stop	Pace National Corp., 500 7th Ave., South, Kirkland, Washington 98033	Jan. 17, 1972.
8590–229	Agway Wettable Sulfur Dust or Spray	Agway, Inc., P.O. Box 4741, Syracuse,, NY 13221	Aug. 10, 1966.
8590–271	Agway Corn Herbicide	do	Apr. 11, 1967.
9241–5	Poco Q-San	The Powell Company, Inc., 700 North Main Street, Lima, OH 45801	Oct. 19, 1962.
9779–248	Harlequin Vegetable Dust	Riverside Chemical Company, A Subsidiary of Terra Chemicals Int'l. Inc., P.O. Box 1828, Sioux City, IA 51102.	Sept. 16, 1976.
9792–1	Copercyd Pure Metalic Cooper Anitfouling Boat Bottom Coating.	James B. Day & Company, Company Day Lane, Carpentersville, IL 60110	Nov. 24, 1967.
10184–1	Pomas #101 Antifouling Gel Coate	PMS Consolidated, 109 New Brunswick Road, Somerset, NJ 08873	Apr. 14, 1969.
10184–2	Pomas #102 Antifouling Gel Coate	do	Apr. 14, 1969.
34704–148	E–Z Flo Dichlone 3 Dust	Platte Chemical Company, P.O. Box 667, Greeley, CO 80632	Feb. 27, 1959.
34704–166	E–Z Flo Phygon Sulfur Dust	do	Mar. 26, 1965.
34704–184	E–Z Flo Dichlone Sulfur 1–5.–30 Dust	do	Sept. 8, 1966.
44313–1	Roach–Kil	R–Value Inc., P.O. Box 2235, Smyrna, GA 30080	May 23, 1980.
46946–80	De-Pester Thio, Karathan 3–1	Uniroyal Chemical, 74 Amity Road, Bethany, CT 06525	Nov. 13, 1967.
46946–85	De-Pester Thio 4% Dust	do	Feb. 16, 1968.
46946–62	De–Pester Thio 3% Dust	do	Aug. 16, 1966.
46946–101	De-Pester Thio-Sulfur 4–50	do	June 5, 1968.
46946–102	De-Pester Thio-Sulfur 3–50	do	May 28, 1968.
46946–116	De-pester Thio-Sulfur A–75	do	Feb. 4, 1969.
46946–189	TH Thiodan 3 Dust Insecticide	do	Apr. 21, 1972.

The Agency has agreed that such cancellation shall be effective May 20, 1983 unless within this time the registrant, or other interested person with the concurrence of the registrant, requests that the registration be continued in effect. The registrants were notified by certified mail of this action.

The Agency has determined that the sale and distribution of these products produced on or before the effective date of cancellation may legally continue in commerce until the supply is exhausted, or for 1 year after the effective date of cancellation, whichever is earlier; provided that the use of these products is consistent with the label and labeling registered with EPA. Furthermore, the sale and use of existing stocks have been determined to be consistent with the purposes of FIFRA as amended. production of these products as pesticide formulations after the effective date of cancellation will be considered to be a violation of the Act.

Requests that the registration of these products be continued, may be submitted in triplicate to the Process Coordination Branch, Registration Division (TS–767), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460.

Comments may be filed regarding this notice. Written comments should bear a notation indicating the document control number "[OPP–66100]" and the specific registration number. Any comments filed regarding this notice will be available for public inspection in the Rm. 236, CM#2, at the above address from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

Sec. 6(a)(1) of FIFRA as amended 86 Stat. 973 89 Stat. (751, 7 U.S.C. 136))

Dated: April 6, 1983.

State Registration of Pesticides; Alabama et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received notices of registration of pesticides to meet special local needs under section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) from 23 States. A registration issued under this section of FIFRA shall not be effective for more than 90 days if the Administrator disapproves the registration or finds it to be invalid within that period. If the Administrator disapproves a registration or finds it to be invalid after 90 days, a notice giving that information will be published in the **Federal Register**.

DATE: The last entry for each item is the date the State registration of the product became effective.

FOR FURTHER INFORMATION CONTACT: Sandra English, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1122, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2126).

SUPPLEMENTARY INFORMATION: Most of the registration listed below were received by EPA in October 1982. Receipts by EPA of state registrations will be published periodically. Except as indicated by (CUP) in 8 of the registrations listed below, there is no changed use pattern involved in any of these registrations.

Alabama

EPA SLN No. AL 82 0036. Red Panther Chemical Co. Registration is for Red Panther Ethylene Dibromide 90, to be used on soybeans to control lance, spiral, sting, and moderate infestations of cyst and root-knot nematodes. October 7, 1982.

Arizona

EPA SLN No. AZ 82 0019. E. I. du Pont de Nemours and Co. Registration is for Du Pont Lannate Insecticide, to be used on onions (green and dry) to control beet armyworms, thrips, and variegated cutworms. October 29, 1982.

EPN SLN No. AZ 82 0020. E. I. du Pont de Nemours and Co. Registration is for Du Pont Lannatre L Insecticide, to be used on onions (green and dry) to control beet armyworms, thrips, and variegated cutworms. October 29, 1982.

California

EPA SLN No. CA 82 0078. Diamond Shamrock Corp. Registration is for Ectrin Insecticide 10% Water Dispersible Liquid, to be used on livestock and their premises to control flies, lice, and ticks. October 18, 1982.

EPA SLN No. CA 82 0088. Shell Chemical Co. Registration is for D.D., to be used on nursery stock growing grounds to control plant parasitic nematodes. (CUP). October 12, 1982.

EPA SLN No. CA 82 0100. Chevron Chemical Co. Registration is for Ortho Paraquat CL, to be used on grapes to control emerged annual weeds and grasses. October 4, 1982.

EPA SLN No. CA 82 0101. Mobay Chemical Corp. Registration is for Nemacur 3, to be used on cotton to control nematodes and thrips. (CUP). October 4, 1982.

EPA SLN No. CA 82 0102. ICI Americas Inc. Registration is for Gramoxone Paraquat Herbicide, to be used on grapes to control emerged annual weeds and grasses. October 4, 1982.

EPA SLN No. CA 82 0103. Mobay Chemical Corp. Registration is for Metasystox R Spray Concentrate to be used on peppers to control leafhoppers. October 29, 1982.

EPA SLN No. CA 82 0104. Mobay Chemical Corp. Registration is for Metasystox R Spray Concentrate to be used on melons to control leafhoppers. October 29, 1982.

EPA SLN No. CA 82 0107. Vertac Chemical Corp. Registration is for Premerge 3, to be used on dormant grapes to control dead arm and susceptible broadleaf and grassy weeds October 18, 1982.

EPA SLN No. CA 82 0108. California Dept. of Agriculture. Registration is for Bromo Gas (liquid) Dow Fume MC 2, to be used on nursery stock growing grounds to control *Phytophthora cinnamoni* and plant parasitic nematodes. October 26, 1982.

EPA SLN No. CA 82 0109. Sonoma County Agricultural Commissioner. Registration is for Pocket Gopher Bait Strychnine Treated Grain (2.63%), to be used in artificial burrows to control gophers. October 26, 1982.

EPA SLN No. CA 82 0110. Sonoma County Agricultural Commissioner. Registration is for Pocket Gopher Bait Strychnine Treated Grain (0.29%), to be used in artificial burrows to control gophers. October 26, 1982.

EPA SLN No. CA 82 0112. Orange County Agricultural Commissioner. Registration is for Feral Pigeon and Crow Bait Starlicide Treated Grain (0.37%), to be placed in feeding areas to control pigeons and crows. October 28, 1982.

Florida

EPA SLN No. FL 82 0084. The Land, Epcot Center. Registration is for Orthene 75 S, to be used on various crops to control thrips, fleahoppers, whiteflies, cutworms, and aphids. October 12, 1982.

EPA SLN No. FL 82 0085. The Land, Epcot Center. Registration is for Dibrom 8 Emulsive, to be used on various crops to control grasshoppers, mites, cutworms, whiteflies, and aphids. October 12, 1982.

EPA SLN No. FL 82 0086. The Land, Epcot Center. Registration is for Ridomil 2E, to be used on various crops to control Pythium damping-off and *Phytophthora*. (CUP). October 12, 1982.

EPA SLN No. FL 82 0087. The Land, Epcot Center. Registration is for Phaltan 50 Wettable, to be used on various crops to control powdery and downy mildew. (CUP). October 12, 1982.

EPA SLN No. FL 82 0088. The Land, Epcot Center. Registration is for Orthocide 50 WP, to be used on various crops to control *Botrytis*, Pythium damping-off, gray leaf spot, and downy mildew. (CUP). October 12, 1982.

Georgia

EPA SLN No. GA 82 0019. Mobay Chemical Corp. Registration is for Oftanol 5% GR, to be used on turf grasses to control white grub larvae, *Hyperodes* weevils, billbugs, chinch bugs, and sod webworms larvae. October 6, 1982.

Idaho

EPA SLN No. ID 82 0031. American Hoechst Corp. Registration is for Hoelon 3EC Herbicide, to be used on fall-planted wheat to control downy brome and ripgut brome as germination occurs. October 1, 1982.

Illinois

EPA SLN No. IL 82 0021. Mobay Chemical Corp. Registration is for Furadan 10 GR, to be used on cucurbits (cucumbers, melons, squash, and pumpkins) to control nematodes and striped and spotted cucumber beetles. October 7, 1982.

EPA SLN No. IL 82 0022. Motomco Ltd. Registration is for Contrax-P, to be used on orchards or groves to control meadow and pine mice and voles. October 22, 1982.

Kansas

EPA SLN No. KS 82 0020. Mobay Chemical Corp. Registration is for Sencor 50% WP, to be used on winter wheat to control grasses and broadleaf weeds. October 5, 1982.

EPA SLN No. KS 82 0021. Mobay Chemical Corp. Registration is for Sencor 4 FL, to be used on winter wheat to control grasses and broadleaf weeds. October 5, 1982.

EPA SLN No. KS 82 0022. Mobay Chemical Corp. Registration is for Sencor DF, to be used on winter wheat to control grasses and broadleaf weeds. October 5, 1982.

EPA SLN No. KS 82 0023. Philips Roxane, Inc. Registration is for Anchor Permectrin 25% WP Long Lasting Barn and Premise Fly Spray, to be used on horse, beef, dairy, swine, and poultry premises to control house, stable, and false stable flies. October 29, 1982.

Mississippi

EPA SLN No. MS 82 0043. Monsanto Co. Registration is for Roundup Herbicide, to be used on roadside Bermuda grass to control Johnson grass. October 25, 1982.

Montana

EPA SLN No. MT 82 0013. American Hoechst Corp. Registration is for Hoelon 3EC Herbicide, to be used on winter wheat to control downy brome and ripgut brome as germination occurs. October 19, 1982.

EPA SLN No. MT 82 0014. Burroughs Welcome Co. Registration is for Atroban 11% EC, to be used on livestock premises to control files, mites, ticks, and lice. October 26, 1982.

New Jersey

EPA SLN No. NJ 82 0018. Stauffer Chemical Co. Registration is for Captan 50 WP—Captan 80 WP, to be used on blueberries to control *Botrytis* fruit rot, anthracnose fruit rot, and mummy berries. (CUP). October 6, 1982.

North Carolina

EPA SLN No. NC 82 0028. Shell Chemical Co. Registration is for Pydrin Insecticide 2.4 EC, to be used on soybeans to control Mexican bean beetles, green cloverworms, velvetbean caterpillars, potato leafhoppers, cabbage loopers, corn earworms, southern green stinkbugs, and bean leaf beetles. October 21, 1982.

EPA SLN No. NC 82 0029. E.I. du Pont de Nemours and Co. Registration is for Du Pont Tersan 1991 Turf Fungicide, to be used on Bermuda grass turf to control spring deadspot disease. (CUP). October 21, 1982.

EPA SLN No. NC 82 0030. U.S. Dept. of Agriculture. Registration is for Proturf Insecticide, to be used on turf to control grubs. October 21, 1982.

North Dakota

EPA SLN No. ND 82 0019. Agsco, Inc. Registration is for Agsco DB-Green + Vitavax Seed Treatment, to be used on wheat, oats, barley, and corn seeds to control smuts, seed decay, and seedling blight and for temporary protection of seeds and seedlings against wireworms. October 20, 1982.

EPA SLN No. ND 82 0020. Farmers Union Central Exchange, Inc. Registration is for Cenex E.P. Herbicide to be used on spring barley and spring and winter wheat to control broadleaf weeds. October 21, 1982.

Ohio

EPA SLN No. OH 82 0019. Mobay Chemical Corp. Registration is for Furadan 4 F, to be used on soybeans to control root-knot, cyst, stunt, ring, spiral, lesion, lance, dagger and stubby-root nematodes. October 28, 1982.

EPA SLN No. OH 82 0020. Fairfield American Corp. Registration is for Permanone Tick Repellent, to be used on clothing to control ticks. October 28, 1982.

Oklahoma

EPA SLN No. OK 82 0028. Burroughs Wellcome Co. Registration is for Atroban 11% EC, to be used on animals and their premises to control flies. October 1, 1982.

Oregon

EPA SLN No. OR 82 0066. American Hoechst Corp. Registration is for Hoelon 3EC Herbicide, to be used on fallplanted wheat to control bromes. October 1, 1982.

EPA SLN No. OR 82 0067. Wilbur-Ellis Co. Registration is for Wilbur-Ellis Snail and Slug Bait, to be used on all crops to control slugs or snails. October 4, 1982.

EPA SLN No. OR 82 0068. The Chas. H. Lilly Co. Registration is for Miller's Wipe Out Slug and Snail Bait (pelleted), to be used on clover and wheat to control slugs and snails. October 13, 1982.

EPA SLN No. Or 82 0069. Chevron Chemical Co. Registration is for Ortho Slug-Geta Snail and Slug Bait, to be used prior to planting crops such as clover or wheat to control slugs and snails. October 15, 1982.

Pennsylvania

EPA SLN No. PA 82 0022. ICI Americas Inc. Registration is for Gramoxone Paraquat Herbicide, to be used on alfalfa to control weeds between cuttings. October 8, 1982.

EPA SLN No. PA 82 0023. Burroughs Wellcome Co. Registration is for Atroban 11% EC, to be used on livestock and their premises to control flies, lice, and ticks. October 25, 1982.

South Dakota

EPA SLN No. SD 82 0010. Shell Chemical Co. Registration is for Shell Bladex 80W Herbicide and Bladex 4L, to be used on corn to control grasses and broadleaf weeds. October 18, 1982.

Tennessee

EPA SLN No.TN 82 0024. O.M. Scott and Sons Co. Registration is for Proturf Insecticide, to be used on cool season grasses to control sod webworms, chinch bugs, mole crickets, and *Hyperodes* weevils. October 18, 1982.

Texas

EPA SLN No. TX 82 0057. Ciba-Geigy Corp. Registration is for D Z N Diazinon AG500, to be used on winter wheat to control white grubs. October 20, 1982.

EPA SLN No. TX 82 0058. Ciba-Geigy Crop. Registration is D Z N Diazinon

50W, to be used on winter wheat to control white grubs. October 20, 1982.

EPA SLN No. TX 82 0059. Ciba-Geigy Crop. Registration is for D Z N Diazinon 14G, to be used on winter wheat to control white grubs. October 20, 1982.

Utah

EPA SLN No. UT 82 0011. Dow Chemical U.S.A. Registration is for Tordon 22K Weed Killer, to be used on rangeland and permanent grass pastures to control yellow star thistles, scotch thistles, must thistles, ox-eye daisies, diffuse knapweeds, spotted knapweeds, henbanes, buffalo burs, rabait brush . *spp.*, tansy ragworts, Canada thistles, rush skeletonweeds, Russian knapweeds, dalmation toadflaxes, gorses, leafy spurges, larkspurts, field bindweeds, and poison oak. October 22, 1982.

Washington

EPA SLN No. WA 820062. E. I. du Pont de Nemours and Co. Registration is for Du Pont Krovar I Weed Killer, to be used on noncropland to control grass and broadleaf weeds. October 1, 1982.

EPA SLN No. WA 82 0063. Great Lakes Chemical Corp. Registration is for Terr-O-Gas 75, to be used on onions (dry bulb) to control White rot. (CUP) October 19, 1982.

EPA SLN No. WA 82 0064. American Hoechst Corp. Registration is for Heolon 3EC Herbicide, to be used on fallplanted wheat to control certain bromes. October 1, 1982.

EPA SLN No. WA 82 0065. Platte Chemical Co., Inc. Registration is for Clean Crop Spud Nic 4, to be used on potatoes to prevent sprouting. October 19, 1982.

West Virginia

EPA SLN No. WV 82 0010. ICI Americas Inc. Registration is for Gramoxone Paraquat Herbicide, to be used on alfalfa for weed control between cuttings. October 1, 1982.

Dated: April 6, 1983.

BILLING CODE 6560-50-M

[OPP-240029; PH-FRL 2346-2]

State Registration of Pesticides; Alabama et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received notices of registration of pesticides to meet special local needs under section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) from 23 States. A registration issued under this section of FIFRA shall not be effective for more than 90 days if the Administrator disapproves the registration or finds it to be invalid within that period. If the Administrator disapproves a registration or finds it to be invalid after 90 days, a notice giving that information will be published in the **Federal Register**.

DATE: The last entry for each item is the dat the State registration of the product became effective.

FOR FURTHER INFORMATION CONTACT: Sandra English, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 1122, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2126).

SUPPLEMENTARY INFORMATION: Most of the registrations listed below were received by EPA in November, 1982. Receipts by EPA of State registrations will be published periodically. Except as indicated by (CUP) in seven of the registrations listed below, there is no changed use pattern involved in any of these registrations.

Alabama

EPA SLN No. AL 82 0037. Diamond Shamrock Corp. Registration is for Ectrin Insecticide 10 Water Dispersible Liquid, to be used on livestock and their premises to control flies, lice, and ticks. November 30, 1982.

California

EPA SLN No. CA 82 0059. Degesch America, Inc. Registration is for Degesch Phostoxin Coated Pellets-Prepak, New Coated Tablets-R, and Phostoxin Coated Pellets, to be used on animal feed to control Hessian flies. November 22, 1982.

EPA SLN No. CA 82 0105. Stanislaus County Dept. of Agriculture. Registration is for Plictran 50W Miticide and Ortho Plictran 50W Miticide, to be used on almonds, nectarines, peaches, plums, prunes, and walnuts to control mites. November 1, 1982.

EPA SLN No. Ca 82 0106. Merced County Dept. of Agriculture. Registration is for Plictran 50 W Miticide and Ortho Plictran 50 W Miticide, to be used on strawberries to control mites. November 1, 1982.

EPA SLN No. CA 82 0111. Stanislaus County Dept. of Agriculture. Registration is for Ortho Paraquat CL Devrinol 50 WP, to be used on nonbearing kiwis to control weeds listed on the registered labels. November 1, 1982.

EPA SLN No. CA 82 0113. San Benito County Agriculture Commissioner. Registration is for Orthocide 10 Dust, Orthocide 4 FL, Orthocide 50 W, to be used on peppers to control *Botrytis* rot. (CUP). November 1, 1982.

EPA SLN No. CA 82 0115. Placer County Dept. of Agriculture. Registration is for DZN Diazinon 50 W, to be used on dormant apple and pear bare root nursery stock to control wooly apple aphids, November 15, 1982.

EPA SLN No. CA 82 0116. Kocide Chemical Corp. Registration is for Kocide 101, to be used on crops for frost injury protection. (CUP). November 23, 1982.

EPA SLN No. CA 82 0117. Riverside County Agriculture Dept. Registration is for Maintain CF 125, to be used on ornamental olive trees for fruit prevention. November 29, 1982.

Connecticut

EPA SLN No. CT 82 0011. FMC Corp. Registration is for Furadan 15 GR, to be used during seeding time on pure alfalfa to control nematodes, potato leafhoppers, alfalfa blotch leafminers, and clover root circulios. November 5, 1982.

EPA SLN No. CT 82 0012. FMC Corp. Registration is for Furadan 15 GR, to be used on sweet corn at planting to control flea beetles and sweet corn pests. November 5, 1982.

Delaware

EPA SLN No. DE 82 0013. FMC Corp. Registration is for Furadan 15 GR, to be used on sweet corn at planting to control flea beetles and northern corn rootworms. November 15, 1982.

EPA SLN No. DE 82 0014. FMC Corp. Registration is for Furadan 15 GR, to be used on non-bearing peach, nectarine, and apple trees to control nematodes. November 15, 1982.

EPA SLN No. DE 82 0015. FMC Corp. Registration is for Furadan 15 GR, to be used on pure seeded alfalfa to control clover root curculios, nematodes, potato leafhoppers, and alfalfa blotch leafminers. November 15, 1982.

EPA SLN No. DE 82 0016. FMC Corp. Registration is for Furadan 15 GR, to be used on potatoes to control European corn borers. November 15, 1982.

Florida

EPA SLN No. FL 82 0089. Mobay Chemical Corp. Registration is for Furadan 10 GR, to be used on peanuts to control root-knot, lesion, and ring nematodes. November 15, 1982.

EPA SLN No. FL 82 0090. FMC Corp. Registration is for Pounce 3.2 EC Insecticide, to be used on cotton to

control boilworms and tobacco budworms. November 15, 1982.

EPA SLN No. 82 0091. The Land, Epcot Center. Registration is for Orthene Tree and Ornamental Spray, to be used on trees and ornamentals to control gypsy moths, aphids, thrips, budworms, and cankerworms. November 2, 1982.

Idaho

EPA SLN No. ID 82 0032. PBI/Gordon Corp. Registration is for Ultra-Sulv Amine, to be used on small grains, pastures, rangelands, fallow lands, and non-crop areas to control broadleaf weeds. (CUP). November 15, 1982.

EPA SLN No. ID 82 0033. O. M. Scott and Sons Co. Registration is for Proturf Insecticide, to be used on golf course fairways, tees, greens, and roughs to control sod webworms, chinch bugs, mole crickets, and *Hyperodes* weevils. November 30, 1982.

EPA SLN No. ID 82 0034. Mobay Chemical Corp. Registration is for Kaygon 1.67, to be used outdoors to control adult mosquitoes. November 30, 1982.

Illinois

EPA SLN No. IL 82 0023. Mobay Chemical Corp. Registration is for Oftanol 5% GR, to be used on turf grasses to control white grub larvae, *Hyperodes* weevils, chinch bugs, billbugs, and sod webworm larvae. November 5, 1982.

Kansas

EPA SLN No. KS 82 0024. Dow Chemical U.S.A. Registration is for Tordon 22K Weed Killer, to be used on rangelands and permanent grass pastures to control mush thistles. November 1, 1982.

Maryland

EPA SLN No. MD 82 0018. E.I. du Pont de Nemours and Co. Registration is for Du Pont Sinbar Weed Killer and Du Pont Karmek, to be used on blueberries to control weeds. November 19, 1982.

Michigan

EPA SLN No. MI 82 0025. FMC Corp. Registration is for Furadan 15G Insecticide-Nematicide, to be used on cucurbits (cucumbers, melons, squash, pumpkins) to control nematodes and striped and spotted cucumber beetles. November 17, 1982.

Mississippi

EPA SLN No. MS 82 0044. FMC Corp. Registration is for Furadan 15G, to be used on soybeans to control nematodes. November 2, 1982.

EPA SLN No. MS 82 0045. FMC Corp. Registration is for Furadan 15G, to be used on young pine plantations and pines planted for Christmas trees to control Nantucket pine tip moths. November 2, 1982.

EPA SLN No. MS 82 0046. FMC Corp. Registration is for Furadan 15G, to be used on sugarcane to control sugarcane beetles. November 2, 1982.

Nevada

EPA SLN No. NV 82 0014. Mobay Chemical Corp. registration is for Baygon 1.67, to be used on outdoor areas to control mosquitoes. November 5, 1982.

New Hampshire

EPA SLN No. NH 82 0004. FMC Corp. Registration is for Furadan 4 FL, to be used on strawberries to control root weevils. November 1, 1982.

New Jersey

EPA SLN No. NJ 82 0019. Stauffer chemical Co. Registration is for Devrinol 10–G, to be used on cranberries to control nutsedge, rice cutgrass, and purple stem beggarticks. November 12, 1982.

EPA SLN No. NJ 82 0020. FMC Corp. Registration is for Furadan 15 GR, to be used on non-bearing peach, apple, and nectarine trees to control nematodes. November 18, 1982.

EPA SLN No. NJ 82 0021. FMC Corp. Registration is for Furadan 15 GR, to be used at seeding time on pure alfalfa to control nematodes, potato leafhoppers, alfalfa blotch leafminers, and clover root curculious. November 18, 1982.

EPA SLN No. NJ 82 0022. FMC Corp. Registration is for Furadan 15 GR, to be used on sweet corn at planting to control flea beetles, northern corn rootworms, and nematodes. November 18, 1982.

New Mexico

EPA SLN No. NM 82 0024. FMC Corp. Registration is for Furadan 15G, to be used on sugarbeets to control beet leafhoppers, aphids, and flea beetles. November 10, 1982.

EPA SLN No. NM 82 0025. FMC Corp. Registration is for Furadan 15G, to be used on peppers to control flea beetles, green peach aphids, and thrips. November 10, 1982.

North Carolina

EPA SLN No. NC 82 0031. Mobay Chemical Corp. Registration is for Furadan 4F, to be used on alfalfa to control clover root curculios, potato leafhoppers, crickets, and grasshoppers. November 1, 1982.

EPA SLN No. NC 82 0032. Mobay Chemical Corp. Registration is for Furadan 10GR, to be used on alfalfa to control clover root curculios, potato leafhoppers, crickets, and grasshoppers. November 1, 1982.

EPA SLN No. NC 82 0033. Mobay Chemical Corp. Registration is for Furadan 15G, to be used on alfalfa to control clover root curculios, potato leafhoppers, crickets, and grasshoppers. November 1, 1982.

EPA SLN No. 82 0034. Philips Roxane, Inc. Registration is for Bio-ceutic Overtime 25% WP Long Acting Livestock Premise Insecticide, to be used on livestock premises to control flies. November 3, 1982.

EPA SLN No. 82 0035. Philips Roxane, Inc. Registration is for Anchor Permectrin 25% WP Long Lasting Barn and Premise Fly Spray, to be used on livestock premises to control flies. November 3, 1982.

EPA SLN No. NC 82 0036. International Two thousand, Inc. Registration is for Mr. Rat Guard II, to be used on orchards to control pine voles and meadow voles. November 18, 1982.

North Dakota

EPA SLN No. ND 82 0021. Platte Chemical Co. Registration is for Clean Crop Spud Nic 4, to be used on potatoes while in storage to control sprouting. November 18, 1982.

Ohio

EPA SLN No. OH 82 0021. Burroughs Wellcome Co. Registration is for Atroban 11% EC, to be used on beef and dairy cattle and horses to control face, stable, house, horse, and horn flies and lice, and on beef and dairy cattle, to control ticks and psoroptic (scabies) mites, and on swine to control hog lice and mange mites. November 17, 1982.

EPA SLN No. OH 82 0022. Diamond Shamrock Corp. Registration is for Ectrin Insecticide 10 Water Dispersible Liquid, to be used on livestock and their premises to control flies, lice, and ticks. November 17, 1982.

Oklahoma

EPA SLN No. OK 82 0030. O.M. Scott and Sons Co. Registration is for Proturf Insecticide 4 to be used on golf course fairways, tees, greens, and roughs to control white grubs (cool season grasses only), sod webworms, chinch bugs, mole crickets, and *Hyperodes* weevils. November 29, 1982.

Oregon

EPA SLN No. OR 82 0070. Rohm and Hass Company. Registration is for Kerb 50–W Herbicide, to be used on fallowed lands that will be planted back in the following year with winter wheat,

barley, or oats to control winter annual grasses and volunteer grains. November 16, 1982.

EPA SLN No. OR 82 0071. Occidental Chemical Co. Registration is for Snail and Slug Bait M, to be used on fallow lands to control slugs and snails. November 12, 1982.

Texas

EPA SLN No. TX 82 0060. Chevron Chemical Co. Registration is for Orthocide 50 W, to be used on spinach to control downy mildew. (CUP). November 18, 1982.

Virginia

EPA SLN No. VA 82 0031. Virginia Division of Forestry. Registration is for Zinc Phosphide 2%, to be used on pine plantations to control voles. November 1, 1982.

EPA SLN No. VA 82 0032. Virginia Division of Forestry. Registration is for Chlorophacinone-Liphadione .005% A/I, to be used on pine plantations to control voles. November 1, 1982.

Washington

EPA SLN No. WA 82 0066. PureGro Co. Registration is for PureGro Dinoseb-5, to be used on alfalfa, trefoil, and clover grown for seed only to control weeds. November 24, 1982.

EPA SLN No. WA 82 0067. Rohm and Hass Co. Registration is for Kerb 50–W Herbicide, to be used on fallow lands rotated to winter wheat, barley, or oats to control weeds. November 16, 1982.

EPA SLN No. WA 82 0068. Dow Chemical U.S.A. Registration is for Tordon 22K Weed Killer, to be used on rangelands and permanent grass pastures to control weeds. November 18, 1982.

EPA SLN No. WA 82 0069. Shell Chemical Co. Registration is for D–D Soil Fumigant, to be used on white potatoes to control nematodes, especially Columbia root-knot nematodes. (CUP). November 17, 1982.

EPA SLN No. WA 82 0070. Oregon Rodent Control Outfitters. Registration is for Orco Field Mouse Bait, to be used on newly planted seedlings to control field mice. November 17, 1982.

EPA SLN No. WA 82 0071. Pennwalt Corp. Registration is for Tricarbamix ZN Fungicide, to be used on apples to control bull's eye rot. (CUP). November 18, 1982.

EPA SLN No. WA 82 0072. Aceto Agricultural Chemicals Corp. Registration is for Aceto Simazine 80W Herbicide, to be used on cabbage grown for seed to control annual weeds, chickweed, groundsel, smartweed, prostrate knotweed, wild buckwheat, annual bluegrass, and pineappleweed. (CUP). November 19, 1982.

EPA SLN No. WA 82 0073. Wilbur-Ellis Co. Registration is for Wilbur-Ellis Parathion 8 FL, to be used on cranberries to control raspberry crown borers. November 20, 1982.

Dated: April 6, 1983.

National Industry Advisory Committee Long Range Planning Committee; Meeting

Pursuant to the provisions of the Pub. L. 92–463, announcement is made of a public meeting of the Long Range Planning Committee of the National Industry Advisory Committee (NIAC) to be held on Wednesday, May 4, 1983. The Committee will meet at the National Association of Broadcasters, located at 1771 N Street, NW., Washington, D.C. at 9:30 a.m.

Purpose: To consider emergency communications matters

Agenda: As follows:

1. Opening remarks
2. Report of the NIAC Common Carrier Communications Subcommittee
3. Report of the NIAC Radio Communications Subcommittee
4. Discussion and presentations concerning the Emergency Broadcast System
   —How it works
   —Current problems
   —Future issues
5. Other business
6. Adjournment

Any member of the public may attend or file a written statement with the Committee either before or after the meeting. Any member of the public wishing to make an oral statement must consult with the Committee prior to the meeting. Those desiring more specific information about the meeting may telephone the NIAC Executive Secretary in the FCC Emergency Communications Division at (202) 634–1549.

William J. Tricarico,

Secretary, Federal Communications Commission.

BILLING CODE 6712–01–M

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Proposed De Novo Nonbank Activities; First Chicago Corp.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce

benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically and questions of a fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *First Chicago Corporation*, Chicago, Illinois (trust activities; Illinois, Arizona, Florida): To engage, through its existing subsidiary, First Chicago Trust Company of Arizona, in performing or carrying on any one or more of the functions of activities that may be performed or carried on by a trust company (including activities of a fiduciary, agency or custodial nature) from a new (additional) office of the subsidiary located in Sun City, Arizona. This office will service Sun City and the surrounding area. Comments on this application must be received not later than May 11, 1983.

B. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Northwest Bancorporation*, ("Northwest"), Minneapolis, Minnestota (financing and insurance activities; Ohio): To continue to engage, through its subsidiaries, Dial Finance Company of Ohio ("Dial Finance/Ohio") and Dial Finance Company of Ohio No. 1, Inc. ("Dial Finance/Ohio No. 1"), in the activities of sales and consumer finance, and in the sale of credit life, credit accident and health, and property and casualty insurance, directly related to extensions of credit by said subsidiaries; and to engage *de novo*, through these subsidiaries, in the activity of commercial finance. Dial Finance/Ohio and Dial Finance/Ohio No. 1 engaged in consumer and sales finance and in the above credit-related insurance activities in California at the time of their acquisition by Northwest, which acquisition occurred pursuant to a binding written contract entered into on or before May 1, 1982, thereby rendering said activities permissible under the terms of Section 601(D) of the Garn-St Germain Depository Institutions Act of 1982. This application is for the relocation within the same city of an existing office in Warren, Ohio; and requests permission to engage *de novo* in the activity of commercial finance from said office, as relocated. Additionally, by this application, First Dial, Inc., also a subsidiary of Northwest, proposes to engage *de novo* in the aforementioned activities at this same office. Upon relocation, this office will serve Warren, Ohio. Comments on this application must be received not later than May 10, 1983.

2. *Northwest Bancorporation* ("Northwest"), Minneapolis, Minnesota (financing and insurance activities; Colorado): To continue to engage, through its subsidiary, Dial Finance Company of Colorado ("Dial Finance/Colorado"), in the activities of consumer and sales finance, and in the sale of credit life, and credit accident and health, insurance, direcly related to extensions of credit by said subsidiary; and to engage *de novo*, through its Dial Finance/Colorado subsidiary, in the activity of commercial finance. Dial Finance/Colorado engaged in consumer and sales finance and in the above credit-related insurance activities in California at the time of its acquisition by Northwest, which acquisition occurred pursuant to a binding written contract entered into on or before May 1, 1982, thereby rendering said activities permissible under the terms of Section 601(D) of the Garn-St Germain Depository Institutions Act of 1982. This application is for the relocation of an existing office in Denver, Colorado, to Arvada, Colorado and requests permission to engage *de novo* in the activity of commercial finance from said office, as relocated. Upon relocation, this office will serve Arvada, Colorado, other nearby suburbs of Denver, Colorado, and the City of Denver. Comments on this application must be received not later than May 4, 1983.

3. *Northwest Bancorporation* ("Northwest"), Minneapolis, Minnesota (financing and insurance activities; Oklahoma): To continue to engage, through its subsidiary, Dial Finance Company of Oklahoma Inc. ("Dial Finance/Oklahoma"), in the activities of consumer and sales finance and in the sale of credit life, credit accident and health, and property and casualty insurance, directly related to extensions of credit by said subsidiary, and to engage *de novo*, through its Dial Finance/Oklahoma subsidiary, in the activity of commercial finance. Dial Finance/Oklahoma engaged in consumer and sales finance and in the above credit-related insurance activities in Oklahoma at the time of its acquisition by Northwest, which acquisition occurred pursuant to a binding written contract entered into on or before May 1, 1982, thereby rendering said activities permissible under the terms of Section 601(D) of the Garn-St Germain Depository Institutions Act of 1982. This application is for the relocation within the same city of an existing office in Oklahoma City, Oklahoma, and requests permission to engage *de novo* in the activity of commercial finance from said office, as relocated. Upon relocation, this office will serve Oklahoma City, Oklahoma. Comments on this application must be received not later than May 10, 1983.

4. *Northwest Bancorporation* ("Northwest"), Minneapolis, Minnesota (financing and insurance activities; Alabama): To continue to engage, through its subsidiary, Dial Finance Company of Alabama ("Dial Finance/Alabama"), in the activities of consumer and sales finance, and in the sale of credit life, credit accident and health, and property and casualty insurance, directly related to extensions of credit by said subsidiary; and to engage *de novo*, through its Dial Finance/Alabama subsidiary, in the activity of commercial finance. Dial Finance/Alabama engaged in consumer finance and the above credit-related insurance activities in Alabama at the time of its acquisition by Northwest, which acquisition occured pursuant to a binding written contract entered into on or before May 1, 1982, thereby rendering said activities permissible under the terms of Section 601(D) of the Garn-St Germain Depository Institutions Act of 1982. This application is for the relocation within the same city of an office in Florence, Alabama; and requests permission to engage *de novo* in the activity of commercial finance, as relocated. Upon relocation, this office will serve Florence, Alabama. Comments on this application must be received not later than May 10, 1983.

C. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Omnibancorp*, Denver, Colorado (insurance underwriting activities; Colorado: To act as underwriter for credit life and credit accident and health

insurance policies directly related to extensions of credit sold by its bank subsidiaries, Omnibank Louisville, Louisville, Colorado, Omnibank University Hills, N.A., Denver, Colorado, and Omnibank Parker Road, N.A., Aurora, Colorado. This activity will be conducted in the State of Colorado. Comments on this application must be received not later than May 12, 1983.

D. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *CVB Financial Corp.* Chino, California (trust activities; California): To engage *de novo* directly or indirectly in acting as a trustee under deeds of trust, through acquisition of Community Trust Deed Services, San Bernardino, California. The area to be served is the State of California. Comments on this application must be received not later than May 4, 1983.

2. *First Security Corporation,* Salt Lake City, Utah (mortgage banking activities; Texas): To engage through its existing subsidiary, Utah Mortgage Loan Corporation, in making or acquiring loans and other extensions of credit such as would be made by a mortgage banking company, including making both residential and commercial mortgage loans for its own portfolio and for sale to others, and the servicing of such loans for others. These activities would be conducted from an office in San Antonio, Texas. This office will serve San Antonio and all of Bexar County, Texas. Comments on this application must be received not later than May 9, 1983.

3. *First Security Corporation,* Salt Lake City, Utah (mortgage banking activities; Texas): To engage through its existing subsidiary, Utah Mortgage Loan Corporation, in making or acquiring loans and other extensions of credit such as would be made by a mortgage banking company, including making both residential and commercial mortgage loans for its own portfolio and for sale to others, and the servicing of such loans for others. These activities would be conducted from an office in Austin, Texas. This office will serve Travis, Caldwell, Bastrop, Hays and Williamson Counties, Texas. Comments on this application must be received not later than May 9, 1983.

4. *First Security Corporation,* Salt Lake City, Utah (mortgage banking activities; Colorado): To engage through its existing subsidiary, Utah Mortgage Loan Corporation, in making or acquiring loans and other extensions of credit such as would be made by a mortgage banking company, including making both residential and commercial mortgage loans for its own portfolio and for sale to others, and the servicing of such loans for others. These activities would be conducted from an office in Colorado Springs, Colorado. This office will serve El Paso, Fremont, Pueblo, Crowley and Lincoln Counties, Colorado. Comments on this application must be received not later than May 9, 1983.

5. *First Security Corporation,* Salt Lake City, Utah (mortgage banking activities; Utah): To engage through its existing subsidiary, Utah Mortgage Loan Corporation, in making or acquiring loans and other extensions of credit such as would be made by a mortgage banking company, including making both residential and commercial mortgage loans for its own portfolio and for sale to others, and the servicing of such loans for others. These activities would be conducted from an office in Roy, Utah. This office will serve Davis and Weber Counties, Utah. Comments on this application must be received not later than May 9, 1983.

6. *The Wilshire Bancorporation,* Los Angles, California (investment or financial advisor, management consulting activities; California): To engage directly in conducting interest rate sensitivity analyses on behalf of subscribers, furnishing pro-forma policies, procedures, and internal controls to subscribing financial institutions and non-bank depository institutions. Applicant also proposes to engage from time to time in providing consulting to subscribers on topics generally encompassing effects on interest rate sensitivity on earnings, traditional methods of adjusting asset-liability interest rate sensitivity on earnings, traditional methods of adjusting asset-liability interest rate sensitivity mismatches, and regulated means of interest income protection. These activities would be conducted from an office in Los Angeles, California, serving the State of California. Comments on this application must be received not later than May 13, 1983.

Board of Governors of the Federal Reserve System, April 14, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-10414 Filed 4-19-83; 8:45 am]

BILLING CODE 6210-01-M

Formation of Bank Holding Companies; Martinius Corp. et al.

The companies listed in this notice have applied for the Board's approval under section 3(a)(1)) of the Bank Holding Company Act (12 U.S.C. 1842(a) (1) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Martinius Corporation,* Rogers, Minnesota; to become a bank holding company by acquiring 91.1 percent of the voting shares of State Bank of Rogers, Rogers, Minnesota. Comments on this application must be received not later than May 12, 1983.

B. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Union of Texas Bancshares, Inc.,* Houston, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of Union Bank of Houston, Houston, Texas. Comments on this application must be received not later than May 13, 1983.

C. **Board of Governors of the Federal Reserve System** (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *Dartmouth National Corporation,* Hanover, New Hampshire; to become a bank holding company by acquiring 100 percent of the voting shares of Dartmouth National Bank of Hanover, Hanover, New Hampshire. This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Boston. Comments on this application must be received not later than May 4, 1983.

Board of Governors of the Federal Reserve System, April 14, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Immigration and Nationality Act; Delegation of Authority

Notice is hereby given that in furtherance of the March 4, 1983 delegations from the Assistant Secretary for Health to the Administrator, Health Resources and Services Administration (HRSA), of the authorities under Section 5(e) of the Immigration and Nationality Act Amendments of 1981, Pub. L. 97–116 (8 U.S.C. 1101 note), and Sections 212(a)(32) and 212(j) of the Immigration and Nationality Act (8 U.S.C. 1182(a)), as amended, the Administrator has delegated all of the authorities under Section 5(e) and Sections 212(a) and 212(j) to the Director, Bureau of Health Professions, with authority to redelegate.

The May 13, 1981 delegation (HRA Delegation No. 43, Revised) made by the Administrator, Health Resources Administration, to the Director, Bureau of Health Professions, of authorities pertaining to Sections 212(a)(32) and 212(j) of the Immigration and Nationality Act has been superseded.

Provision was made for previous delegations and redelegations of authorities made to HRSA officials under Sections 212(a)(32) and 212(j) to continue in effect for no more than 90 days from March 4, 1983, provided they are consistent with this delegation.

This delegation was effective on April 9, 1983.

Robert Graham,

Administrator, Health Resources and Services Administration.

BILLING CODE 4160–16–M

Social Security Administration

Privacy Act of 1974; Report of New Matching Program

AGENCY: Social Security Administration, Health and Human Services Department.

ACTION: Notice of a Matching Program—Social Security Administration (SSA)/ Department of Labor (DOL).

SUMMARY: SSA is issuing public notice of its intent to conduct a matching program with DOL. SSA, Office of System Requirements, will perform the match using certain data provided by DOL. The matching program will be an interface between an extract from DOL's Office of Worker's Compensation Programs Black Lung Claimant Information File (**Federal Register**, dated July 13, 1982, page 30365) and SSA's Master Beneficiary Record (MBR) (**Federal Register**, dated October 13, 1982, pages 45626–45628). The purpose of the match is to detect and/or prevent overpayments of SSA benefits.

DATE: Data exchange will begin in fiscal year 1983 and, unless comments are received which will result in a contrary determination, will recur periodically.

ADDRESS: Interested individuals may comment on this proposal by writing to the Privacy Officer, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235. All comments received will be available for public inspection at 3–F–1 Operations Building at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Frank Bowings, Chief, Disability Systems Branch, Office of System Requirements, 3–M–11 Operations Building, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, area code (301) 594–8818.

SUPPLEMENTARY INFORMATION: The matching program which SSA will conduct will be a computerized interface between an extract from DOL's Office of Worker's Compensation Programs Black Lung Claimant Information File (**Federal Register**, dated July 13, 1982, page 30365) and SSA's MBR (**Federal Register**, dated October 13, 1982, pages 45626–45628). The purpose of the match is to detect and/or prevent overpayments of SSA benefits. DOL pays Part C Black Lung benefits to individuals who may also receive title II disability benefits. Part C payments come within the purview of section 224 of the Social Security Act and must be considered the same as other workmen's compensation payments in applying an offset to Social Security benefits. Since SSA offsets the beneficiary's disability benefits by the amount of the Part C Black Lung benefit, SSA will conduct a matching operation with DOL to detect and/or prevent overpayments of SSA benefits.

Presently, Black Lung Part C data are obtained through voluntary reporting by beneficiaries. Very often, beneficiaries claim to be unaware of the need to report initial receipt of, or changes in, Part C Black Lung benefits. SSA is, therefore, unable to make a timely and proper offset of benefits, thus creating an overpayment. Obtaining Part C Black Lung benefit data through a matching operation with DOL will permit timely, proper payment of disability benefits and detect and/or prevent overpayments.

Further information regarding the matching program including the authority for the program, a description of the program, the personal records to be matched, the dates of the program, security safeguards, and plans for disposition of the records are provided in the text below. This information is required by paragraph 5.f.1. of the Revised Supplemental Guidance for Conducting Matching Programs (**Federal Register**, May 19, 1982, pages 21657–21658). A copy of this notice has been provided to both Houses of Congress and the Office of Management and Budget.

Dated: April 13, 1983.

John A. Svahn,

Commissioner of Social Security.

Report of a Matching Program Social Security Administration Matching with Department of Labor Records

a. *Authority:* Section 224 of the Social Security Act.

b. *Description of Matching Program:*

1. *Organizations Involved:* The Social Security Administration (SSA) and the Department of Labor (DOL) are the involved components.

2. *Purpose:* DOL pays Part C Black Lung benefits to individuals who may also receive title II disability benefits. Part C payments come within the purview of section 224 of the Social Security Act and must be considered the same as other worker's compensation payments in applying an offset to Social Security benefits. Since SSA offsets the beneficiary's disability benefit by the amount of Part C Black Lung benefit, SSA will conduct a matching operation with DOL to prevent and/or detect overpayments. Presently, Black Lung Part C DOL date are obtained through voluntary reporting by beneficiaries. Very often, beneficiaries claim to be unaware of the need to report changes in the amount or initial receipt of Part C Black Lung benefits. Obtaining Part C Black Lung benefit data through a matching operation with DOL will give SSA relevant information earlier and permit more timely action to detect and prevent overpayments of SSA benefits.

3. *Procedures:* DOL will furnish SSA an extract file containing: Social Security number, name, current benefit amount data, effective date, date of birth, date of entitlement, and payment status of all Part C beneficiaries. This file will be processed against SSA's record of all title II beneficiaries. For those records matched, action will be taken to assure disability benefits are offset appropriately. SSA will make no subsequent contacts as part of this

matching program with DOL after DOL furnishes the extract file, except in specific cases where there is an inconsistency.

c. *Records to be Matched:* SSA will match the Master Beneficiary Record (MBR) (HHS/SSA/OURV 09–60–0090, **Federal Register** dated October 13, 1982, pages 45626–45628), which contains all data pertinent to the payment of Social Security recipients, with an extract from DOL, Office of Worker's Compensation Programs Black Lung Claimant Information File (DOL/ESA–8, **Federal Register** dated July 13, 1982, page 30365).

d. *Projected Starting and Ending Dates:* The match will begin in fiscal year 1983 and will be a continuing process except that subseqent files from DOL will contain only changes on previously reported individuals and additions of newly entitled Black Lung recipients.

e. *Security Safeguards:* Security safeguards pertaining to the MBR as reflected in the **Federal Register** dated October 13, 1982, pages 45626–45628, will apply. All magnetic tapes and discs are within an enclosure attended by security guards. Anyone entering or leaving this enclosure must have special badges which are issued only to authorized personnel. The same safeguards will apply to DOL tapes while they are in the possession of SSA. All microfilm and paper files are accessible only by authorized personnel with a need to know.

f. *Disposition of Records:* Data received will be returned to DOL after the matching operation. Information regarding "hits" will be incorporated into the MBR as necessary.

g. *Other Comments:* For those records matched, SSA will take proper action to assure that disability benefits are offset appropriately.

Wilderness Recommendations; California; Hearing

AGENCY: USDI, Bureau of Land Management, Interior.

ACTION: Notice of Public Hearing: Preliminary Wilderness Recommendations for the Alturas Resource Area, Susanville District and Redding Resource Area, Ukiah District, California.

SUMMARY: Pursuant to Section 202(f) and 603(a) of the Federal Land Policy Management Act of 1976 and Section 102(c) of the National Environmental Policy Act of 1969, the Bureau of Land Management has prepared draft environmental impact statements (EIS) concerning prelimiary wilderness recommendations for the Alturas Resource Area, Susanville District and the Redding Resource Area of the Ukiah District, California.

The preferred alternative is to designate a portion (5,880 acres) of Pit River Wilderness Study Area (WSA) CA–020–103 as suitable with the remainder (5,695 acres) as unsuitable. The Tule Mountain WSA CA–020–211 (16, 950 acres); the Timbered Crater WSA CA–030–201 (18, 690 acres) and the Lava WSA CA–030–203 (11,632 acres) are recommended as unsuitable for inclusion in the National Wilderness Preservation System. The Pit River and Tule Mountain WSA's are included in the Alturas Resource Management Plan (RMP) EIS which had four alternatives; All Wilderness, Preferred Alternative, No Wilderness, and No action. The Timbered Crater and Lava WSA's are included in the North Central California Wilderness, Study Area Draft EIS. The alternatives considered were: All Wilderness, Partial Wilderness, Multiple Use Limited, Multiple Use Intensive, and No Action.

DATE: A joint public hearing on both the Alturas RMP/EIS WSAs and the North Central California Wilderness EIS WASs will be held from 7:30 p.m. to 9:30 p.m. on May 23, 1983, at the Lion's Hall Highway 299, McArthur, California. All interested persons are invited to attend and present their views on two points: (a) the suitability or nonsuitability of the areas for wilderness designation, and (b) the draft EIS's.

Comments on the draft environmental impact statements are being solicited from public agencies and interested individuals and organizations. The Bureau of Land Management invites written comments on the Draft Alturas RMP/EIS (Pit River and Tule Mountain WSA's) to be received by July 14, 1983. Comments should be addressed to: Area Manager, Alturas Resource Area, Bureau of Land Management, P. O. Box 771, Alturas, California 96101. Telephone (916) 233–4666. Comments on the Draft North Central California Wilderness Study Area EIS (Timbered Crater and Lava WSA's) are to be received by July 30, 1983. Comments should be addressed to: Area Manager, Redding Resource Area, 3555 Hemsted Drive, Redding, California 96001. Telephone (916) 246–5325.

ADDRESSES: A limited number of copies of the draft environmental impact statements are available at the Alturas and Redding Resource Area Offices and at the following locations:

Alturas RMP/EIS

Susanville District Office, Bureau of Land Management, P. O. Box 1090, 705 Hall Street, Susanville, California 96130, Telephone (916) 257–5381

North Central California Wilderness Study EIS

Ukiah District Office, Bureau of Land Management, 555 Leslie Street, Ukiah, California 95482

Alturas RMP/EIS and North Central California WSA EIS

California State Office, Bureau of Land Management, 2800 Cottage Way, Sacramento, California 95825, Telephone (916) 484–4541

Washington Office Bureau of Land Management, Interior Building 18th and C Street NW., Washington, D.C. 20240

FOR FURTHER INFORMATION CONTACT:

Alturas RMP/EIS

Richard Drehobl, Alturas Resource Area manager, P. O. Box 771, Alturas, California 96101, Telephone (916) 233–4666

BILLING CODE 4310–84–M

Fish and Wildlife Service

Intent To Prepare an Environmental Impact Statement for the Comprehensive Conservation Plan for Kodiak National Wildlife Refuge

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This notice advises to public that the Service intends to gather information necessary for the preparation of an Environmental Impact Statement (EIS) and a comprehensive conservation plan for the Kodiak National Wildlife Refuge in southcentral Alaska. Public meetings regarding preparation of this plan and the EIS also will be held. This notice is being furnished as required by the National Environmental Policy Act (NEPA) Regulations (40 CFR 1501.7) to obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the EIS. Comments and participation in this scoping process are solicited.

DATES: Written comments should be received by July 7, 1983. Public meetings regarding the Kodiak National Wildlife Refuge plan and EIS will be held at:

Kodiak—East Elementary School Multi-purpose Room 7:30 pm, May 7, 1983.

Achorage—Central Junior High School Multi-purpose Room 7:30 pm June 7, 1983.

In addition, public meetings will be held at Old Harbor, Akhiok, Larsen Bay, and Karluk during the period May 18–May 24, weather permitting.

ADDRESSES: Comments should be addressed to: Regional Director, U.S. Fish and Wildlife Service: 1011 E. Tudor Road; Anchorage, Alaska 99503.

FOR FURTHER INFORMATION CONTACT: Mike Evans, Public Affairs Specialist, Refuge Planning, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Anchorage, Alaska 99503.

SUPPLEMENTARY INFORMATION: This comprehensive conservation plan is being prepared to fulfill requirements of the Alaska National Interest ands Conservation Act of 1980, section 304 g. The environmental review of the project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4371 et seq.), Council of Environmental Quality Regulations (40 CFR Parts 1500–1508), other appropriate Federal regulations, and FWS procedures for compliance with those regulations.

We estimate the Draft Environmental Impact Statement and plan will be made available to the public by October 1984.

Dated: April 12, 1983.

Le Roy W. Sowl,

Acting Regional Director.

BILLING CODE 4310-55-M

Minerals Management Service

Outer Continental Shelf (OCS), Oil and Gas Information Program; Availability of "Arctic Summary Report—January 1983"

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of Availability.

SUMMARY: A revision to the initial "Arctic Summary Report—October 1981" has been published in accordance with the OCS Lands Act Amendments of 1978 and 30 CFR 252.4. The report is a synthesis of recent data concerning OCS leasing activities, including current oil and gas resource estimates, magnitude and timing of offshore development, oil and gas transportation strategies, facilities and impacts.

An update to "Arctic Summary Report—January 1983" is expected to be published September 1983 by the Minerals Management Service.

EFFECTIVE DATE: The report will be available in May 1983.

ADDRESS: Copies of the reports may be obtained from the OCS Information Program, Minerals Management Service, 12203 Sunrise Valley Drive, MS 640, Reston, VA 22092

FOR FURTHER INFORMATION CONTACT: David A. Nystrom, OCS Information Program, Minerals Management Service, 12203 Sunrise Valley Drive, MS 640, Reston VA 22092 (703) 860–7166

Dated: April 11, 1983.

BILLING CODE 4310-MR-M

Outer Continental Shelf (OCS), Oil and Gas Information Program; Availability of "Mid-Atlantic Summary Report 2," "Gulf of Mexico Summary Report 3," and "Pacific Summary Report—December 1982"

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of availability.

SUMMARY: A revision to the initial "Mid-Atlantic Summary Report—November 1979," a second revision of the initial "Gulf of Mexico Summary Report—September 1980," and a second revision to the initial "Pacific Summary Report—May 1980" have been published in accordance with the OCS Lands Act Amendments of 1978 and 30 CFR 252.4. The reports are syntheses of recent data concerning OCS leasing activities, including current oil and gas resource estimates, magnitude and timing of offshore development, oil and gas transportation strategies, and nature and location of nearshore and onshore facilities.

The next revision of the "Mid-Atlantic Summary Report" is tentatively scheduled for October 1983. The next revisions of the "Gulf of Mexico Summary Report" and the "Pacific Summary Report" are expected to be published in August and September, 1983, respectively. Updated reports for the North Atlantic and South Atlantic OCS planning areas are expected to be published in April 1983, by the Minerals Management Service.

EFFECTIVE DATE: The report is available immediately.

ADDRESSES: Copies of the reports may be obtained from the OCS Information Program, Minerals Management Service, 12203 Sunrise Valley Drive, MS 640, Reston, VA 22092.

FOR FURTHER INFORMATION CONTACT: David A. Nystrom, OCS Information Program, Minerals Management Service, 12203 Sunrise Valley Drive, MS 640, Reston, VA 22092 (703) 860–7166.

Dated: April 11, 1983.

BILLING CODE 4310-MR-M

Environmental Documents Prepared for Proposed Oil and Gas Operations on the Atlantic Outer Continental Shelf (OCS)

ACTION: Notice of availability of environmental documents prepared for OSC mineral exploration proposals on the Atlantic OCS.

SUMMARY: The Minerals Management Service (MMS), in accordance with Federal regulations (40 CFR 1501.4 and 1506.6) that implement the National Environmental Policy Act (NEPA), announces the availability of NEPA-related Environmental Assessments (EA's) and Findings Of No Significant Impact (FONIS's) prepared by the MMS for the following oil and gas exploration activities proposed on the Atlantic OCS. This listing includes all proposals for lease operations for which environemtnal documents were prepared by the Atlantic OCS Region in the 3-month period preceding this Notice.

Operator/activity	Location	FONSI date
Shell/exploration plan.	OCS lease No. A 0337, block 587, protraction diagram No. NJ 18–6 (96 miles southeast of Atlantic City, N.J.).	Jan. 26, 1983.

Persons interested in reviewing environmental documents for the proposal listed above or obtaining informatioin about EA's and FONSI's prepared for activities on the Atlantic OCS are encouraged to contact the appropriate offices in the Atlantic OCS Region.

FOR FURTHER INFORMATION CONTACT: Regional Supervisor, Field Operations, Atlantic OCS Region, Minerals Management Service, Suite 601, 1951, Kidwell Drive, Vienna, Virginia 22180, (703) 285–2169, FTS–8–285–2169. For copies contact: Records Management Section, Minerals Management Service, Suite 601, 1951 Kidwell Drive, Vienna, Virginia 22180, (703) 285–2191, FTS–8–285–2191. The total cost of providing reproductions of the EA and related Exploration Plan and Environmental Report is $28.00. Check or money order should be made payable to the Minerals

Management Service—Department of the Interior.

SUPPLEMENTARY INFORMATION: The MMS prepares EA's and FONI's for proposals which relate to exploration for oil and gas resources on the Atlantic OCS. The EA's examine the potential environmental effects of activities described in the proposals and present MMS conclusions regarding the significance of those effects. EA's are used as a basis for determining whether or not approval of the proposals constitutes major Federal actions that significantly affect the quality of the human environment in the sense of NEPA 102(2)(C). A FONSI is prepared in those instances where the MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis for that finding and includes a summary or copy of the EA.

This Notice constitutes the public notice of availability of environmental documents required under the NEPA regulations.

Dated: April 8, 1983.

Donald P. Truesdell,

Acting Regional Manager, Atlantic OCS Region.

Office of the Secretary

Arizona; Amendment of Wilderness Inventory Decision

AGENCY: Interior Department.

ACTION: Amendment of Wilderness Inventory Decision.

SUMMARY: This notice designates one area totaling 2,065 acres for wilderness consideration pursuant to Section 202 of the Federal Land Policy and Management Act of 1976 (FLPMA).

EFFECTIVE DATE: April 20, 1983.

FOR FURTHER INFORMATION CONTACT: Arizona State Director, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073, telephone (602) 261–3873.

Amendment of Wilderness Inventory Decisions

This notice continues action necessary with respect to Bureau of Land Management (BLM) wilderness study areas in Arizona to bring the BLM wilderness review into compliance with recent decisions of the Interior Board of Land Appeals. Previous action on this subject was published in the Federal Register on December 30, 1982 (47 FR 58372).

The following area has been designated for wilderness consideration pursuant to Section 202 of FLPMA. This area was formerly identified as a wilderness study area under Section 603 of FLPMA, but is was eliminated from that category on December 30, 1982.

Area Name: Baboquivari Peak
Number: AZ–020–203B
Acreage: 2,065
County: Pima

This is a final decision of the Department of the Interior and is not subject to appeal under 43 CFR Part 4.

Dated: April 12, 1983.

Garrey E. Carruthers,

Assistant Secretary.

[Investigation No. 337-TA-145]

Certain Rotary Wheel Printers; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on March 16, 1983, under section 337 of the Tariff Act of 1930, as amended, (19 U.S.C. 1337), on behalf of Qume Corporation, 2530 Qume Drive, San Jose, California 95131. The complaint alleges unfair methods of competition and unfair acts in the importation into the United States of certain rotary wheel printers, or in their sale, by reason of alleged infringement of claims 1, 6 and 11 of U.S. Letters Patent No. 4,118,129. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complaint requests the Commission to institute an investigation and, after a full investigation, to issue both a permanent exclusion order and a permanent cease and desist order.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission on April 13, 1983, ORDERED THAT—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unauthorized importation into the United States of certain rotary wheel printers, or their sale, by reason of alleged infringement of claims 1, 6 and 11 of U.S. Letters Patent No. 4,118,129, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Qume Corporation, 2530 Qume Drive, San Jose, California 95131.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is be served:

Nippon Electric Co., Ltd., 33–1, Shiba, Gochome, Minato-ku, Tokyo, 108, Japan

Tokyo Electric Co., Ltd, 14–10, 1-chome, Uchikanda, Chiyoda-ku, Tokyo 101, Japan

C. Itoh & Co., Ltd., 5–2, Kita-Aoyama 2-chome, Minato-ku, Tokyo 107, Japan
Ricoh Company, Ltd., 15–5, Minami-Aoyama 1-chome, Minato-ku, Tokyo 107, Japan
Fujitsu Limited, 6–1, Marunouchi 2-chome, Chiyoda-ku, Tokyo 100, Japan
Daisy Systems Holland B.V., Nieuweweg 279, Postbus 125, 6600 AC Wijchen, The Netherlands

(c) Oreste Russ Pirfo, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Room 126, Washington, D.C. 20436, shall be the Commission investigative attorney, a party of this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, shall designate the presiding officer.

Responses must be submitted by named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 201.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Room 156, Washington, D.C. 20436, Phone 202–523–0471.

FOR FURTHER INFORMATION CONTACT: Oreste Russ Pirfo, Esq., Unfair Import Investigations Division, Room 126, U.S. International Trade Commission, telephone 202–523–4693.

By order of the Commission.

Issued: April 15, 1983.

Kenneth R. Mason,
Secretary.

BILLING CODE 7020–02–M

[332–149]

Competitive Assessment of the U.S. Metalworking Machine Tool Industry.

AGENCY: International Trade Commission.

ACTION: The Commission will hold a public hearing for the purpose of affording all interested parties an opportunity to present views on the competitive position of the U.S. metalworking machine tool industry. The initial notice of the investigation indicating the scope of the study, contact persons, and other related information was published in the **Federal Register** of December 8, 1982 (47 FR 55343); notice of the Commission's extension of the deadline for the filing of written submissions from interested parties was published in the **Federal Register** of February 15, 1983 (48 FR 6793).

Public Hearing: A public hearing in connection with the investigation will be held in the Commission Hearing Room, 701 E Street NW., Washington, D.C. 20436, beginning at 10:00 a.m., e.d.t., on June 28, 1983, to be continued on June 29, 1983, if required. All persons shall have the right to appear by counsel or in person, to present information and to be heard. Requests to appear at the public hearing should be filed with the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, not later than June 21, 1983.

Written Submissions: In lieu of or in addition to appearance at the public hearing, interested persons are invited to submit written statements concerning the investigation by June 25, 1983. Commercial or financial information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

By order of the Commission.

Issued: April 11, 1983.

Kenneth R. Mason,
Secretary.

BILLING CODE 7020–02–M

[Investigation No. 731–TA–103 (Final)]

Cotton Shop Towels From the People's Republic of China; Antidumping Investigation

AGENCY: International Trade Commission.

ACTION: Institution of a final antidumping investigation and scheduling of a hearing to be held in connection with the investigation.

EFFECTIVE DATE: April 14, 1983.

SUMMARY: As a result of an affirmative preliminary determination by the U.S. Department of Commerce that there is a reasonable basis to believe or suspect that imports from the People's Republic of China (China) of shop towels of cotton, provided for in item 366.2740 of the Tariff Schedules of the United States Annotated, are being, or are likely to be, sold in the United States at less than fair value (LTFV) within the meaning of section 731 of the Tariff Act of 1930 (19 U.S.C. 1673), the United States International Trade Commission hereby gives notice of the institution of investigation No. 731–TA–103 (Final) under section 735(b) of the act (19 U.S.C. 1673d(b)) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise. The Department of Commerce has notified us that the investigation will be extended, and that it will make its final dumping determination in the case on or before August 10, 1983. The Commission will make its final injury determination by September 23, 1983 (19 CFR 207.25).

FOR FURTHER INFORMATION CONTACT: Ms. Marilyn C. Borsari (202–523–5703), Office of Industries, U.S. International Trade Commission.

SUPPLEMENTARY INFORMATION:

Background.—On October 8, 1982, the Commission determined, on the basis of the information developed during the course of its preliminary investigation, that there was a reasonable indication that an industry in the United States was threatened with material injury by reason of imports of cotton shop towels from China which are alleged to be sold at LTFV. The preliminary investigation was instituted in response to a petition

filed on August 24, 1982, by counsel of Milliken and Company.

Participation in the investigation.—Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than 21 days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Upon the expiration of the period for filing entries of appearance, the Secretary shall prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to the investigation, pursuant to § 201.11(d) of the Commission's rules (19 CFR 201.11(d)). Each document filed by a party to this investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service (19 CFR 201.16(c), as amended by 47 FR 33682, Aug. 4, 1982).

Staff report.—A public version of the staff report containing preliminary findings of fact in this investigation will be placed in the public record on August 5, 1983, pursuant to § 207.21 of the Commission's rules (19 CFR 207.21).

Hearing.—The Commission will hold a hearing in connection with this investigation beginning at 10:00 a.m., on August 18, 1983, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on August 5, 1983. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 10:00 a.m., on August 9, 1983, in room 117 of the U.S International Trade Commission Building. The deadline for filing prehearing briefs is August 15, 1983.

Testimony at the public hearing is governed by § 207.23 of the Commission's rules (19 CFR 207.23, as amended by 47 FR 33682, Aug. 4, 1982). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. All legal arguments, economic analyses, and factual materials relevent to the public hearing should be included in prehearing briefs in accordance with § 207.22 (19 CFR 207.22, as amended by 47 FR 33682, Aug. 4, 1982). Posthearing briefs must conform with the provisions of § 207.24 (19 CFR 207.24) and must be submitted not later than the close of business on August 25, 1983.

Written submissions.—As mentioned, parties to this investigation may file prehearing and posthearing briefs by the dates shown above. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before August 25, 1983. A signed original and fourteen (14) true copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired shall be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6).

For further information concerning the conduct of the investigation, hearing procedures, and rules of general application, consult the Commission's Rules and Practice and Procedure, Part 207, Subparts A and C (19 CFR Part 207, as amended by 47 FR 33682, Aug. 4, 1982), and Part 201, Subparts A through E (19 CFR Part 201, as amended by 47 FR 33682, Aug. 4, 1982.

This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

Issued: April 15, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 731-TA-125 and 126 (Preliminary)]

Potassium Permanganate From the People's Republic of China and Spain

Determinations

On the basis of the record [1] developed in the subject investigations, the Commission unanimously determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured,[2] by reason of imports from the People's Republic of China (China) and Spain of potassium permanganate, provided for in item 420.28 of the Tariff Schedules of the United States, which are alleged to be sold in the United States at less than fair value (LTFV).

Background

On February 22, 1983, counsel for Carus Chemical Co. filed a petition with the U.S. International Trade Commission and the U.S. Department of Commerce alleging that an industry in the United States is materially injured or is threatened with material injury, by reason of imports from China and Spain of potassium permanganate which are allegedly being sold at LTFV. Accordingly, effective Feburary 22, 1983, the Commission instituted preliminary antidumping investigations under section 733(a) of the Act (19 U.S.C. 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise.

Notice of the institution of the Commission's investigations and of a conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on March 3, 1983 (48 FR 9091). The conference was held in Washington, D.C. on March 21, 1983, and all persons who requested the opportunity were permitted to appear in person or by counsel.

---

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[2] Commissioner Stern determines that there is a reasonable indication that an industry in the United States is materially injured, or threatened with material injury, by reason of the subject imports.

The Commission transmitted its report on the investigations to the Secretary of Commerce on April 8, 1983. A public version of the Commission's report, *Potassium Permanganate from the People's Republic of China and Spain* (investigations Nos. 731–TA–125 and 126 (Preliminary), USITC Publication 1369, 1983), contains the views of the Commission and information developed during the investigations.

By Order of the Commission.

Issued: April 15, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

Report to the President

April 15, 1983.

To the President:

In accordance with Executive Order 11377 of October 23, 1967 to assist the President in the exercise of his authority under headnote 3 to schedule 7, part 8, subpart A, of the *Tariff Schedules of the United States* (TSUS) (79 Stat. 948; 19 U.S.C. 1202), the U.S. International Trade Commission herein reports its judgment as to the estimated domestic consumption of broom corn brooms for the year 1982, the basis for that estimate, and information on U.S. consumption, production, imports, and exports of other types of brooms considered to be competitive with broom corn brooms for 1982. For convenience, the Commission also reports corresponding data for broom corn brooms for the years 1980 and 1981 and data for competitive brooms for 1980.

Estimated Consumption of Broom Corn Brooms

In the judgment of the Commission, consumption of brooms wholly or in part of broom corn in the calendar years 1980, 1981, and 1982 was as follows:

Brooms wholly or in part of broom corn: U.S. consumption, 1980–82.

(In dozens)

Type of broom	1980 [1]	1981 [2]	1982
Whiskbrooms of a kind provided for in TSUS items 750.26 to 750.28, inclusive	342,414	252,335	215,658
Other brooms of a kind provided for in TSUS items 750.29 to 750.31, inclusive	2,061,176	1,707,309	1,811,915
Total	2,403,590	1,959,644	2,027,573

[1] As reported to the President on April 14, 1981.
[2] As reported to the President on March 31, 1982.

Source: Compiled from data supplied by U.S. producers and the U.S. Customs Service.

Aggregate apparent consumption of broom corn brooms amounted to 2.0 million dozen in 1982, up 3 percent from 1981. Consumption of whiskbrooms of broom corn, which accounted for 11 percent of total consumption in 1982, was down 15 percent from 1981, while consumption of other brooms of broom corn, 89 percent of total consumption in 1982, increased by 6 percent over 1981.

Basis for the Commission's Judgment With Respect to Broom Corn Brooms

The Commission estimated consumption of broom corn brooms in 1982 by the same methods it used to estimate consumption in its previous reports pursuant to Executive Order 11377. Apparent annual consumption was determined by adding the quantity of shipments by domestic producers to the quantity of imports and then subtracting the quantity of exports. Data on imports were obtained from the U.S. Customs Service; data on shipments and exports were estimated from responses to questionnaires sent to all known domestic producers of broom corn brooms.

Issued: April 15, 1983.

By Order of the Commission

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

[OP5MCF–182]

Motor Carriers; Decision-Notice; Finance Applications

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impedimentss) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

Dated: April 14, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler and Fortier.

Agatha L. Mergenovich,

Secretary.

MC–F–15223, filed March 31, 1983. GELCO COURIER SERVICES, INC., (GELCO), (P.O. Box 1975, St. Paul, MN 55111)—PURCHASE—McBREEN TRUCKING, INC., (McBREEN), (3641 NW. Front Ave., Portland, OR 97210). Representatives: Sally G. Galway, P.O. Box 1975, St. Paul, MN 55111; Lawrence V. Smart, Jr., 419 N.W. 23rd Ave., Portland, OR 97210. Gelco seeks to purchase all of the interstate operating rights of McBreen. Gelco's noncarrier parent, International Couriers Corporation (ICC) also controls B.D.C., Ltd. (MC–150871). ICC is controlled by Gelco Corporation (GC) which in turn controls Brooks Transportation, Inc. (MC–142559), Federal Freight System, Inc. (MC–143790) and Gelco Rail Car (MC–160442) a licensed property broker. Gelco, and, in turn, ICC and GC, seek authority to acquire control of McBreen's rights through the transaction. The interstate operating rights being purchased are contained in Certificate No. MC–112188 and Sub-Nos. 6, 8, 10 and 12 issued October 25, 1963, March 17, 1964, October 28, 1965, November 7, 1966, and May 12, 1980, respectively, authorizing the transportation as summarized: (A) over regular routes, (1) films and articles associated with the exhibition of motion pictures, as described in Descriptions in Motor Carrier Certificates, 61 M.C.C. 766, (a) between Portland, OR, and LaGrande, OR, and (b) between Hood River, OR, and White Salmon, WA, and (2) motion picture films, theatre advertising matter, and motion picture machine parts and accessories, (a) between Portland, OR, and Ashland, OR, (b) between McMinnville, OR, and Myrtle Point, OR, (c) between Portland, OR, and junction Oregon Hwy 47 and US Hwy 99W near McMinnville, OR, (d) between Oregon City, OR, and Salem, OR, (e) between Salem, OR, and junction Oregon Hwy 22 and US Hwy 99W at Rickreall, OR, (f) between Albany, OR, and Sweet Home, OR, and (g) between Sweet Home, OR, and Halsey, OR, serving specified immediate points, and (B) over irregular routes, (1) motion picture film, theatre advertising matter, and motion picture machine parts and accessories, (a) between Portland, OR, on the one hand, and, on the other, Baker and Freewater, OR, (2) bread, pies, and pastries (a) from Portland, OR, to Walla Walla, WA, and points within 10 miles thereof and return shipments, (3) blood specimens, (a) from Vancouver, WA, and points in Oregon to Portland, OR, (4) time-dated magazines and advertising material moving in connection therewith and (5) paperback books, from Portland, OR, to Baker, Coos Bay, Corvallis, Roseburg, Eugene, LaGrande, Medford, Salem, The Dalles, Klamath Falls, and Bend, OR, (6) magazines, paperback and books, periodicals, and printed matter, between points in Oregon and Washington, and (7) newspapers from Portland, OR, to Walla Walla, WA. Gelco is presently authorized to operate as a motor contract and common carrier under MC–114533 (Sub-Nos. 372, 373, and 375X) to transport, over irregular routes, commercial papers, documents and written instruments as are used in connection with the business of banking and banking institutions between all points in the United States; commercial documents, business records, accounting and audit media, automated data processing media, and advertising materials, between points in Oregon and Washington; and shipments weighing 100 pounds or less, between all points in the United States.

BILLING CODE 7035–01–M

Motor Carriers; Decision-Notice Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 C.F.R. 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

[Volume No. OP–5–184]

Motor Carriers; Permanent Authority Decision; Decision-Notice

Decided: April 12, 1983.

The following operating rights applications, filed on or after July 3, 1980, are filed in connection with pending finance applications under 49 U.S.C. 10926, 11343 or 11344. The applications are governed by Special Rule 252 of the Commission's General Rules of Practice (49 CFR 1100.252).

Persons wishing to oppose an application must follow the rules under 49 CFR 1160.40–1160.49. Persons submitting protests to applications filed in connection with pending finance applications are requested to indicate across the front page of all documents and letters submitted that the involved proceeding is directly related to a finance application and the finance docket number should be provided. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. However, the Commission may have modified the application to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exceptions of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each applicant has demonstrated that its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements as to the finance application *or* to the following operating rights applications directly related thereto filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except where the application involves duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 1, Members Parker, Chandler and Fortier (member Parker not participating).

Agatha L. Mergenovich,

Secretary.

MC 167178, filed April 1, 1983. Applicant: METROPLEX FREIGHT SERVICE OF OKLAHOMA, INC., 901 Enterprise Ave., Oklahoma City, OK 73128. Representative: D. Paul Stafford, Suite 1125—Frito Lay Tower, P.O. Box 45538, Dallas, TX 75245, (214) 358–3341. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in OK, on the one hand, and, on the other, points in the U.S. (except AK and HI).

Note.—Applicant has filed a directly related petition for control exemption in No. MC–F–15230, published in this same issue.

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: April 13, 1983.

The following restriction removal applications, are governed by 49 CFR Part 1165. Part 1165 was published in the Federal Register of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 4, at (202) 275–7669.

Motor Carriers; Permanent Authority Decision; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Supart A of Part 1160 of the Commission's General Rules of Practices. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers filed on or after November 19, 1982 are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishng to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property-that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract, carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, The authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,
Secretary.

Note. All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 4 at (202) 275-7669.

Volume No. OP4-224

Decided: April 12, 1983.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC 134387 (Sub-98), filed April 4, 1983. Applicant: BLACKBURN TRUCK LINES, INC., 4998 Branyon Ave., South Gate, CA 90280. Representative: Andrew D. Shafer, 1200 IBM Bldg., Seattle, WA 98101, (202) 624-7373. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with Safeway Stores, Inc., of Oakland, CA.

MC 144557 (Sub-25), filed April 6, 1983. Applicant: HUDSON TRANSPORTATION, INC., P. O. Box 847, Troy, AL 36081. Representative: William P. Jackson, Jr., 3426 N. Washington Blvd., P. O. Box 1240, Arlington, VA 22210, (703) 525-4050. Transporting *general commodities* (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except AK and HI).

MC 144697 (Sub-1), filed April 6, 1983. Applicant: GIBCO MOTOR EXPRESS, INC., 3200 Haythorne Ave., P. O. Box 478, Terre Haute, IN 47805. Representative: Norman R. Garvin, 1301 Merchants Plaza, Indianapolis, IN 46204, (317) 638-1301. Transporting *commodities in bulk*, between points in IA, IL, IN, KY, MI, MN, MO, NE, OH, PA, TN, WI, and WV.

MC 147876 (Sub-8), filed April 4, 1983. Applicant: SHAY COMPANY, INC., P.O. Box 2081, Clarksville, IN 47130. Representative: K. Edward Wolcott, Suite 1200, 235 Peachtree St., NE, Atlanta, GA 30303, (404) 522-2322. Transporting *metal products*, between points in Butler County, OH, on the one hand, and on the other, points in Ripley County, IN and Coffee County, TN.

MC 148628 (Sub-1), filed April 5, 1983. Applicant: JACK CLOSE, d.b.a. CLOSE TRUCKING, Route #3, Millersburg, OH 44654. Representative: Earl N. Merwin, 85 E. Gay St., Columbus, OH 43215, (614) 224-3161.Transporting *general commodities (except classes A and B explosives, household goods, commodities in bulk), between points in OH and PA, on the one hand, and on the other, points in the U.S. (except AK and HI).*

MC 151736 (Sub-4), filed March 25, 1983. Applicant: MANCHESTER MOVERS, INC., 85 Colonial Rd., Manchester, CT 06040. Representative: Frank N. Serignese (same address as applicant), (203) 646–3333.Transporting *household goods* between points in CT, on the one hand, and, on the other, points in AR, AZ, CA, CO, IA, ID, KS, LA, MN, MO, MS, MT, NE, ND, NM, NV, OK, OR, SD, TX, UT, WA, WI and WY.

MC 157497 (Sub-3), filed March 28, 1983. Applicant: IVAN HABECK, Route 1, Box M–8, Ipswich, SD 57451. Representative: John T. Wirth, 717–17th St., Suite 2600, Denver, CO 80202–3357, (303) 892–6700. Transporting *lumber and wood products*, between points in the U.S. (except AK and HI).

Volume No. OP4–226

Decided: April 13, 1983.

By the Commission, Review Board No. 3, members Krock, Joyce, and Dowell.

MC 138926 (Sub-10), filed April 7, 1983. Applicant: GENCOM, INC., R.R. #4, Box 697, Marshall, MO 65340. Representative: Thomas P. Rose, P.O. Box 205, Jefferson City, MO 65102, (314) 636–2321. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in MO and KS, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 140787 (Sub-2), filed April 4, 1983. Applicant: GIVENS TRUCKING COMPANY, INC., 1720 S Military Hwy, Chesapeake, VA 23320. Representative: Frank B. Hand, Jr., P.O. Box 145G, Berryville, VA 22611, (703) 662–0927. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with Givens, Incorporated of Chesapeake, VA.

MC 142397 (Sub-1), filed April 4, 1983. Applicant: DENNIS J. LAUGHLIN, d.b.a. DENNIS J. LAUGHLIN TRUCKING, 130 Sawyer Ave., Tonawanda, NY 14150. Representative: Michael R. Werner, 241 Cedar Lane, Teaneck, NJ 07666, (201) 836–1144. Transporting *those commodities which because of their size or weight require the use of special handling or equipment and transportation equipment*, between points in NY, on the one hand, and, on the other, points in the U.S. (except AK and HI).

MC 143656 (Sub-6), filed April 7, 1983. Applicant: GOLD LEAF TRUCKING COMPANY, 2927 Retnag Rd., Petersburg, VA 23803. Representative: David B. Kearney, 1400 Ross Bldg., Richmond, VA 23219, (804) 644–4131. Transporting *tobacco products*, between points in Middlesex County, NJ, and Chesterfield County, VA, on the one hand, and, on the other, Petersburg, VA, and points in Bibb County, GA.

MC 144587 (Sub-4), filed April 5, 1983. Applicant: DON E. KEITH, 2990 Pierce Rd., Bakersfield, CA 93308. Representative: Earl N. Miles, 3704 Candlewood Dr., Bakersfield, CA 93306, (805) 872–1106. Transporting *petroleum, natural gas and their products*, between points in CA, on the hand, and, on the other, points in AZ.

MC 144667 (Sub-27), filed April 7, 1983. Applicant: ARTHUR E. SMITH & SON TRUCKING, INC., P.O. Box 1054, Scottsbluff, NE 69361. Representative: Bradford E. Kistler, P.O. Box 82028, Lincoln, NE 68501, (402) 475–6761. Transporting *general commodities*, (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI).

MC 148116 (Sub-1), filed April 7, 1983. Applicant: TOM JOSEPH ENTERPRISES, INC., 8000 Cleveland Ave., N, N Canton, OH 44720. Representative: Boyd B. Ferris, 50 W Broad St., Columbus, OH 43215, (614) 464–4103. Transporting *transportation equipment*, between points in the U.S. (except AK and HI).

MC 152117 (Sub-4), filed April 8, 1983. Applicant: LITTLE GINNEY TRANSPORT SYSTEMS, INC., 1112 29th Ave., S.W., Cedar Rapids, IA 52406. Representative: Virginia A. Wilson (same address as applicant), (319) 366–0347. Transporting *general commodities*, (except classes A and B explosives, household goods, and commodities in bulk), between points in the U.S. (except AK and HI).

MC 152176 (Sub-4), filed April 8, 1983. Applicant: SAIN & HEAVNER TRUCKING, Route 1, Box 316, Vale, NC 28168. Representative: Frank A. Graham, Jr., P.O. Box 11864, Columbia, SC 29211, (803) 799–9122. Transporting *glass and glassware*, between points in NC and FL, under continuing contract(s) with PPG Industries, Inc., of Pittsburgh, PA.

MC 166806, filed March 15, 1983. Applicant: DES PLAINES SOD CENTER, INC., d.b.a. D.S.C. TRANSPORTATION, P.O. Box 380, Algonquin, IL 60102. Representative: Donald S. Mullins, 1033 Graceland Ave., Des Plaines, IL 60016, (312) 298–1094. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI).

Frederick Ave., Gaithersburg, MD 20877, 301–840–8565. Transporting *general commodities* (except classes A and B explosives, household good, and commodities in bulk) between points in the U.S. (except HI) under continuing contract(s) with Harris Graphics Corporation of Melbourne, FL.

[FR Doc. 83–10443 Filed 4–19–83; 8:45 am]
BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common of contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31,1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 2, (202) 275–7030.

Volume No. OP2–173

Decided: April 11, 1983.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

MC 141872 (Sub-3), filed March 29, 1983. Applicant: MATS, INC., P.O. Box 1615, St. Paul, MN 55111. Representative: Andrew R. Clark, 1600 TCF Tower, Minneapolis, MN 55402, (612) 333–1341. Transporting *shipments weighing 100 pounds or less* if transported in a vehicle in which no one package exceeds 100 pounds, between points in the U.S. (except AK and HI).

MC 144602 (Sub-3), filed March 31, 1983. Applicant: CONTINENTAL LIMOUSINE SERVICE, INC., 1137 N. Highland St., Arlington, VA 22201. Representative: Andrew J. Carraway, Suite 1301, 1600 Wilson Blvd., Arlington, VA 22209, 703–522–0900. Transporting *passengers*, in charter and special operations, between points in the U.S. (except HI).

Note:—Applicant seeks to provide privately-funded charter and special transportation.

MC 153043 (Sub-2), filed March 8, 1983. Applicant: WEST SHORES LEASING CORP., 3102 W. Buckeye Rd., Phoenix, AZ 85009. Representative: Donald R. Hedrick, P.O. Box 4334, Santa Ana, CA 92702, 714–667–8107. Transporting (a) *passengers*, over *regular routes* (1) between Chandler, AZ and El Centro, CA: from the Chandler over AZ Hwy 87 to junction U.S. Hwy 80, then over U.S Hwy 80 to junction Interstate Hwy 8, then over Interstate Hwy 8 to El Centro, CA, (2) between El Centro and San Ysidro, CA: from El Centro over Interstate Hwy 8 to junction Interstate Hwy 805, then over Interstate Hwy 805 to San Ysidro, CA, (3) between San Ysidro and San Diego, CA over Interstate Hwy 5, (4) between San Diego and Los Angeles, CA: from San Diego over Interstate Hwy 5 to junction Interstate Hwy 10, then over Interstate Hwy 10 to Los Angeles, return over the same routes, and (5) serving all intermediate points in routes (1) thru (4) above, (b) *passengers*, in charter and special operations, between points in the U.S. (except HI), and (c) *shipments weighing 100 pounds or less* if transported in a motor vehicle in which no one package exceeds 100 pounds, between points in the U.S. (except HI).

Notes:—(1) In part (a) applicant seeks to provide regular route service in interstate or foreign commerce and in intrastate commerce under 49 U.S.C. 10922 (c)(2)(b) over the same route. (2) In part (b) applicant seeks to provide privately-funded charter and special transportation. Part (a) is published in the **Federal Register**, this issue, with "regular applications".

BILLING CODE 7035–01–M

Motor Carrier; Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with provisions of 49 CFR 1131.3 These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the applicaiton is on file, and can be examined at the ICC Regional Office to which protest are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

The following applications were filed in Region 2. Send protests to: ICC, Fed. Res. Bank Bldg., Philadelphia, PA 19106.

MC 107012 (Sub-II–281TA), filed March 31, 1983. Applicant: NORTH AMERICAN VAN LINES, INC., 5001 U.S. Highway 30 West, P.O. Box 988, Fort Wayne, IN 46801. Representative: Marget S. The following applications were filed in region 5. Send protest to: Consumer Assistance Center Interstate Commerce Commission, 411 West 7th Street, Suite 500, Fort Worth, TX 76102.

MC 61396 (Sub-5–27TA), filed April 6, 1983. Applicant: HERMAN BROS. INC., P. O. Box 189, Omaha, NE 68101. Representative: Jack L. Shultz. P.O. Box 82028, Lincoln, NE 68501–2028. *Petroleum products,* between points in Pottawattamie County, IA on the one hand, and, on the other, points in CO, IA, ID, IL, KS, MO, MN, NE, ND, OK, SD, TX, and WY. Supporting shipper: McCollister & Co., Council Bluffs, IA.

MC 147676 (Sub-5–15TA), filed April 7, 1983. Applicant: KEATON TRUCK LINES, INC., P.O. Box 1187, Texarkana, TX 75504. Representative: Patsy R. Washington (same as above). *Cleaning Compounds and materials and supplies used in the manufacturer thereof* between a 50-mile radius of Atlanta, GA on the one hand, and, on the other, all points in the contiguous U.S. Supporting shipper: Diversey-Wyandotte Corp., Tucher, GA.

MC 147676 (Sub-5–16TA), filed April 7, 1983. Applicant: KEATON TRUCK LINES, INC., P.O. Box 1187, Texarkana, TX 75504. Representative: Patsy R. Washington (same above). *General Commodities except items in bulk, class A & B explosives, and items of unusual value,* between a 50-mile radius of Atlanta, GA and Chicago, IL, on the one hand; and, on the other, all points in the contiguous U.S. Supporting shipper: Hoyne Industries, Inc., Conyers, GA.

MC 150809 (Sub-5–13TA), filed April 6, 1983. Applicant: CENTURY CONCRETE CO., d.b.a. FLYNN CENTURY CONCRETE CO., East 12th Street, Dubuque, IA 52001. Representative: Carl E. Munson, P.O. Box 796, Dubuque, IA 52001. *Cement,* from points in Rock Island County, IL, to points in IA. Supporting shipper: Dundee Cement Company, Clarksville, MO.

MC 152117 (Sub-5–6TA), filed April 6, 1983. Applicant: LITTLE GINNY TRANSPORT SYSTEMS, INC., 1112 29th Avenue, S.W., Cedar Rapids, IA 52408. Representative: Virginia A. Wilson (same). *General Commodities* (except Classes A and B Explosives, commodities in bulk, those commodities which because of their size or weight require the use of special handling or equipment and household goods) between points in the U.S. (excluding AK & HI). Support shippers: 15.

MC 161236 (Sub-5–2TA), filed April 8, 1983. Applicant: BARBARA KRAKLIO, d.b.a. K & K TRUCKING, R.R. #1, Box 106, Eldridge, IA 52748. Representative: Richard D. Howe, 600 Hubbell Building, Des Moines, IA 50309. (1) *Silica sand,* between Scott County, IA, on the one hand, and, on the other, Ottawa County, OK, and points in IL and (2) *crushed glass,* between Polk County, IA, on the one hand, and, on the other, Okmulgee County, OK; St. Louis, MO; and points in IL. Supporting Shipper: Container Recovery, Inc., Des Moines, IA and Marthens Company, Davenport, IA.

MC 165947 (Sub-5–2TA), filed April 6, 1983. Applicant: HOWARD LOVE MACHINERY AND SUPPLY CO., 1717 East Loop, Suite 330, Houston, TX 77029. Representative: Doyle G. Owens, P.O. Box 7735, Beaumont, TX 77706. *Hot Coal Tar and Asphalt, in bulk,* between Lone Star, TX and Schererville, IN. Supporting shipper: Midwest Pipe Coating, Inc., Schererville, IN.

MC 166644 (Sub-5–1TA), filed April 6, 1983. Applicant: FAST DELIVERY SERVICE, 1001 South Main Street, Nashville, AR 71852. Representative: Frank Wilkins, 1001 South Main Street, Nashville, AR 71852. *General Commodities express service limited to 1000 lbs. or less per shipment* between Texarkana, TX, Texarkana, AR, Commercial Zone and the following counties in AR, Little River, Sevier, Howard, Pike, and Hempstead. Supporting shippers: 10.

MC 166736 (Sub-5–2TA), filed April 7, 1983. Applicant: RKM EQUIPMENT & TRUCKING, INC., P.O. Box 767, Yukon, OK 73099. Representative: William P. Parker, P.O. Box 54657, Oklahoma City, OK 73154. (1) *Metal Products,* from Pryor, OK and Van Buren, AR to points in the U.S. (except AK and HI) and (2) *Machinery,* between points in the U.S. (except AK and HI) restricted to traffic moving for the account of Harris Machine Tools, Inc. and Bob Kaufman Machinery Corp. Supporting shipper(s): Harris Machine Tools, Inc., Houston, TX; Bob Kaufman Machinery Corp., North Chicago, IL; HEM, Inc., Pryor, OK.

MC 166923 (Sub-5–1TA), filed April 8, 1983. Applicant: KAPEX, 6455 Parker Road, St. Louis, MO 63033. Representative: James P. Main (Same as

applicant). Toys and Plastic molded objects, between the facilities of Alma Plastics at or near Edinbergh, IN on the one hand, and, on the other the facilities of Learning Products at or near St. Louis, MO. Alma Plastics, Edinbergh, IN; Learning Products, St. Louis, MO.

MC 167139 (Sub-5–1TA), filed April 8, 1983. Applicant: DANMARR TRANSIT, INC., 24 Royale Dr., Van Buren, AR 72956. Representative: Marr Lynn Bearden (same as above). *Paper and Paper Products,* between AR, OK, KS, MO, TX, TN and GA. Supporting Shipper: Inland Container Corp., Ft. Smith, AR.

MC 167251 (Sub-5–1TA), filed April 6, 1983. Applicant: FLEETWOOD EXPRESS, INC., 2813 18th Avenue, Scottsbluff, NE 69361. Representative: Jack L. Shultz, P.O. Box 82028, Lincoln, NE 68501–2028. *Fertilizer* in *bulk,* between points in Laramie County, WY, on the one hand, and, on the other, points in Scotts Bluff, Morrill, Box Butte, Banner and Cheyenne Counties, NE. Supporting shipper: Panhandle Co–op Association, Scottsbluff, NE.

MC 167284 (Subs-5–1TA), Filed April 8, 1983. Applicant: SOIL FERTILITY OF TEXAS, INC., P.O. Box 815, Nacogdoches, TX 75961. Representative: Nelson M. Davidson, Jr., P.O. Box 1148, Austin, TX 78767. *Fertilizer and fertilizer materials* from Nacogdoches, Tyler, Galena Park and Freeport, TX, to points in AR and LA. Supporting Shipper: American Plant Food Corp., Galena Park, TX.

The Following Applications Were Filed In Region 6. Send Protests to: Interstate Commerce Commission, Region 6 Motor Carrier Board, 211 Main St. Suite 501, San Francisco, CA 94105.

MC 167196 (Sub-6–1TA), filed April 7, 1983. Applicant: ROBERT E. DAY, d.b.a. CORDOVA AIRPORTER, P.O.B. 2309, Cordova, AK 99574. Representative: Lawrence N. Minch, Two Embarcadero Center, San Francisco, CA 94111. *General Commodities* (except Classes A & B explosivies) between points within a 25–mile radius of the city limits of Cordova, AK, including Cordova, AK, for 270 day. An underlying ETA seeks 120 days authority. Supporting Shippers: Foss Alaska Line, Inc., P.O.B. 80887, Seattle, WA 98108; Harbor Hydraulic & Welding, Cordova, AK 99574; Redden of Cordova, Inc., P.O.B. 2323, Cordova, AK 99574; Morpac, Inc., No. 1 Cannery Row Cordova AK 99574.

MC 167264 (Sub-6–1TA), filed April 6, 1983. Applicant: FRANKLIN A. DICKTEN ROBERT E. and AGORASTOS, a partnership d.b.a. D & A TRANSPORTATION, 15833 Slover Ave., Fontana, CA 92335. Representative: Roy Gray, P O Box 344, Bloomington, CA 92316. Clay, concrete, glass, stone, fabricated metal products and non metallic minerals, from points in AZ, CA, CO, MT, NM, NV, MO, OK, TX, UT, for 270 days. *Supporting shippers:* Kaygor Inc., 1243 Transit St., Pomona, CA 91769: EXPAC Inc., P.O. Box 804, Rancho Cucamonga, CA 91709; J and R Concrete Products, Inc., 11050 Redwood Ave., Fontana, CA 92335.

MC 167263 (Sub-6–1TA), filed April 6, 1983. Applicant: ANDRESA DULAY, 1925 Dover St., Delano, CA 93215. Representative: M. Dwain Smith, 1120 Kensington, Delano, CA 93215. *Passengers,* between Delano, CA and Las Vegas, NV, for 270 days. *Supporting shippers:* There are 5 shippers. Their statements may be examined at the regional office listed above.

MC 41098 (Sub-6–25TA), filed April 7, 1983. Applicant: GLOBAL VAN LINES, INC., One Global Way, Anaheim, CA 92803. Representative: Alan F. Wohlstetter, 1700 K St., N.W., Washington, D.C. 20006. *Contract carrier,* irregular routes, transporting *household goods* between points in the U.S. under continuing contract(s) with The Hertz Corporation of New York, NY for 270 days. *Supporting shipper:* The Hertz Corporation, 660 Madison Avenue, New York, NY 10021.

MC 41098 (Sub-6–26TA), filed April 7, 1983. Applicant: GLOBAL VAN LINES, INC., One Global Way, Anaheim, CA 92803. Representative: Alan F. Wohlstetter, 1700 K St., N.W., Washington, D.C. 20006. *Contract,* irregular, *Household goods* between points in the U.S. under continuing contract(s) with Gould Inc. of Rolling Meadows, IL and its subsidiaries, for 270 days. *Supporting shipper:* Gould Inc., 10 Gould Center, Rolling Meadows, IL 60008.

MC 164274 (Sub-6–1TA), filed April 7, 1983. Applicant: L & D ENTERPRISES, INC., 14909 NE 26th Street, Vancouver, WA 98664. Representative: David C. White, 2400 SW Fourth Ave., Portland, OR 97201. *Styrofoam cups* and *lids,* between p;oints in Contra Costa and Marin Counties, CA, on the one hand, and, on the other, points in AZ, UT and WA, for 270 days. ETA has been filed seeking 120 days' authority. *Supporting shipper:* Handi-Cup Company, 195 Tamal Vista, Corte Madera, CA 94925.

MC 167265 (Sub-6–1TA), filed April 6, 1983. Applicant: EMIL J. SAYLES, P.O.B. 1047, Evansville WY 82636. Representative: Sandra L. Sayles, 8450 Weld County Road 64, Windsor, CO 80550. *Oilfield equipment, materials and supplies used for same,* between points in WY, CO, KS, ME, OK, TX, LA, NM for 270 days. Supporting shipper: Black Hills Bentonite Co., POB 9, Mills, WY 82644.

MC 121366 (Sub-6–1TA), filed April 6, 1983. Applicant: DALLAS SMITH TRANSPORT CORP., 1102 E. Tonto St., Phoenix, AZ 85034. Representative: Andrew V. Baylor, 337 E. Elm St., Phoenix, AZ 85012. *Motor vehicles* between points in IL, MI and WA for 270 days. Interline privileges requested. An underlying ETA seeks 120 days authority. Supporting shipper: Ford Motor Company, 1 Parklane Blvd, Parklane Towers East, Suite 200, Dearborn, MI 48126.

BILLING CODE 7035–01–M

Motor Carriers; Proposed Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed exemptions.

SUMMARY: The motor carriers shown below seek exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343,* 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATE: Comments must be received within 30 days after the date of publication in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Warren C. Wood (202) 275–7977.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

By the Commission. Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

Volume No. OP3–163

Decided: April 13, 1980.

Maislin Industries, Ltd.—Continuance in Control Exemption—Contract Trucks, Inc., Maislin Transport, Ltd., Maislin Transport of Delaware, Inc., Gateway Transportation Co., Inc., Quinn Freight Lines, Inc., and Port Express International, Inc. MC–F–15184, Maislin Transport, Ltd. (MTL) (MC–108006), Maislin Industries, Ltd., (MIL), a non-carrier holding company, (MTL's parent

holding company) and Maislin Industries U.S., Inc. (MIUS), a non-carrier holding company (owned by MIL) seek an exemption from the requirement under section 11343 of prior regulatory approval for their continuance in control of Contract Truckers, Inc. (CTI) (an applicant for initial operating authority in MC–156254) (which is owned by MIUS). MTL also owns the stock of Maislin Transport of Delaware, Inc. (MTD)— (MC–60580) and Gateway Transportation Co., Inc. (MC–80430) and has temporary control of Quinn Freight Lines, Inc. (MC–4941). MIL also controls Port Express International, Inc., a Canadian non-carrier Corporation which is seeking to acquire a portion of the operating rights of Quinn in a separate proceeding (MC–F–14615).

[Finance Docket No. 30152]

Rail Carriers; Dillingham Holdings, Inc.—Control Exemption—Dillingham Corporation

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: Pursuant to 49 U.S.C. 10505, the Interstate Commerce Commission exempts from the requirements of prior approval under 49 U.S.C. 11343 the acquisition of common control of Amador Central Railroad, Eagle Motor Lines, Inc., Foss L&T, Inc., and Propane Transport, Inc.

DATES: This exemption will be effective on April 20, 1983. Petitions to reopen must be filed by May 10, 1983.

ADDRESSES: Send pleadings referring to Finance Docket No. 30152 to: (1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, D.C. 20423; and (2) Petitioner's representative: Barbara Campbell, 21 Dupont Circle NW., Washington, D.C. 20036.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision contact: T. S. InfoSystems, Inc., Room 2227, c/o Interstate Commerce Commission, 12th and Constitution Ave. NW., Washington, D.C. 20423; or telephone: (202) 289–4357 (D.C. Metropolitan area), (800) 424–5403 (toll free-outside the D.C. area).

Decided: April 12, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

[No. 19610]

Rail Carriers; Switching Rates in Chicago Switching District

AGENCY: Interstate Commerce Commission.

ACTION: Notice of reopening to eliminate prescription.

SUMMARY: Several rail carriers operating in the Chicago Switching District have petitioned for relief from the minimum rate prescription entered in this proceeding, 177 I.C.C. 669 (1931), and subsequent decisions. The Commission has provisionaly decided to vacate the prescription in its entirety. Additional petitions, for special permission, are denied for lack of jurisdiction.

DATES: Comments are due on May 20, 1983. The relief will become effective on June 20, 1983, unless, in response to comments filed, the Commission issues a further decision modifying or withdrawing this relief.

ADDRESS: Send an original and, if possible, 15 copies of comments to: Rail Section, Room 5344, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245; or Wendy Tillis, (202) 275–6445.

SUPPLEMENTARY INFORMATION: The Indiana Harbor Belt Railroad Company, the Chicago Short Line Railway Company, and the Baltimore & Ohio Chicago Terminal Railroad Company, each filed petitions requesting that rates prescribed in No. 19610, *supra*, be vacated for their single-line movements. The Elgin, Joliet & Eastern Railway and 16 other railroads have requested similar relief for their joint-line movements. Several of the petitioners have also requested that, should the order be vacated, they be allowed to supplement or reissue existing tariffs, increasing or reducing rates, on one day's notice.

In this case, originally decided over 50 years ago, the Commission prescribed minimum intrastate single-car rates for one, two, and three-line movements within the Chicago Switching District. The action was taken to remove discrimination against interstate commerce. These minimum rates, periodically revised by general increases, are still in effect today. The present rate for a single-car, single-line movement is 63 cents per 100 pounds at the RCCR–X002 level. (The two-line rate is 65 cents per 100 pounds, and the three-line rate is 68 cents per 100 pounds, minimum weight 60,000 pounds).

Petitioners agrue that the competitive environment has changed substantially since this proceeding originated. They contend also that since motor carriers operate free of regulation within the Chicago Commercial Zone, rail carriers, which must charge prescribed minimum rates, operate at a competitive disadvantage.[1] Petitioners note that the Staggers Rail Act and the National Rail Transportation Policy encourage rail carrier rate-making freedom and competition between modes of transportation. They indicate also, that the Commission has granted relief to the Elgin, Joliet & Eastern Railway Company (EJ&E) on single-line movements (STA-No. 81–6000 S, June 2, 1982) and that this places other rail carriers at a disadvantage vis-a-vis the EJ&E.

Circumstances have changed, and minimum rate prescriptions in this

[1] The commercial zone and terminal area exemptions are statutory. The limits of these zones are set by the Commission.

proceeding no longer appear warranted. Today's regulatory scheme encourages ratemaking freedom and competition among and between modes of transportation. The petitioning railroads allege that they no longer need the protection of minimum rate orders while their removal would be harmonious with elements of the rail transportation policy. Removal would (1) allow competition and demand to set reasonable rate levels, (2) reduce Federal regulatory control, (3) enhance competition among modes, and (4) foster sound economic conditions in transportation. In the circumstances, there no longer appears to be a valid regulatory purpose served by the outstanding order.

It does not appear that this decision will significally affect the quality of the human environment or conservation of energy resources.

49 U.S.C. 10321, 10701, 10702, and 10704)

Decided: April 8, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

Correction

In FR Doc. 83-7726 beginning on page 12802 in the issue of Friday, March 25, 1983, make the following correction:

On page 12804, center column, MC 159224 (Sub-1), Henry's Van Service, Inc., lines 8 through 10, "(except classes A and B explosives, household goods, and commodities in bulk)" should have read "(except classes A and B explosives and commodies in bulk)".

BILLING CODE 1505-01-M

[Ex Parte No. 55 (Sub-No. 43D)

Certification of Canadian or Mexican Ownership or Control of Applicants for Motor Common or Contract Carrier Authority

AGENCY: Interstate Commerce Commission.

ACTION: Modification of temporary procedure.

SUMMARY: On September 27, 1982, the Commission modified temporarily its procedures for applying for motor carrier operating rights authority in order to comply with the statutory prohibition against issuance of certificates or permits to certain applicants as set forth in the Bus Regulatory Reform Act of 1982. All applicants were required to make certification with respect to Canadian or Mexican domicile, ownership or control. In accordance with the Bus Regulatory Reform Act of 1982, the President ended the moratorium as it pertained to Canada, and certification with respect to Canada is no longer required. Certification is still required with respect to Mexico. Failure to make the required certification will result in rejection of the application..

EFFECTIVE DATE: This procedure becomes effective April 20, 1983.

FOR FURTHER INFORMATION CONTACT:
Joseph B. O'Malley, Jr., (202) 275-7928
or
Howell I. Sporn, (202) 275-7691.

SUPPLEMENTARY INFORMATION: As enacted, Section 6(g) of the Bus Regulatory Reform Act of 1982 (Pub. L. No. 97-261) imposed a moratorium on the Commission's issuance of certificates or permits to motor carriers domiciled in Canada or Mexico or owned or controlled by Mexicans or Canadians. The Act authorizes the President to remove the moratorium in whole or in part upon determination that such action is in the national interest.

The President made an initial determination that, effective September 21, 1982, a partial suspension of the moratorium with respect to Canada was in the national interest, and he excepted certain categories or operating authority from the coverage of the moratorium. See 47 FR 7778. To enable the Commission to comply with the terms of the moratorium, as modified by the President, we adopted on September 27, 1982, a temporary procedure in Ex Parte No. 55 (Sub-No. 43D) published in the **Federal Register** on September 29, 1982 (47 FR 42948). That procedure required all motor carrier applicants for operating authority of any nature to provide certain certification regarding Canadian or Mexican domicile, ownership or control.

Subsequently, the President removed the moratorium for Canada, effective November 30, 1982. Accordingly, certification regarding Canadian domicile, ownerhip or control is no longer required and need not be submitted by motor carrier applicants. All motor carrier applicants, however, must continue to certify that they are neither domiciled in Mexico, nor owned or controlled by persons of that country. This certification must be in the following form:

I certify that the applicant in this proceeding is not domiciled in Mexico. Moreover, the applicant is not owned by or controlled by persons of that country.

This certification must appear on the first page of a verified statement immediately following the name and address of applicant. Details need not be furnished at this stage, but failure to include the certification will result in rejection of the application. A person desiring to challenge an applicant's representation of domicile, ownership or control may do so as part of the normal protect procedure applicable to the type of application filed.

Because this temporary procedural change is merely a change in agency procedure or practice, notice to the public and opportunity to comment prior to adoption of the temporary procedure is not required. 5 U.S.C. 553(b)(3)(A). In addition, notice and comment would be both impractical and unnecessary. 5 U.S.C. 553(b)(3)(B). As noted when we adopted the previous certification procedure in September 1982, the mandate of the statutory provision is clear and leaves no discretion with the Commission. In our procedures we have attempted to follow its language and intent, as modified by the President, as closely as possible without placing an undue burden on motor carrier applicants. The uncertain duration of the moratorium militates against any lengthy consideration of public input in our decision. For the above reasons, we find that there is good cause to dispense with notice and comment procedures. Similarly, there is good cause under 5 U.S.C. 553(d)(3) for making the procedure effective on less than 30 days' notice. The removal of Canadian applicants from the prohibitions of the moratorium is already in effect, and our modification of the temporary procedure here merely recognizes that fact and clarifies the type of information presently needed by the Commission.

This action will not have a significant impact on the quality of the human environment or conservation of energy resources.

The provisions of 5 U.S.C. 603 require that the Commission examine the impact of our action on small businessses and small organizations. We can perceive no significant economic impact on small entities as a result of this temporary procedure.

This action is taken under the authority of 49 U.S.C. 10321, and 10922(1), and 5 U.S.C. 553.

Decided: April 13, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Proposed Consent Decree In Action To Enforce the Clean Water Act; City of Jacksonville

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on April 4, 1983, a proposed consent decree in *United States* v. *City of Jacksonville*, Civil Action No. 79-65-Civ-J-M, was lodged with the United States District Court for the Middle District of Florida.

The proposed consent decree resolves an action by the United States against the City of Jacksonville seeking injunctive relief and civil penalties under the Clean Water Act.

The Department of Justice will receive for a period of thirty (30) days from the date of this notice written comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *City of Jacksonville*, D.J. No. 90-5-1-1-1980.

A copy of the proposed consent decree may be examined at the Office of the United States Attorney, Middle District of Florida, 409 Post Office Building, 311 West Monroe Street, Jacksonville, Florida 32201; the Environmental Protection Agency, 345 Courtland Street, N.E., Altanta, Georgia 30365; and the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Proposed Consent Decree In Action To Enjoin Emission Of Air Pollutants; State Of New York Facilities Development Corp. et al.

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a proposed consent decree in *United States* v. *State of New York Facilities Development Corporation, et al.*, Civil Action No. 81-CV-482, has been lodged with the United States District Court for the Northern District of New York. The proposed consent decree would establish a compliance program for the State of New York's Rochester Pyschiatric Center and Marcy Psychiatric Center, to bring those facilities into compliance with the Clean Air Act, 42 U.S.C. 7401 *et seq.*

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530 and should refer to *United States* v. *State of New York Facilities Development Corporation, et al.*, D.J. Ref. No. 90-5-2-1-252.

The proposed consent decree may be examined at the office of the United States Attorney, Northern District of New York, Federal Building, Syracuse, New York 13201; at the Region II office of the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278; and the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.10 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Proposed Consent Decree In Action Under Clean Water Act To Require Defendant To Cease Illegal Discharges of Pollutants at the Gary Sanitary Wastewater Treatment Facility in Gary, Indiana

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that a proposed consent decree in *United States of America* v. *City of Gary and Gary Sanitation District*, Civil No. H 78-29, was lodged with the United States District Court for the Northern District of Indiana on March 25, 1983.

The proposed consent decree requires the City of Gary and the Gary Sanitation District to undertake certain measures to ensure that its wastewater treatment plant is operated in compliance with the Clean Water Act, 33 U.S.C 1251 *et seq.*, including the restoration and reconstruction of existing equipment, and the implementation of operation, maintenance and staffing procedures and requirements.

The proposed consent decree may be examined at the office of the United States Attorney, Room 312 Federal Building, 507 State Street, Hammond, Indiana; at the Region V office of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois; and at the Office of the Enviromental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Tenth and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. Please forward a check in the amount of $1.60 ($.10 per page) for each copy requested.

The Department of Justice will receive written comments relating to the proposed consent decree for a period of thirty days from the date of this notice. Comments should be directed to the Assistant Attorney General for the Land and Natural Resources Division of the Department of Justice, Tenth and Pennsylvania Avenue, NW., Washington, D.C. 20530 and should refer to *United States of America* v. *City of Gary and Gary Sanitation District*, D. J. Ref. 90-5-1-1-860.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Drug Enforcement Administration

Importer of Controlled Substances; Registration

By Notice dated March 11, 1982, and published in the **Federal Register** on March 19, 1982, (47 FR 11995), Stepan Chemical Company, Natural Products Department, 100 West Hunter Avenue, Maywood, New Jersey 07607, made application to the Drug Enforcement Administration to be registered as an importer of Coca Leaf (9040), a basic class of controlled substance listed in Schedule II.

No comments or objections have been received. Therefore, pursuant to Section 1008(a) of the Controlled Substances Import and Export Act and in accordance with Title 21 Code of Federal Regulations § 1311.42, the above firm is granted registration as an importer of the basic class of controlled substance listed above.

Dated: April 11, 1983.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 7400-02-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-364]

Alabama Power Co.; Grant of Relief From ASME Section XI Inservice Testing Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components" to Alabama Power Company (the licensee). The relief relates to the inservice testing program for the Joseph M. Farley Nuclear Plant, Unit No. 2 (the facility) located in Houston County, Alabama. The ASME Code requirements are incorporated by reference in to the Commission's rules and regulations in 10 CFR Part 50. The relief is effective as of April 8, 1983.

The relief permits the licensee to test certain designated pumps and valves in a manner or on a schedule different from that prescribed in Section XI of the ASME Boiler and Pressure Vessel Code and applicable Addenda, as required by 10 CFR Part 50, because of inaccessibility, configuration of components, radiation level, or other valid reasons.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letter granting relief.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this relief.

For further details with respect to this action, see (1) the application for relief

dated March 12, 1986, as revised March 17 and August 6, 1982, (2) the Commission's letter dated April 8, 1983 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 8th day of April, 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

[FR Doc. 83-10546 Filed 4-19-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-334]

Duquesne Light Co., et al; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 68 to Facility Operating License No. DPR-66 issued to Duquesne Light Company, Ohio Edison Company, and Pennsylvania Power Company (the licensees), which revised Technical Specifications for operation of the Beaver Valley Power Station, Unit No. 1 (the facility) located in Beaver County, Pennsylvania. The amendment is effective as of the date of issuance.

The amendment removes the accuracy requirement on control rod position indication for Modes 3, 4, and 5.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazard consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated September 29, 1982, supplemented by letters dated December 8, 1982 and February 9, 1983, (2) Amendment No. 68 to License No. DPR-66 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001. A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 13th day of April, 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-142-OLA; (ASLPB No. 80-444-05 LA)]

The Regents of the University of California; Reconstitution of Board

Pursuant to the authority contained in 10 CFR 2.721 (1980), the Atomic Safety and Licensing Board for *The Regents of the University of California*, UCLA Argonaut-Type Research Reactor, Docket No. 50-142-OLA, is hereby reconstituted by appointing Glenn O. Bright to the Board in place of Dr. Oscar H. Paris, who because of a schedule conflict, is no longer able to serve.

As reconstituted, the Board is comprised of the following Administrative Judges: John H. Frye, Chairman; Emmeth A. Luebke, and Glenn O. Bright.

All correspondence, documents and other material shall be filed with the Board in accordance with 10 CFR 2.701 (1980). The address of the new Board member is:

Administrative Judge Glenn O. Bright, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555

Issued at Bethesda, Maryland this 12th day of April, 1983.

B. Paul Cotter, Jr.,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

BILLING CODE 7590-01-M

[Docket No. 50-259]

Tennessee Valley Authority (Browns Ferry Nuclear Plant, Unit 1); Exemption

I

The Tennessee Valley Authority (TVA/licensee) is the holder of Facility Operating License No. DPR-33 which authorizes the operation of the Browns Ferry Nuclear Plant, Unit 1 (the facility) at steady-state power levels not in excess of 3293 megawatts thermal. The facility is a boiling water reactor (BWR) located at the licensee's site in Limestone County, Alabama. The license provides, among other things, that it is subject to all rules, regulations and Orders of the Commission now or hereafter in effect.

II

Section 50.54(o) of 10 CFR Part 50 requires that primary reactor containments for water cooled power reactors be subject to the requirements of Appendix J to 10 CFR Part 50. Appendix J contains the leakage test requirements, schedules, and acceptance criteria for test of the leak-tight integrity of the primary reactor containment and systems and components which penetrate the containment. Section III.D.3 of Appendix J requires that Type C tests—which are defined as "tests intended to measure containment isolation valve leakage rates"—"shall be performed during each reactor shutdown for refueling but in no case at intervals greater than 2 years". Appendix J was published on February 14, 1973. At that time, all light water reactors were on a nominal annual refueling cycle. However, most light water reactors are now on an 18-month or two-year refueling cycle.

By letter dated March 29, 1983, TVA requested an exemption from the Type C test interval requirements of 10 CFR Part 50, Appendix J for eleven isolation valves at Browns Ferry Unit No. 1 to permit continued operation until Unit 2 is ready to restart following an extended outage. Unit 1 is currently scheduled to shut down for the Cycle 5 refueling outage on April 15, 1983. For the eleven isolation valves, the two-year test interval specified in Appendix J expires on April 11, or April 12, 1983. To account for a possible delay in returning Browns Ferry Unit 2 to power following the torus load tests now scheduled to be completed on April 10, 1983 (and which in turn is responsible for the postponement in shutting down Unit 1), TVA has requested an extension to the two-year test internal to May 6, 1983

(i.e., a maximum extension of 25 days for any isolation valve).

The Browns Ferry units are on a nominal 18-month refueling cycle. During the past several years, the refueling outages have extended over a period of six to eight months. The extended outages have resulted from the various modifications being performed, the most significant of which has been the Mark I torus modifications. Browns Ferry Unit 1, which is the subject of this exemption, was scheduled to shutdown for refueling on March 1, 1983. However, the outage of Browns Ferry Unit 2 which shutdown on July 30, 1982, extended to March 18, 1983—over two months beyond that which had been projected. To avoid simultaneous multi-unit outages, TVA has been operating Unit 1 in a coastdown mode and rescheduled the refueling outage to April 15, 1983—about the time the startup tests are expected to be completed on Unit 2.

Browns Ferry Unit 1 shutdown for the last refueling modification in April 1981. The eleven isolations valves which are covered by this exemption were individually leak tested in accodance with Appendix J on April 11 and 12, 1981. Unit 1 did not startup until October 1, 1981, so there was a period of almost six months—about 25% of the two year Appendix j test interval—during which the valves were not exposed to any significant temperature, pressure or conditions which would likely degrade the valves.

We have determined that the exemption from the Type C testing frequency of Appendix J requested by the licensee for the eleven isolation valves identified in TVA's letter of March 29, 1983 should be granted on the following bases:

1. The condition of the eleven isolation valves is not expected to change significantly during the requested extension period, which is short in comparison with the two-year test interval specified in Appendix J. The extension in the test interval is for a maximum of 25 days for any valve; if Browns Ferry Unit 1 shuts down for refueling as presently scheduled on April 15, 1983, the extension in time for testing any valve would be a maximum of four days.

2. The intent of Appendix J was that isolation valves be tested during refueling outages. It was not the intent of Appendix J to require a shutdown solely to test isolation valves. The reason for the request by the licensee is to extend the test interval to coincide with the scheduled shutdown for refueling.

3. None of the eleven isolation valves are located on major primary systems; in the event of an accident, they would not constitute a significant leakage pathway to the environment.

4. The two-year test interval specified for Type C tests in Appendix J was based on two years of expected exposure of valves to service. However, for about one quarter of the two-year period since the eleven valves were tested, Browns Ferry Unit 1 was in an extended outage during which the valves were not exposed to an operating environment. This should reduce any potential degradation of the valves.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest. Therefore, the Commission hereby approves the following exemption request:

Exemption is granted from the requirements of Section III.D.3 of Appendix J pertaining to the test frequency for conducting Type C tests on the eleven isolation valves identified in TVA's letter of March 29, 1983. The test interval may be extended to the next refueling outage of Browns Ferry Unit 1 but in no case shall extend beyond May 6, 1983.

The NRC staff has determined that the granting of this exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 8th day of April, 1983.

For the Nuclear Regulatory Commission.

Darrell Eisenhut,

Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 83-10549 Filed 4-19-83; 8:45 am]

BILLING CODE 7590-01-M

Vermont Yankee Nuclear Power Corp.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 78 to Facility Operating License No. DPR-28, issued to Vermont Yankee Nuclear Power Corporation which revised Technical Specifications for operation of the Vermont Yankee Nuclear Power Station (the facility) located near Vernon, Vermont. The amendment is effective as of its date of issuance.

The amendment modifies the Technical Specifications to permit the disconnecting of the electrical input to the local power range monitors during refueling outages.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated February 22, 1983, (2) Amendment No. 78 to License No. DPR-28, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Brooks Memorial Library, 224 Main Street, Brattleboro, Vermont 05301. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 11th day of April 1983.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

Chief, Operating Reactors Branch No. 2, Division of Licensing.

BILLING CODE 7901-01-M

RAILROAD RETIREMENT BOARD

Report Under Section 22 of the Railroad Retirement Act; Correction

AGENCY: Railroad Retirement Board.

ACTION: Notice of a report submitted to the President, the Speaker of the House, and the President of the Senate; correction.

SUMMARY: This document corrects the notice of a report submitted to the President, the Speaker of the House, and the President of the Senate on February

18, 1983, and which was published March 17, 1983 (48 FR 11363). This action is necessary to correct typographical errors appearing in that document. The errors mentioned below are very minor, do not change the substance of the information reported, and would not have required a printed correction except for item 2. The other changes are mentioned simply because a correction document is being prepared for item 2.

DATE: April 20, 1983.

The notice is corrected as follows:

1. On page 11364, column 2, second full paragraph, line 6, "estimates of hypothetical levels of" is corrected to read "estimates to hypothetical levels of".

2. On page 11364, column 2, the last paragraph is incomplete. The paragraph, as printed with a portion omitted, read:

"Balance I" represents the balance in the Railroad Retirement Account on May 1 of the indicated year, assuming that the Railroad Unemployment Insurance Account after September 30, 1983. A negative balance indicates that the Railroad Account is in debt to the general fund; the magnitude of the negative number is the amount of the outstanding loan.

This paragraph, as reported to the President and the Congress, and for purposes of publication, is corrected to read:

"Balance I" represents the balance in the Railroad Retirement Account on May 1 of the indicated year,assuming that the Railroad Unemployment Insurance Account is allowed to continue borrowing from the retirement account. "Balance II" differs from Balance I in that it is based on the assumption that no loans are made from the Railroad Retirement Account to the Railroad Unemployment Insurance Account after September 30, 1983. A negative balance indicates that the Railroad Retirement Account is in debt to the general fund; the magnitude of the negative number is the amount of the outstanding loan.

3. On page 11365, column 1, item 3, line 5, the word "account" is corrected to read "Account".

4. On page 11365, column 2, last paragraph, lines 7 and 8, the words "Railroad Account" are corrected to read "Railroad Retirement Account."

Dated April 12, 1983.

By Authority of the Board.

James T. Brown,

Chief Executive Officer, Railroad Retirement Board.

BILLING CODE 7905-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 22912; 70-6855]

Allegheny Power System, Inc.; Proposed Issuance and Sale of Common Stock

April 14, 1983.

Allegheny Power System, Inc. ("APS"), 320 Park Avenue, New York, New York, 10022, a registered holding company, has filed a declaration with the Commission pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50(a)(5) promulgated thereunder.

APS proposes to issue and sell from time to time not more than 3,000,000 shares of its authorized and unissued common stock, par value $2.50 per share ("Additional Common Stock") pursuant to its Dividend Reinvestment and Stock Purchase Plan ("Dividend Plan") and its Tax Credit Employee Stock Ownership Plan ("PAYSOP"). The PAYSOP was formerly called the Tax Reduction Act Employee Stock Ownership Plan ("TRASOP"). By orders dated August 5, 1977, and April 29, 1980 (HCAR Nos. 20131 and 21542), the Commission authorized the issuance by APS of an aggregate of 3,000,000 shares under these plans, of which 1,899,073 and 690,938 shares have been issued pursuant to the Dividend Plan and the PAYSOP, respectively, as of December 30 1982, the last date on which shares were issued under either of the plans. As of March 15, 1983, APS is authorized to issue 55,000,000 shares of its common stock, of which 47,587,242 shares are outstanding.

The Dividend Plan makes the following options available, on a voluntary basis, to all holders of record from time to time of common stock of APS: (a) To invest cash dividends automatically, on each quarterly dividend payment date, in Additional Common Stock, (b) to make optional cash purchases of not less than $50 and not more than $5,000 per quarter of Additional Common Stock provided that in each quarter the maximum aggregate amount of Additional Common Stock to be made available for purchase shall not exceed the number of shares which have been offered to, but not purchased by, the holders of shares of common stock with cash dividends, and (c) both (a) and (b).

In each case the price of the Additional Common Stock will be equal to the average of the daily high and low market prices of APS common stock as published in the Wall Street Journal Report of New York Stock Exchange Composite Transactions for the 10 Trading days prior to the dividend payment date. All costs and charges of participation in the Dividend Plan are paid by APS. A shareholder may withdraw from the Dividend Reinvestment part of the Dividend Plan at any time by giving appropriate written notice, and such withdrawal will have no effect on such shareholder's right to continue to make optional cash purchases. APS reserves the right to direct the administrator of the Dividend Plan to purchase shares in the open market, subject to any applicable regulatory requirements, with funds provided from participants' cash dividends and optional cash payments. In such event the price of any such shares to the participant will be the average cost of the shares excluding any related brokerage fees or commissions, which will be paid by APS. In the event optional cash payments exceed the number of shares available for optional cash purchases, that is the number of shares which have been offered to but not purchased by the holders of shares with cash dividends in that quarter, the available shares will be alloted among those who have made optional cash payments, in proportion to the amount of their optional cash payments, and any excess cash remaining will be refunded to participants without interest.

With respect to the PAYSOP, APS proposes to issue the Additional Common Stock to a trust created for the benefit of qualified employees of all system companies pursuant to the requirements of the Tax Reduction Act of 1975, as amended by the Tax Reform Act of 1976 and the Economic Recovery Tax Act of 1981. The amount of employer contributions which may be made to the trust (and hence the value of shares of Additional Common Stock so issued) is determined by applicable provisions of the Internal Revenue Code. In brief, contributions in respect of Plan years or portions thereof after December 31, 1982, are equal to varying percentages of Compensation (as defined) paid to Plan members less certain recaptured tax credits. The number of shares of Additional Common Stock to which each qualified employee shall be entitled will be computed in the proportion that the Compensation of each of them (not in excess of $100,000 a year) bears to the total of all Compensation not in excess of $100,000 of all such qualified employees in that year. The price of the shares will be equal to the daily average of the closing prices as published in the Wall Street Journal Report of New York Stock Exchange Composite Transactions for the 20 business days preceding the day

the stock is issued to the trust. The Additional Common Stock issued to the trust will be in consideration for the past labor and services of qualified APS System employees. All costs of administration of the PAYSOP, in excess of those allowed to be paid from contributions to the trust, will be paid by APS.

The proceeds from the issuance of the Additional Common Stock under the Dividend Plan and the tax savings which will be realized as a result of the PAYSOP, the total amount of which cannot be determined, will be used by APS to make capital contributions to its direct and advances to its indirect subsidiaries, to acquire notes or stock of such subsidiaries, and to finance other corporate needs.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by May 9, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[Release No. 13159; 812-5144]

American Trading and Production Corp.; Filing of Application

April 13, 1983.

Notice is hereby given that American Trading and Production Corporation ("Applicant"), One North Charles Street, Baltimore, Maryland 21201, a Maryland corporation, filed an application on March 11, 1982, and an amendment thereto on September 30, 1982, pursuant to Section 3(b)(2) of the IInvestment Company Act of 1940 ("Act"), for an order of the Commission declaring that Applicant is primarily engaged in a business or businesses other than that of investing, reinvesting owning, holding, or trading in securities, either directly or through wholly-owned subsidiaries, or through controlled companies. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant represents that it is a closely-held company, not subject to the registration and reporting requirements of the Securities Exchange Act of 1934, and that it has never made a public offering of its securities. It further represents that it is currently, and for a number of years has been, actively engaged in certain operating businesses: i.e., oil and gas exploration and development, marine transportation, real estate and manufacturing. It further states, however, that it falls within the definition of investment company set forth in Section 3(a)(3) of the Act, which defines as an "investment company" any issuer which is engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities and owns or proposes to acquire investment securities having a value exceeding 40 percent of the value of such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis. Applicant falls within this definition, it is stated, by reason of its ownership of the securities of the following issuers, in each of which it holds a less-than-majority interest: Crown Central Petroleum Corporation ("Crown Central"), Standard Oil Company (Indiana) ("Indiana"), Exxon Corporation ("Exxon"), Union Trust Bancorporation ("Union Trust") and U.S. F. & G. Corporation ("U.S.F. & G.").[1]

Notwithstanding its status according to the provisions of Section 3(a)(3), Applicant contends that its operating activities and those of its wholly-owned subsidiaries, together with the operation of Crown Central, in which Applicant holds a controlling interest and through which it claims to be doing business, afford a basis upon which the Commission should find, pursuant to the provisions of Section 3(b)(2) of the Act, that Applicant is primarily engaged in businesses other than that of investing in, owning, or holding securities. Section 3(b)(2) of the Act excludes from the definition of investment company, any issuer which the Commission, upon application by such issuer, finds and by order declares to be primarily engaged in a business or businesses other than that of investing, reinvesting, owning, holding, or trading in securities, either directly or (A) through majority-owned subsidiaries, or (B) through controlled companies conducting similar types of business. Applicant asserts, in general, that its historical development, public representations of policy, the nature of its present assets and the sources of its present income support the conclusion that it is primarily engaged in operating businesses rather than the business of investing in securities.

Applicant traces its origins to the period before 1920, when Louis Blaustein and his son Jacob became engaged in the oil and gas business (it is stated that all of Applicant's existing stockholders received their interests from Louis and Jacob Blaustein, their descendants or the spouses of their descendants, or as the result of recapitalization and stock dividends). Applicant states that the Blausteins originally operated their businesses in partnership form, later organizing them as wholly-owned corporations, Lord Baltimore Filling Stations, Inc., ("Lord Baltimore") organized in 1921, and The American Oil Company ("American Oil"), organized in 1922. These companies (jointly referred to as "American Oil"), Applicant states, were basically distributors of petroleum products, such as gasoline and kerosene, and did not have refineries, facilities for crude oil production, or bulk transportation capability. Therefore, it is stated, it was necessary for American Oil to purchase all of the gasoline it marketed from Standard Oil Company of New Jersey ("Jersey Standard"), American Oil's principal competitor. To alleviate this disadvantage, Applicant states, in 1923 the Blausteins sold half of

---

[1] Indiana is a major "integrated" oil company, engaged primarily in the production, refining, transportation and marketing of petroleum and petroleum products, including petrochemicals. Applicant states. Crown Central, it is stated, is a "semi-integrated", domestic independent refiner-marketer of petroleum and petroleum products, also engaged in crude oil and natural gas production; through a subsidiary, Crown Central writes individual and group life and health insurance and individual annuities. Exxon, it is stated, is a major integrated, international oil company. Union Trust Bancorp is a bank holding company, the principal subsidiary of which is Union Trust Company of Maryland, which is engaged in the commercial banking and trust business, Applicant states. It is stated that the shares of Union Trust Bancorp presently held by Applicant were acquired by it in 1972 pursuant to the organization of Union Trust Bancorp as a bank holding company in exchange for the common stock of Union Trust Company of Maryland. Lastly, Applicant states the U.S.F. & G. is an insurance holding company which is engaged through subsidiaries in writing all types of insurance. Applicant represents that it acquired its holdings of Union Trust Bancorp and U.S.F. & G. through open-market purchases, from stock dividends and splits, and through rights offerings from 1942 through 1960.

the stock of American Oil to Pan American Petroleum and Transport Company ("Old Pan-Am"), which was not a competitor and which engaged in crude oil production, refining and transportation, but did not have sales outlets or marketing facilities. An agreement providing for the management of American Oil and a long-term supply contract for gasoline accompanied this transfer, Applicant states.

It is further stated, however, that difficulty with this arrangement arose from the acquisition by 1930 of most of the stock of Old Pan-Am by Indiana, the management of which wanted to transfer Old Pan-Am's crude oil refining properties to Jersey Standard, thereby making American Oil again dependent upon a competitor for products. To avert that result, Applicant states, the Blausteins advocated that American Oil acquire an interest in Crown Central, which had refining facilities that could be developed to meet American Oil's requirements. Indiana management, Applicant states, would not agree to this proposal; therefore, in November 1930, the Blausteins themselves acquired a nearly 50 percent interest in Crown Central. At this time, Applicant notes, Crown Central was a small corporation engaged principally in producing and selling at wholesale refined products from a single refinery in Texas, having annual revenues of less than $4,000,000.

It is further stated that as friction between the Blausteins and Indiana management continued, and because it would be necessary to borrow in order to bring about the expansion of Crown Central, in 1931 the Blausteins decided to organize Applicant, and transfer to it their entire investment in Crown Central [2] and approximately half of their interest in American Oil in exchange for all of Applicant's capital stock. In acquiring the American Oil interest, it is stated, Applicant would obtain an asset which it could utilize as security to obtain financing for the Crown Central expansion.

After the Crown Central acquisition, Applicant states, Henry A. Rosenberg, a son-in-law of Louis Blaustein and formerly an executive of American Oil, became president and chief executive officer of Crown Central, while remaining a director of Applicant.[3] The Blausteins, it is stated, continued as principal officers, and directors, of American Oil, but also became participants in importan management decisions regarding Crown Central.

Applicant further states that in 1933 the strategy of marketing Crown Central products through American Oil was deferred in conjunction with the reorganization of Old Pan-Am into a new entity, also named Pan-American Petroleum and Transport Company ("New Pan-Am"), which acquired all of the stock of American Oil owned by the Blausteins, by Applicant, and by Old Pan-Am. It was intended that New Pan-Am would construct a refinery with capital funds provided by Indiana, and would, in general, combine with American Oil into an integrated oil company. The Blausteins became officers and directors of New Pan-Am and various subsidiaries in the aftermath of this restructuring. It is further stated, however, that plans for an integrated oil operation did not materialzed to the Blaustein's satisfaction, and in 1937, they sued Indiana to compel Indiana to co-operate with them in the management of New Pan-Am in the manner allegedly contemplated by the 1933 reorganization. With the advent of this lawsuit, Applicant states, the Blausteins resigned as officers of New Pan-Am, but various officers and directors of Applicant remained directors of New Pan-Am and its subsidiaries as well as members of management committees of these entities. Substantial amounts of time were expended by Applicant's officer and other employees on the Indiana litigation, it is also stated.

The Blaustein's proceeding against Indiana was finally settled in 1954, Applicant states, with the merger of New Pan-Am into Indiana. In that merger, it is stated, Applicant received shares of Indiana stock for its shares of New Pan-Am. On the basis of those Indiana shares, Applicant states, it has received dividends from time to time paid in capital stock of Jersey Standard, and in 1972, Applicant's shares of Jersey Standard were converted in a reorganization into shares of Exxon.[4]

Applicant states, in addition, that from the time of the Indiana reorganization in 1954, until the death of Jacob Blaustein in 1970, officers and employees of Applicant continued to administer on-going operations at Indiana, although the amount of time they devoted to Indiana was substantially reduced. Since 1970, it is stated, no one associated with Applicant has been a director of Indiana, and activities on the part of Applicant with regard to Indiana have been limited to attendance at stockholders' meetings and occasional informational meetings with Indiana's management.

With respect to its relationship to Crown Central, Applicant states that it exercises effective control of the large petroleum producer through ownership of Crown Central voting securities, noting that its Crown Central stock has represented over half of the total shares present and voting at every meeting of Crown Central stockholders since 1931. It is further stated that although pursuant to agreement Applicant and Crown Central have never had common officers, there have been three common directors of the two companies at all times since Applicant became a Crown Central securityholder.[5] It is conceded that from 1955 to 1971, the chief executive officer of Crown Central was not a director of Applicant, but it is further noted that during that period Henry A. Rosenberg, Jr., who was a director of Applicant, was also a director and an employee of Crown Central, becoming president and chief executive officer of Crown Central in

---

[2] Applicant presently owns approximately 49.15 percent of Crown Central Class A Common Stock, and approximately 42.26 percent of Crown Central Class B Common Stock.

[3] It is noted that Mr. Rosenberg's son, Henry A. Rosenberg, Jr., is the current chief executive officer and president of Crown Central.

[4] In Applicant's view, the origin of its acquisition of the investment securities it now holds, as described hereinabove, tends to diminish the importance of these assets in the determination of whether Applicant is primarily engaged in the business of investing in securities. In a related vein, Applicant finds support for the contention that it is not primarily engaged in the business of investing in securities in the fact that none of its more than 1,300 employees is engaxged in trading or investing in securities, not has it sold any investment securities since the passage of the Act in 1940, other than certain concurrent sales and repurchases of identical numbers of shares of Jersey Standard for tax purposes, and sales of fractional shares received in reorganizations and pursuant to stock dividends. Applicant also notes that less than 2 percent of the total working hours of its senior executive oficers is allocated to matters which relate to Applicant's investment securities (it may be inferred from this representation that included within the less-than-2 percent limitation is the time allocated by the two directors of Applicant who are also directors of Union Trust Bancorp to their responsibilities as members of the bank holding company's board, and the hours expended by the director of Applicant who is also a director of U.S.F.&G. in connection with his directorship of that insurance holding company; also included within the less-than-2 percent ceiling may be the hours consumed by the senior executive officers of Applicant in attending annual meetings of Union-Trust Bancorp, U.S.F.&G. and Indiana). Lastly, Applicant asserts that it is engaged in the businesses in which Crown Central is engaged and that therefore, Applicant's Crown Central stock should not be regarded as investment securities for purposes of ascertaining whether Applicant is primarily engaged in the business of investing in securities.

[5] It is stated that Crown Central currently has 14 directors, three of whom are also directors of Applicant, and another of whom is a member of a law firm which is general counsel to both Applicant and Crown Central.

1971. In addition, the advisory committee of Applicant's board of directors regularly considers action that may be taken in connection with the operation of Crown Central, Applicant states, and two of Applicant's directors occupy positions on the Crown Central executive committee, while one of Applicant's directors is a member of the audit committee of Crown Central. With regard to decisions affecting Crown Central requiring stockholder approval, it is stated that such matters are normally discussed by Crown Central's management with Applicant's management, but that Applicant has not otherwise participated in management of Crown Central since 1970 save through the functions of common directors.

In brief, Applicant asserts that its role in the administration of Crown Central's businesses is in many respects as extensive as that of a parent corporation in the operation of a majority-owned subsidiary sufficiently large to have its own full-time executive and administrative personnel.

Crown Central's operations have grown dramatically since the 1930's, such that currently the company produces more 3,6000 barrels of crude oil per day, Applicant states, and has over nine million barrels of reserves. It is further stated that Crown Central produces over 35,800 MCF (thousand cubic feet) of gas per day, and has over 52,000,000 MCF of reserves. Crown Central also owns a 100,000 barrel-per-day refinery, as well as marketing facilities and pipelines, it is stated. Applicant notes that for 1981 Crown Central was ranked No. 242 on the *Fortune* list of the 500 largest industrial companies, with revenues of $1,500,000,000, and assets exceeding $540,000,000. Applicant has participated actively in the planning and implementation of all of the significant stages of the Crown Central expansion, it is also stated.

Applicant further states that Crown Central's operations are similar to the oil and gas operations which Applicant conducts directly and through subsidiaries. It is stated that Applicant has engaged in exploration for oil and gas in the United States since 1936, and in Canada since 1969. An average of 62 full-time executive, professional, administrative and support personnel are currently employed in this business, it is stated. Applicant further states that drilling operations are conducted for it by independent contractors, but that Applicant owns outright all of its oil and gas properties. It is also stated that while in certain cases Applicant owns 100% of the operating interests in particular properties, in many instances it owns only an undivided fraction of the entire operating interest.

It is further stated that Applicant's marine transportation business was an outgrowth of petroleum and natural gas operations in which it was involved in the 1930's. It initial endeavor in the field of marine transportation began in 1938, Applicant states, with the shipment of petroleum products primarily for Crown Central, by means of a single oil tanker. Following World War II, it is stated, Applicant's transport operations were diversified and augmented, such that, Applicant currently (though subsidiaries) owns and operates five oceangoing vessels engaged in the transportation of petroleum products, other liquid commodities such as alcohol and petrochemicals, and grain. Applicant represents that on December 31, 1981, its vessels had a deadweight tonnage (carrying capacity) of 190,000 tons, and that three additional tankers which have been under construction will increase the deadweight tonnage of Applicant's fleet by 132,000 tons. It is further stated that the operation of five tankers currently in use requirements that Applicant employ the equivalent of 92 officers and 217 crew members working 40 hours per week. Applicant states that it maintains a supervisory staff of 27 executive, administrative, professional and support personnel to oversee its marine transportation business. Overall, Applicant states, the number of persons it employs in tanker operations exceeds 210.

The remaining businesses in which Applicant states that it is engaged are real estate and manufacturing. Since the 1950's, Applicant states, it has conducted substantial real estate operations, initially involving urban renewal projects in Baltimore, MD, and presently including the construction, ownership and operation of commercial and residential properties. Applicant represents that its current operating properties consist of seven office buildings (having more than 1,700,000 rentable square feet), a 262-unit apartment project, two parking garages, a shopping mall/office tower complex, and a recreational property associated with a condominium project. An additional office building having approximately 122,000 square feet of rentable space has recently been completed, it is stated. Applicant states that it employs over 210 persons in its real estate business.

Applicant states, in addition, that its manufacturing operations had their inception in 1961 and that its products presently include microphone stands and accessories, horn-type loudspeakers, alarm devices and lamination stampings used in electric motors and transformers. It is further stated that Applicant's consumer products consist of a wide range of serving accessories and giftware sold under the trade names Kromex, Etco and Ernest Sohn Creations. At December 31, 1981, Applicant states, 203 executive, administrative, professional and support personnel were engaged in Applicant's manufacturing operations, while 529 production employees were engaged in these functions.

In further support of its contention that it is not primarily engaged in the business of investing in, owning, or holding securities, Applicant represents that it has never held itself out as an investment company, either to its own securityholders or to the general public. For example, Applicant cites the statement of its business purposes contained in its certificate of incorporation, and the summaries of its business operations contained in its annual reports to shareholders for 1980 and 1981.

Applicant further represents that it has been described in reports issued by Dun & Bradstreet, Inc. as a producer of crude oil and natural gas, manufacture of giftwares; communication equipment and lamination; owner and operator of a tanker fleet; and developer and operator of commercial property. It is stated that these reports also disclose that a substantial part of Applicant's net worth is represented by stock investments not included in current assets. In addition, in sales literature pertaining to one of its real estate ventures, Applicant states, Applicant has been described as a "substantially diversified, privately held corporation," which is directly engaged in "the exploration and production of crude oil and natural gas; the ownership and operation of a fleet of ocean-going tankers; and the manufacturing of electronic communications equipment and quality kitchenware and giftware . . ."

Applicant further states that in proxy statements distributed by companies in which it has invested, Applicant has generally been described as a diversified industrial company engaged in marine transportation, oil and gas development, real estate development and manufacturing. For example, it is stated that in Crown Central's proxy statement Applicant is said to be engaged in "oil and gas exploration and production; tanker transportation; commercial and residential real estate; [and] diversified manufacturing."

In analyzing the nature of its present assets, Applicant emphasizes the lengthy chronology of developments leading up to its current position, citing the fact that over 99% (excluding Crown Central stock) of the market value of its investment securities consist of stock (shares of Indiana and Exxon) acquired as the result of reorganizations, recapitalizations, stock dividends and similar non-purchase transactions evolving from the assets with which the Blausteins initially capitalized Applicant in 1931. Substantial gains in the market values of these passive investments, Applicant notes, have accompanied the diversification and expansion during this period of Applicant's operating businesses. Hence, in Applicant's case, it is asserted, it may be unrealistic to evaluate Applicant's status under the Act by measuring the worth of its investment securities by current market prices, while looking solely to net book values (historical cost minus depreciation, depletion, and amoritization) in valuing operating assets. In this regard, Applicant further states that in the course of certain valuations of its assets made recently by investment bankers, the financial advisers expressed the opinion that the several businesses conducted directly by Applicant and its subsidiaries have aggregate values which substantially exceed those that are indicated by a simple examination of balance sheets prepared in accordance with generally accepted accounting principles. Applicant notes further that the Commission itself has recognized that in the case of oil and gas operations, traditional accounting principles, which give effect only to historical cost minus depletion and depreciation and do not reflect proven oil and gas reserves as assets, do not produce meaningful reporting of earnings and financial condition.

With regard to its sources of present income, Applicant states that it derives revenue from three sources: its directly-operated businesses, including wholly-owned subsidiaries, dividends from Crown Central, and dividends from the four remaining non-subsidiary companies in which it holds interests. Applicant concedes that the net income after taxes that it receives from dividends in respect of investment securities (excluding its Crown Central stock) is currently, and in prior years has been, greater than the net after-tax income Applicant derives from its operating businesses. Applicant states, however, that the receipt of dividend income involves minimal expenses, whereas the production of operating income involves substantial costs and expenses, which are deducted to arrive at pre-tax earnings. Moreover, non-cash items such as depreciation and depletion further reduce Applicant's operating income and thus the ratio of this class of income to after-tax earnings, but, Applicant states, as a practical matter, by sheltering income from taxation, these non-cash deductions actually increase the amount of funds available for further expansion of business operations. Applicant further notes that the reduction of operating income by pre-tax deductions is particularly significant in the case of a company as Applicant, engaged in substantial oil and gas exploration activities, because, under the successful efforts method of accounting, which Applicant utilizes, unsuccessful drilling ventures are immediately charged to current expense, rather than capitalized.

Thus, Applicant believes that rather than focusing upon after-tax earnings, its status as an operating company, rather than an investment company, can more appropriately be ascertained by comparing its investment income with total revenues, or with total earnings before taxes. Applicant also cites the ratio of its dividends from non-controlled companies to total funds provided from all operations in support of its assertion that it is primarily engaged in businesses other than that of investing in securities. In summary, it is stated that Applicant derives more revenue, pre-tax earnings and available funds from the conduct of its operating businesses than from dividends paid by non-controlled companies in which it has investments.

Lastly, Applicant directs attention to the growth experienced by its operating businesses as indicative that earnings from these segments may be expected to advance, rather than recede, in relation to investment income in future years. It is stated, for example, that revenues derived by Applicant from crude oil and natural gas exploration and production are more than 300 times greater today than in 1937, Applicant's first full year of production. It is further stated that since 1938, a more than 12-fold increase in the deadweight tonnage of applicant's marine transportation fleet has been attained, concomitant with a greater than 60-fold increase in freight revenues. Moreover, Applicant also states that it is presently engaged in a major expansion of its fleet as a result of which deadweight tonnage should increase by more than 69% and total investment (before depreciation) in vessels should quadruple. In addition, it is noted that Applicant's 1981 results represent a more than 3,000% increase in total sales by its manufacturing operations, and that planned improvements on building sites that applicant owns will more than double Applicant's gross investment in real estate properties. Finally, Applicant represents that its policy, established by its board of directors and communicated to its shareholders, is to use available funds to meet the needs of its operating businesses, and to expand and increase those businesses, and that the great majority of funds retained after payment of dividends and retirement of capital stock and long-term debt, has been utilized in this manner is each of the past five years.

In view of the foregoing, Applicant submits that it is entitled to an order pursuant to Section 3(b)(2) of the Act declaring that it is primarily engaged, both directly and through subsidiaries and controlled companies, in businesses other than that of investing, reinvesting, owning, holding, or trading in securities.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 9, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13161; 812-5452]

BC Funding, Inc.; Filing of Application

April 14, 1983.

Notice is hereby given that BC Funding, Inc. ("Applicant"), 165 Broadway, New York, NY 10080, a Delaware corporation, filed an application on February 8, 1983, with amendments thereto on March 30, 1983

and April 5, 1983, for an order of the Commission pursuant to Section 6(c) of the Investment Company Act of 1940 (the "Act"), exempting Applicant from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

Applicant represents that its sole business will consist of selling Applicant's commercial paper notes in the United States and utilizing the proceeds to purchase promissory notes of Barclays Bank of Canada ("Barclays Canada"), a Canadian banking corporation, and that substantially all of Applicant's assets will consist of a master promissory note of Barclays Canada payable to the order of Applicant ("Deposit Note"), evidencing purchases by Applicant ("Purchases") of indetedness of Barclays Canada. The maturity of each Purchase will match the maturity of the commercial paper note issued by Applicant to fund that Purchase. To support repayment of the indebtedness evidenced by the Deposit Note, the New York branch of Barclays Bank International Limited ("New York Branch") will issue an irrevocable letter of credit ("Letter of Credit") in favor of Applicant for the account of Barclays Canada. Neither Barclays Canada nor Barclays Bank International Limited ("BBI"), nor any of their affiliates, will own, directly or indirectly, any equity or other securities of Applicant.

Applicant states that Barclays Canada is a wholly-owned subsidiary of BBI, a commercial bank organized under the laws of the United Kingdom. BBI is a wholly-owned subsidiary, and the international banking arm, of Barclays Bank PLC ("Barclays"), a commercial bank organized under the laws of the United Kingdom. Each of Barclays Canada, BBI and Barclays has received an order exempting it from all provisions of the Act in connection with its offering of commercial paper in the United States (Barclays Canada on March 9, 1982/Release No. IC–12281; BBI on March 14, 1980/Release No. IC–11089; and Barclays on March 14, 1980/Release No. IC–11090).

Applicant proposes to issue and sell in the United States, short-term negotiable promissory notes of the type exempt from the registration requirements of the Securities Act of 1933 ("Securities Act") by virtue of paragraph 3(a)(3) thereof and generally referred to as commercial paper ("Notes"). Applicant represents that the Notes will be sold in minimum denominations of $100,000, will have a maturity not exceeding 270 days, and will neither be payable on demand prior to maturity nor eligible for any extension, renewal, or automatic "rollover" at the option of either the holder or the issuer.

Applicant undertakes not to market any Notes prior to receiving an opinion of counsel to the effect that the proposed offering of Notes is exempt from the Securities Act's registration requirements by virtue of paragraph 3(a)(3) thereof. Applicant further undertakes that, in respect of any future offerings of Applicant's debt securities in the United States other than the Notes, Applicant will obtain an opinion of counsel as to the availability of an exemption from the registration requirements of the Securities Act. Applicant does not request Commission review or approval of counsel's opinion regarding the availability of an exemption for the Notes under paragraph 3(a)(3) of the Securities Act.

Applicant states that, except for amounts needed to pay fees due Applicant's commercial paper dealer, Applicant will utilize all proceeds from the sale of the Notes to make Purchases. Applicant states that the proceeds of the Purchases will be used by Barclays Canada for current transactions. Applicant states that it will issue Notes only pursuant to requests from Barclays Canada with a specified range of rates and maturities. Applicant represents that it will issue Notes only in aggregate amounts substantially equal to the amount of indebtedness which Barclays Canada requests Applicant to purchase.

Applicant undertakes to select the corporate trust department of a major commercial bank to act as its issuing and paying agent for the Notes ("Depository"). The Depository will receive the proceeds from Applicant's sales of the Notes and will collect payments made in respect of the Deposit Note upon maturity. As trustee for the benefit of the holders of the Notes, the Depository will receive an assignment of all of the Applicant's rights, title and interest in and to the Deposit Note. The New York Branch will issue the Letter of Credit in favor of Applicant to support payment by Barclays Canada to Applicant of amounts due in respect of the Deposit Note. The Letter of Credit will provide that funds drawn thereunder will be payable to the Depositary, as trustee for the benefit of the holders of the Notes. Any drawing required to be made under the Letter of Credit to obtain funds in respect of Barclays Canada's obligations to Applicant will be made by the Depositary on behalf of Applicant.

Applicant represents that each Purchase will have the same maturity date as, and will be made on a discount or interest-bearing basis at, a rate not less than the rate of the Notes issued by Applicant to obtain funds to make the Purchase. Payments will be made into a special purpose trust account established by the Depositary ("Commercial Paper Account") to be applied to the payment of Notes. Applicant represents that the Deposit Note will be a direct liability of Barclays Canada and will rank *pari passu* with all other unsecured indebtedness of Barclays Canada, including deposit liabilities of Barclays Canada (except to the extent deposits are secured or subject to priorities created by Canadian laws). Applicant estimates that in the first year in which the Notes are issued, the aggregate face amount outstanding will average approximately $200,000,000.

Applicant represents that the amount of the Letter of Credit will be not less than the amount payable by Barclays Canada to Applicant in respect of the Deposit Note. Applicant expects that maturing Notes will be repaid from payments received by Applicant in respect of the Deposit Note. Applicant represents that the Letter of Credit will provide that the Depositary may make drawings thereunder to the extent that Barclays Canada fails to pay into the Commercial Paper Account any amount owed to Applicant by Barclays Canada in respect of the Deposit Note. Applicant represents that the Letter of Credit will rank *pari passu* with all other unsecured and unsubordinated indebtedness of BBI, including deposit liabilities of BBI, except tp the extent that such deposits are secured or subject to priorities created by English, New York State or Federal law.

Applicant represents that the Notes will be offered publicly, through one or more major commercial paper dealers, only to the types of sophisticated and largely institutional investors that ordinarily participate in the United States commercial paper market. Applicant states that, while an announcement of the establishment of the commercial paper facility may be made as a matter of record, the offering will not be advertised. Applicant undertakes to ensure that each offeree of the Notes will be furnished with a memorandum describing the businesses of Barclays Canada, BBI and Applicant and containing the most recent publicly available audited financial statements of Barclays Canada and BBI. Each memorandum will be at least as comprehensive as memoranda

customarily used in offering commercial paper in the United States Each memorandum will also include a description of material differences between generally accepted accounting principles followed in the United States and those followed in Canada or the United Kingdom. In the event of subsequent offerings, each memorandum will be updated at the time thereof to reflect material changes in the respective financial positions of Barclays Canada and BBI.

Applicant represents that Barclays Canada and BBI will submit to the jurisdiction of any State or Federal court in the City of New York, and Barclays Canada and BBI will authorize an agent to accept service of process in any action against Barclays Canada, based on the Deposit Note, or against BBI, based on the Letter of Credit. Applicant further represents that the consents of Barclays Canada and BBI to jurisdiction, and appointment of an agent to accept service of process, will be irrevocable until all amounts due and to become due in respect of the Notes have been paid.

Applicant represents that, prior to their issuance, the Notes, and any future issue of Applicant's debt securities other than the Notes, offered for sale in the United States, will have received one of the three highest investment grade ratings from at least one nationally recognized statistical rating organization and that is United States counsel will have certified that such rating has been received. However, no such rating shall be required with respect to any future issue of Applicant's debt securities other than the Notes if, in the opinion of counsel, an exemption is available for the issue pursuant to Section 4(2) of the Securities Act.

Section 6(c) of the Act provides that the Commission by order upon application may conditionally or unconditionally exempt any person, security, or transaction from the provisions of the Act if and to the extent that such exempt is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the exemptive relief requested, Applicant states that the Bank Act prohibits the establishment of foreign branches or foreign subsidiaries by foreign-owned Canadian banks. As a result, Barclays Canada has determined that the most economical means of gaining access to the United States commercial paper market is through Applicant, which is unaffiliated through ownership with Barclays Canada. Applicant asserts that, except for that lack of affiliation, its operations would be virtually identical to the operations of foreign bank subsidiaries which have been granted exemptions under Section 6(c) of the Act and, like the operations of those subsidiaries, would be conducted for the sole purpose of providing funds to a foreign bank which is not an investment company.

Applicant maintains that denial of its requested exemption would have the unintended effect of reinforcing, to the detriment of foreign parents of Canadian banks, the provisions of Canadian banking law which discriminate against foreign-owned Canadian banks and place them at a competitive disadvantage *vis-a-vis* Canadian-owned banks. In addition, a failure to exempt Applicant would channel the benefits of the capital raised in the United States commercial paper markets for the account of Canadian banks to Canadian-owned banks rather than to both Canadian-owned and non-Canadian-owned Canadian banks. Applicant contends that since its purpose, characteristics, and operations would be virtually identical to those of the United States subsidiaries established by foreign banks to which the Commission previously has granted exemptions under Section 6(c) of the Act, it would be in the public interest to grant Applicant an exemption which would have the effect of placing foreign-owned Canadian banks on the same footing as competing Canadian-owned Canadian banks. Applicant asserts that the Commission's grant of the exemption requested in this application would not confer on Barclays Canada any advantage over United States banks in connection with issuances of commercial paper.

Applicant asserts that approval of the application would be consistent with the protection of investors. Applicant maintains that its limited business purpose and its obligation to invest only in the Deposit Note, the repayment of which is supported by the Letter of Credit, obviate the need for the regulatory safeguards provided by the Act. Applicant further maintains that, as a special purpose corporation created solely to sell the Notes and utilize the proceeds of the sales to make Purchases from Barclays Canada, its only "investment" activity would be the acquisition of a Canadian bank promissory note supported by letters of credit issued by the New York branch of a major foreign bank.

In addition, Applicant asserts that the rationale underlying the exemptions which have been granted to foreign bank subsidiaries formed for the purpose of selling commercial paper in the United States and advancing the proceeds to the subsidiaries' parents extends to Applicant. Applicant states that, as in the case of foreign bank subsidiaries, its sole activity will be to provide funds for a foreign bank—Barclays Canada—when and in the amounts requested by Barclays Canada. Applicant further states that, as in the case of foreign bank subsidiaries, because the maturity of each Purchase is identical to the maturity of the Notes issued by Applicant to obtain funds to make the Purchase and because the amount payable by Barclays Canada in respect of the Deposit Notes is at least equal to the amount payable by Applicant in respect of the Notes, repayment of the Notes is, in effect, guaranteed by substantial banking entities—in Applicant's case both Barclays Canada, the obligor on the Deposit Notes, and BBI, the issuer through the New York Branch of the Letter of Credit supporting Barclays Canada's obligations with respect to the Deposit Notes.

Applicant asserts that Barclays Canada and BBI, like United States banks which are exempted from the Act pursuant to paragraph 3(c)(3) of the Act, are each subject to a comprehensive bank regulatory scheme which, like the regulatory schemes applicable to banks organized under the laws of the United States or under State law, adequately protects depositors; in addition, the Depositary, as trustee on behalf of the holders of the Notes, will have the benefit of the Letter of Credit. Applicant states that the characteristics of the Notes themselves also limit the possible exposure of United States investors.

Finally, Applicant contends that approval of this application would be consistent with the purposes intended by the policy and provisions of the Act. Applicant contends that, as a special purpose corporation established solely to issue commercial paper in the United States to obtain funds to make Purchases from Barclays Canada, Applicant's operations do not lend themselves to the abuses against which the Act was directed.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 9, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above.

Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 851; 803-25]

Bogey Enterprises, Inc.; Filing of Application

April 13, 1983.

Notice is hereby given that Bogey Enterprises, Inc. ("Applicant"), 2020 K Street N.W., Washington, D.C., 20006, a District of Columbia corporation, registered as an investment adviser under the Investment Advisers Act of 1940 ("Act"), filed an application on July 20, 1982, with amendments thereto on January 28, 1983, March 4, 1983, and April 12, 1983, requesting an order of the Commission pursuant to Section 206A of the Act, exempting the performance-based fee arrangement between Applicant and its investment advisory clients, from the provisions of Section 205(1) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of Section 205(1) thereof.

Applicant states that it specializes in the provision of investment advice and related financial services to individuals, primarily professional athletes, who have substantial incomes but do not have the time or inclination personally to oversee their investment portfolios. Applicant further states that, while it has custody of its clients' funds, it does not have investment discretion with respect to such funds; investment recommendations made by Applicant are effected only at the client's direction.

Applicant states that the individual needs of most of its clients are for investments which provide capital appreciation and/or long-term income. Applicant states that the majority of its recommendations have been of investments in real estate or in oil and gas concerns. Applicant futher states that it encourages its clients to keep a lesser percentage of their assets in relatively high-yielding, high quality investments, both for liquidity purposes and on an interim basis, pending investment elsewhere.

Applicant states that it currently supervises 41 accounts with an approximate aggregate value of $1,392,692. Applicant further states that the fee which it presently charges its clients is an annual retainer equal to the greater of 2% of the total value of assets under management, or $5,000; it charges clients for whom Applicant's chief executive officer, Mr. Richard A. Bennett, Jr. ("Mr. Bennett") also performs significant legal services, a retainer equal to the greater of such 2%, or $3,000.

Applicant proposes to restructure its fee arrangements as follows. The new fee structure would feature an annual fee, for investment advice, of two percent of assets under management. There would be a separate charge for administrative services to clients, currently provided by Applicant without separate compensation. With respect to investments made in certain real estate and oil and gas partnerships, two additional fees would be payable to Applicant and/or Mr. Bennett. The first, a management fee equal to 15% of the partnership's net operating income, would be payable quarterly to the general partner(s) of each partnership ("advisory partners"). The second fee would be a fee based on a percentage of capital gains ("performance-based fee"), payable to the advisory partners, that is the subject matter of this application.

Applicant states that the performance-based fee would be payable only with respect to investments which have at least the following attributes. Each investment would be a limited or general partnership interest in a partnership engaged in the real estate or the oil and gas business; Applicant and/or Mr. Bennett would serve as a general partner of each partnership. As general partner, the advisory partner(s) would make an aggregate capital contribution to each partnership of at least one percent of the aggregate capital contribution of all partners and would have in the aggregate at least a one percent interest in the profits and losses of each partnership. No advisory partner would be permitted to withdraw or reduce its minimum capital contribution. Interests in each partnership would be offered and sold pursuant to an exemption from the prospectus delivery requirements of Section 5 of the Securities Act of 1933 and, in most instances, pursuant to Regulation D under the Securities Act of 1933. Each partnership would have at least one limited or general partner who was not advised by, or affiliated with, Applicant and who was either an accredited investor (as defined in Regulation D) or was advised with respect to the investment by a purchaser representative (as defined in Regulation D), unaffilated with Applicant. At least one of the unaffiliated investors in each partnership would have (or would be advised by a purchaser representative having) such knowledge and experience in financial and business matters that he would be capable of evalutating the merits and risks of the prospective investment ("unaffiliated sophisticated investor"). Applicant states that its clients would not be allowed to acquire interests in any one partnership if the purchase price of the interest would exceed 15% of the client's total assets, at the time of such investment, nor would the aggregate purchase price of interests in all such partnerships exceed 33% of a client's total assets at the time such purchase is made. In addition the amount invested in any one partnership by each of Applicant's clients would not exceed the largest amount invested in that partnership by an unaffiliated sophisticated investor. Each of Applicant's clients would have assets in addition to the investment account advised by Applicant. Both Applicant's clients and the investors who are not Applicant's clients would acquire interests in the partnerships which were identical in all respects other than the amount.

With respect to the performance-based fee which the advisory partners seek to receive in their capacity as general partners, the general partner(s) would determine for each partnership, for each quarter, the realized capital gains for that quarter, if any, net of all realized capital losses and unrealized capital depreciation for that quarter and for all prior quarters ("Net Capital Gains"). Net Capital Gains distributed to the partners in the partnership (including, but not limited to, Applicant's clients) would be reduced by the advisory partners' performance-based fee in the following manner:

1. five percent (5%) of the first five percent (5%) of distributed Net Capital Gains;

2. ten percent (10%) of the second five percent (5%) of distributed Net Capital Gains;

3. fifteen percent (15%) of the third five percent (5%) of distributed Net Capital Gains; and

4. twenty percent (20%) of distributed Net Capital Gains in excess of fifteen percent (15%).

The performance-based fee would be calculated by reference to the cost to the partnership of the asset giving rise to such gains. Such calculation would be made on a cumulative basis, commencing as of January 1, 1983. Capital gains realized upon the sale of all or substantially all of the partnership's assets or upon its dissolution would be subject to the same performance-based fee. If a partnership had more than one general partner, the allocation of the performance-based fee among the general partners would be determined in accordance with the partnership agreement.

Applicant represents that the proposed performance-based fee, described above, would be received by the advisory partners only in those instances where they were serving as a general partner of the particular partnership and, accordingly, might be characterized as other than an investment advisory fee. Applicant states that, without conceding that the proposed performance-based fee is an investment advisory fee, solely for purposes of obtaining the exemptive relief requested in this application, it will assume that the performance-based fee which Applicant proposes to receive, would be proscribed by Section 205(1) of the Act.

Section 206A of the Act provides, in pertinent part, that the Commission may, by rules and regulations, upon its own motion, or by order upon application, conditionally or unconditionally exempt any person or transaction or any class or classes of persons or transactions, from any provision or provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the relief requested, Applicant asserts that the purpose of the Act's prohibition against performance-based fees, contained in Section 205(1), is to prevent investment advisers from investing clients' funds in unduly speculative securities and from manipulating portfolio investments in a manner inconsistent with their clients' interests. Applicant asserts that since its proposed performance-based fee would be calculated net of realized capital losses and unrealized capital depreciation, the deterrent of Section 205(1) would be unnecessary. Applicant further asserts that the graduated structure of its proposed performance-based fee arrangement provides a disincentive to undue speculation or manipulation. In addition, Applicant argues that the requirement that the advisory partners acquire and maintain at least a 1% investment interest in each partnership's profits and losses further protects the interests of Applicant's clients and serves as a deterrent to undue speculation. Applicant represents that the advisory partners would be barred from withdrawing their minimum 1% capital contribution.

Applicant argues that the requirement that each partnership would have at least one sophisticated investor, unaffiliated with Applicant, provides further protections for Applicant's clients. Applicant submits that this requirement ensures that the particular investment would be examined by independent purchasers who would provide the necessary element of external, professional review, sufficient to protect those of Applicant's advisory clients, who should also decide to participate in that particular partnership. Applicant states that this requirement is an adaptation of the concept of accredited investor. Applicant asserts that the accredited investor concept, which had its origins in the Commission's Rule 242 and is presently contained in Regulation D, represents a basic conclusion by the Commission that there are certain persons fitting within that category who are sufficently knowledgeable and experienced in financial matters that they do not need the protection given them by the registration provisions of the Securities Act of 1933. Applicant maintains that Rule 242 before it, and now Regulation D, permit a certain number of other investors to participate in an offering where an accredted investor has led the way. Applicant states that, in adapting that concept to these circumstances, one could view Applicant's advisory clients as "free-riding" on the investigation, research, intellectual skills, and judgment possessed by others. Applicant contends that, although the investor protections that would be provded to Applicant's advisory clients would be derivative, they would also be verifiable, tangible, and quite real.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 9, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[File No. 1-8213]

Chessco Industries, Inc.; Application to Withdraw from Listing and Registration

April 13, 1983.

In the matter of Chessco Industries, Inc., Common Stock, $.10 Par Value, Warrants to Purchase Common Stock, $.10 Par Value.

The above named issuer has filed an application with the Securities and Exchange Commission pursuant to Section 12(d) of the Securities Exchange Act of 1934 ("Act") and Rule 12d2-2(d) promulgated thereunder, to withdraw the specified securities from listing and registration on the Boston Stock Exchange, Inc. ("BSE").

The reasons alleged in the application for withdrawing these securities from listing and registration include the following:

The common stock and warrants of Chessco Industries, Inc. ("Company") have been listed and registered on the BSE since September 1981. The Company has determined that in light of the small and infrequent volume of trading on the BSE the expense of continued listing is no longer justified. In addition, the Company desires to include its stocks in NASDAQ.

Any interested person may, on or before May 4, 1983, submit by letter to the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549, facts bearing upon whether the application has been made in accordance with the rules of the Exchange and what terms, if any, should be imposed by the Commission for the protection of investors. The Commission, based on the information submitted to it, will issue an order granting the application after the date mentioned above, unless the

Commission determines to order a hearing on the matter.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13154; 812-5443]

Hutton Municipal Fund Inc., et al.; Filing of Application

April 12, 1983.

Notice is hereby given that Hutton Municipal Fund Inc., Hutton California Municipal Fund Inc., and Hutton New York Municipal Fund Inc. (the "Funds"), and E.F. Hutton & Company Inc. ("E.F. Hutton") (collectively referred to as "Applicants"), One Battery Park Plaza, New York, New York, 10004, filed an application on February 4, 1983, for an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), for exemptions from Sections 22(d) and 12(d)(3) of the Act to the extent necessary to permit: (i) The sale of shares of the Funds at net asset value without imposition of a sales charge and without regard to minimum initial investment requirements to participants in a reinvestment program to be offered to unitholders of the E.F. Hutton Tax-Exempt Trust (the "Trust") or any other existing or future unit investment trust which E.F. Hutton sponsors or co-sponsors which invests in municipal obligations (collectively, the "Trusts"); and (ii) to permit the Funds to acquire rights to sell their portfolio securities to brokers or dealers. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act and the rules thereunder for further information as to the provisions to which the exemptions apply.

The Funds, all open-end, diversified, series-type, management investment companies, seek to obtain as high a level of interest income exempt from federal income taxes as is consistent with preservation of capital. To further fulfull their investment objectives, where appropriate, the Funds also seek as high a level of interest income exempt from state and local income taxes as is consistent with preservation of capital. Each fund offers its shares to the public at an offering price which includes a sales charge of not more than 4% of the public offering price. The minimum initial investment is $500; subsequent investments must be at least $250. E.F. Hutton serves as investment adviser and as distributor for each of the Funds.

A series unit investment trust registered under the Act, the Trust's objectives are tax-exempt income and conservation of capital through investment in a diversified portfolio of municipal bonds. The sale of Trust shares includes a sales charge equal to 4% of the public offering price per unit.

Applicants propose to establish a reinvestment plan ("Reinvestment Program") to permit unitholders of existing and future series of the Trusts to purchase shares of the Funds through reinvestment of Trust distributions at net asset value (without a sales load) and without regard to any minimum investment requirements of the Funds. Upon request, unitholders of the Trusts will receive a current prospectus of the appropriate fund and an authorization form, execution of which constitutes an election to enroll in the Reinvestment Program. An election will be effective until revoked by written notice to the Trust's trustee. Disclosure regarding the Reinvestment Program will be included in the prospectus of all future series of the Trust. E.F. Hutton, the Funds' principal underwriter, will bear the offering expenses of the Reinvestment Program. Once a unitholder elects to participate in the Reinvestment Program, his account with a fund will be handled in the same manner as the account of any other fundshareholder. Applicants have reserved the right to discontinue the Reinvestment Program.

Applicants submit that the requested exemption from the provisions of Section 22(d) would be in the public interest, beneficial to the investors in the Trusts and the Funds, and consistent with the purposes of Section 22(d) of the Act. To the extent operating expenses do not increase proportionately with assets, Applicants contend that the Reinvestment Program would decrease the Funds' average expenses by increasing their asset bases. Applicants assert that the Funds could also benefit from an increased cash flow which would enable the Funds to more readily meet redemptions without liquidating portfolio investments, decrease assets held as cash reserves, and diversify and enlarge their investment positions. Applicants contend that E.F. Hutton will realize economies of scale in sales expense—little or no additional sales costs need be allocated to fund shares marketed through the Reinvestment Program—which benefits Reinvestment Program participants because such participants will be able to invest their distributions at net asset value.

The Funds also request an exemption from Section 12(d)(3) of the Act to the extent necessary to permit them to acquire "puts" or "stand-by" commitments from brokers or dealers. The Funds characterize a put or stand-by commitment as a right granted by a broker, dealer, or other financial institution to an investment company upon the purchase of a municipal obligation entitling the investment company to sell the same principal amount of such securities back to the seller, at the investment company's option, at a specified price. Acquiring such rights, the Funds assert, would enhance their liquidity by allowing them to be as fully invested as practicable in municipal securities while preserving the flexibility necessary to meet redemptions.

Applicants state that the Funds will acquire puts which will have the following characteristics: (1) They will be in writing and will be physically held by the Funds' custodian; (2) they may be exercised by a Fund at any time prior to the maturity of the underlying security; (3) they will be entered into only with dealers, banks, and brokers who in the investment adviser's opinion present a minimal risk of default; (4) the Funds's right to exercise the puts will be unconditional and unqualified; (5) although the puts will not be transferable, the underlying securities could be sold to a third party at any time, even though the put was outstanding; and (6) the exercise price of the put will be (i) the Funds' acquisition cost of the underlying security (excluding any accrued interest which the Funds paid on their acquisition), less any amortized market premium or plus any amortized market or original issue discount during the period the Fund owns the security, plus (ii) all interest accrued on the security since the last interest payment date during the period the security was owned by the Fund.

According to the application, the Funds expect that puts will generally be available without the payment of any direct or indirect consideration. If necessary and advisable, however, the Funds state that they will pay for puts, either separately in cash or by paying a higher price for the underlying securities. The Funds have stated an intent that the total amount "paid" in either manner for outstanding puts held in any of their portfolios will not exceed ½ of 1% of the value of the total assets of such portfolio calculated immediately after any put is acquired. Acknowledging the difficulty of evaluating the likelihood of exercise or the potential benefit of a put. Applicants

expect that the Funds' directors will determine that puts have a "fair value" of zero, regardless of whether any direct or indirect consideration is paid. Where a Fund has paid for a put, its cost will be reflected as unrealized depreciation in the underlying security for the period during which the commitment is held. The Funds have not sought a favorable ruling from the Internal Revenue Service ("IRS") with respect to stand-by commitments. In the absence of a favorable tax ruling or opinion of counsel, the Funds will not engage in the purchase of securities subject to stand-by commitments.

Applicants submit that an exemption from Section 12(d)(3) of the Act to permit the Funds to acquire stand-by commitments from brokers or dealers would be consistent with the standards set forth in Section 6(c) of the Act. Applicants do not expect that the acquisition of puts would affect the Funds' net asset values per share for purposes of sales and redemptions, but rarther will improve the Funds' liquidity and ability to meet redemptions (Applicants point out that certain investment techniques used to obtain liquidity by taxable funds are not available to the Funds since they entail adverse tax consequences). Applicants state that the acquisition of puts will not expose the Funds' assets to the entrepreneurial risks of the investment banking business, nor require them to evaluate the credit of dealers in determining their net asset value. Applicants recognize that the failure of a broker or a dealer to fulfill its obligation under a put could result in a loss to the Funds, but contend that such risk of loss is not quantitatively different from the risk of loss faced by any investment company which is holding securities pending settlement after having agreed to sell the securities to a broker or dealer in the ordinary course of business. Applicants declare that the Funds will not acquire puts to provide reciprocal practices, to encourage the sale of their shares, or to obtain research services. Finally, Applicants assert, as with their Section 22(d) proposal, that the exemption requested is appropriate and in the public interest, consistent with the protection of investors, and consistent with the purposes fairly intended by the policy and provisions of the Act.

Section 6(c) of the Act permits the Commission, among other things, to grant an exemption by order upon application from any provision or provisions of the Act, provided such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 9, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13155; 812-5410]

Municipal Fund for California Investors, Inc., and Henry M. Watts, Jr.; Filing of Application

April 12, 1983.

Notice is hereby given that Municipal Fund for California Investors, Inc. ("Fund"), Suite 204, Webster Building, 3411 Silverside Road, Wilmington, Delaware 19810, an open-end, diversified, management investment company, and Henry M. Watts, Jr., a director of the Fund, Mitchel, Schreiber, Watts & Co., Inc., 20 Broad Street, New York, New York 10005 (collectively, "Applicants") filed an application on December 22, 1982, and an amendment thereto on March 23, 1983, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") for an order of the Commission declaring that Mr. Watts shall not be deemed to be an "interested person" of the Fund within the meaning of Section 2(a)(19) of the Act solely by reason of his being an officer, director and employee of Mitchel, Schreiber, Watts & Co., Inc. ("Mitchel, Schreiber"), a broker-dealer registered under the Securities Exchange Act of 1934. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the complete text of the provisions to which the exemption applies.

The application describes the Fund as a Maryland corporation whose proposed investment objective is to provide investors with as high a level of current interest income exempt from federal and California state personal income taxes as is consistent with the preservation of capital and relative stability of principal. Applicants state that in furtherance of its investment objective, the Fund intends to offer shares in a portfolio consisting primarily of debt obligations issued by or on behalf of the state of California and other states, territories and possessions of the United States, the District of Columbia and their authorities, agencies, instrumentalities and political subdivisions ("municipal securities"). According to the application, the Fund will maintain at least 80 percent of its assets in municipal securities except during defensive periods or when acceptable securities are unavailable for investment, will not knowingly purchase securities the income from which is subject to federal income tax, and will have at least 50 percent of its assets invested in California governmental debt obligations at the close of each quarter of the Fund's fiscal year. The application states further that the Fund may hold uninvested cash reserves pending investment during defensive periods or if, in the opinion of its investment adviser, suitable tax-exempt obligations are unavailable. The Fund if said is said to be primarily designed for California institutional investors, such as banks acting in a fiduciary, advisory, agency or similar capacity; insurance companies; investment counselors; and brokers seeking tax-exempt income.

Applicants state that the Fund's distributor is Shearson/American Express Inc. ("Shearson"). According to Applicants, purchase and redemption orders for Fund shares placed directly by shareholders with Shearson without the assistance of a broker-dealer will be processed without charge (except redemption orders submitted by Shearson for its own brokerage customers). The Fund's investment adviser is Provident Institutional Management Corporation ("PIMC"), and its sub-adviser is Provident National Bank ("Provident"). Applicants state that in connection with the execution of portfolio transactions on behalf of the Fund, PIMC will seek to obtain the best net price and the most favorable execution of its orders. Brokerage commissions, Applicants allege, will not

normally be paid on investments by the Fund since purchases and sales of portfolio securities will usually be principal transactions. The Fund's administrator is The Boston Company Advisors, Inc. ("Boston Advisors"). According to the application, Boston Advisors, as administrator, will assist in supervising all Fund operations (other than those performed under the Fund's advisory, custodian and transfer agency agreements). Boston Advisors is a wholly-owned subsidiary of Shearson.

The application states that Mr. Watts is a director of the Fund and an officer, director emeritus and employee of Mitchel, Schreiber. Mitchel, Schreiber is, purportedly, wholly-owned by Angeles Corporation, a financial services corporation with operating subsidiaries engaged in real estate, investment counseling and investment advisory services. Applicants represent that, historically, Mitchel, Schreiber's business has been limited to the technical execution and clearance of exchange-traded securities on behalf of other broker-dealers; it did not provide research analysis or other financial services and did not act as a dealer with respect to any securities. The application states that at the present time, however, Mitchel, Schreiber conducts no active business other than occasional real estate transactions on behalf of its parent, although Mitchel, Schreiber also makes its seat on the New York Stock Exchange available to its parent. The application asserts further that in light of Mitchell, Schreiber's current business inactivity it is unlikely that Mitchel, Schreiber would ever have occasion to act as a broker or dealer directly or indirectly for the Fund.

Applicants state that Mitchel, Schreiber has no direct business relationship with PIMC, Provident, Boston Advisors or Shearson. Pursuant to a prior order of the Commission, Mr. Watts currently is deemed not to be an "interested person" of Shearson, PIMC, Provident and certain investment companies distributed or advised by them within the meaning of Section 2(a)(19) of the Act by reason of his being an officer, director, and employee of Mitchel, Schreiber.

Section 6(c) of the Act permits the Commission to grant an exemption by order upon application from any provision or provisions of the Act, provided such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants maintain that Mr. Watts should not be deemed to be an "interested person" of the Fund by virtue of his association with Mitchel, Schreiber because Mitchel, Schreiber will have no occasion to have any direct or indirect relationship with the Fund and will have no direct business relationship with PIMC, Provident, Boston Advisors or Shearson. Applicants maintain that, as a result, Mr. Watts' affilation with Mitchel, Schreiber will not impair or otherwise affect his ability to exercise independent, disinterested judgment in the conduct of his office as a director of the Fund. Applicants submit that the requested exemption is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In connection with the application, the following representations have also been made:

1. The Fund represents that it will not use Mitchel, Schreiber for portfolio transactions or for the distribution of its shares so long as Mr. Watts is a director of the fund and also a director, director emeritus, officer or employee of Mitchel, Schreiber; and

2. The Fund, to the best of its knowledge, and Mr. Watts represent that since at least October 1, 1978, Mr. Watts has not had a material business or professional relationship with PIMC, Provident, Boston Advisors or Shearson, or with the principal executive officers of or any person controlling, controlled by or under common control with PIMC, Provident, Boston Advisors or Shearson.

Notice is further given any interested person wishing to request a hearing on the application may, not later than May 12, 1983, at 5:30 p.m. do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13160; 812-5463]

Real Estate Associates Limited VI, et al.; Filing of Application

April 13, 1983.

Notice is hereby given that Real Estate Associates Limited VI, a California limited partnership ("REAL VI"), and its general partners, National Partnership Investments Corp. and National Partnership Investments Associates ("General Partners") (REAL VI together with General Partners, collectively referred to hereinafter as "Applicants"), 1880 Century Park East, Los Angeles, California, 90067 filed an application on March 1, 1983, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), for an order of the Commission exempting REAL VI from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicants state that REAL VI was formed under the California Limited Partnership Act on November 8, 1982, and is designed to implement the policy of Title IX of the Housing and Urban Development Act of 1968 to provide private investors with a means of acquiring equity interests in government-assisted low and moderate income housing. REAL VI will acquire limited partnership interests in local limited partnerships ("Local Limited Partnerships") which own or lease government-assisted rental housing projects for low and moderate income persons.

Applicants state that REAL VI is organized as a limited partnership because a limited partnership is the only form of organization which provides an investor with both liability limited to his capital investment and the ability to claim on his individual tax return the deductions, losses, credits and other tax items a partnership can pass through to its partners. Therefore, REAL VI will operate as a "two-tier" partnership; i.e., REAL VI, a limited partnership, has invested and will invest primarily in other limited partnerships (Local Limited Partnerships) which, in turn, will be engaged in the development, building, ownership or leasing of

government-assisted housing for low and moderate income persons. Applicants further represent that one of the primary objectives of REAL VI is to pass through to its partners during the early years of the partnership net losses which may be used to offset other taxable income.

Applicants represent that REAL VI has filed a registration statement under the Securities Act of 1933, which will cover the sale of 240 to 2,000 Units at $5,000 per Unit. Each Unit consists of two limited partnership interests and a warrant to purchase two additional limited partnership interests, exercisable in January, 1984 (the "Warrants"). The Warrants will entitle an investor to purchase the related limited partnership interests for $2,500 each, the equivalent price per limited partnership interest acquired pursuant to the purchase of a Unit. It is also stated that in the event that any Warrant is not exercised, the respective limited partnership interests may be sold by REAL VI to other qualifying offerees.

Offers to sell and sales of the Units to the public are proposed to be effected through E. F. Hutton & Company Inc. and other selected members of the National Association of Securities Dealers, Inc., none of which will own or owns any interest in either of the General Partners or will have or has any other material relationship with their directors, officers or partners. Such broker-dealers will use their best efforts as agents for REAL VI to obtain subscriptions for Units in REAL VI and thereafter to sell any limited partnership interests available upon the non-exercise of the Warrants.

The application states that no subscription for Units or limited partnership interests will be accepted unless it is approved by the General Partners, which approval shall be conditioned upon representations as to suitability of the investment to each such subscriber, and it is claimed that the Units and additional limited partnership interests will be sold only to relatively sophisticated investors who have special qualifications. The application states that the subscribing investor will represent in the Subscription Agreement for Units (1) that he has a net worth (exclusive of home, furnishings, and automobiles) of at least $30,000 and an annual gross income of at least $30,000, or that he has a net worth (exclusive of home, furnishings, and automobiles) of at least $200,000, or that he is purchasing in a fiduciary capacity for a person or entity which has such net worth and annual gross income; and (2) that he is aware of the risks involved in investing in REAL VI. He also must represent that some part of his annual income for 1983 will be taxable at the federal tax rate of 38% or more, and that he anticipates some part of his income for the next four years will, but for the effect of his investment in the Units and limited partnership interests or other tax shelters, be taxable at such 38% rate. In addition, the Restated Certificate and Agreement of Limited Partnership Agreement of REAL VI ("Partnership Agreement") will require that until January 1, 1989 each transferee of limited partnership interests must represent that he meets the suitability standards set forth above.

Applicants state that the General Partners will be entitled to receive 1% of REAL VI's profits, losses and distributions subject to the conditions that their 1% share of net cash flow will be reduced each year by the amount of annual management fees which are paid or payable to them in that year. In addition to their 1% participation in REAL VI's profits, losses and distributions, the General Partners will receive certain fees for overseeing the conduct of REAL VI's affairs and the continuing operation of each project. Applicants represent that these fees are in substantial conformity with the standards imposed by the North American Securities Administrators Association, Inc. and the California Corporations Commissioner, and that to the best of their knowledge all such fees are in compliance with the current rules promulgated by such authorities.

During REAL VI's operational period, the General Partners will receive, in consideration for their management services rendered to local limited partnerships owning government-assisted housing projects, an annual fee in an amount equal to 0.5% of invested assets to be paid out to REAL VI's general funds to such local limited partnerships. As noted above, this annual management fee will be applied against the General Partners' 1% shares of REAL VI's net cash flow. Finally, when a project is sold, the General Partners will receive a liquidation fee based upon the net proceeds only after payment to the limited partners of their invested capital in the project, plus an amount sufficient to pay their federal and state taxes.

Applicants further note that REAL VI states that it will file with the Commission pursuant to Section 15(d) of the Securities Exchange Act of 1934 all required annual reports, quarterly reports, and current reports on Forms 10–K, 10–Q and 8–K, as well as any other reports required by such Act. The General Partners will also send each limited partner a year-end report containing financial statements audited by REAL VI's independent accountants and tax information necessary for the preparation of each limited partner's federal income tax return. In addition, each limited partner will receive a report at least semiannually of REAL VI's activities and the operational status of its investment, as well as interim reports regarding acquisitions.

Applicants state that under the California Limited Partnership Act, and under the terms of the Partnership Agreement, the corporate General Partner, which has registered as an investment adviser under the Investment Advisers Act of 1940, and the non-corporate General Partner, are fiduciaries of REAL VI and its limited partners. Applicants state that under the Partnership Agreement, the officers and directors of the corporate General Partner and the partners of the non-corporate General Partner will be indemnified only when a court finds that such persons' conduct fairly and equitably merit indemnity in the amount claimed.

Without conceding that REAL VI is an investment company as defined in the Act, Applicants request that REAL VI be exempted from the provisions of the Act pursuant to Section 6(c). Section 6(c) of the Act provides that the Commission may exempt any person, security or transaction from any provision of the Act and rule thereunder if, and to the extent that, such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants contend that the exemption of REAL VI from all provisions of the Act is both necessary and appropriate in the public interest. Applicants assert that the form of organization REAL VI, *i.e.*, a limited partnership, which is necessary to limit the liability of private investors investing in subsidized low and moderate income housing, is incompatible with the regulatory framework of the Act. Applicants contend that to discourage the two-tier limited partnership arrangement by application of the Act would elmininate the primary means of attracting private equity capital into government-assisted housing and would frustrate the national policy declared by Congress "to encourage the widest possible participation by private enterprise in the

provision of housing for low and moderate income persons."

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 9, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by afidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unles the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19672; File No. SR-MSRB-83-1]

Self Regulatory Organizations; Filing of Proposed Rule Change by Municipal Securities Rulemaking Board

April 13, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on January 17, 1983, the Municipal Securities Rulemaking Board ("MSRB") 1150 Connecticut Avenue, N.W., Washington, D.C. 20036, filed with the Commission the proposed rule change described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change reviews the application of MSRB rules to private placement of municipal securities and interprets the application of MSRB Rules G-1, G-3 and G-23 to financial advisory services rendered to a corporate obligor on an issue of industrial development bonds ("IDB"). With respect to private placement activity for IDBs by a bank, the interpretation notes that it must be conducted through the registered dealer department of the bank. The MSRB warns bank dealers to review their organizations to ensure that all departments or units of the bank which engage in private placement of IDBs are designated on the bank's Form MDS and other applicable bank records as part of its separately identifiable department or division pursuant to Rule G-1. The MSRB also states that private placements must be effected and supervised by persons qualified pursuant to the requirements of Rule G-3.

The proposed rule change also interprets the application of MSRB Rules G-1, G-3, and G-23 to financial advisory services rendered to a corporate obligor for an issue of IDBs. Rule G-1 defines a separately identifiable department or division of a bank. Rule G-3 prescribes the classification and qualification requirements for persons engaged in underwriting, providing financial advisory services to issuers, clearance, research and investment advice related to municipal securities, recordkeeping and training. Rule G-23 prescribes ethical standards and disclosure requirements for brokers, dealers and municipal securities dealers who act as financial advisors to issuers of municipal securities.

The proposed MSRB interpretation states that these thre rules do not apply to financial advisory services given to a corporate obligor for an IDB issue, if such financial advisory services are limited to advice on the structure, timing, terms, and other similar matters concerning a proposed issue. The MSRB states, however, that other financial advisory services, such as participating in negotiations with prospective purchasers or engaging in placement of the issue, would be subject to Rules G-1 and G-3. The MSRB states that its rules would continue to apply to any advisory relationship with a governmental unit or direct communication with public customers. At this time, however, the MSRB is not aware of problems associated with the furnishing of financial advisory services to corporate obligors on IDBs which indicate a need for MSRB regulation. The MSRB states that it does not believe it is appropriate or necessary at this time to extend its regulatory reach to persons who are in the business of advising corporations about various financing alternatives merely because one alternative involves the issuance of tax-exempt securities.

The MSRB has proposed the rule change pursuant to subsections (A), (C) and (H) of Section 15B(b)(2) of the Act. The MSRB states that it does not believe the proposed rule change will have an effect on competition.

In order to assist the Commission in determining whether to approve the proposed rule change or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register.** Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Reference should be made to File No. SR-MSRB-83-1.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communictions relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal of office of the MSRB.

For the Commission, by the Division of Market Regulations, pursuant to delegated authority.[1]

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

Boston Stock Exchange, Inc., Applications for Unlisted Trading Privileges and of Opportunity for Hearing

April 14, 1983.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Alpha Industries, Inc., Common Stock, $.25 Par Value (File No. 7-6562)
Hanna Mining Company, Common Stock, $1 Par Value (File No. 7-6563)
Harris Bankorp, Inc., Common Stock, $8 Par Value (File No. 7-6564)
Logicon, Inc., Common Stock, $.10 Par Value (File No. 7-6566)
North American Philips Corp., Common Stock, $5 Par Value (File No. 7-6567)
Paine Webber, Inc., Common Stock, $1 Par Value (File No. 7-6568)

---

[1] 17 CFR 200.30-3(a)(12).

Pillsbury Company, Common Stock, NoPar Value (File No. 7–6569)
Pulte Home Corp., Common Stock, $1 Par Value (File No. 7–6570)
Union Camp Corporation, Common Stock, $1 Par Value (File No. 7–6571)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 5, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington , D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 11:10 a.m. on Friday, April 15, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to make funds available for the payment of insured deposits in Sparta-Sanders State Bank, Sparta, Kentucky, which was closed by the Acting Commissioner of Banking and Securities for the State of Kentucky on Friday, April 15, 1983.

At the same meeting, the Board of Directors considered a personnel matter.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(2), (c)(6), (c)(8), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(6), (c)(8), and (c)(9)(B)).

Dated: April 15, 1983.

Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

2

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, April 25, 1983, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for consent to convert into a non-FDIC insured institution:

BancOne of Connecticut, Bridgeport, Connecticut.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,569–NR (Amended): United States National Bank, San Diego, California
Case No. 45,672–L: Franklin National Bank, New York, New York

Memorandum and Resolution re: Amendment to the Policy Statement for Corporate Audit Activities.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications or requests approved by the Director or Associate Director of the Division and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Discussion Agenda:

No matters scheduled.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: April 18, 1983.
Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

3

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, April 25, 1983, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b(c)(2), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Application for capital assistance pursuant to section 13(i) of the Federal Deposit Insurance Act:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

Discussion Agenda:

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsection (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Request for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: April 18, 1983.

List of Libraries That Have Announced Availability of Federal Register and Code of Federal Regulations

LIST OF LIBRARIES THAT HAVE ANNOUNCED AVAILABILITY OF FEDERAL REGISTER AND CODE OF FEDERAL REGULATIONS

In order to better serve the public the Office of the Federal Register is publishing a list of libraries where the *Federal Register* and *Code of Federal Regulations* are available for examination free of charge. This list contains only those Government depository libraries and other libraries that specifically have chosen to be included. A complete listing of *Government Depository Libraries* is available without charge from The Library, U.S. Government Printing Office, 5236 Eisenhower Avenue, Alexandria, VA 22304.

The Office of the Federal Register's list will be updated annually unless public interest requires more frequent publication. Any library that maintains these publications, makes them available to the public, and wishes to be included on future lists should write to the Director of the Federal Register, National Archives and Records Service, GSA, Washington, DC 20408, or phone (202) 523–5227 giving the name and address of the library. (*FR only, †CFR only.)

Department of the Interior

Bureau of Land Management

Geothermal Resources Leasing Program; Final Rule

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Parts 3200, 3210, 3220, 3230, 3240 and 3250

[Circular No. 2523]

General Amendments to the Geothermal Resources Leasing Program

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: The final rulemaking will eliminate burdensome, outdated and unneeded provisions of the existing geothermal leasing regulations. The specific amendments to the existing regulations resulted from public comments on the proposed rulemaking, and an intensive review of the existing regulations by personnel in the Bureau of Land Management responsible for the geothermal leasing program.

EFFECTIVE DATE: May 20, 1983.

ADDRESS: Any suggestions or inquiries should be sent to: Director (530), Bureau of Land Management, 1800 C Street, NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Karl F. Duscher, (202) 343–7753.

SUPPLEMENTARY INFORMATION: The proposed rulemaking amending the existing regulations for the geothermal leasing program was published in the **Federal Register** on April 30, 1982 (47 FR 18828). Comments were invited for a 60 day period during which time a total of 20 comments were received. Ten comments were received from the energy development industry, five comments were from other Federal agencies, two were from associations, two were from state agencies, and one was received from an individual.

Most of the comments received supported the proposed rulemaking. The sections which were most controversial and received adverse comments were those addressing diligent exploration/escalating rental requirements and environmental analysis/surface management provisions. The Bureau's response to these and other comments is given under each section heading.

Section 3200.0–5 (k)(3)

Although no specific change was proposed to this section, comments and suggestions for a new definition of "competitive interest" were invited. This section defines "competitive interest", one of the criteria used by the Secretary to classify lands as "known geothermal resource areas" (KGRA's), as existing whenever two or more noncompetitive lease applications are filed for the same lands during the same filing period which is defined as a calendar month. Once lands are classified as KGRA's, all noncompetitive lease applications are required to be rejected and the lands are then offered at a competitive lease sale.

The comments received generally concluded that, if the concept of KGRA determination based on the number of bids received during a filing period is to be retained in the geothermal leasing program, the number of overlapping lease applications necessary to trigger a KGRA classification should be increased. Several comments indicated that reliance on any particular number of lease applications is a poor criterion for KGRA classification and that the Secretary should give greater weight to geologic indices. These comments held that the existence of competitive interest, regardless of definition, should not compel a KGRA classification.

The Department appreciates the comments submitted on this section. Following further review by the Bureau of Land Management a determination will be made as to whether a rule change is needed. Provision for more extensive use of the Secretary's discretion, as noted above, may alleviate much of the problem with the existing definition of competitive interest.

Section 3200.0–6

This section, concerning preleasing environmental review procedures, received the most comments. The effect of the proposed change would be to liberalize the preleasing procedures in line with flexibility allowed under the Council on Environmental Quality guidelines. The existing regulations imply that a multi-agency, comprehensive environmental review will be completed prior to lease issuance. However, the section does allow this to be postponed until "the need arises" The Department believes that multi-agency, comprehensive reviews should not be undertaken until the need arises. In addition, the level and intensity of the review should be dictated by the action proposed and the significant environment values that may be placed at risk by the action. In only rare instances has the need for comprehensive major environmental reviews arisen prior to lease issuance or even upon actual development on a leasehold. Only three environmental impact statements have ever been prepared in the program. One of these was a programmatic document prepared at the program's inception.

Several industry comments expressed concern that inadequate environmental reviews would be done and that leases would be issued without full identification of constraints that may seriously affect lease rights. This is a valid concern. Given the Federal government's board discretionary authority to control operations on leaseholds, prelease compliance with the National Environmental Policy Act could become a very routine matter. However, the Bureau of Land Management's policy is to conduct a prelease review that not only satisfies the National Environmental Policy Act, but also provides to potential lessees information relative to obvious, major concerns that may influence postlease operations.

Some industry comments also expressed concern that exhaustive environmental review, if not completed prior to lease issuance, would be required after lease issuance with the proposed change. It was believed that such reviews might consume much of the running time of leases while preventing exercise of lease rights. As stated above, the major environmental concerns are identified prior to lease issuance. In most cases, it is expected that lessees will submit development proposals that accommodate the concerns identified. Although the need for an exhaustive postlease environmental review should very rarely arise, identification of concerns prior to lease issuance should serve to alert all parties of the possibility.

Comments from environmental interests expressed a preference for retaining or even expanding the existing provisions addressing prelease environmental review procedures. These comments expressed the view that the various types of reviews used by the Bureau should be described in detail for the public. However, environmental procedures are already contained in the Department Manual, available to the public, which allows flexibility so that environmental reviews can be completed in a cost effective manner. These comments also cautioned that failure to adequately identify development constraints prior to lease issuance may lead to environmental concessions at the time development is proposed, under pressure from lessees to allow exercise of lease rights. With respect to this comment, adequate controls and responsibilities exist to protect all valid environmental concerns regardless of whether the concerns have been identified prior to or after lease issuance. The Department of the Interior is aware of no instance in which

environmental damage has occurred due to a valid concern not being noted in a prelease geothermal review.

After reviewing all comments received, the Department of the Interior has decided that the proposed amendment should be retained in the final rulemaking. Geothermal leases involving lands administered by the Bureau of Land Management will only be issued after necessary environmental reviews and identification of major development constraints.

Sections 3203.5 and 3205.3–3

The purpose of the proposed changes to these sections was to simplify the reporting and recordkeeping associated with diligent exploration and payment of escalating rentals. The change would have accomplished this by replacing the existing diligent "work" requirement with a higher lease rental. It was thought that the higher rental would serve as an incentive to lessees to explore and establish production, at which time they would be relieved of paying the higher rental. Comments were very supportive of the efforts to reduce reporting and recordkeeping burdens. With respect to higher rentals, only one commenter supported the increase, suggesting that it be increased even more to serve as a true incentive. However, industry commenters unanimously opposed a higher lease rental. These comments expressed the view that the speculative nature of geothermal resources was too great to justify higher rentals at this time. It was contended that higher rentals would not serve to speed development but simply increase the cost of doing business and likely lead to premature relinquishments. Some of these comments suggested that a higher rental would be acceptable provided it could be offset by expenditures made for diligent exploration as would be allowed under the proposed rulemaking for existing leases.

The industry comments on these sections were accepted. The final rule continues the diligent exploration "work" requirement, while allowing lessees the option of paying a higher rental for lease years in which, for one reason or another, diligent exploration was not justified. In recognition of the speculative nature of geothermal resources, these requirements will not apply until leases enter their sixth year.

The reduction in reporting and recordkeeping contained in the proposed rule is retained in the final rulemaking. Finally, a number of suggested changes have been incorporated to clarify the meaning of diligent exploration.

Section 3204.1

This section presently is lengthy and lists numerous terms and conditions which already generally appear in the standard lease form or in the Geothermal Resources Operational Orders. The proposed rulemaking deleted the terms and conditions from the existing regulations since they are also found on the lease form.

Few comments were received on this proposed change. Comments that were received suggested retaining the terms and conditions in the regulations. They stated that the standard lease form or a geothermal operation order could not adequately substitute for a provision in the regulations since a form or a geothermal operating order may be modified without inviting public comment. The Department believes that the terms involved, whether they appear in regulations, forms or Geothermal Resources Operational Orders constitute substantive rules. In accordance with the Administrative Procedures Act (5 U.S.C. 553), changes to substantive rules require a formal solicitation of public comments. In addition, the Paperwork Reduction Act (44 U.S.C. 3501, et seq.) requires notice and public comment whenever forms are being revised.

Section 3205.3–1

Comments received recommended clarification of the wording of this section. The suggested changes were incorporated into the final rulemaking.

Section 3205.3–3

This section has been deleted in its entirety consistent with the change made to § 3203.5. Comments concerning this section are addressed under the discussion of comments received for § 3203.5.

Section 3206.8

Only one comment was received on this proposed change which would allow oil and gas lease bonds to be amended to include coverage for geothermal leases. The comment expressed concern that there would be possible dilution of bond coverage if a single bond were allowed to cover both oil and gas operations and geothermal operations. Separation of bonding for geothermal operations was recommended in order to adequately protect the interests of the United States.

The Department does not agree that allowing geothermal bond coverage under an existing oil and gas bond would greatly dilute coverage since geothermal operations are likely to be only a small percentage of a lessee's total potential liability. Therefore, the proposed change is included in the final rulemaking.

Sections 3210.2–1(d), 3211.1(d), 3211.2(g) and 3220.6(d).

A few comments suggest retaining these provisions of the existing regulations that require prelease exploration or development plans. It was suggested that such plans are necessary to allow an accurate prelease review. Other comments expressed support for the proposed rulemaking because of its time and cost saving features.

All comments were considered and it has been determined that the existing requirements for prelease plans should be deleted as provided in the proposed rulemaking. Experience has shown that prior to lease issuance, there is little certainty on the part of potential lessees as to exactly where exploration or development will take place.

Precise plans can be costly to develop since they require geologic and engineering findings. Although potential lessees do invest money in identifying leasing prospects, it is unrealistic to expect them to invest the much greater amount of money necessary to identify drilling locations prior to obtaining leases. For this reason, the proposed changes are made final. However, the Bureau has already consolidated the regulations in Part 3210 and Part 3211 in final rulemaking published in the Federal Register on February 11, 1983 (48 FR 6336).

Section 3210.3

Few comments were received on the proposed change to this section. The proposed change involves the definition of competitive interest, which is currently under review. Therefore, the Department of the Interior has decided to withdraw the proposal for change at this time.

Part 3230

The proposed deletion of this section received no comment and the deletion is made in the final rulemaking.

Section 3241.1–1(c)

Several comments requested that § 3241.1–1(c) not be amended. However, as written, this section is inconsistent with provisions of the Geothermal Steam Act (30 U.S.C. 1001–1025) regarding adjustment of lease terms. Readjustment of lease terms at less than 10 year intervals is specifically prohibited by the Act. The proposed

change is therefore adopted in the final rulemaking.

Sections 3421.2–1 and 3250.0–3

No comments were received regarding the proposed changes to these sections. And the changes are made in the final rulemaking.

Section 3250.0–5(e)

A comment made the recommendation that the phrase "power generation facility" be deleted and replaced by the phrase "utilization facilities". This suggestion is consistent with other changes in subpart 3250 and has been adopted in the final rulemaking.

Section 3250.0–6

No negative comments were received on this section and the proposed amendment is adopted in the final rulemaking.

Section 3250.1–1

In response to comments, the first paragraph of § 3250.1–1 has been simplified in the final rulemaking to remove unnecessary wording and possible misunderstandings regarding qualifications required of applicants for an exploration license.

Several comments were received concerning this section. One noted that the information required in § 3250.1–1(d)(3) of the proposed rules appeared to go beyond that required to make a land management decision concerning power plant siting. Another suggested removing § 3250.1–1(d)(3) entirely since all necessary information should already be on file in accordance with the requirements of 30 CFR Part 270. However, the information that would be required by § 3250.1–1(d)(3) under the proposed rulemaking would already be a considerable simplification of provisions of the present regulations. The remaining information requested is necessary for a basic understanding of the scope and nature of the proposed utilization facility. Therefore, the proposed rules are adopted in the final rulemaking.

Section 3250.3

Comments similar to those received on the proposed change to § 3200.0–6 were received on this section. For reasons stated under the discussion of comments under § 3200.0–6, the change proposed in § 3250.3 is retained in the final regulations.

Section 3250.6–1

A suggestion was made in a comment to remove "and operate" from the first sentence of § 3250.6–1(b). This suggestion was adopted in the final rulemaking to more accurately state the intended requirements. A comment was also received suggesting replacing the words "Area Geothermal Supervisor" with the word "Supervisor" in order to be consistent with § 3200.0–5(g). This suggestion was also adopted in the final rulemaking.

Sections 3250.6–2 and 3250.7

No comments were received on the changes proposed for these sections and the changes are incorporated into the final rulemaking.

Section 3250.6–3

One comment stated that the minimum of $10 per acre rental provided in the proposed rulemaking for non-electrical purposes was to low too ensure "fair return". It was recommended that the rate be raised to $25. However, rentals for utilization licenses are established through standard appraisal procedures. The minimum $10 rental will only be charged in cases where the appraisal results in a lower fee.

The principle author of this final rulemaking is Karl F. Duscher of the Division of Oil, Gas, and Geothermal, Bureau of Land Management, Washington, D.C. assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

It is hereby determined that this final rulemaking is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(C)) is required.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

This rulemaking is not anticipated to have a significant economic impact. The reduction in burden imposed on individuals or institutions seeking to develop geothermal resources is expected to have a positive economic effect due to an associated reduction in paperwork and related administrative costs. Such reductions should not create any additional costs for other sectors of the economy.

The information collection requirements contained in 43 CFR Part 3250 have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004–0063.

List of Subjects

43 CFR Part 3200

Environmental protection, Geothermal energy, Mineral Royalties, Public lands: classification, Public lands: mineral resources, Surety bonds.

43 CFR Parts 3210, 3220 and 3230

Geothermal energy, Public lands: mineral resources.

43 CFR Part 3240

Geothermal energy, Mineral royalties, Public lands: mineral resources, Water resources.

43 CFR Part 3250

Electric power, Geothermal energy, Public lands—mineral resources.

Under the authority of the Geothermal Steam Act of 1970 (30 U.S.C. 1001–1025), the regulations at Group 3200, Subchapter C, Chapter II of Title 43 of the Code of Federal Regulations are amended as set forth below:

Dated: February 10, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

PART 3200—GEOTHERMAL RESOURCES LEASING; GENERAL

1. Section 3200.0–6 is revised to read:

§ 3200.0–6 Preleasing procedures.

When an area is initially considered for geothermal leasing or when the need arises, the authorizing officer shall complete, in a timely manner, any environmental review determined to be necessary to conform with the National Environmental Policy Act of 1969 (42 U.S.C. 43323).

§ 3201.1–5 [Amended]

2. Section 3201–5 is amended by removing paragraph (b) in its entirety and removing the designation "(a)" at the beginning of the first paragraph of that section.

§ 3201.2 [Amended]

3. Section 3201.2(d) is amended by removing subparagraphs (3) and (4) in their entirety.

4. Section 32301.2(d) is revised to read:

§ 3203.5 Diligent exploration.

Each geothermal lease shall include provisions requiring diligent exploration until there is a well(s) capable of commerical production on the leased lands. Diligent exploration means postlease field operations, conducted by the lessee or designated operator, on or related to the leased lands. Diligent exploration operations include, but are not limited to, geochemical surveys, heat

flow measurement, core drilling or test drilling of test wells. To qualify as diligent exploration, the results and associated expenditures of operation shall be submitted to the supervisor in accordance with applicable regulations. In addition, to qualify after the fifth year of the lease, operations shall exceed minimum per acre expenditure in accordance with the following table:

Lease year	Expenditure per acre
6	$4
7	6
8	8
9	10
10–15	12

All expenditures qualifying as diligent exploration during the first 5 years of a lease, and all expenditures during any subsequent year in excess of the minimum requirement, shall be credited by the supervisor against the requirement for successive years. However, in lieu of performing the minimum required diligent exploration in any lease year in which a minimum requirement is specified, the lessee may exercise the option of paying an additional rental of $3 per acre or fraction thereof. Failure to either pay the additional rental or complete the minimum required diligent exploration by the end of a lease year shall subject the lease to cancellation.

5. Section 3204.1 is revised to read:

§ 3204.1 General.

A lessee shall comply with all of the standard lease terms and conditions, any special lease stipulations added by the authorized officer and all Geothermal Resource Operational Orders issued pursuant to 30 CFR 270.11.

§ 3204–2 [Removed]

6. Section 3204.2 is removed in its entirety.

§ 3204.3 [Redesignated as § 3203.9]

7. Section 3204.3 is renumbered § 3203.9.

§ 3204.4 [Redesignated as § 3203.7]

8. Section 3204.4 is renumbered § 3203.7.

§ 3204.5 [Redesignated as § 3203.8]

9. Section 3204.5 is renumbered § 3203.8.

§ 3204.6 [Removed]

10. Section 3204.6 is removed in its entirety.

§ 3205.3–1 [Amended]

11. Section 3205.3–1 is amended by:

a. Revising the second sentence to read as follows:

"An application accompanied by a payment of the first year's rental which is deficient by not more than 10 percent shall be accepted by the authorized officer provided all other requirements are met, but if the additional rental is not paid within 30 days after receipt of notice the application shall be rejected or the lease, if issued, will be cancelled.

b. Revising the last sentence to read as follows:

"If the annual rental established for the lease to be issued is more than $1 per acre or fraction thereof, the applicant shall submit the additional rental due within 30 days after receipt of notice of the application shall be rejected."

§ 3205.3–3 [Removed]

12. Section 3205.3–3 is removed in its entirety.

§ 3206.8 [Amended]

13. Section 3206.8 is amended by revising the first sentence to read. "The provisions of these regulations may be made applicable to any oil and gas nationwide or statewide bond by filing in the proper BLM office a written consent to that effect and an agreement to be bound by the provisions of this section executed by the principal and surety."

§ 3209.3 [Amended]

14. Section 3209.3 is amended by revising the last sentence to read "Within 90 days after the filing of such 'Notice of Completion,' the authorized officer shall notify the party who had conducted the operations whether all the terms and conditions set out by the regulations in this subpart and in the Notice of Intent have been met, or whether additional measures shall be taken to correct any unacceptable damage to the lands, specifying the nature and extent of such measures."

PART 3210—NONCOMPETITIVE LEASES

§ 3210.2–1 [Amended]

15. Section 3210.2–1 is amended by removing paragraph (d) in its entirety and renumbering paragraph (e) as paragraph (d).

§ 3210.2–2 [Amended]

16. Section 3210.2–2 is amended by revising the first sentence to read "Applications for leases under this subpart shall be submitted only during application filing periods." and by removing the third sentence in its entirety.

PART 3220—COMPETITIVE LEASES

§ 3220.6 [Amended]

17. Section 3220.6(d) is amended by revising the first sentence to read "If the lease is awarded, 3 copies of the lease shall be sent to the successful bidder who shall execute them within 30 days from receipt thereof, pay the first year's rental and file the required bond(s)."

PART 3230—RIGHTS TO CONVERSION TO GEOTHERMAL LEASES OR APPLICATION FOR GEOTHERMAL LEASES [REMOVED]

18. Part 3230 is removed in its entirety.

PART 3240—RULES GOVERNING LEASES

§ 3241.1–1 [Amended]

19. Section 3241.1–1 is amended by removing paragraph (c) in its entirety.

§ 3241.2–1 [Amended]

20. Section 3241.2–1 is amended by inserting in the first sentence immediately after the word "approval" the words "or validation."

21. The title of subpart 3250 is revised to read:

Subpart 3250—Utilization of Geothermal Resources

Note.—The information collection requirements contained in this subpart have been approved by the Office of Management and Budget under 44 U.S.C. 3507 and assigned clearance number 1004–0063. This information is needed to permit the authorized officer to determine if a permit should be granted for use of the public lands for utilization of geothermal resources. The obligation to respond is required to obtain a benefit.

PART 3250—UTILIZATION OF GEOTHERMAL RESOURCES

§ 3250.0–1 [Amended]

22. Section 3250.0–1 is amended by removing the phrase "for the purpose of generating electric power" at the end of the paragraph.

§ 3250.0–3 [Amended]

23. Section 3250.0–3 is amended by revising the last sentence to read "The right to use lands under geothermal lease for the purpose of utilizing geothermal resources may be exercised only in accordance with these regulations."

24. Section 3250.0–5 is amended by revising paragraph (d) and adding a new paragraph (e) to read:

§ 3250.0–5 Definitions.

* * * * *

(d) "Utilization site" means that tract of Federal lands under geothermal lease authorized for utilization of geothermal energy including, but not limited to, substations, switch yards, waste disposal and storage facilities, utility service lines, transmission lines, loading docks, processing plants, greenhouses, gasohol plants, crop dryers and appurtenant structures.

(e) "Joint Utilization Agreement" means the arrangement between the holder of a geothermal resource lease and a third party for utilization of geothermal steam and associated geothermal resources produced from a leasehold, for operation of utilization facilities.

* * * * *

§ 3250.0–6 [Amended]

25. Section 3250.0–6 is amended by removing from the last sentence the phrase "a power plant site" and replacing it with the phrase "any proposed utilization."

26. Section 3250.1–1 is amended by revising the introductory text, paragraphs (d)(2) and (d)(3) to read:

§ 3250.1–1 Requirements for application.

Any lessee or any party to a joint utilization agreement or a sales contract who desires a license to use the surface of lands under Federal geothermal lease for construction of utilization facilities, other than as provided in 30 CFR Part 270 and § 3250.4 of this title, shall file an application with the authorized officer."

* * * * *

(d) * * *

(1) * * *

(2) A map or maps showing the boundaries of the site and the location and dimensions of buildings, cooling towers or ponds, waste disposal or storage sites, switch yards, roads, pipelines, utility service lines, transmission lines and all other structures or facilities used in connection with the utilization of the geothermal steam and associated geothermal resources. In addition, the authorized officer may require maps showing the general location of proposed facilities to be used in connection with utilization of the geothermal resources but outside the license area.

(3) A description of the proposed facility including pertinent information about any substations included in the facility, indicating whether the proposed facility is to be interconnected with other facilities and whether the energy produced is to be sold to others or used by the applicant.

* * * * *

27. Section 3250.3 is revised to read:

§ 3250.3 Environmental analysis.

The authorized officer shall complete, in a timely manner, any environmental review determined to be necessary to conform with the National Environmental Policy Act of 1969 (42 U.S.C. 4332).

§ 3250.5–1 [Amended]

28. Section 3250.5–1 is amended by removing from the first sentence of both paragraph (a) and paragraph (b) the phrase "a power plant site utilizing" and replacing it with the phrase "utilization facilities for".

§ 3250.5–2 [Amended]

29. Section 3250.5–2 is amended by removing the phrase "a power plant site utilizing " and replacing it with the phrase "utilization facilities for".

30. Section 3250.6–1 is revised to read:

§ 3250.6–1 Area covered by license.

(a) The area approved for the proposed utilization site shall be reasonably compact as determined by the authorized officer and shall be limited to as much of the surface of the lands applied for as the authorized officer determined necessary for the adequate utilization of the geothermal resources.

(b) Prior to commencing any surface disturbance activities related to the construction of a utilization facility licensed under provisions of this group, a permit to construct a utilization facility shall be obtained from the Supervisor. The application for such permit shall be filed in triplicate under the regulations in 30 CFR Part 270.

§ 3250.6–2 [Amended]

31. Section 3250.6–2 is amended by removing from paragraph (a) the phrase "an electrical power plant" and replacing it with the phrase "a utilization facility" and by removing from paragraph (c) the phrase "power plant" and replacing it with the phrase "utilization facility".

§ 3250.6–3 [Amended]

32. Section 3250.6–3 is amended by revising the first sentence to read "Rental at a rate to be determined by the authorized officer shall be paid annually, but said rental shall not be less than $100 per acre if the utilization facility is for electrical generation, or not less than $10 per acre if the utilization facility is for nonelectrical purposes."

33. Section 3250.7 is amended by revising paragraph (c)(2) to read:

§ 3250.7 Bonds.

(a) *Surety bond.* The licensee of an electrical generating facility shall furnish and maintain a surety bond of not less than $100,000, conditioned upon compliance with all the terms and conditions of the license. The licensee for a nonelectrical utilization facility may be required to furnish a surety bond in an amount specified by the authorized officer. The authorized officer may determine not to require a surety bond in circumstances where it is determined that the nonelectrical uses have a low potential for causing damage to the environment.

* * * * *

(c) * * *

(2) indemnify the United States against any liability for damages or injury to life, person or property arising from the occupancy or use of the lands under license. Where a utilization facility license is granted under this subpart to a State or other governmental agency which does not have the authority to assume such liability with respect to damages caused by it to lands or property, such agency shall be responsible for repair or all such damages

April 20, 1983

Part IV

Department of Education

Office of Elementary and Secondary Education

Financial Assistance to State Educational Agencies To Improve the Interstate and Intrastate Coordination of Migrant Education Activities; Proposed Rule and Application Notice for Fiscal Year 1983 (Program Year 1983–84)

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

34 CFR Part 205

Chapter 1 of the Education Consolidation and Improvement Act of 1981; Financial Assistance to State Educational Agencies To Improve the Interstate and Intrastate Coordination of Migrant Education Activities

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes regulations for the Migrant Education Interstate and Intrastate Coordination Program authorized under the Education Consolidation and Improvement Act of 1981. This program provides financial assistance to State educational agencies (SEAs) for projects designed to improve the interstate and intrastate coordination of migrant education activities, including those activities conducted under the Migrant Education Program.

DATE: Comments must be received on or before June 6, 1983.

ADDRESS: Comments should be addressed to Mr. Vidal A. Rivera, Jr., Acting Director, Migrant Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Avenue, S.W. (Room 1100, Donohoe Bldg.), Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Mr. Vidal A. Rivera, Jr. Telephone No. (202) 245–2222.

SUPPLEMENTARY INFORMATION:

A. Overview of Chapter 1

Chapter 1 of the Education Consolidation and Improvement Act of 1981 (Chapter 1) was enacted as part of Subtitle D of Title V of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35). Chapter 1 supersedes Title I of the Elementary and Secondary Education Act of 1965, as amended (Title I). The purpose of Chapter 1 is to continue to provide financial assistance to State and local educational agencies (LEAs) to meet the special educational needs of educationally deprived children, on the basis of entitlements calculated under Title I, but to do so in a manner which will eliminate burdensome, unnecessary, and unproductive paperwork and free the schools of unnecessary Federal supervision, direction, and control.

These proposed regulations apply only to that portion of Chapter 1 that provides financial assistance to SEAs for special projects designed to improve interstate and intrastate coordination among State and local educational agencies of educational programs available for migratory students.

B. Overview of These Proposed Regulations

These proposed regulations relate to—

- General matters such as the purpose of this program, eligibility as a grantee, and regulations and definitions that apply to this program;
- How an SEA applies for a grant, including the required contents of an application and how an SEA must develop its application; and
- How a grant is made to an SEA, including how an application is evaluated, the selection criteria for reviewing an application, and the factors considered in awarding a grant.

c. Application of Other Statutes and Regulations

(1) Recipients of funds under Chapter 1 must comply with Federal civil rights laws generally applicable to recipients of Federal financial assistance; consequently, those laws, as well as the regulations that implement them, apply to all Chapter 1 programs. The applicable civil rights regulations are found in 34 CFR Parts 100, 104, and 106. Although regulations implementing the Age Discrimination Act of 1975 have not yet been published, recipients of Chapter 1 funds must comply with the provisions of that Act.

(2) Section 596 of the ECIA makes certain sections of the General Education Provisions (Act (GEPA) specifically applicable to Chapter 1 programs. Subject to the exceptions noted below, the Secretary adopts the interpretation that the other provisions of GEPA are applicable to Chapter 1. These proposed regulations reflect that intepretation.

Even though GEPA generally applies to Chapter 1, some specific provisions of GEPA are inapplicable because: they are specifically made inapplicable by the ECIA, they are superseded by specific provisions of the ECIA, or for other reasons explained in the following paragraphs. Other provisions of GEPA, though not inapplicable, have been superceded by the Department of Education Organization Act or are otherwise irrevelent to the operation of the Chapter 1 program. After a careful consideration of the ECIA and its legislative history, the Secretary interprets the following sections of GEPA as inapplicable to Chapter 1 as a matter of law:

(a) Section 408(a)(1) of GEPA (authorizing the Secretary to promulgate regulations), 20 U.S.C. 1221e–3(a)(1), is superseded by Section 591(a) of the ECIA.

(b) Section 425 of GEPA, 20 U.S.C. 1231b–2, provides complex procedures regarding certain actions by an SEA that affect applicants or recipients under an applicable program. Section 425 also provides for Federal Review of an SEA's action under that section. The Secretary believes that this provision was not intended to apply to Chapter 1. Section 425 applies only the programs in which assistance is provided "in accordance with a State Plan approved by the Secretary." Chapter 1 is not such a program. Further, Section 425 is clearly inconsistent with Section 552 of Chapter 1 which provides: "The Congress declares it to be the policy of the United States to continue to provide financial assistance to State and local educational agencies to meet the special educational needs of educationally deprived children * * * but to do so in a manner which will * * * free the schools of unnecessary Federal supervision, direction, and control."

(c) Section 426(a) of GEPA (relating to technical assistance from the Department), 20 U.S.C. 1231(a), is superseded by Section 591(b) of the ECIA.

(d) Section 427 of GEPA, 20 U.S.C. 1231d, directs the promulgation of Federal regulations or criteria relating to parental participation where the Secretary determines that parental participation at the State or local level will increase the effectiveness of a Federal program. The Secretary believes that Section 427 should not be invoked with respect to Chapter 1 even in the context of a determination of general GEPA applicability. The matter of parental invovlement is covered in Section 556(b)(3) of Chapter 1, and the Secretary regards this section as preemptive and rendering unnecessary the issuance of regulations or criteria under Section 427 of GEPA.

(3) Sections 1741 (distribution of block grant funds), 1742 (reports on the proposed use of funds and public hearings), 1743 (transition provisions), and 1745 (State audit requirements) of the Omnibus Budget Reconciliation Act of 1981 do not apply to Chapter 1. However, Section 1744 regarding access to records by the Comptroller General by its own terms does apply.

(4) The Education Department General Administrative Regulations (EDGAR) do apply to projects funded under these proposed regulations for the Migrant Education Interstate and

Intrastate Coordination Program. Those portions of EDGAR that apply to the Program are found in 34 CFR Parts 74, 75, 77 and 78.

The President's Task Force on Regulatory Relief has named EDGAR as a target for review. Therefore, the Department of Education will review EDGAR for the purpose of identifying opportunities to reduce paperwork and other burdens. Deregulation resulting from this review will be reflected in the final EDGAR regulations.

For the most part, EDGAR is inapplicable to programs funded under Chapter 1 of the Education Consolidation and Improvement Act. See, Final Regulations for programs of financial assistance to meet special educational needs of disadvantaged children, 45 FR 52340 (November 8, 1982), and Proposed Regulations for agencies to meet special educational needs of migratory children, handicapped, and neglected or delinquent children in institutions, 45 FR 54718 (December 3, 1982). However, EDGAR is applicable to these proposed regulations for the Migrant Education Interstate and Intrastate Coordination Program because unlike the others, the Program distributes funds to State educational agencies on the basis of a competitive application process.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291 of February 17, 1981 and are classified as non-major because they do not meet the criteria for major regulations published in the Order.

The purpose of Executive Order 12291 is to relieve regulatory burdens. The Order requires the Department of Education (ED), when promulgating new regulations, to—

(a) Base administrative decisions on adequate information concerning the need for, and consequences of, proposed Government action;

(b) Ensure that a regulation's benefits to society outweigh its costs to society;

(c) Choose regulatory objectives that maximize the net benefits to society; and

(d) Choose the regulatory approach involving the least net cost to society.

The Secretary has, to the maximum extent possible, incorporated these requirements as part of the Department's procedures for promulgating regulations. To assist the Department in complying with the specific requirements of Executive Order 12291 and its overall requirement of reducing regulatory burden, public comment is especially invited on whether there may be further opportunities to reduce any regulatory burden found in these proposed regulations.

Regulatory Flexibility Act

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities. Under these proposed regulations, grants are available only to State agencies. As defined in the Regulatory Flexibility Act, "small entities" only includes small businesses, small organizations, and small governmental jurisdictions. The definitions of "small governmental jurisdiction" does not include States or State agencies.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this preamble. All comments received on or before June 6, 1983, will be considered in developing the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 1100, Donohoe Building, 400 Sixth Street, S.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

List of Subjects in 34 CFR Part 205

Education, of disadvantaged, Elementary and secondary education, Grant programs—education, Migrant labor.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the lne following each substantive provision of these proposed regulations. Reference to "Sec." in these citations refer to sections of the Education Consolidation and Improvement Act of 1981 and to Title I of the Elementary and Secondary Education Act, as amended, respectively.

(Catalog of Federal Domestic Assistance No. 84.144; Migrant Education/Interstate and Intrastate Coordination Program)

Dated: April 14, 1983.

T. H. Bell,

Secretary of Education.

The Secretary proposes to amend Title 34 of the Code of Federal Regulations by revising Part 205 to read as follows:

PART 205—CHAPTER 1 OF THE EDUCATION CONSOLIDATION AND IMPROVEMENT ACT OF 1981—FINANCIAL ASSISTANCE TO STATE EDUCATIONAL AGENCIES TO IMPROVE THE INTERSTATE AND INTRASTATE COORDINATION OF MIGRANT EDUCATION ACTIVITIES

Subpart A—General

Sec.

205.1 Purpose.
205.2 Eligibility to participate as a grantee.
205.3 Regulations that apply.
205.4 Definitions that apply.
205.5 Acronyms.

Subpart B—Types of Activities That the Secretary Assists Under This Program

205.10 Type of projects that may be funded.

Subpart C—How To Apply for a Grant

205.20 Information required in an application.
205.21 Specific information required in a group application.
205.22 Consultation with other agencies.

Subpart D—How Grants Are Made

205.30 Application evaluation.
205.31 Selection criteria for reviewing an application.
205.32 Factors considered in awarding a grant.

Authority: Section 554(a) of Chapter 1 of the Education Consolidation and Improvement Act of 1981 (Pub. L. 97–35) (20 U.S.C. 3803(a)) and Section 143 of Title I, Elementary and Secondary Education Act of 1965, as amended by the Education Amendments of 1978 (Pub. L. 95–561) (20 U.S.C. 2763), unless otherwise noted.

Subpart A—General

§ 205.1 Purpose.

The Migrant Education Interstate and Intrastate Coordination Program is designed to provide financial assistance to State educational agencies (SASs) for projects designed to improve interstate and intrastate coordination of migrant education activities among SEAs and local educational agencies (LEAs). The projects may be designed to include SEAs, LEAs, and other operating agencies participating in the Chapter 1 Migrant Education Program.

(Sec. 552, 20 U.S.C. 3801; Sec. 554(a), 20 U.S.C. 3803(a), Title I, Sec. 143, 20 U.S.C. 2763)

§ 205.2 Eligibility to participate as a grantee.

Only SEAs, either individually or cooperatively (i.e., through a group or consortium), may apply for a grant under this program.

(Sec. 554(a), 20 U.S.C. 3803(a), Title I, Sec. 143, 20 U.S.C. 2763)

§ 205.3 Regulations that apply.

The following regulations apply to this program:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78.

(b) The regulations in this Part 205.

(Sec. 554(a), 20 U.S.C. 3803(a), Title I, Sec. 143, 20 U.S.C. 2763)

§ 205.4 Definitions that apply.

The definitions in the regulations for the Chapter 1 Migrant Education Program (34 CFR Part 201) published on ——————[1] apply to this program.

(Sec. 554(a), 20 U.S.C. 3803(a), Title I, Sec. 143, 20 U.S.C. 2763)

§ 205.5 Acronyms.

The following acronyms are used frequently in these regulations:

"LEA" stands for local educational agency.

"SEA" stands for State educational agency.

(Sec. 554(a), 20 U.S.C. 3803(a), Title I, Sec. 143, 20 U.S.C. 2763)

Subpart B—Types of Activities that the Secretary Assists Under this Program

§ 205.10 Types of projects that may be funded.

The Secretary may make grants to an SEA or SEAs to carry out among State and local educational agencies projects designed to improve the interstate and intrastate coordination of the educational programs available for migratory students.

(Sec. 554(a), 20 U.S.C. 3803(a), Title I, Sec. 143, 20 U.S.C. 2763)

Subpart C—How to Apply for a Grant

§ 205.20 Information required in an application.

In applying for a grant, an SEA shall follow the procedures and meet the requirements stated in Subpart C of 34 CFR Part 75.

(Sec. 554(a), 20 U.S.C. 3803(a), Title I, Sec. 143, 20 U.S.C. 2763)

§ 205.21 Specific information required in a group application.

In applying for a grant, an SEA shall provide information relevant to any proposed consortium of SEAs (for a group application only) as required by Subpart C of 34 CFR Part 75. In addition, the application must include—

(a) An identification of each SEA proposed to participate in the consortium;

(b) A description of the proposed objectives of the consortium; and

(c) A description of how each SEA proposed to participate in the consortium was involved in the development of the proposed objectives and activities of the project.

(Sec. 554(a), 20 U.S.C. 3803(a), Title I, Sec. 143, 20 U.S.C. 2763)

§ 205.22 Consultation with other agencies.

An applicant SEA under the Migrant Education Interstate and Intrastate Coordination Program shall plan and develop its project in consultation and coordination with other SEAs or with participating LEAs, as appropriate.

(Sec. 554(a); 20 U.S.C. 3803(a), Title I, Sec. 143, 20 U.S.C. 2763)

Subpart D—How Grants are Made

§ 205.30 Application evaluation.

(a) The Secretary evaluates an application under this program on the basis of the criteria in § 205.31 of these regulations.

(b) The Secretary awards up to 100 possible points for meeting these criteria.

(c) The maximum number of points possible for meeting each individual criterion is indicated in parentheses after the heading for that criterion.

(Sec. 554(a); 20 U.S.C. 3803(a); 20 U.S.C. 1221e–3(a)(1), Title I, Sec. 143, 20 U.S.C. 2763)

§ 205.31 Selection criteria for reviewing an application.

(a) *Interstate and intrastate consultation and coordination* (30 points)

(1) The Secretary reviews each application for information that shows the quality of the applicant SEA's proposed consultation and coordination with other SEAs or with participating LEAs, as appropriate to effect improved interstate and intrastate coordination of programs available for migratory students (10 points).

(2) The Secretary reviews each application to determine the extent to which the proposed activities address unmet national needs (10 points).

(3) The Secretary looks for information that shows that the applicant SEA—

(i) Has consulted and coordinated adequately with other SEAs or participating LEAs, as appropriate, in planning, developing, and disseminating its project (5 points); and

(ii) Will consult and coordinate adequately with other SEAs or participating LEAs, as appropriate, in implementing and evaluating its project (5 points).

(b) *Plan of operation.* (25 points)

(1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows the following:

(i) High quality in the design of the project.

(ii) An effective plan of management that insures proper and efficient administration of the project.

(iii) A clear description of how the objectives of the project relates to the purpose of the program.

(iv) A clear description of the way that the applicant SEA plans to use its resources and personnel to achieve each objective of the project.

(v) A clear description of how the applicant SEA will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(iv) A clear description of how the applicant SEA will provide an opportunity for participation of students enrolled in private schools.

(c) *Quality of key personnel.* (15 points)

(1) The Secretary reviews each application for information that shows adequate qualifications of the key personnel the applicant SEA plans to use in the project.

(2) The Secretary looks for information that shows the following:

(i) The qualifications of the project director (if one is to be used).

(ii) The qualifications of each of the other key personnel to be used in the project.

(iii) The time that each person referred to in paragraphs (b)(2)(i) and (ii) of this section plans to commit to the project.

(iv) The extent to which the applicant SEA, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(3) To determine personnel qualifications, the Secretary considers experience and training—in field related to the objectives of the project—as well

[1] Proposed regulations were published on December 3, 1982 at 47 FR 54718.

as other information that the applicant SEA provides.

(d) *Budget and cost effectiveness.* (15 points)

(1) The secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows the following:

(i) The budget for the project is adequate to support the project activities.

(ii) Costs are reasonable in relation to the objectives of the project.

(e) *Evaluation plan.* (10 points)

(1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project.

Cross-reference. See 34 CFR 75.590 of EDGAR (Evaluation by the grantee).

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(f) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each application for information that shows that the applicant SEA plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows the following:

(i) The facilities that the applicant SEA plans to use are adequate.

(ii) The equipment and supplies that the applicant SEA plans to use are adequate.

(See. 544(a), 20 U.S.C. 3803(a); 20 U.S.C. 1221e–3(a)(1), Title I, Sec. 143 20 U.S.C. 2763)

§ 205.32 Factors considered in awarding a grant.

In awarding grants, the Secretary considers—

(a) The amount of funds available for grants under the program; and

(b) The rank order of the applications—as determined by using the criteria listed in § 205.31 of these regulations.

(Sec. 544(a); 20 U.S.C. 3803(a); 20 U.S.C. 1221e–3(a)(1), Title I, Sec. 143, 20 U.S.C. 2763)

BILLING CODE 4000–01–M

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

Grants to State Educational Agencies To Improve the Interstate and Intrastate Coordination of Migrant Education Activities

AGENCY: Department of Education.

ACTION: Application Notice for Fiscal Year 1983 (Program Year 1983–84).

Applications are invited for new grants under the Migrant Education Interstate and Intrastate Coordination Program to improve the coordination of activities conducted under Chapter 1 of the Education Consolidation and Improvement Act (ECIA) of 1981 (Pub. L. 97–35), Migrant Education Basic State Formula Grant Program.

The authority for this special coordination program is contained in Section 554(a) of Chapter 1, ECIA. (The text of Section 143 of Title I of the Elementary and Secondary Education Act (Title I, ESEA as amended by Pub. L. 95–561) (20 U.S.C. 2763) contains the specific language authorizing the program. Section 554(a) of Chapter 1, ECIA provides continued authority to make payments based on the amount of, and eligibility for, grants as determined under the applicable sections of Title I, ESEA.) Funds are made available through a reservation from the total Chapter I Migrant Education Program appropriation. (The reservation of funds is authorized by Section 143(b) of Title I, ESEA, the Education Amendments of 1979 (Pub. L. 96–46).)

(U.S.C. 3803(a))

Eligible applicants are State educational agencies (SEAs).

The purpose of this program is to provide grants to SEAs, that may apply individually or cooperatively (i.e., as a group or consortium), to plan and implement special projects designed to improve the interstate and intrastate coordination of migrant education activities. Applicants under Section 415 of the Department of Education Organization Act (Pub. L. 96–88) (20 U.S.C. 3475) and the Federal Grant and Cooperative Agreement Act of 1977 (Pub. L. 95–224) (41 U.S.C. 501 *et. seq.)*

Closing Date for Transmittal of Applications: An application for a grant must be mailed or hand delivered by June 6, 1983.

Applications Delivered by Mail: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.144, Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) a legibly-dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education. If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark; or (2) A mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant SEA should check with its local post office.

An applicant is encouraged to use registered or first class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building 3, 7th and D Streets, S.W., Washington, D.C.

The Application Control Center will accept a hand-delivered application between 8:00 a.m. and 4:30 p.m. (eastern standard time) daily, except Saturdays, Sundays, and Federal holidays.

An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information: The Secretary awards grants under this program to SEA's to support special projects designed to promote and enhance the interstate and intrastate coordination of migrant education activities conducted under the Migrant Education Basic State Formula Grant Program. The basic program provides instructional and support services to meet the special educational needs of migratory children.

Available Funds: The Secretary estimates that there will be $2,065,600 available for FY 1983 grants. The Secretary estimates that these funds will support 15 projects with most awards between $80,000 and $200,000. These estimates, however, do not bind the U.S. Department of Education to a specific number of grants nor to the amount of any grant unless that amount is otherwise specified by statute or regulations.

Application Forms: The U.S. Department of Education's Migrant Education Programs office will mail application forms and program information packages to all eligible SEA's. An applicant SEA may obtain additional forms and program information packages by writing to Mr. Dustin Wilson, Migrant Education Programs, Office of Elementary and Secondary Education, U.S. Department of Education, 400 Maryland Ave. S.W., (Donohoe Building, Room 1100), Washington, D.C. 20202.

An applicant SEA must prepare and submit its application in accordance with the regulations, instructions, and forms included in the program information package. However, the program information package is only intended to aid the applicants in applying for assistance under this program. Nothing in the grant application package is intended to impose any paperwork, application content, reporting, or grantee performance requirements beyond those specifically imposed under the statute and regulations governing this program. The Secretary strongly urges that the narrative portion of an application not exceed 30 pages. The Secretary also urges that an applicant not submit information that is not requested.

Special Procedures: The application is subject to the State and areawide clearinghouse review procedures under OMB Circular A–95.

An applicant should check with its appropriate Federal regional office to obtain the name(s) and address(es) of the clearinghouse(s) in its State. OMB Circular A–95 requires an applicant to give the clearinghouse(s) sufficient time for review, consultation, and comments on its application.

In its application, an applicant must provide–

(1) The comments of each clearinghouse that commented on its application; or

(2) A statement that the applicant used the procedures of Part 1 of OMB Circular A–95 but did not receive any clearinghouse comments.

Applicable Regulations: The regulations that apply to this program include the following:

(a) Regulations governing the Migrant Education Interstate and Intrastate Coordination Program as proposed in 34 CFR Part 205. (Applications are being accepted based on the notice of proposed rulemaking for the Migrant Interstate and Intrastate Coordination Program which is published in this issue of the **Federal Register.** If any substantive changes are made in the final regulations for this program, applicants will be given an opportunity to revise their applications.)

(b) The Education Department Genertal Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, and 78).

Further Information: For further information, contact Mr. Dustin Wilson, Director, Division of Program Operations, Migrant Education Programs, Office of Elementary and Secondary Education, 400 Maryland Avenue, S.W., (Donohoe Building, Room 1100), Washington, D.C. 20202. Telephone (202) 245–9231.

(20 U.S.C. 3803(a))

(Catalog of Federal Domestic Assistance No. 84.144; Migrant Education/Interstate and Intrastate Coordination Program)

Dated: April 14, 1983.

Lawrence F. Davenport,

Assistant Secretary for Elementary and Secondary Education.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5053 of April 19, 1983

Jewish Heritage Week, 1983

By the President of the United States of America

A Proclamation

American Jews have made significant contributions to every phase of American life. They have served this Nation by fighting for her freedom, building her industry, working for her goals, and nurturing her dreams. They have brought distinction to every field of American endeavor and have participated in the cultural development, economic growth, and spiritual progress of America.

The Jewish people remain dedicated to ancient and revered traditions which have been severely tested over the centuries. From the observance of Passover, which tells the story of the passage from bondage to freedom and rekindles the hope for all who are oppressed, through the participation in the National Days of Remembrance honoring the victims and survivors of the Holocaust and the anniversary of the Warsaw Ghetto Uprising, Jews pay tribute to their past.

Each spring, the American Jewish community remembers its struggles, celebrates its achievements, and renews its commitment to a future of continued advancement. It is during this time that American Jews renew their common heritage with Jews throughout the world by celebrating such occasions as Israel's Independence Day and Solidarity Day for Soviet Jews. In particular, these Jewish traditions have been honored in 1983 by the American Gathering of Holocaust Survivors.

In recognition of the special significance of this time of year to American Jews, in tribute to the important contributions they have made to American life, and in tribute to the cultural diversity of the American people, the Congress of the United States, by House Joint Resolution 80, has authorized and requested the President to proclaim April 17 through April 24, 1983, as Jewish Heritage Week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning April 17, 1983, as Jewish Heritage Week. I call upon the people of the United States, Federal, State and local government officials, and interested organizations to observe that week with appropriate ceremonies, activities, and reflection.

IN WITNESS WHEREOF, I have hereunto set my hand this 19th day of April, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Proclamation 5054 of April 20, 1983

Death of Federal Diplomatic and Military Personnel in Beirut, Lebanon

By the President of the United States of America

A Proclamation

As a mark of respect for the American diplomats, military personnel and loyal staff members who died violently in the performance of their duty on April 18, 1983, in the tragic bombing of the United States Embassy in Beirut, Lebanon, I hereby order, by virtue of the authority vested in me as President of the United States of America by Section 175 of Title 36 of the United States Code, that the flag of the United States shall be flown at half-staff upon all public buildings and grounds, at all military posts and naval stations, and on all naval vessels of the Federal government in the District of Columbia and throughout the United States and its Territories and possessions through Tuesday, April 26, 1983. I also direct that the flag shall be flown at half-staff for the same length of time at all United States embassies, legations, consular offices, and other facilities abroad, including all military facilities and naval vessels and stations.

IN WITNESS WHEREOF, I have hereunto set my hand this 20th day of April, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Rules and Regulations

Federal Register
Vol. 48, No. 78
Thursday, April 21, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 905

[Orange, Grapefruit, Tangerine, and Tangelo Reg. 6, Amdt. 22]

Oranges, Grapefruit, Tangerines, and Tangelos Grown in Florida; Amendment of Grade Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule relaxes grade requirements currently in effect for fresh domestic and export shipments of pink seedless grapefruit and Honey tangerines to U.S. No. 2 Russet for the period April 25–August 21, 1983. This action is designed to increase the supply of such grapefruit and tangerines in recognition of demand conditions and the available remaining supplies in the interest of growers and consumers.

EFFECTIVE DATE: April 25, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone (202) 447–5975.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the Florida pink seedless grapefruit and Honey tangerine crops for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under the marketing agreement and Order No. 905 (7 CFR Part 905), regulating the handling of oranges, grapefruit, tangerines, and tangelos grown in Florida. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based upon recommendations and information submitted by the Citrus Administrative Committee, and upon other available information. It is hereby found that amendment of the regulation currently in effect for pink seedless grapefruit and Honey tangerines, as hereinafter provided, will tend to effectuate the declared policy of the Act.

The minimum grade requirements, specified herein, reflect the Committee's and Department's appraisal of the need to revise the grade requirements applicable to pink seedless grapefruit and Honey tangerines. Such revision will augment the total available supply of pink seedless grapefruit and Honey tangerines, available for shipment to market by handlers.

Under section 8e of the Act (7 U.S.C. 608e–1), whenever specified commodities, including grapefruit, are regulated under a Federal marketing order, imports of that commodity must meet the same or comparable grade, size, quality or maturity requirements as those in effect for the domestically produced commodity. Thus, grade requirements for imported pink seedless grapefruit will also change to conform to the grade requirements for domestic shipments of Florida pink seedless grapefruit.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this final rule is based and the effective date necessary to effectuate the declared purposes of the Act.

Interested persons were given an opportunity to submit information and views on the revisions of the grade requirements at an open meeting. This final rule relieves restrictions on the handling of pink seedless grapefruit and Honey tangerines. Handlers have been apprised of such provisions and the effective date.

List of Subjects in 7 CFR Part 905

Marketing agreements and orders, Florida, Grapefruit, Oranges, Tangelos, Tangerines.

Accordingly, the provisions of § 905.306 are amended by revising the following entries in Table I, paragraph (a) applicable to domestic shipments, and Table II, paragraph (b), applicable to export shipments, to read as follows.

§ 905.306 Orange, Grapefruit, Tangerine and Tangelo Regulation 6.

(a) * * *

TABLE I

Variety	Regulation period	Minimum grade	Minimum diameter (in.)
(1)	(2)	(3)	(4)

7 CFR Part 907

[Navel Orange Regs. 575 and 574, Amdt.]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period April 22–28, 1983, and increases the quantity of such oranges that may be so shipped during the period April 15–21, 1983. Such action is needed to provide for orderly marketing of fresh navel oranges for the period specified due to the marketing situation confronting the orange industry.

DATES: This regulation becomes effective April 22, 1983, and the amendment is effective for the period April 15–21, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202–447–5975.

SUPPLEMENTARY INFORMATION:

Findings

This rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona navel orange crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

This regulation and amendment are issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on September 21, 1982. The committee met again publicly on April 19, 1983 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navel oranges deemed advisable to be handled during the specified weeks. The committee reports the demand for navel oranges is continuing a little slow.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of navel oranges. It is necessary to effectuate the declared purposes of the Act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 907

Marketing agreements and orders, California, Arizona, Oranges (navel).

1. Section 907.875 is added as follows:

§ 907.875 Navel orange regulation 575.

The quantities of navel oranges grown in California and Arizona which may be handled during the period April 22, 1983 through April 28, 1983, are established as follows:

(1) District 1: 1,600,000 cartons;
(2) District 2: Unlimited cartons;
(3) District 3: Unlimited cartons;
(4) District 4: Unlimited cartons.

2. Section 907.874, Navel Orange Regulation 574 (48 FR 16025), is hereby amended to read:

§ 907.874 Navel orange regulation 574.

* * * * *

(1) District 1: 1,700,000 cartons;
(2) District 2: Unlimited cartons;
(3) District 3: Unlimited cartons;
(4) District 4: Unlimited carton.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: April 20, 1983.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 1505-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 82-AGL-31]

Alteration of Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this federal action is to convert the Williston, North Dakota, control zone from a part-time status to a full-time status. The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions on a 24-hour basis.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL–530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694–7360.

SUPPLEMENTARY INFORMATION: This action was initiated as a result of notification from Sloulin Field International Airport officials that required weather reporting is currently available on a 24-hour basis. The National Weather Service operates a full-time weather bureau facility located

at the Sloulin Field International Airport and observes and disseminates weather 24 hours per day, 7 days per week. The alteration in this case deletes the two sentences: "This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will, thereafter, be continuously published in the Airport/Facility Directory.", from the published description for the Williston, North Dakota, control zone.

Aeronautical maps and charts will continue to reflect the defined area which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

History

On page 7468 of the **Federal Register** dated February 22, 1983, the FAA proposed to amend § 71.171 of the Federal Aviation Regulations (14 CFR Part 71) so as to alter the control zone near Williston, North Dakota. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rulemaking.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.171 of Part 71 of the Federal Aviation Regulations was published in Advisory Circular AC 70-3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Control zones, Aviation safety.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT, June 9, 1983, as follows:

Williston, ND

Within a 5-mile radius of the Sloulin International Airport (latitude 48°10'37" N., longitude 103°36'18" W.); within 1.5 miles each side of the Williston VORTAC, and within 2 miles north and 3 miles south of the 126° bearing from the Sloulin International Airport, extending from the 5-mile radius area to 10 miles southeast of the airport.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)) and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, it is certified that this—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on April 7, 1983.

Monte R. Belger,

Acting Director, Great Lakes Region.

14 CFR Part 71

[Airspace Docket No. 82-AGL-30]

Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This notice proposes to alter the Superior, Wisconsin, transition area by designating an additional amount of airspace necessary for a new VOR-A instrument approach procedure to serve Sky Harbor Airport, Duluth, Minnesota.

The intended effect of this action is to insure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions in controlled airspace.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION: The airspace involved would be an area within a 5-mile radius of the Sky Harbor Airport, excluding the portion overlying the Duluth, Minnesota, 700' transition area. The floor of the controlled airspace in this area will be lowered from 1,200' above ground to 700' above ground. The development of the proposed instrument procedure requires that the FAA lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700' controlled airspace.

Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

History

On page 7467 of the **Federal Register** dated February 22, 1983, the FAA proposed to amend § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) so as to alter the transition area airspace near Superior, Wisconsin. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rulemaking.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was published in Advisory Circular AC 70-3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Transition areas, Aviation safety.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., June 9, 1983, as follows:

Superior, WI

That airspace extending upward from 700' above the surface within a 5-mile radius of the Richard I. Bong Airport (latitude 46°40'55"N., longitude 92°05'35"W.); within a 5-mile radius of the Sky Harbor Airport (latitude 46°43'18"N., longitude 92°02'36"W.); excluding those portions within the Duluth, Minnesota, 700' transition area.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)) and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, it is certified that this—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on April 7, 1983.

Monte R. Belger,

Acting Director, Great Lakes Region.

14 CFR Part 71

[Airspace Docket No. 83-ASO-10]

Redesignation of Control Zones, Savannah, Georgia; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction of final rule.

SUMMARY: This action corrects the descriptions of the amended Savannah, Georgia, control zones. The final rule published in the **Federal Register** (48 FR 10038) on Thursday, March 10, 1983, altered the Savannah, Georgia, control zone by establishing two separate control zones in the vicinity of Savannah Municipal Airport and Hunter AAF. When the control zones were redefined, the geographical coordinates of Hunter AAF and the northern limits of the control zone were erroneously listed. The purpose of this amendment is to correct the defectively written description. Since this action is editorial in nature, further notice and public procedure are not necessary. The effective date of this correction coincides with the effectivity of the original amendment. To avoid confusion, the complete description, as corrected, is presented in the text of this corrective amendment.

EFFECTIVE DATE: 0901 G.m.t., June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

Aviation safety, Airspace, Control zone.

SUPPLEMENTARY INFORMATION:

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., June 9, 1983, as follows:

Savannah Municipal Airport, GA—Revised

Within a 5-mile radius of Savannah Municipal Airport (Lat. 32°07'39"N., Long. 81°12'09"W.); within two miles each side of Savannah ILS Runway 36 Localizer south course, extending from the 5-mile radius area to the LOM.

Savannah Hunter AAF, GA—New

Within a 5-mile radius of Hunter AAF (Lat. 32°00'35"N., Long. 81°08'45"W.); excluding that airspace north of latitude 32°02'30"N.

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on April 7, 1983.

George R. LaCaille,

Acting Director, Southern Region.

14 CFR Part 71

[Airspace Docket No. 83-ASO-2]

Alteration of Transition Area, Augusta, Georgia

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment increases the size of the Augusta, Georgia, transition area to accommodate Instrument Flight Rule (IFR) operations at Burke County Airport. This action will lower the base of controlled airspace form 1,200 to 700 feet above the surface. An instrument approach procedure, based on a new nondirectional radio beacon which is to be installed on the airport, is being developed to serve the airport and additional controlled airspace is required to protect IFR operations. In addition, the coordinates of several airports already contained within the transition area, as well as the name of an airport, are being revised so that the description will be technically correct.

EFFECTIVE DATE: 0901 G.m.t., June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, January 27, 1983, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by increasing the size of the Augusta, Georgia, transition area to provide additional controlled airspace for containment of aeronautical operations in the vicinity of Burke County Airport. A nondirectional radio beacon is being established on the airport to support instrument flight rule activities by aircraft and this action will provide necessary controlled airspace. In addition, the coordinates of several airports already contained within the transition area description, as well as the name of an airport, are being revised so that the description is technically correct (48 FR 3768). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received in response to circularization. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations increases the size of the Augusta, Georgia, transition area to accommodate aeronautical activities at Burke County Airport.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Transition area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t. June 9, 1983, as follows:

Augusta Bush Field, Georgia—Revised

That airspace extending upward from 700 feet above the surface within an 11-mile radius of Bush Field (Lat. 33°22'11" N., Long. 81°57'55" W.); within 9.5 miles west and 4.5 miles east of Augusta ILS localizer south course, extending from the 11-mile radius area to 18.5 miles south of the LOM; within a 9-mile radius of Daniel Field (Lat. 33°28'00" N., Long. 82°02'30" W.); within a 7-mile radius of Thomson-McDuffie County Airport (Lat. 33°31'45" N., Long. 82°31'00" W.); within 9.5 miles north and 4.5 miles south of the 090° bearing from McDuffie RBN (Lat. 33°31'45" N., Long 82°26'19" W.), extending from the 7-mile radius area to 18.5 miles east of the RBN;

within a 6.5-mile radius of Burke County Airport (Lat. 33°02'25" N., Long. 82°00'00" W.); within 3.5 miles each side of the 249° bearing from the Burke County RBN (Lat. 33°02'32" N., Long. 82°00'16" W.), extending from the 6.5-mile radius area to 8.5 miles southwest of the RBN.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on April 6, 1983.

14 CFR Part 71

[Airspace Docket No. 82-AGL-11]

Designation of Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to designate an airport control zone to serve Grand Rapids/Itasca County Airport, Grand Rapids, Minnesota. This results from a request by the Grand Rapids/Itasca County Airport Commission. The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION: The airspace required would lower the floor of controlled airspace from 700 feet above the surface down to the surface within a five statute mile radius of the geographic center of Grand Rapids/Itasca County Airport. The control zone would be effective during the specific dates and times established in advance by a Notice of Airmen. The effective date and time would thereafter be continuously published in the Airport/Facility Directory. In addition, aeronautical maps and charts will reflect the defined area which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

History

On page 4292 of the Federal Register dated January 31, 1983, the FAA proposed to amend § 71.171 of the Federal Aviation Regulations [14 CFR Part 71) so as to establish a control zone near Grand Rapids, Minnesota. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rulemaking.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.171 of Part 71 of the Federal Aviation Regulations was published in Advisory Circular AC 70-3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Control zones, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., June 9, 1983, as follows:

Grand Rapids, MN

Within a 5-mile radius of the Grand Rapids-Itasca County Airport (latitude 47°12'45"N., longitude 93°31'00"W.).

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)) and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, it is certified that this—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on April 7, 1983.

Monte R. Belger,

Acting Director, Great Lakes Region.

14 CFR Part 71

[Airspace Docket No. 82-AGL-27]

Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to alter the Vincennes, Indiana, transition area by designating an additional amount of airspace necessary for a newly established NDB Runway 4 instrument approach procedure to serve Mt. Carmel, Illinois, Municipal Airport.

The intended effect of this action is to insure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions in controlled airspace.

EFFECTIVE DATE: June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION: The development of the proposed procedure requires that the FAA alter the designated airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace.

The airspace involved would be an area approximately 3.5 miles by 6 miles located southwest of the airport and extending from the 5-mile radius area to 8.5 miles south of the Mt. Carmel Municipal Airport.

Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

History

On page 4799 of the **Federal Register** dated February 3, 1983, the FAA proposed to amend § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) so as to alter the transition area airspace near Vincennes, Indiana. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rulemaking.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was published in Advisory Circular AC 70-3A dated January 3, 1983.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t, June 9, 1983, as follows:

Vincennes, Indiana

That airspace extending upward from 700 feet above the surface within a 7-mile radius of Lawrenceville-Vincennes Municipal Airport (latitude 38°45'35" N, longitude 87°36'27" W.); within 3 miles each side of the 186° bearing from the airport, extending from the 7-mile radius to 8 miles south; and 3 miles each side of the 352° bearing from the airport, extending from the 7-mile radius to 8 miles north; within 3 miles each side of the 102° bearing from the airport, extending from the 7-mile radius to 8 miles east; and within a 5.5-mile radius of O'Neal Airport (latitude 38°41'29" N., longitude 87°33'08" W.); and within 3 miles each side of the 258° bearing from the O'Neal Airport, extending from the 7-mile and 5½-mile radius area to 8 miles west of the O'Neal Airport; and within a 5-mile radius of the Mt. Carmel Municipal Airport (latitude 38°36'24" N., longitude 87°43'34" W.); within 3 miles either side of the 038° bearing from the Mt. Carmel Airport, extending from the 5-mile radius area northeast to join the Lawrenceville and O'Neal radius areas; and within 3 miles either side of the 196° bearing from the Mt. Carmel Airport extending from the 5-mile radius area to 8.5 miles south of the airport.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)) and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, it is certified that this—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on April 7, 1983.

Monte R. Belger,

Acting Director, Great Lakes Region.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 270

[Release No. IC-13163]

Filing of Materials With the Commission

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is adopting a technical amendment to rule 0-2(a) under the Investment Company Act of 1940 that will expand the rule to provide that, when the last day for timely filing of papers required to be filed by the Act falls on a Saturday, Sunday or holiday, the time within which required papers may be filed with the Commission will be extended until the following business day.

EFFECTIVE DATE: April 21, 1983.

FOR FURTHER INFORMATION CONTACT: Jane A. Kanter, Special Counsel (202) 272-2115, or Larry L. Greene, Esq. (202) 272-7320, Office of Disclosure Legal Services, Division of Investment Management, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission is today adopting a technical amendment to rule 0-2(a) [17 CFR 270.0-2(a)] under the Investment Company Act of 1940 (the "1940 Act") [15 U.S.C. 80a-1 *et seq.*] to provide that

when the last day for the timely filing of papers required to be filed by the 1940 Act falls on a Saturday, Sunday or holiday, the time within which required papers may be timely filed with the Commission will be extended until the following business day. Currently, no provision is made in rule 0–2(a) to accommodate situations in which the last day for the timely filing of required papers falls on a Saturday, Sunday or holiday. The amendment adopted today revises that rule to provide if the last day on which papers can be accepted as timely filed falls on a Saturday, Sunday or holiday, such papers may be filed on the following first business day.

Discussion

It has come to the Commission's attention that the filing requirements under the 1940 Act may, on occasion, result in a shortening of the filing period for materials required to be filed with the Commission when the last day of the filing period falls on a Saturday, Sunday or holiday. Currently, no provision is made in rule 0–2(a) under the 1940 Act to accommodate situations in which the last day for the timely filing of required papers falls on a Saturday, Sunday or holiday. Consequently, when the last day of the filing period is a Saturday, Sunday or holiday the filing must be made on the prior business day in order to be filed timely. The Commission has previously taken the position that shortened filing periods impose an unnecessary hardship on the responsible party. On May 17, 1971,[1] the Commission amended rule 22(j) [17 CFR 201.22(j)] of its Rules of Practice with respect to proceedings before the Commission. That rule was amended to provide, in pertinent part, that in computing any period of time prescribed or allowed by the Rules of Practice or by order of the Commission for the filing of papers in proceedings before the Commission, the last day of the time period so computed will be included unless that day is a Saturday, Sunday or holiday. In that case, the time period will be permitted to run until the end of the next day that is neither a Saturday, Sunday or legal holiday. Similarly, on March 29, 1974,[2] the Commission adopted an amendment to rule 0–3 [17 CFR 240.0–3] under the Securities Exchange Act of 1934 [15 U.S.C. 78a *et seq.*] relating to the filing of materials with the Commission under that Act. The amendment to rule 0–3 provides that if the last day on which papers can be accepted as timely filed falls on a Saturday, Sunday or holiday, such papers may be filed with the Commission on the next business day.

The Commission finds, in light of these other rules concerning the computation of the time periods prescribed or allowed for filing materials with the Commission, that present rule 0–2(a) under the 1940 Act is inconsistent with the Commission's view that shortened filing periods impose an unnecessary hardship on the responsible party. Consequently, the Commission hereby adopts a technical amendment to rule 0–2(a) to amend the requirements of that rule by providing that if the last day on which papers can be accepted as timely filed falls on a Saturday, Sunday or holiday, such papers may be filed on the first business day following.[3] The amendment also incorporates language that makes rule 0–2 specifically applicable to papers required to be filed pursuant to the Act or the rules and regulations thereunder. As discussed more fully below, in view of the Commission's determination that prior notice and comment are unnecessary under the circumstances, this technical amendment is being adopted without prior notice and comment, and will be effective immediately upon publication in the **Federal Register.**

Adoption of the Technical Amendment Without Prior Notice

The Administrative Procedure Act [5 U.S.C. 551 *et seq.*] ("APA") generally requires that any agency or commission publish a notice of proposed rule-making that provides adequate opportunity for comment by interested persons. Section 553(b)(B) of the APA provides an exception from this requirement in situations where the agency for good cause finds that prior notice and comment are "impractical, unnecessary, or contrary to the public interest." These standards are incorporated in rule 4(b) of the Commission's Rules of Practice [17 CFR 201.4(b)], which requires publication of prior notice of proposed rule amendments "[e]xcept where the Commission finds that notice and public procedure are impracticable, unnecessary, or contrary to the public interest."

In addition, the APA provides in section 553(d) that an adopted rule must be published at least 30 days prior to the rule's effective date. However, section 553(d)(1) contains an exception to this required publication of an adopted rule and 30 day delay in effectiveness when the rule is a substantive one that grants an exception or relieves a restriction.

The purpose of this technical amendment to rule 0–2(a) of the 1940 Act is to relieve an unnecessary filing burden. The Commission believes that this amendment to rule 0–2(a), however, would not significantly alter the rule and would have no detrimental impact on the rights of persons subject to the rule. In addition, the Commission believes that there is little likelihood that any interested person would object to the rule's adoption. Accordingly, the Commission has determined that prior notice and comment are unnecessary. Further, the Commission finds that a 30 day delay in effectiveness is not required pursuant to section 553(d)(1) of the APA because this amendment to rule 0–2(a) grants an exception or relieves a restriction. Therefore, this amendment to rule 0–2(a) will become effective immediately upon publication in the **Federal Register.**

Investment companies, Reporting and recordkeeping requirements, Securities.

Text of Technical Amendment to Part 270

In accordance with the foregoing, Chapter II, Title 17 of the Code of Federal Regulations, Part 270 is amended as follows:

PART 270—GENERAL RULES AND REGULATIONS UNDER THE INVESTMENT COMPANY ACT OF 1940

In § 270.0–2, paragraph (a) is revised as follows:

§ 270.0–2 General requirements of papers and applications.

(a) *Filing of papers.* All papers required to be filed with the Commission pursuant to the Act or the rules and regulations thereunder shall, unless otherwise provided by the rules and regulations in this part, be delivered through the mails or otherwise to the Securities and Exchange Commission, Washington, D.C. 20549. Except as otherwise provided by the rules and regulations, the date on which papers are actually received by the Commission shall be the date of filing thereof. If the last day for the timely filing of such papers falls on a Saturday, Sunday, or holiday, such papers may be filed on the first business day following.

BILLING CODE 6310-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 282

[Docket No. RM81-17-000]

Definition of Agricultural Use in Section 282.202(a) of the Commission's Incremental Pricing Regulations; Order Denying Rehearing and Request for Exemptive Rule

Issued: April 12, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order denying rehearing and request for exemption rule.

SUMMARY: On November 16, 1981, the Federal Energy Regulatory Commission (Commission) issued a final rule expanding the list of agricultural uses of natural gas set forth in § 282.202(a) which are exempt from incremental pricing surcharges (Order No. 189, 46 FR 57469, Nov. 24, 1981). A timely petition for rehearing of Order No. 189 or, in the alternative, for an exemptive rule under section 206(d) of the Natural Gas Policy Act of 1978 was filed by Humko Chemical. For the reasons discussed below and in Order No. 189, the Commissioin denies the petition for rehearing and request for exemptive rule.

DATE: Issued April 12, 1983.

FOR FURTHER INFORMATION CONTACT: Barbara K. Christin, Office of General Counsel, 825 North Capitol Street, NE., Washington, D.C. 20426; (202) 357-8033.

SUPPLEMENTARY INFORMATION:

On November 16, 1981, the Federal Energy Regulatory Commission (Commission) issued a final rule in this docket amending its regulations on incremental pricing (18 CFR Part 282) under Title II of the Natural Gas Policy Act of 1978 (15 U.S.C. 3301-3432) (NGPA). The final rule (Order No. 189, 46 FR 57469, November 24, 1981) amended § 282.202(a), which contains the list of agricultural uses of natural gas exempt from incremental pricing surcharges. The amendment added additional uses to the list.

A timely petition for rehearing of Order No. 189 was filed by Humko Chemical. On January 15, 1982, the Commission granted the petition solely for purposes of further consideration.

In its petition for rehearing, Humko Chemical requested the Commission to reconsider its decision in the final rule that the production of fatty chemicals from agricultural products and by-products, including tallow, tall oils, fish oils, and vegetable oils is not an agricultural use of natural gas for purposes of an incremental pricing exemption. Petitioner asserts, as it did in comments filed in response to the Notice of Proposed Rulemaking,[1] that its processing activities constitute natural fiber processing, agricultural production, and food processing, and that some of the fatty chemicals which it produces are essential to food quality maintenance.[2]

Although some of the products which Humko processes (such as tallow, tall oils, fish oils, and vegetable oils) may be derived from fibrous materials, they are not natural fiber. Therefore, the processing of these oils and the other materials is not natural fiber processing. Furthermore, the Commission's definition of agricultural use in § 282.202(a) of its regulations as it relates to "agricultural production" is generally limited to the on-farm use of natural gas for the production of crops or the raising of livestock.[3] Thus, although the raw materials which are processed by Humko Chemical may be agricultural in nature, the use of natural gas for this purpose does not fall within the "agricultural production" category as defined by the Commission.

Finally, petitioner's arguments that its use of natural gas to process agricultural products and by-products into chemical intermediates qualifies as food processing and is essential to food quality maintenance were considered by the Commission and addressed in the preamble to the final rule. (*Mimeo* at 12-14.) Further discussion here would not be helpful.

Accordingly, for the reasons discussed above and in the preamble to the final rule, the Commission denies rehearing of the final rule.

Petitioner requests in the alternative that the Commission issue a rule under section 206(d) of the NGPA to exempt its use of natural gas from incremental pricing surcharges. Section 206(d) grants the Commission authority to exempt any industrial facility or category of facilities from incremental pricing. Pursuant to section 206(d)(2), however, any exemptive rule is subject to Congressional review before becoming effective. Petitioner argues that the considerations underlying the Commission's decision in Order No. 177 are applicable here.[4] That order was issued pursuant to section 206(d) of the NGPA and exempted from incremental pricing natural gas used in the manufacture of fertilizer, agricultural chemicals, animal feed and food.

The Commission denies the request for an exemptive rule under section 206(d) Of the NGPA. The exemption granted by Order No. 177 was limited to the group of industries specifically enumerated in section 206(b)(3)(B) of the NGPA.[5] Petitioner's use of natural gas in the processing of agricultural products and by-products into fatty chemicals does not fall within this group.

The Commission orders

Humko Chemicals' petition for rehearing or, in the alternative, for an exemptive rule under section 206(d) of the NGPA, is denied.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

18 CFR Part 385

[Docket No. RM83-58-000; Order No. 289]

Rules of Practice and Procedure; Citation Form

Issued: April 12, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is amending its Rules of Practice and Procedure by establishing an official citation form for documents filed with

[1] Issued April 20, 1981, 46 FR 23487 (April 27, 1981).

[2] Section 206(b)(3)(A) defines "agricultural use" as follows:

(b)(3) Agricultural Use Defined.—For purposes of this subsection, the term "agricultural use," when used with respect to natural gas, means the use of natural gas to the extent such use is—

(A) for agricultural production, natural fiber production, natural fiber processing, food processing, food quality maintenance, irrigation pumping, or crop drying; or * * *.

[3] Order No. 114, Docket No. RM80-48, issued December 5, 1980, 45 FR 82915, 82918 (December 17, 1980).

[4] Order No. 177, Docket No. RM80-16, issued September 24, 1981, 46 FR 50080 (October 9, 1981).

[5] Section 206(b)(3)(B) defines, as an agricultural use, the use of natural gas "as a process fuel or feedstock in the production of fertilizer, agricultural chemicals, animal feed, or food."

the Commission. Accordingly, the Commission is adopting *A Uniform System of Citation* as its official citation manual.

EFFECTIVE DATE: May 23, 1983.

FOR FURTHER INFORMATION CONTACT: Kenneth J. Malloy, Rulemaking and Legislative Analysis Section, Office of General Counsel, 825 North Capitol Street, N.E., Room 8602–A, Washington, D.C. 20426; (202) 357–8033.

SUPPLEMENTARY INFORMATION: The Federal Energy Regulatory Commission (Commission) is amending its Rules of Practice and Procedure (18 CFR Part 385) by establishing an official citation form for documents filed with the Commission. The Commission does so by adopting *A Uniform System of Citation* [1] as its official citation manual.

I. Background

Accurate and uniform citation to legal authority is essential to effective and efficient regulatory writing and research. The Commission frequently receives pleadings, briefs, comments on rulemakings, and other documents that contain incomplete, inaccurate, or misleading citations. These inadequacies often consume time and staff resources and may impede Commission processes. Accordingly, the Commission believes that it is necessary to affirm the importance of citation form by using standard guidelines.

The Commission's rules, opinions, orders, and public information materials are published in a variety of places. For example, the Commission's rules are published in both the Code of Federal Regulations and the **Federal Register;** opinions and orders are published in the *FERC Reports;* and some types of orders and opinions are available only from the Commission in their typographic or photocopied form. The Commission also publishes much of this material in its looseleaf series called *Federal Energy Guidelines,* which is currently marketed to the public in identical looseleaf format by Commerce Clearing House (CCH).[2] The advantage of these "looseleaf" publications is that they contain most of the Commission's documents and thus provide easy accessibility to the primary source material. A standardized method of citing to these materials will be a welcomed aid to the Commission and the public alike.

The CCH publications are convenient for Commission personnel and regular practitioners, and the Commission recommends them. However, the series is not yet readily available to the general public and, therefore, the Commission has decided not to require citation to them. If a person using *FERC Statutes and Regulations* has the correct bluebook citation, it is generally a simple matter to locate the material in the Commission's publication.[3]

II. The Rule

The Commission is promulgating Rule 2003(c) (to be published at 18 CFR 385.2003(c)) to establish the most current edition of *A Uniform System of Citation* (currently in its 13th edition) as the preferred method of citation in all Commission filings and documents. The Commission believes that *A Uniform System of Citation* (known in the legal community as the "bluebook") is the preeminent authority on citation form and its use will minimize confusion. By invoking the *Uniform System,* this final rule also requires all persons to cite to certain preferred sources when filing documents. For example, statutes should be cited to *United States Code,* regulations to the *Code of Federal Regulations,* opinions and orders to *FERC Reports,*[4] and unpublished material to the Commission's typographic issuance.

This rule departs from *A Uniform System of Citation* in one respect. Rather than permit the use of any of the several citation forms discussed in Rule 1 of the *Uniform System,* the Commission adopts only the form for law reviews,[5] and specifically excepts Rule 1.1 (which applies to briefs and legal memoranda). The law review form is the proper one for any document containing substantial footnotes, as do most documents at the Commission. The bluebook contains numerous examples of footnotes in the law review form. In addition, the use of parallel citations, such as the docket or order numbers, is encouraged.

The following are examples of correct footnote citations for Commission documents.

Orders and Opinions: Tenneco Oil Co., 21 FERC ¶ 61,320 (1982),[6] *on remand of* Air Prod. & Chem., Inc. v. FERC, 650 F.2d 687 (5th Cir. 1981), *remanding and vacating* Tenneco Oil Co., 2 FERC ¶ 61,247 (1978), 3 FERC ¶ 61,257 (1978), and 4 FERC ¶ 61,070 (1978),[7] *modifying* Tenneco Oil Co., 57 F.P.C. 1306 (1977)[8] and 59 F.P.C. 2134 (1977).[9]

Statutes: Natural Gas Act § 7, 15 U.S.C. § 717f (1976 and Supp. IV 1980)

Rules: Settlements Involving Headwater Benefits, 18 CFR 13.1 (1982)

Proposed Rules, Rules not in CFR, and Regulation Preambles: Incremental Pricing: Definition of Agricultural Use, 46 FR 57,469 (1981).[10]

Impact of the NGPA on Current and Projected Natural Gas Markets, 47 FR 19,157, 19,159 (1982) (notice of inquiry issued April 28, 1982).[11]

The Administrative Procedure Act does not require notice and comment for "rules of agency organization, procedure, or practice." 5 U.S.C. 553(b)(A) (1976). Accordingly, this amendment to the Rules of Practice and Procedure is being made without prior notice and comment.

The final rule is effective on May 23, 1983.

(Department of Energy Organization Act, 42 U.S.C. 7101–7352 (Supp. IV 1980); Exec. Order No. 12,009, 3 CFR 142 (1978))

List of Subjects in 18 CFR Part 385

Administrative rules of practice and procedure.

In consideration of the foregoing, the Commission amends Part 385 of Title 18, Chapter I, *Code of Federal Regulations,* as set forth below.

---

[1] Harvard Law Review Ass'n, A Uniform System of Citation (13th ed. 1981). This book is available in most law bookstores.

[2] Inquiries on the Commerce Clearing House publication may be directed to Order Department, Commerce Clearing House, Inc., 4025 West Peterson Avenue, Chicago, Illinois 60646, (Phone: (312)583–8500).

[3] There are instances in which there is a notation in one volume (*e.g., FERC Reports*) that the full text of an order or opinion appears in another volume (*e.g., FERC Statutes and Regulations*). In these instances, the citation to the publication in which the full text appears should be used.

[4] In addition to *FERC Reports, Federal Energy Regulatory Commission Appeals Dicisions* is a one volume publication containing Commission decisions reviewing certain Department of Energy matters between August 1978 and June 1981. Decisions after June 1981 are integrated into *FERC Reports.*

[5] Rule 1.3 states that one may use large and small capital letters or regular roman type in footnotes. Since most documents prepared at or for the Commission are typed, ordinary roman type should be used.

[6] A parallel citation might add: Op. No. 10–B, Docket No. CI75–45.

[7] A parallel citation might add: Op. Nos. 10 and 10–A, Dock. No. CI75–45. Tenneco Oil Co., 4 FERC ¶ 61,070 (1978), was not assigned an opinion number. It was an "Order Clarifying Opinion No. 10 and Denying Stay."

[8] A parallel citation might add: Op. No. 788.

[9] A complete citation or prior history such as this example would generally be unnecessary, unless the history of the case were discussed.

[10] A parallel citation might add: [Reg. Preambles 1977–1981] FERC Stat. & Reg. ¶ 30,313 (1981), Order No. 169, Docket No. RM81–17.

[11] A parallel citation might add: 4 FERC Stat. & Reg. ¶ 35,512, Docket No. RM82–20–000.

By the Commission. Commissioner Richard concurred with a separate statement attached.

Kenneth F. Plumb,

Secretary.

PART 385—[AMENDED]

Section 385.2003 is amended by adding a new paragraph (c) to read as follows:

§ 385.2003 Specifications (Rule 2003)

* * * * *

(c) *Citation form.* Any filing with the Commission should comply with the rules of citation, except Rule 1.1, set forth in the most current edition of *A Uniform System of Citation,* published by The Harvard Law Review Association.

Final Rule to Adopt the *Uniform System of Citation;* Docket No. RM83–58–000.

Issued: April 12, 1983.

Richard, Commissioner, concurring:

Administrative Law Judge David Benkin has a speech that he gives on the evils of "secret law" at the Commission. He is referring to the unwritten policies and procedures that are mysterious and inaccessible to those who do not regularly appear before us. In recent years great strides have been taken to dispel that atmosphere. The Commission has resumed publication of its decisions;[1] the Rules of Practice and Procedure for hearings and general matters have been issued;[2] and discovery rules are being developed. (In my personal view, the discovery rules cannot be completed too soon).

Still, the regulatory environment is complex, replete with technical jargon and legal terms. Initiates have a tendency to speak in shorthand of energy regulation. Quick allusions to "the *South Georgia* exemption"[3] or to "Order 30"[4] may be unavoidable in day-to-day conversation, but in written documents, unless they are accompanied by complete and accurate citations, such references only serve to heighten the impression of "secret law" or to confuse novitiates (and new Commissioners).[5]

It is easy to go overboard with rules of form. Satirists have suggested that "the basic belief of the fundamentalists is that every word in the bluebook is literally true * * *. Thus, when the bluebook commands, 'discussions in selective case reports are cited: Annot., 12 A.L.R. 2d 382 (1950) * * *,' they cite 12 A.L.R. 2d 382 (1950) regardless of which annotation they are relying upon."[6] I do not think we need to go this far nor do we need to employ a squad of editors wielding blue pencils to police the proper use of italics. We do not expect strict compliance with the minutiae of the bluebook, however, the adoption of the rule before us today should be viewed as a serious mandate to end secret law at this Commission by fully citing legal authority.

Oliver G. Richard III,

Commissioner.

In FR Doc. 83–8103 beginning on page 13161 in the issue of Wednesday, March 30, 1983 make the following correction:

On page 13164, column three, line six should read "Dated March 25, 1983."

BILLING CODE 1505–01–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 401

[T.D. 7886]

Temporary Procedure and Administration Regulations Under the Tax Equity and Fiscal Responsibility Act of 1982; Certain Requirements for Release of Liens

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations governing the issuance of a release of a notice of Federal tax lien filed with respect to internal revenue taxes. Changes to the applicable tax law were made by the Tax Equity and Fiscal Responsibility Act of 1982. These regulations affect all persons against whom a notice of Federal tax lien has been filed for outstanding Federal taxes and Internal Revenue Service personnel who file a notice of Federal tax lien and will provide them with guidance necessary to comply with the law.

DATE: The regulations apply to a notice of Federal tax lien filed after December 31, 1982, notice of Federal tax lien satisfied after December 31, 1982, and notice of Federal tax lien for which a taxpayer after December 31, 1982, requests that a certificate of release be issued on the grounds that the tax liability was satisfied or has become legally unenforceable.

FOR FURTHER INFORMATION CONTACT: Neil W. Zyskind of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224. Attention: CC:LR:T, (202) 566–3289, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

A new Part 401 , Temporary Procedure and Administration Regulations under the Tax Equity and Fiscal Responsibility Act of 1982, is added by this document to Title 26 of the Code of Federal Regulations. In addition, this document contains temporary regulations under new Part 401 relating to certain requirements for the issuance of a release of a notice of Federal tax lien under section 6325(a) of the Internal Revenue Code of 1954, as amended by section 348 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248, 96 Stat. 638). The temporary regulations provided by this document will remain in effect until superseded by the final regulations on this subject.

The temporary regulations contain provisions relating to the issuance of a certificate or release of a notice of Federal tax lien under section 6325(a) of the Code. Section 401.6325–1(a) sets forth the general requirements for the release of a notice of Federal tax lien.

Section 401.6325–1(b) grants the district director the authority to file a notice of Federal tax lien containing a certificate of release which will become effective as a release as of a date prescribed in the document containing the notice of Federal tax lien and certificate of release. The authority to combine these documents will reduce the administrative difficulties in monitoring tax liens which have become legally unenforceable and will relieve the district director of the burden of

[5] New Commissioners have been surprised to learn that circuit court cases relied upon by outside parties or staff were affirmed or overturned by the Supreme Court, a fact omitted from the participants' footnotes. A few surprises of this sort have made me realize that my staff and I must scrutinize each and every citation of authority.

[6] Book Review, 65 Geo. L.J. 671 n. 7 (1977) (reviewing The Columbia Law Review, The Harvard Law Review Association, The University of Pennsylvania Law Review, and the Yale Law Journal, *A Uniform System of Citation* (12th ed. 1976).

issuing a separate certificate of release. Furthermore, the cost of filing a release, which is charged to a taxpayer, will be reduced by combining the documents.

Section 6325(a) requires that the Secretary issue a certificate of release of a notice of Federal tax lien no later than 30 days after the day on which the Secretary finds that the liability for the tax has been fully satisfied or has become legally unenforceable. Under paragraph (c) of § 401.6325–1, satisfaction of the tax liability occurs either when (1) the district director determines, as soon as practicable after tender of payment, that the entire tax liability has been satisfied in full, or (2) when the taxpayer provides the district director with proof of full payment of the tax liability. Section 401.6325–1(d) defines the term "proof of full payment."

Paragraph (e) of § 401.6325–1 provides that when a notice of Federal tax lien lists multiple tax liabilities, the district director shall issue a certificate of release when all of the tax liabilities have been fully satisfied or have become legally unenforceable. In addition, if the taxpayer requests that a certificate of release be issued for one of the liabilities listed in the notice of Federal tax lien and such liability has been fully satisfied or has become legally unenforceable, the district director shall issue a certificate of release. Thus, for example, if a notice of Federal tax lien is filed in 1983 covering an employment tax liability assessed for the third quarter of 1982 and an employment tax liability assessed for the fourth quarter of 1982, a release will not automatically be issued until the entire employment tax liabilities for the third and fourth quarters of 1982 have been satisfied or have become legally unenforceable. However, if the taxpayer paid the employment tax liability for the third quarter of 1982, the taxpayer can request that a certificate of release be issued for the third quarter tax liability and the district director shall issue a release. This provision will substantially reduce the burden, both administratively and economically, on the taxpayer and district director.

Section 401.6325–1(f) contains provisions relating to the necessary information required to be set forth in the taxpayer's request for the issuance of a certificate of release from a notice of Federal tax lien. Section 401.6325–1(g) contains the effective dates for the changes made to section 6325(a).

Non-Applicability of Executive Order 12291

The Treasury Department has determined that this temporary regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of the Order dated April 28, 1982.

Regulatory Flexibility Act

No general notice of proposed rulemaking is required by 5 U.S.C. 553 (b) for temporary regulations. Accordingly, the Regulatory Flexibility Act does not apply and no Regulatory Flexibility Analysis is required for this rule.

Drafting Information

The principal author of these temporary regulations is Neil W. Zyskind of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

List of Subjects in 26 CFR Part 401

Release of liens, Tax Equity and Fiscal Responsibility Act of 1982.

Adoption of Amendments to the Regulations

Accordingly, a new Part 401, Temporary Procedure and Administration Regulations under the Tax Equity and Fiscal Responsibility Act of 1982, is added to Title 26 of the Code of Federal Regulations. Part 401 reads as follows:

PART 401—TEMPORARY PROCEDURES AND ADMINISTRATION REGULATIONS UNDER THE TAX EQUITY AND FISCAL RESPONSIBILITY ACT OF 1982 (PUB. L. 97–248)

Sec.
401.6325–1 Release of liens.

Authority. Sections 6325(a) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 781, 917; 26 U.S.C. 6325(a), 7805).

§ 401.6325–1 Release of liens.

(a) *In general.* The district director shall issue a certificate of release for a filed notice of Federal tax lien not later than 30 days after the date on which the district director finds that the entire tax liability listed in such notice of Federal tax lien has been fully satisfied (as defined in paragraph (c) of this section) or has become legally unenforceable.

(b) *Certificate of release for a lien which has become legally unenforceable.* The district director shall have the authority to file a notice of Federal tax lien which also contains a certificate of release pertaining to those liens which become legally unenforceable. Such release will become effective as a release as of a date prescribed in the document containing the notice of Federal tax lien and certificate of release.

(c) *Satisfaction of tax liability.* For purposes of paragraph (a) of this section, satisfaction of the tax liability occurs when—

(1) The district director determines that the entire tax liability listed in a notice of Federal tax lien has been fully satisfied. Such determination will be made as soon as practicable after tender of payment; or

(2) The taxpayer provides the district director with proof of full payment (as defined in paragraph (d) of this section) with respect to the entire tax liability listed in a notice of Federal tax lien together with the information and documents set forth in paragraph (f) of this section. See paragraph (e) of this section if more than one tax liability is listed in a notice of Federal tax lien.

(d) *Proof of full payment.* As used in paragraph (c)(2) of this section, the term "proof of full payment" means—

(1) An internal revenue cashier's receipt reflecting full payment of the tax liability in question;

(2) A canceled check in an amount sufficient to satisfy the tax liability for which the release is being sought; or

(3) Any other manner of proof acceptableto the district director.

(e) *Notice of a Federal tax lien which lists multiple liabilities.* When a notice of Federal tax liens lists multiple tax liabilities, the district director shall issue a certificate of release when all of the tax liabilities listed in the notice of Federal tax lien have been fully satisfied or have become legally unenforceable. In addition, if the taxpayer requests that a certificate of release be issued with respect to one or more tax liabilities listed in the notice of Federal tax lien and such liability has been fully satisfied or has become legally unenforceable, the district shall issue a certificate of release. For example, if a notice of Federal tax lien lists two separate liabilities and one of the liabilities is satisfied, the taxpayer may request the issuance of a certificate of release with respect to the satisfied tax liability and the district director shall issue a release. See paragraph (c) of this section in determining when a tax lien has been fully satisfied. A request made by the taxpayer shall be made to the district director in accordance with the procedures in paragraph (f) of this section.

(f) *Taxpayer requests.* A request for a certificate of release with respect to a notice of Federal tax lien shall be submitted in writing to the district director (marked for the attention of the

Chief, Special Procedures Function) of the district in which the notice of Federal tax lien was filed. The request shall contain the following—

(1) Name and address of the taxpayer;

(2) A copy of the notice of Federal tax lien affecting the property; and

(3) The grounds upon which the issuance of a release is sought.

(g) *Effective date.* The provisions of this section are effective with respect to a notice of Federal tax lien (1) which is filed after December 31, 1982, (2) which is satisfied after December 31, 1982, or

(3) with respect to which the taxpayer after December 31, 1982, requests that district director to issue a certificate of release on the grounds that the liability was satisfied or legally unenforceable.

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under section (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

This Treasury decision is issued under the authority contained in sections 6325(a) and 7805 of the Internal Revenue Code of 1954 (68A Stat. 781, 917; 26 U.S.C. 6325(a), 7805).

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

Approved: April 6, 1983.

John E. Chapoton,

Assistant Secretary of the Treasury.

BILLING CODE 4830-01-M

PENSION BENEFIT GUARANTY CORPORATION

29 CFR Part 2606

Rules for Administrative Review of Agency Decisions

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Final rule.

SUMMARY: This final rule amends the Pension Benefit Guaranty Corporation's regulation on Administrative Review of Agency Decisions by changing the definition of the PBGC's Appeals Board to provide for a Board consisting of three senior agency officials, one of whom is designated chairperson, and to provide for three ex officio members. The purpose of this rule is to provide for a more effective appeals process.

EFFECTIVE DATE: April 21, 1983.

FOR FURTHER INFORMATION CONTACT: Deborah West, Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006; (202) 254-3010. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On July 19, 1979, the PBGC published a final rule regarding administration review of agency decisions (44 FR 42161). The purpose of the regulation is to ensure that persons who are adversely affected by certain initial determinations of the PBGC are provided with an opportunity to obtain review of those determinations. The current regulation applies to eleven types of determinations and provides for two types of agency review. Seven types of initial determinations are subject to appeal to the Appeals Board; four are subject to reconsideration by an official in the office that issued the initial determination, at a level higher than that of the person who issued the initial determination.

The term "Appeals Board" is defined in § 2606.2 of the regulation to mean a board consisting of the Director of the Office of Program Operations, the Director of the Office of Financial Operations, and the General Counsel, or their designees. The regulation is being amended to provide that the Appeals Board will consist of three senior agency officials appointed by the PBGC's Executive Director, one of whom shall be designated chairman by the Executive Director. If a person is unable to serve on the Appeals Board with respect to a particular case, he or she will be replaced by another senior agency official designated by the Executive Director. The purpose of this change is to provide for a chairperson and to ensure that Appeals Board matters are considered by an Appeals Board comprised of senior agency officials. The definition also provides that the Executive Director or, if unavailable, the Deputy Executive Director and the General Counsel are ex officio members of the Appeal Board and that the General Counsel may vote on any matter before the Board. If a tie results, the appeal will be referred to the Executive Director.

The Pension Benefit Guaranty Corporation has determined that this amendment is not a "major rule" for the purposes of Executive Order 12291, because it will not have an annual effect on the economy of $100 million or more; or create a major increase in costs or prices for consumers, individual industries, or geographic regions; or have significant adverse effects on competition, employment, investment, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. This conclusion is based on the fact that the amendment is procedural, and advises the public of a change in agency organization.

Because this regulation deals only with matters of agency organization and procedure, a general notice of proposed rulemaking is not required. See 5 U.S.C. 553(b). Further, since a general notice of proposed rulemaking is not required, this rule is not covered by the Regulatory Flexibility Act, 5 U.S.C. 601(2).

Pursuant to 5 U.S.C. 553(d), the agency finds that an immediate effective date for this amendment is needed to effectively administer the PBGC's appeals process and further finds that because it is a rule of agency organization, there is no public advantage in delay. Accordingly, the agency finds good cause to waive the 30-day service period.

List of Subjects in 29 CFR Part 2606

Pensions and pension insurance.

In consideration of the foregoing, Part 2606 of Chapter XXVI of Title 29, Code of Federal Regulations is hereby amended as follows:

1. The authority citation for Part 2606 is revised to read as follows:

Authority: Sec. 4002(b)(3), Pub. L. 93-406, as amended by sec. 403(e), Pub. L. 96-364, 94 Stat. 1208, 1302 (1980) (29 U.S.C. 1302(b)(3)).

2. In § 2606.2, the definition of "Appeals Board" is revised to read as follows:

§ 2606.2 Definitions

* * * * *

"Appeals Board" means a board consisting of a Chairperson appointed by the Executive Director of the PBGC and two senior agency officials appointed by the Executive Director to serve as regular members. Other senior agency officials may serve as alternate members in the event that a regular member is not available to serve or is unable to serve. Such alternates shall be appointed pursuant to a list designated by the Executive Director and shall serve in the order designated in that list. The General Counsel and the Executive Director or Deputy Executive Director shall be ex officio members. The General Counsel as an ex officio member of the Appeals Board may, if he or she chooses, vote on any matter before the Board for a decision. Appeals shall be decided by a majority vote of the Board members, but if the General Counsel votes on an appeal and that results in a tie vote, the appeal will be

referred to the Executive Director as specified in Section 2606.61. A person may not serve on the Appeals Board with respect to any case in which he or she made a determination with respect to the merits of the initial determination.

* * * * *

Issued at Washington, D.C. on this 15th day of April 1983.

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 946

Approval of Modification of the Virginia Permanent Regulatory Program Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Interim final rule.

SUMMARY: OSM is announcing interim final approval of a modification of the Virginia permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA) which would subject interim program operations to the penalty and enforcement provisions of the Virginia program. By letter dated March 22, 1983, Virginia submitted a proposed program amendment consisting of amendments to the Virginia Surface Mining Control and Reclamation Act of 1979.

DATES: Effective April 21, 1983. Public comment is invited on the action set forth herein. Written comments must be received on or before 4:00 p.m. on May 23, 1983, to be considered.

ADDRESSES: Written comments should be mailed or hand delivered to: Ralph Cox, Director, Virginia Field Office, Office of Surface Mining Reclamation and Enforcement, Highway 23, South, P.O. Box 626, Big Stone Gap, Virginia 24219, Telephone: (703) 523-4303.

Copies of the Virginia program, the March 22, 1983, letter containing the modification to the program, and all written comments received in response to this notice will be available for review at the OSM Offices and the Office of the State regulatory authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays:

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 "L" Street, N.W., Washington, D.C. 20240;

Office of Surface Mining Reclamation and Enforcement, Highway 23, South, Big Stone Gap, Virginia 24219;

Office of Surface Mining Reclamation and Enforcement, Flannagan and Carroll Streets, Lebanon, Virginia 24266;

Virginia Division of Mined Land Reclamation, 620 Powell Avenue, Big Stone Gap, Virginia 24219.

FOR FURTHER INFORMATION CONTACT: Ralph Cox, Director, Virginia Field Office, Office of Surface Mining, P.O. Box 626, Big Stone Gap, Virginia 24219, Telephone: (703) 523-4303.

SUPPLEMENTARY INFORMATION: The Virginia program was conditionally approved by the Secretary of the Interior on December 15, 1981 (46 FR 61088-61115). Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Virginia program can be found in the December 15, 1981 Federal Register (46 FR 61088-61115).

Background

When Virginia's permanent regulatory program was conditionally approved on December 15, 1981, it was OSM's understanding, pursuant to Section 506(a) of SMCRA, that a coal mining operation did not have to meet the permanent program *performance standards* until a permanent program permit was obtained.

However, this delay in the applicability of the permanent program performance standards does not apply to the *enforcement* aspects of State programs; Section 506(a) states that after eight months from program approval or longer if the operator submitted his permit application on time but the State has not yet processed it, no one is to mine without a permanent program permit. The purpose of the Section 506(a) exemption is to prevent the termination of ongoing operations due to bureaucratic delay. This exemption from the permanent program permit requirement should not be construed to allow the interim program enforcement mechanisms to continue. States with approved programs must have adequate staff and authority to carry out enforcement similar to Sections 517 and 521 of SMCRA and sanctions which meet the requirements of Section 518. State enforcement is to begin as soon as the program is approved. This enforcement must include cessation orders and notices of violation and must comply with the other Federal inspection and enforcement requirements mandated by SMCRA and approved in the State program.

Section 45.1-220, Article 1, Chapter 19 of the Virginia Code states in part that the provisions of Chapter 17, Title 45.1, will continue in effect for the regulation of operations which have been permitted pursuant to Chapter 17 until the completion of the processing of their applications for permanent program permits under Chapter 19 of Title 45.1. (Chapter 19 of the Virginia Code is the permanent regulatory program; Chapter 17, the interim regulatory program.) Virginia interpreted this section to mean that *all* aspects of the permanent coal surface mining regulatory program in Virginia take effect on the date on which the surface mining operation receives its permanent program permit. Due to this interpretation, questions were raised concerning how the State could implement, enforce and maintain its program, as required by SMCRA.

Pursuant to an ongoing dialogue between OSM and Virginia, an agreement was reached in November 1982 whereby the State would introduce legislation in the Virginia General Assembly to amend the Virginia Surface Mining Control and Reclamation Act (Virginia SMCRA) to provide Virginia officials with immediate authority to issue notices of violation and cessation orders, to impose civil penalties, etc. against existing mine permits prior to repermitting those operations under the State's permanent regulatory program. Upon enactment of this legislation, OSM agreed to withdraw all of the additional Federal inspectors sent into Virginia in July 1982 to ensure adequate inspection and enforcement of mining operations in the State.

On March 22, 1983, Virginia submitted as a program amendment an act passed by the Virginia General Assembly which amends Section 45.1-234.A. of the Virginia Surface Mining Control and Reclamation Act (Virginia SMCRA) to subject interim program operations to the penalty and enforcement provisions of Sections 45.1-245, 45.1-246, 45.1-247, 45.1-249, 45.1-250, 45.1-251 of the Virginia SMCRA and the penalty and enforcement regulations implementing those Sections (Administrative Record No. VA 483).

Also, in the March 22, 1983 letter, Virginia submitted two additional proposed revisions to the Virginia SMCRA. One of the proposed revisions

amends Section 45.1–240 to correct an erroneous cross-reference in the Virginia SMCRA. The other proposed revision amends Sections 45.1–249 and 45.1–251 of the Virginia SMCRA to satisfy condition "q" set by the Secretary in his conditional approval. These additional proposed amendments are the subject of a separate **Federal Register** notice.

Findings

The Director finds, in accordance with SMCRA and 30 CFR 732.17 and 732.15, that the program amendment, which subjects interim program operations to the penalty and enforcement provisions of the Virginia SMCRA and its implementing regulations, submitted by Virginia on March 22, 1983, meets the requirements of SMCRA and 30 CFR Part VII.

The approval of this amendment is effective April 21, 1983. To satisfy the public participation requirements for approval or disapproval of State program amendments, the Director is inviting public comment for 30 days on the action set forth herein. Following OSM's review of the comments received, OSM will issue a final rule to announce the Director's final decision on this modification of the Virginia program.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 946

Coal mining Intergovernmental relations, Surface mining, Underground mining.

Dated: April 15, 1983.

Carson W. Culp, Jr.,

Acting Director, Office of Surface Mining.

Part 946 of Title 30 is amended by revising § 946.10 to read as follows:

§ 946.10 State regulatory program approval.

(a) The Virginia State Program, as submitted on March 3, 1980, as amended and clarified on June 16, 1980, as resubmitted on August 13, 1981, and clarified in a meeting with OSM on September 21 and 22, 1981, and in a letter to the Director of the Office of Surface Mining on October 15, 1981, was conditionally approved, effective December 15, 1981. Beginning on that date, the Department of Conservation and Economic Development, Division of Mined Land Reclamation, was deemed the regulatory authority in Virginia for all surface coal mining and reclamation operations and all exploration operations on non-Federal and non-Indian lands. Beginning on July 21, August 19, September 21, and December 13, 1982, January 18, and February 28, 1983, the program also included program amendments submitted on January 28, July 9, July 8, August 13, September 30, and December 20, 1982, respectively. Further, beginning on (Insert: date of publication of this notice) the program includes a program amendment submitted on March 22, 1983.

(b) Copies of the conditionally approved program, as amended, are available for review at:

Virginia Division of Mined Land Reclamation, Drawer U, 622 Powell Avenue, Big Stone Gap, Virginia 24219;

Virginia Department of Conservation and Economic Development, 1100 State Office Building, Richmond, Virginia 23219;

Office of Surface Mining Reclamation and Enforcement, Flannagan and Carroll Streets, Lebanon, Virginia 24266;

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 L Street, N.W., Washington, D.C. 20240.

BILLING CODE 4310–05–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 366

[DoD Directive 5141.1]

Director, Program Analysis and Evaluation

AGENCY: Office of the Secretary, DoD.

ACTION: Final rule.

SUMMARY: The Secretary of Defense has assigned responsibilities and functions to the Director, Program Analysis and Evaluation (DPA&E), and has delegated specific authorities. This rule (DoD Directive 5141.1) serves as the instrument that authorizes the DPA&E to carry out his charter.

EFFECTIVE DATE: This rule was approved and signed by the Deputy Secretary of Defense on September 2, 1982, and is effective as of that date.

FOR FURTHER INFORMATION CONTACT: Mr. Arthur H. Ehlers, Director for Organizational and Management Planning, Office of the Deputy Assistant Secretary of Defense (Administration), Washington, D.C. 20301; telephone 202–695–4278.

SUPPLEMENTARY INFORMATION: In FR Doc. 79–2233 appearing in the **Federal Register** on January 22, 1979 (44 FR 4470), the Office of the Secretary of Defense (OSD) published the charter of the then Assistant Secretary of Defense (Program Analysis and Evaluation) (ASD(PA&E)). The OSD has revised this part to update the charter and to reflect the renaming of the position from ASD(PA&E) to DPA&E.

List of Subjects in 32 CFR Part 366

Organization and functions (government agencies), DoD programs.

Accordingly, 32 CFR is amended by revising Part 366, reading as follows:

PART 366—DIRECTOR, PROGRAM ANALYSIS AND EVALUATION

Sec.

366.1 Purpose.
366.2 Definition.
366.3 Responsibilities.
366.4 Functions.
366.5 Relationships.
366.6 Authorities.

Authority: 10 U.S.C. 125.

§ 366.1 Purpose.

This part is reissued and establishes, pursuant to the authority vested in the Secretary of Defense under 10 U.S.C. 125, the position of Director, Program Analysis and Evaluation (DPA&E), with

the responsibilities, functions, and authorities as prescribed herein.

§ 366.2 Definition.

DoD Components. The Office of the Secretary of Defense, the Military Departments, the Organization of the Joint Chiefs of Staff, the Unified and Specified Commands, and the Defense Agencies.

§ 366.3 Responsibilities.

The Director, Program Analysis and Evaluation, as the principal staff assistant to the Secretary of Defense for DoD program analysis and evaluation, shall:

(a) Develop policies, provide advice, make recommendations, and participate in the preparation of planning, fiscal, and materiel support guidance upon which DoD program projections are based.

(b) Perform analyses and evaluations of plans, programs, and budget submissions in relation to projected threats, estimated costs, resource constraints, and U.S. defense objectives and priorities.

(c) Identify issues and evaluate alternative programs.

(d) Initiate programs, actions, and taskings to ensure adherence to DoD policies and national security objectives; ensure that programs are designed to accommodate operational requirements and promote the readiness and efficiency of the U.S. Armed Forces.

(e) Review, analyze, and evaluate programs for carrying out approved policies and standards.

(f) Ensure that the costs of DoD programs are presented accurately and completely.

(g) Assess the effects of DoD spending on the U.S. economy, and evaluate alternative policies to ensure that the DoD program can be implemented efficiently.

(h) Provide leadership in developing and promoting improved methods for analyzing national security planning and the allocation of resources.

(i) Serve on boards, committees, and other groups pertaining to the DPA&E's functional areas, and represent the Secretary of Defense on PA&E matters outside the Department of Defense.

(j) Perform such other duties as the Secretary of Defense may assign.

§ 366.4 Functions.

In executing assigned responsibilities, the DPA&E shall:

(a) Carry out the responsibilities described in § 366.3 for the following functional areas:

(1) General purpose force structure, both active and reserve.

(2) Strategic and theater nuclear force structure.

(3) Mobility force structure and prepositioning plans.

(4) Force readiness and capabilities.

(5) Weapon systems and major items of materiel.

(6) Implications for manpower resources of specific force structure plans.

(7) Support systems.

(8) Contingency plans.

(9) Materiel support programs and war reserve stocks.

(10) Deployment plans and overseas basing requirements.

(11) Mobilization plans.

(12) Effects of the DoD program on the economy and the industrial base.

(13) Security assistance programs.

(14) Allied and foreign military requirements and capabilities.

(15) Nuclear warhead requirements.

(16) Such other areas as the Secretary of Defense may from time to time prescribe.

(b) Perform critical reviews of requirements, performance, and life-cycle costs of current and proposed weapon systems.

(c) Provide leadership and support to the Cost Analysis Improvement Group in accordance with DoD Directive 5000.4.

§ 366.5 Relationships.

(a) In the performance of his duties, the DPA&E shall:

(1) Coordinate and exchange information with other DoD organizations having collateral or related functions.

(2) Use existing facilities and services of the Department of Defense or other federal agencies to avoid duplication and achieve maximum efficiency and economy.

(b) Heads of DoD Components shall coordinate with the DPA&E on all matters related to the functions cited in § 366.4.

§ 366.6 Authorities.

The DPA&E is hereby delegated authority to:

(a) Issue instructions and one-time directive-type memoranda, consistent with DoD Directive 5025.1, that carry out policies approved by the Secretary of Defense in assigned fields of responsibility. Instructions to the Military Departments shall be issued through their Secretaries or designees. Instructions to Unified and Specified Commands will be issued through the Joint Chiefs of Staff.

(b) Obtain such reports, information, advice, and assistance consistent with the policies and criteria of DoD Directive 5000.19, as necessary.

(c) Communicate directly with heads of DoD Components. Communications to the Commanders of the Unified and Specified Commands shall be coordinated with the Joint Chiefs of Staff.

(d) Establish arrangements for DoD participation in those nondefense governmental programs for which the DPA&E has been assigned primary cognizance.

(e) Communicate with other government agencies, representatives of the legislative branch, and members of the public, as appropriate, in carrying out assigned functions.

April 18, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

Department of the Army

32 CFR Part 632

Army Regulation 190-28, Use of Force by Personnel Engaged in Law Enforcement and Security Duties

AGENCY: Department of the Army, DOD.

ACTION: Final rule.

SUMMARY: This regulation establishes policy and procedures governing the use of force by personnel engaged in law enforcement and security duties. It requires that only the minimum amount of force needed to accomplish law enforcement and security duties will be used and further identifies situations where deadly force is authorized. This regulation also delineates training requirements that must be completed by all personnel assigned to law enforcement, security, or U.S. military prisoner guard duties prior to performing these duties.

EFFECTIVE DATE: April 21, 1983.

FOR FURTHER INFORMATION CONTACT: Major Ronald S. Phillips, (202) 756-1896.

SUPPLEMENTARY INFORMATION: Proposed rulemaking was published on pages 8790-8791 of the **Federal Register** of March 2, 1982, and invited comments to be submitted on or before April 1, 1982. Comments were received from one source. The following summarizes the comments, suggestions, and actions taken.

Comment One: Some doubt was created relative to the applicability of the proposed rule on civilian contract

guards who perform security duties for the Department of the Army.

Action Taken: Section 632.2(a) was revised to include civilian contract guards.

Comment Two: The authority citation should be 10 USC 3012.

Action Taken: The authority citation was changed to read 10 USC 3012.

Regulatory Review: This regulation is not significant under the requirements of Executive Order 12044, and a regulatory analysis is not required. The Department of the Army has also determined as required by the Regulatory Flexibility Act (Pub. L. 96-354) that the proposed rule poses no burden upon small entities.

List of Subjects in 32 CFR Part 632

Law enforcement, Security measures, Military personnel.

Dated: April 15, 1983.

John O. Roach II,

Army Liaison Officer with the Federal Register.

Accordingly, 32 CFR is amended by adding new Part 632.

PART 632—USE OF FORCE BY PERSONNEL ENGAGED IN LAW ENFORCEMENT AND SECURITY DUTIES

Sec.

632.1 Purpose.
632.2 Applicability.
632.3 Policy.
632.4 Deadly force.
632.5 Use of firearms.
632.6 Administrative instructions.

Authority: 10 U.S.C. 3012.

§ 632.1 Purpose.

This regulation implements DOD Directive 5210.65. It sets uniform policy for use of force by DA law enforcement and security personnel.

§ 632.2 Applicability.

(a) This regulation applies to all DA including Army National Guard and Army Reserve and civilian personnel engaged in law enforcement or security duties, and those civilian contract guard personnel performing security duties. These duties include guarding U.S. Military prisoners and interior guard duties.

(b) Except for personnel guarding U.S. military prisoners, this regulation does not apply to persons assigned to—

(1) A wartime combat zone.

(2) A non-wartime hostile fire area.

(3) Duties with the U.S. Secret Service.

(4) Civil disturbance control. (See para 4-12, FM 19-15.)

§ 632.3 Policy.

(a) Law enforcement and security personnel will use force only when they cannot fulfill their duties without it. They will use the minimum force needed; only as a last resort will they use deadly force. (See § 632.3(c), 632.4, and 632.5.)

(b) Commanders are encouraged to substitute nonlethal devices (such as night sticks) for firearms when adequate for law enorcement and security personnel to safely fulfill their duties.

(c) In evaluating the degree of force needed for specific law enforcement or security situations, consider these options:

(1) Verbal persuasion.

(2) Unarmed defense techniques.

(3) Chemical aerosol irritant projectors (M36). (May be subject to host nation or local restrictions.)

(4) MP club.

(5) MP working dogs.

(6) Deadly force. (§ 632.4)

(d) Entrapment, i.e., inducing someone to commit an offense in order to prosecute that person, is not permitted in law enforcement or security duties.

(e) Use MP working dogs in accordance with the provisions of AR 190-12. Release dogs only if a lesser measure of force would not be effective.

(1) Releasing a sentry dog to apprehend a suspect is a greater measure of force than releasing a patrol dog.

(2) Before releasing a military dog for attack, give a challenge or order to halt.

§ 632.4 Deadly force.

(a) Deadly force is destructive physical force directed against a person or persons (e.g., firing a lethal weapon). Use it only in extreme need, when all lesser means have failed or cannot reasonably be used. Use deadly force for one or more of the following reasons only:

(1) In self-defense, when in imminent danger of death or serious injury.

(2) To protect property related to national security, when reasonably necessary to prevent—

(i) Threatened theft, damage, or espionage aimed at property or information specified by a commander or other competent authority as vital to national security. (See § 632.4(b) below.)

(ii) Actual theft, damage, or espionage aimed at property or information which, though not vital, is substantially important to national security. (See § 632.4(b) below.)

(iii) Escape of an individual whose unauthorized presence near property or information vital to national security is a reasonable threat of theft, sabotage, or espionage.

(3) To prevent actual theft or sabotage of property (such as operable weapons or ammunition) which could cause deadly harm to others in the hands of an unauthorized person.

(4) To prevent serious offenses against a person or persons (e.g., armed robbery, rape, or violent destruction of property by arson, bombing).

(5) To apprehend a suspect believed to have committed any of the types of offenses named in (a) (2), (3), and (4) of this section.

(6) To prevent the escape of a prisoner (when authorized by a commander or other competent authority and reasonably necessary).

(7) To obey lawful orders from higher authority governed by this regulation.

(b) A commander or other competent authority will specify that property or information is—

(1) Vital to national security only when its loss, damage, or compromise would seriously harm national security or an essential national defense mission.

(2) Substantially important to national security based on the mission and the material or information required to perform it.

(c) To comply with local law or international agreement or arrangements, a commander may impose further restrictions on using deadly force. (Restrictions should not unduly compromise U.S. security interests).

(d) Security criteria and standards for protection of nuclear weapons (§ 632.4(c) AR 50-5-1) and for chemical agents (§ 632.4(c) AR 50-6-1) also apply.

§ 632.5 Use of firearms.

(a) If it becomes necessary to use a firearm in any of the circumstances described in § 632.4 above, observe the following precautions when possible:

(1) Give an order to halt before firing.

(2) Do not fire if shots are likely to harm innocent bystanders.

(3) Since warning shots could harm innocent bystanders, avoid firing them. However, when lesser degrees of force have failed, the law enforcement or security person may judge that warning shots would help to control the situation without using deadly force. If able to avoid hazards to innocent persons in these cases, fire warning shots.

(4) Aim to disable. At times it may be difficult to fire with enough precision to ensure disabling rather than killing. If the use of firearms are otherwise authorized by this regulation, such circumstances will not rule out their use.

§ 632.6 Administrative instructions.

(a) Commanders will ensure that all persons assigned to law enforcement, security, or US military prisoners' guard duties will, before performing these duties—

(1) Receive instructions on regulations regarding use of force.

(2) Show knowledge and skill in the use of—

(i) Unarmed defense techniques.

(ii) MP club.

(iii) Individual chemical aerosol irritant projectors.

(iv) Their assigned firearms.

(b) Commanders will also—

(1) Provide periodic refresher training to ensure continued proficiency and updated knowledge in these skills. (Include applicable host nation requirements.)

(2) Require MPs with law enforcement duties to qualify yearly with their assigned handguns.

(3) Require interior guards to receive instructions regarding use of force. (Give periodic refresher training to ensure continued familiarity with regulations.)

(c) Requirements concerning use of the MP club and chemical aerosol irritant projectors apply only when these weapons are issued items or are carried on duty.

(d) FM 19–5 contains procedures and methods for using unarmed defense techniques and the MP club.

BILLING CODE 3710-03-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD11 11-27-83]

Establishment of Special Local Regulations for the "Annual Spring Regatta"

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: Special local regulations are being adopted for the Annual Spring Regatta on the Colorado River. This event will be held on 7 and 8 May 1983, at Headgate Rock Dam. The regulations are needed to provide for the safety of life on navigable waters during the event.

EFFECTIVE DATE: These regulations become effective on 7 May 1983 and terminate on 8 May 1983.

FOR FURTHER INFORMATION CONTACT: Lt N. M. Turner, Commander(bpa), Eleventh Coast Guard District, 400 Oceangate, Long Beach, California 90822, (213) 590–2213.

SUPPLEMENTARY INFORMATION: A notice of proposed rule making has not been published for these regulations and they are being made effective in less than 30 days from the date of publication. There was not sufficient time to publish proposed rules in advance of the event or to provide for a delayed effective date.

Drafting Information: The principal individuals involved in drafting this rule are Lt Noris M. Turner, Chief, Boating and Public Affairs Branch, Eleventh Coast Guard District, and Lt Catherine M. Kelly, Project Attorney, Legal Office, Eleventh Coast Guard District.

Discussion of Regulations: The Southern California Speedboat Club's "Annual Spring Regatta" will be conducted beginning 7 May 1983, starting from Headgate Rock Dam. This event will have 50 to 60 13- to 22-foot racing hydroplanes and runabouts that could pose hazards to navigation. Vessels desiring to transit the regulated area may do so only with clearance from a patrolling law enforcement vessel or an event committee boat.

Evaluation: These regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be a major rule. This conclusion follows from the fact that the regulated area will be open for the passage of commercial vessels and can be opened periodically to recreational vessels.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water).

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

Final Regulations: In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations, is amended by adding the following section:

§ 100.35–11–1127 Southern California Speedboat Club/Annual Spring Regatta.

(a) *Regulated area:* The following regulated area will be closed intermittently to all vessel traffic from 8:00 am to 7:00 pm each day on 7 and 8 May 1983: That portion of the Colorado River north of the city of Parker, Arizona, starting from Headgate Rock Dam, thence northeasterly along the natural flow of the river for one (01) mile, on Moovalya Lake.

(b) *Special Local Regulations:* (1) No person or vessel may enter or remain in the regulated area unless participating in the event or authorized by the sponsor of the event to do so.

(2) Procedures For Transiting: The regulated area will be opened every hour on the hour or after each heat or race for minimum of ten (10) minutes for the safe transit of nonparticipant water craft.

(3) These regulations are temporary in nature and shall cease to be in effect or further enforced at the end of the period set forth.

(46 U.S.C. 454; 49 U.S.C. 1655(b)(1); 33 CFR 1.46(b))

Dated: April 12, 1983.

A. P. Manning,

Rear Admiral, U.S. Coast Guard, Commander, Eleventh Coast Guard District.

BILLING CODE 4910-14-M

33 CFR Part 117

[CGD3 (83–007)]

Drawbridge Operation Regulations; Appoquinimink River, Delaware

AGENCY: Coast Guard, DOT.

ACTION: Final rule, Revocation.

SUMMARY: This amendment revokes the regulations for the Delaware State Highway Route 9 drawbridge, mile 3.5 at Fennimores, Delaware because the bridge has been removed and replaced by a fixed bridge as authorized by Coast Guard Bridge Permit 162–71. Notice and public procedure have been omitted from this action due to the removal of the drawbridge concerned.

EFFECTIVE DATE: This rule becomes effective on April 21, 1983.

FOR FURTHER INFORMATION CONTACT: William C. Heming, Bridge Administrator, Third Coast Guard District, (212) 668–7994.

SUPPLEMENTARY INFORMATION: This action has no economic consequences. It merely revokes regulations that are now meaningless because they pertain to a drawbridge that no longer exists. Consequently, this action cannot be considered to be a major rule under Executive Order 12291. Furthermore, it has been found to be nonsignificant under the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 5–2–80), and does not warrant preparation of an economic evaluation. Because no notice of proposed rulemaking is required under 5 U.S.C. 553, this action is exempt from the Regulatory Flexibility Act (5 U.S.C. 605(b)). It is certified that this action will not have a significant effect on a substantial number of small entities.

Drafting Information:

The drafters of this rule are Ernest J. Feemster, project manager, and LCDR Frank E. Couper, project attorney.

---

33 CFR Part 165

[Reg. 83–02]

COTP Wilmington, NC, Safety Zone Regulations; Port of Morehead City, North Carolina

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing Safety Zones around the perimeter of the State Ports at Morehead City, North Carolina and Radio Island at Beaufort, North Carolina. These zones are needed to conduct training in special port operations. Entry into these zones is prohibited unless authorized by the Captain of the Port.

EFFECTIVE DATE: This regulation becomes effective at 1900, Eastern Standard Time, April 17, 1983. It terminates at 1600, Eastern Daylight Savings Time, April 27, 1983.

FOR FURTHER INFORMATION CONTACT: LT K. C. Olds, Chief, Operations Department, Coast Guard Marine Safety Office, Wilmington, North Carolina, 28401, Phone: 919–343–4882.

SUPPLEMENTARY INFORMATION: A notice of proposed rule making was not published for this regulation and is being made effective in less than 30 days after **Federal Register** publication. Publishing a NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to prevent possible damage to the port facilities and vessels involved.

Drafting Information: The drafters of this regulation are Lieutenant K. C. Olds, project officer, for the Captain of the Port and Commander D. J. Kanter, project attorney, Fifth Coast Guard District Legal Office.

Discussion of Regulations: The port operations requiring this regulation will begin at 1900, Eastern Standard Time, April 17, 1983. Due to training exercises by various military units in the vicinity of State Ports and Radio Island, the need exists to control access and control vessel movement within these areas. Landside and waterborne traffic will be prohibited from entering or remaining in the safety zone without prior proper identification and authorization from the Captain of the Port or his designated representative.

List of Subjects in 33 CFR Part 165

Harbors, marine safety, Navigation (water) Security measures, Vessels, Waterways.

PART 165—[AMENDED]

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is amended by adding a new § 165.T502 to read as follows:

§ 165.T502 Safety zone

(a) *Location:* The following locations are safety zones: The area of the State Ports at Morehead City, North Carolina and the perimeter waters extending out to 500 feet; the area of Radio Island, Beaufort, North Carolina and the perimeter waters extending out to 500 feet.

(b) *Regulations:* (1) In accordance with the General Regulations in § 165.23 of this part, entry into these zones is prohibited unless authorized by the Captain of the Port.

(33 U.S.C. 1225 and 1231; 49 CFR Part 146; 33 CFR 165.3)

Dated: April 18, 1983.

C. M. Holland,

Capt, USCG Executive Secretary, Maine Safety Council.

BILLING CODE 4910–14–M

---

33 CFR Part 165

[Reg. 83–07]

COTP Hampton Roads, VA; Safety Zone Regulations; James River, Newport News, Virginia

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a safety zone in the James River, Newport News, Virginia. The zone is needed to protect watercraft from possible damage during the launching of the submarine USS OLYMPIA from Newport News Shipbuilding Shipway No. 6. Entry into this zone is prohibited unless authorized by the Captain of the Port.

EFFECTIVE DATE: This regulation becomes effective at 11:00 AM, Eastern Daylight Time, 30 April 1983. It terminates at 1:30 PM, Eastern Daylight Time, 30 April 1983.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander W. K. Six, Chief, Port Operations Department, Coast Guard Marine Safety Office, Hampton Roads, Norfolk, Virginia 23510, (804) 441–3296.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was not published for this regulation and it is being made effective in less than 30 days after **Federal Register** publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to safeguard watercraft and their occupants.

Drafting Information: The drafter of this regulation is Lieutenant Commander W. K. Six, project officer for the Captain of the Port.

Discussion of Regulation: To prevent possible damage to watercraft and possible injury to their occupants during the launching, no watercraft will be permitted to remain in, enter, moor in, anchor in, or transit this safety zone unless specifically authorized by the Captain of the Port, Hampton Roads, Virginia. U. S. Coast Guard patrol vessels will be on scene to enforce the safety zone monitoring VHF-FM channels 16 and 13. This action is necessary due to the hazards involved in moving a vessel the size of the USS OLYMPIA into a restricted waterway such as the James River. During the launching the USS OLYMPIA will be out of control until assisting tugs can secure the vessel. This rule is in response to a request by the Newport News Shipbuilding and Drydock Company for Coast Guard assistance in providing traffic control and vessel escorts for the launching of the USS OLYMPIA. This action is designed to prevent damage to watercraft and injury to their occupants in the event of collision with the USS OLYMPIA and will accomplish this end by preventing all such traffic from entering the safety zone.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Regulation: In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations, is amended by

adding a new § 165.T518 to read as follows:

§ 165.T518 Safety Zone: James River, Newport News, Virginia.

(a) *Location:* The waters and waterfront facilities located within the following boundaries constitute a safety zone: A line beginning at 36–58–48N Latitude, 76–26–26W Longitude, thence to 36–58–14N Latitude, 76–27–06W, Longitude, thence to 36–59–06N Latitude, 76–28–00W Longitude, thence to 36–59–12N Latitude, 76–26–39W Longitude, thence along the shoreline to the point of beginning. The safety zone will commence at 11:00 AM, Eastern Daylight Time, 30 April 1983 and terminates at 1:30 PM, Eastern Daylight Time, 30 April 1983.

(b) *Regulations:* (1) In accordance with the general regulations in 165.23 of this part, entry into this zone is prohibited unless authorized by the Captain of the Port.

(33 U.S.C. 1225 and 1231; 49 CFR 1.46; 33 CFR 165.3)

Dated: April 8, 1983.

D. C. O'Donovan,

Captain, U. S. Coast Guard, Captain of the Port, Hampton Roads, U.S. COAST GUARD.

BILLING CODE 4910–14–M

---

33 CFR Part 165

[Reg. 83–01]

COTP Wilmington, NC, Safety Zone Regulations; Approaches to Cape Fear River at Southport, North Carolina

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard is establishing a safety zone covering the area of Lockwood's Folly Inlet, North Carolina Explosive Anchorage (as defined in 33 CFR 110.170) and around U.S. Army LCU's transiting the Cape Fear River from Military Ocean Terminal Sunny Point south to Cape Fear River lighted bouy #3 thence in a straight line to the eastern most point of the Lockwood's Folly Inlet Explosive Anchorage. This zone is needed to protect watercraft from possible damage during the transiting operations of the U.S. Army LCU's. Entry into these zones is prohibited unless authorized by the Captain of the Port.

EFFECTIVE DATES: This regulation becomes effective at 0700, Eastern Daylight Savings Time, May 7, 1983. It terminates at 0700, Eastern Daylight Savings Time, May 13, 1983.

FOR FURTHER INFORMATION CONTACT: Lt K. C. Olds, Chief, Operations Department, U.S. Coast Guard Marine Safety Office, Suite 20, 201 N. Front St., Wilmington, North Carolina 28401, Phone: 919–343–4892.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was not published for this regulation and is being made effective in less than 30 days after **Federal Register** publication. Publishing a NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to prevent possible damage to the vessels involved.

Drafting Information: The drafters of this regulation are Lieutenant K. C. Olds, project officer, for the Captain of the Port and Commander D. J. Kanter, project attorney, Fifth Coast Guard District Legal Office.

Discussion of Regulations: The hazard requiring this regulation will begin at 0700, Eastern Daylight Savings Time, May 7, 1983. The restricted nature of the Cape Fear River, the carriage of hazardous cargo and the reduced amount of visibility and maneuverability of the loaded U.S. Army LCU's pose a threat to other watercraft in the area. This safety zone will only be in effect for U.S. Army LCU's transiting in a loaded condition from the Explosive Anchorage east to the Cape Fear River bouy #3 and thence north to Military Ocean Terminal Sunny Point. Waterborne traffic will be prohibited from entering or remaining in the safety zone when in effect without prior Captain of the Port approval.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

PART 165—[AMENDED]

In consideration of the foregoing, Part 165 of title 33, Code of Federal Regulations is amended by adding a new § 165.T501 to read as follows:

§ 165.T501 Safety Zone: Cape Fear River and approaches, Southport, North Carolina.

(a) *Location.* The following locations are safety zones: The Lockwood Folly Inlet, North Carolina Explosive Anchorage (as defined in 33 CFR 110.170). Circles with a radius of 500 yards with the U.S. Army LCU's as their center while transiting easterly from the Explosive Anchorage to Cape Fear River Bouy #3 thence north in the Cape Fear River to Military Ocean Terminal Sunny Point, Southport, North Carolina.

(b) *Regulations:* (1) In accordance with the General Regulations in § 165.23 of this part, entry into this zone is prohibited unless authorized by the Captain of the Port.

(33 U.S.C. 1225 and 1231; 49 CFR Part 146; 33 CFR 165.3)

Dated: April 18, 1983.

C. M. Holland,

Capt, USCG, Executive Secretary, Marine Safety Council.

Approval and Promulgation of Implementation Plans New Hampshire; PSD Permit Notice and Hearing Procedures

AGENCY: Environmental Protection Agency (EPA)

ACTION: Final rule.

SUMMARY: EPA is approving a State Implementation Plan (SIP) revision submitted by the State of New Hampshire. This revision will allow the State to carry out its Prevention of Significant Deterioration (PSD) program delegation in accordance with federal requirements.

DATES: This action will be effective June 20, 1983, unless notice is received on or before May 23, 1983, that adverse or critical comments will be submitted.

ADDRESSES: Comments may be mailed to Harley F. Laing, Director, Air Management Division, Room 2312, JFK Federal Building, Boston, MA 02203. Copies of the State submittal are available for public inspection during normal business hours at the Environmental Protection Agency, Room 2111, JFK Federal Building, Boston, MA 02203; Public Information Reference Unit, Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460; Office of the Federal Register, 1100 L Street, NW Room 8401, Washington, DC 20408 and the New Hampshire Air Resources Commission, Health and Welfare Building, Hazen Drive, Concord, NH 03301.

FOR FURTHER INFORMATION CONTACT: Miriam R. Fastag, State Air Programs Branch, Environmental Protection Agency, Region I, JFK Federal Building, Boston, MA 02203, (617) 223–5130.

SUPPLEMENTARY INFORMATION: On November 19, 1982, New Hampshire submitted a revision to its SIP. This revision specifies that the State shall

follow the federal permit notice and hearing procedures of 40 CFR 52.21 in processing new source permit applications subject to federal regulations governing PSD. The purpose of this revision is to comply with the condition in EPA's delegation of authority for implementing the PSD program to New Hampshire on March 18, 1982, that the State would follow the public notice and hearing procedures of the federal rules.

EPA is approving this revision without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. This action will be effective 60 days from the date of this **Federal Register** unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective (60 days from today).

Action

EPA is approving the revision to New Hampshire's permit notice and hearing procedures for permit applications subject to federal PSD requirements.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements (see section 307(b)(2)).

Pursuant to the provisions of the Regulatory Flexibility Act, I certify that this rule will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, and Hydrocarbons.

(Secs. 110(a) and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410(a) and 7601(a)))

Note.—Incorporation by reference of the State Implementation Plan for the State of New Hampshire was approved by the Director of the Federal Register on July 1, 1982.

Dated: April 12, 1983.

Lee L. Verstandig,

Acting Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart EE—New Hampshire

Section 52–1520 is amended by adding paragraph (c)(24) as follows:

§ 52.1520 Identification of plan.

* * * * *

(c) * * *

(24) A revision specifying the State will follow federal permit notice and hearing procedures for applications subject to PSD requirements was submitted by the Air Resources Commission on November 19, 1982.

40 CFR Part 86

[AMS-FRL 2279-8]

Revised Motor Vehicle Exhaust Emission Standards for Oxides of Nitrogen (NO_x) for 1981 Through 1984 Model Year Light-Duty Diesel Vehicles; Summary of Decision

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This amended regulation establishes interm oxides of nitrogen (NO_x) emission standards for 1984 model year light-duty vehicles belonging to three classes or categories of light-duty vehicles ("engine families") for which EPA has granted waivers from standards otherwise applicable under section 202(b)(6)(B) of the Clean Air Act, as amended ("Act"), 42 U.S.C. 7521(b)(6)(B). Specifically, this amendment applies to one new diesel engine family of American Motors Corporation ("AMC") and two new diesel engine families of Toyota Motor Corporation ("Toyota") which I have determined qualify under the statutory criteria for waivers of the NO_x standard for model year 1984. This action has the effect of setting interim NO_x standards at the most stringent level that will permit AMC and Toyota to market their diesel engine families in model year 1984.

EFFECTIVE DATE: May 23, 1983.

ADDRESSES: Information relevant to this rule, including the accompanying decision document, is contained in Public Docket EN–82–08 at the Central Docket Section of the Environmental Protection Agency, Gallery I, 401 M Street, SW., Washington, D.C. 20460, and is available for review between the hours of 8:00 a.m. and 4:00 p.m. As provided in 40 CFR Part 2, EPA may charge a reasonable fee for copying services. Interested parties may also obtain the decision document by contacting the Manufacturers Operations Division as indicated below.

FOR FURTHER INFORMATION CONTACT: Peter J. Murtha, Attorney/Adviser, Manufacturers Operations Division (EN–340), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 382–2521.

SUPPLEMENTARY INFORMATION: Section 202(b)(1)(B) of the Act requires that light-duty vehicles or engines manufactured during or after the 1981 model year shall be subject to regulations containing standards limiting NO_x emissions from such vehicles or engines to no more than 1.0 grams per vehicles mile (g/mi).

Section 202(b)(6)(B) of the Act authorizes the Administrator, upon application by any manufacturer, to waive the statutory NO_x standard for the 1981 through 1984 model years for any light-duty diesel engine families for which the Administrator can make the required statutory finding. I am required to promulgate interim NO_x standards applicable to the subject engine families for those model years for which I have granted waivers.

AMC and Toyota have each submitted a waiver application for their new diesel engine families for model year 1984. My decision to grant the waiver applications is based on the statutory criteria and my determinations about the engine families covered by the applications. My reasoning is explained in detailed in a decision document which may be obtained as noted above.

In that decision document, I granted waivers covering AMC's 1.6 liter (L) new diesel engine family and Toyota's 1.8l. new naturally aspirated and turbocharged diesel engine families for the 1984 model year. AMC and Toyota each demonstrated, and I concluded, that these waivers are necessary to permit the use of diesel technology because there is a substantial risk that these new engine families would not be able to meet the NO_x emission standard during the waiver period without encountering significant engine durability and performance problems as well as increased particulate and hydrocarbon emissions.

Moreover, granting these waivers for these engine families will not endanger

public health, because there will not be a significant increase in ambient NO_x levels. In fact, denying these waivers could result in the production of diesel vehicles emitting more particulate matter. Finally, AMC and Toyota have demonstrated that these engine families have met the fuel economy and long-term air quality benefit criteria for receiving waivers.

Having decided to grant these waiver applications, I am simultaneously promulgating regulations adopting emission standards prohibiting NO_x emissions from 1984 model year vehicles of these engine families from exceeding 1.5 g/mi. EPA has afforded interested parties an opportunity to comment on the waiver applications and to participate in a public hearing to consider these requests. No testimony or comments were received. For these reasons, I find that providing notice and an opportunity to comment on this rulemaking before final promulgation is unnecessary. *See* 5 U.S.C. 553(b).

Note.—The Office of Management and Budget (OMB) has exempted this action from the requirements of sections 3 and 7 of Executive Order 12291.

Under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, EPA is required to determine whether a regulation will have a significant economic impact on a substantial number of small entities so as to require a regulatory flexibility analysis. The interim NO_x standards established by this rulemaking apply to AMC and Toyota only, which are not "small entities" under the Regulatory Flexibility Act. Therefore, pursuant to 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities.

These amendments are issued pursuant to sections 202 and 301(a) of the Clean Air Act, as amended, 42 U.S.C. 7521 and 7601(a).

List of Subjects in 40 CFR Part 86

Administrative practice and procedure, Labeling, Motor vehicle pollution, Reporting and recordkeeping requirements.

Dated: April 15, 1983.

Lee Verstandig,

Acting Administrator.

PART 86—[AMENDED]

For the reasons set forth above, 40 CFR 86.082–8(a)(1)(iii) is revised to read as follows:

§ 86.082–8 Emissions standards for 1982 and later model year light-duty vehicles.

(a)(1) * * *

(ii) * * *

(iii) Oxides of nitrogen—1.0 grams per vehicle mile, except that: (A) Oxides of nitrogen emissions from 1982 model year light-duty vehicles manufactured by American Motors Corporation shall not exceed 2.0 grams per vehicle mile; (B) oxides of nitrogen emissions from light-duty diesel vehicles of the following 1982 and later model year engine families shall not exceed the prescribed levels:

BILLING CODE 6560–50–M

DEPARTMENT OF AGRICULTURE

Office of the Secretary

41 CFR Part 4–1

Amendment of Agriculture Procurement Regulations

AGENCY: Office of Operations, USDA.

ACTION: Final rule.

SUMMARY: This rule amends the Agriculture Procurement Regulations by revising the section covering debarment, suspension and the resulting ineligibility of government contractors. It implements the new govermentwide debarment regulations issued by the Office of Federal Procurement Policy. The intent of this amendment is to establish responsibilities, authorities, and procedures to conduct debarment and suspension activity for the purpose of ensuring that contracts are awarded to responsible contractors.

EFFECTIVE DATE: April 21, 1983.

FOR FURTHER INFORMATION CONTACT: Douglas L. Metzger, Office of Operations, United States Department of Agriculture, Washington, D.C. 20250, (202) 447–5729.

SUPPLEMENTARY INFORMATION: This amendment to the Agriculture Procurement Regulations implements the new governmentwide debarment and suspension regulations contained in FPR Temporary Regulation 65 (47 FR 43692, October 4, 1982). The basis for the temporary regulation is Office of Federal Procurement Policy (OFPP) Policy Letter 82–1 which was issued on June 24, 1982, (47 FR 28854, July 1, 1982).

These regulations are prescribed for contracts involving personal property (including agricultural commodities), leases of real property, and nonpersonal services, including construction. While these regulations are applicable only to procurement transactions governed by the Federal Procurement Regulations, they may be adopted by any agency within the Department having the authority to conduct debarment and suspension actions relating to their programs, including the Commodity Credit Corporation.

This rule relates to agency contracting. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect thereto are impracticable and contrary to the public interest, and good cause is found for making this rule effective less than 30 days after publication in the **Federal Register.** Furthermore, rules relating to agency contracting have been exempted from

the provisions of Executive Order 12291. Lastly, this action is not a rule as defined in Pub. L. 96–354, the Regulatory Flexibility Act, thus, it is exempt from the provisions of that Act.

Lists of Subjects in 41 CFR Part 4–1

Government procurement and administration practices and procedures. Accordingly, Part 4–1, Title 41, Code of Federal Regulations, is amended as follows:

1. The authority citation for Part 4–1 reads as follows:

Authority: 5 U.S.C. 301, 40 U.S.C. 486(c).

PART 4–1—GENERAL

2. The Table of Contents for Subpart 4–1.6 is revised to read as follows:

Subpart 4–1.6—Debarment, Suspension, and Ineligibility

4–1.600 Scope of subpart.
4–1.603 Establishment and maintenance of a list of debarred, suspended, and ineligible contractors and agency records.
4–1.603–1 Consolidated list of debarred, suspended, and ineligible contractors.
4–1.604 Treatment to be accorded listed contractors.
4–1.604–1 General.
4–1.604–3 Continuation of current contracts.
4–1.605 Debarment.
4–1.605–3 Procedures.
4–1.606 Suspension.
4–1.606–3 Procedures.
4–1.650 Appeals.

3. Subpart 4–1.6 is revised to read as follows:

Subpart 4–1.6—Debarment, Suspension, and Ineligibility

§ 4–1.600 Scope of subpart.

(a) This subpart implements and supplements Subpart 1–1.6 of this title by prescribing policies and procedures related to debarment and suspension of contractors under contracts involving personal property (including agricultural commodities), leases of real property, and nonpersonal services, including construction. The policies and procedures in this subpart and Subpart 1–1.6 of this title are not prescribed for sales contracting, however, agencies involved in such activity may wish to adopt these regulations.

(b) Pursuant to the Secretary's delegations of authority in 7 CFR 2.25 and 2.75, the Director, Office of Operations, has been designated as the Department Debarring Officer. The Department Debarring Officer serves as the debarring official as defined in § 1–1.602(h) of this title and is authorized to perform the functions of this subpart and Subpart 1–1.6 of this title. The Department Debarring Officer has delegated debarring authority to the Agricultural Marketing Service for contracts under the School Lunch and Surplus Removal Programs (42 U.S.C. 1755 and 7 U.S.C. 612c).

§ 4–1.603 Establishment and maintenance of a list of debarred, suspended, and ineligible contractors and agency records.

§ 4–1.603–1 Consolidated list of debarred, suspended, and ineligible contractors.

The Department Debarring Officer shall be the Department's single point of contact with GSA for debarment and suspension actions taken under this subpart. The debarring officer in the Agricultural Marketing Service shall notify the Department Debarring Officer of each debarment and suspension action by promptly submitting a copy of the debarment or suspension notice and any later changes to the debarment or suspension status. The Department Debarring Officer will forward a copy of the notice to GSA for inclusion in the governmentwide consolidated list.

§ 4–1.604 Treatment to be accorded listed contractors.

§ 4–1.604–1 General.

Contracting officers shall not knowingly solicit offers or bids from, award contracts to, review or otherwise extend the duration of an existing contract with, or consent to a subcontract with any contractor currently listed on the consolidated list, unless there is a compelling reason for such action. Compelling reasons are considered to be present where failure to contract with the debarred or suspended contractor would seriously harm the agency's programs and prevent them from accomplishing their mission requirements. Such an action must be fully justified, and a written determination made by the appropriate agency head of the procuring agency or authorized designee.

§ 4–1.604–3 Continuation of current contracts.

Determinations to terminate a contract under § 1–1.604–3 of this title shall be made by the appropriate agency head of the procuring agency or authorized designee.

§ 4–1.605 Debarment.

§ 4–1.605–3 Procedures.

Whenever a contracting officer becomes aware of possible irregularities or any information which may be sufficient cause for debarment, the case should be immediately referred through agency channels to the appropriate debarring official. The case must be accompanied by a complete statement of the facts (including a copy of any criminal indictments, if applicable) along with a recommendation for action. Where the statement of facts indicates the irregularities to be possible criminal offenses, or for any other reason further investigation is considered necessary, debarring officials should request the Office of Inspector General to assume the investigation. The Office of Inspector General shall advise the debarring official of its findings.

§ 4–1.606 Suspension.

§ 4–1.606–3 Procedures.

Whenever a contracting officer becomes aware of possible irregularities or any information which may be sufficient cause for suspension, the case should be immediately referred through agency channels to the appropriate debarring official. The case must be accompanied by a complete statement of the facts along with a recommendation for action. Where the statement of facts indicates the irregularities to be possible criminal offenses, or for any other reason further investigation is considered necessary, the debarring official shall request the Office of Inspector General to assume the investigation. The Office of Inspector General shall advise the debarring official of its findings.

§ 4–1.650 Appeals.

Decisions of the debarring officer may be appealed by mailing or otherwise furnishing a written notice within 90 days from the date of the decision to the U.S. Department of Agriculture Board of Contract Appeals, Washington, D.C. 20250. A copy of the notice of appeal shall be furnished to the debarring officer from whose decision the appeal is taken. Appeals under this Subpart, 4–1.6 of this title, shall be governed by the rules and procedures of the U.S. Department of Agriculture Board of Contract Appeals set forth in 7 CFR Part 24.

Authority: This amendment is made under the authority of 5 U.S.C. 301, 40 U.S.C. 486(c).

Done at Washington, DC, this 18th day of April, 1983.

Frank Gearde, Jr.,

Director, Office of Operations.

BILLING CODE 3410–98–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Public Land Order 6374

[CA-13275]

California; Partial and Total Revocation of Executive Orders

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially and totally revokes two Executive orders which reserved 34.75 acres of public land for lighthouse purposes for use by the U.S. Coast Guard. The lands are included in a pending Recreation and Public Purposes Application and therefore remain closed to operation of the public land laws and mining. The lands will be opened to mineral leasing.

EFFECTIVE DATE: April 21, 1983.

FOR FURTHER INFORMATION CONTACT: Marie M. Getsman, California State Office, 916-484-4431.

By virtue of the authority contained in Section 204(a) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714; it is ordered as follows:

1. Executive Orders of June 8, 1866, and September 10, 1902, which reserved public lands for use of the U.S. Coast Guard, Department of Commerce, for lighthouse purposes are hereby revoked so far as they affect the following described lands:

Humboldt Meridian

Lot 37, Section 26, Township 8 North, Range 1 West, Humboldt Meridian. Humboldt County, California, containing 42.79 acres.

Excluding the following described parcels as shown on that certain Record of Survey prepared by Hansa Engineering Corporation at the request of the Commander, Twelfth Coast Guard District and filed September 29, 1976, at Book 33 of Surveys at Page 46, Humboldt County Records:

Parcel 1

Beginning at Point P.I.C; thence S 52°23'40" E 87.62 feet to point P.I.D; thence East 850 feet more or less to the mean high tide line of the Pacific Ocean; thence southwesterly and northwesterly along said tide line to a point which is S 32°08'56" W from the Point of Beginning; thence 275 feet more or less to the Point of Beginning; containing 7.1 acres more or less.

Parcel 2

Beginning at Point P.I.F.; thence N 19°37'45" E 216.20 feet to Point P.I.G; thence S 71°12'24" E 185.38 feet to Point P.I.H.; S 18°44'56" W 215.79 feet to Point P.I.I.; thence N 71°19'31" W 188.70 feet to the Point of Beginning; containing 0.94 acres more or less.

The area described aggregates approximately 34.75 acres in Humboldt County.

2. The surface estate of these lands has been classified suitable for disposal to the City of Trinidad under the Recreation and Public Purposes Act of June 14, 1926, as amended, 43 U.S.C. 869; therefore, unless and until appropriate rules and regulations are issued, the lands will not be open to location under the United States mining laws.

3. These lands shall immediately be made available for issuance of patent under the Recreation and Public Purposes Act to the City of Trinidad, California.

4. At 10 a.m., on May 20, 1983, the lands will be open to applications and offers under the mineral leasing laws.

Inquiries concerning these lands should be addressed to the Bureau of Land Management, Room E-2841, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

Dated: April 14, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 74

[BC Docket No. 81-794; RM-3893; FCC 83-153]

Experimental, Auxiliary and Special Broadcast and Other Program Distributional Services; Rules To Permit Shared Use of Broadcast Auxiliary Facilities With Other Broadcast and Non-Broadcast Entities and To Establish New Licensing Policies for Television Broadcast Auxiliary Stations

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action amends several rules in Part 74, Subpart F of the Commission's Rules relating to the operation of televison broadcast auxiliary stations. Specifically, the rules are amended to permit shared use of auxiliary facilities with other broadcast licensees and non-licensees. Broadcasters choosing to share their facilities will be permitted to do so for a profit. Several changes in licensing policy are also made, including the elimination of exclusive channel assignments, the elimination of the limit on the number of channels any one licensee can use, and the establishment of a use priority system for resolving interference disputes. These actions are taken to promote the more efficient and cost-effective use of the increasingly crowded electromagnetic spectrum.

EFFECTIVE DATE: May 23, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Michael A. McGregor, Mass Media Bureau, (202) 632-7792.

List of Subjects in 47 CFR Part 74

Television auxiliary broadcast.

Report and Order (Proceeding Terminated)

In the matter of an amendment of Part 74, Subpart F of the Commission's Rules to Permit Shared Use of Broadcast Auxiliary Facilities with Other Broadcast and Non-broadcast Entities and to Establish New Licensing Policies for Television Broadcast Auxiliary Stations; BC Docket No. 81-794, RM-3893.

Adopted: April 7, 1983.

Released: April 15, 1983.

By the Commission: Commissioner Fogarty absent; Commissioner Rivera concurring and issuing a statement.

I. Introduction

1. Before the Commission is a *Notice of Proposed Rule Making*, 46 FR 60024 (1981), in which we solicited comment on a number of proposed amendments to Part 74, Subpart F of our Rules dealing with television broadcast auxiliary stations. The *Notice* was divided into three major sections. The first section, prompted by a petition for rule making filed by the Public Broadcasting Service and a request for waiver submitted by Westinghouse Broadcasting Company, proposed to amend the auxiliary station rules to permit licensees to share their facilities with other entities. The second section proposed to expand the permissible uses of multiplexed audio signals transmitted on broadcast auxiliary stations. The third section of the *Notice* proposed various changes in our auxiliary station licensing policies. We concluded that the proposed amendments, if adopted, would represent a substantial deregulation of the television broadcast auxiliary service.

2. A total of 23 comments representing 42 parties was received. Four parties filed reply comments. A list of those parties submitting comments is included as Appendix C.[1] Not all parties

[1] The text of the rules amended as a result of this proceeding is included as Appendix A. Appendix B contains amendments to FCC Form 313, the application form for auxiliary stations.

addressed every proposal set forth in the *Notice*. Rather than presenting an initial detailed comment summary, we will summarize the comments pertaining to each issue as we address that issue in this *Report and Order*.

II. The PBS and Westinghouse Proposals To Permit Shared Use of Television Auxiliary Facilities

3. *Channel Sharing—The Proposal.* Current Commission rules provide that television auxiliary stations are intended primarily for the transmission of program material to be broadcast by television stations owned by or under common control of the licensee of the auxiliary station. When the material transmitted is so used by the licensee, the programming also may be broadcast by any other television station. With limited exceptions, additional uses of auxiliary stations are forbidden. In the *Notice*, we proposed to broaden significantly the permissible use of broadcast auxiliary facilities yet retain the primary broadcast-related purpose of the service. Under the proposed rule, licensees of television auxiliary stations would be permitted to transmit any material—broadcast or non-broadcast—to any other entity whenever the auxiliary station is not being used to feed the licensee's broadcast station. The proposed rule contained no limitations on the amount of time that a facility could be used for alternative purposes. We sought comment on whether such unrestricted shared use ultimately might subvert the nature of the broadcast auxiliary service.

4. *The Comments.* The proposal to permit shared use of auxiliary facilities resulted in nearly unanimous support from the commenters. Of the parties commenting on this issue, only NBC asserts that auxiliary frequencies should be reserved exclusively for broadcast use. The commenters generally express the opinion that permitting shared use of existing facilities would promote the more efficient use of the spectrum and would obviate the need to construct costly parallel facilities. Because some auxiliary stations are used to transmit material to and from satellite earth facilities, Group W states that unlimited shared use will help develop a nationwide domestic satellite network and promote competitive sources of television programming. Educational broadcasters in particular express strong support for the time-sharing proposal. A group of noncommercial licensees filing jointly ("noncommercial licensees") states that by permitting the collection of additional revenues, the proposed amendments could aid in the formation of new statewide educational television networks and the strengthening of existing networks. PBS adds that facility sharing will further Congressional objectives by allowing public broadcasters to enhance their revenue-generating activities.

5. NBC, however, claims that the proposals will have an adverse effect on already crowded microwave frequencies in larger urban areas. NBC opines that where excess capacity is exhausted or unavailable, intense demand for additional spectrum could siphon frequencies from their primary intended use. According to NBC, the time-sharing proposals could exacerbate congestion in many markets to the point where use of frequencies for broadcast purposes may become impossible "* * * such as when a news emergency creates peak load pressure." If non-broadcast use of auxiliary facilities is allowed, NBC urges that the Commission take necessary precautions to preserve the essential character of the service.

6. Although arguing in favor of shared use arrangements, many commenters express some concern that excessive shared use may subvert the primary function of the broadcast auxiliary service. The Commission expressed similar concerns in the *Notice* and asked for suggestions on how to prevent misuse of auxiliary frequencies. We specifically sought comment on whether a particular limitation should be placed on alternate uses of facilities, such as a 50 percent limit on the total time that a facility could be used for non-broadcast purposes. Cox, Fetzer, and Multimedia, filing jointly ("Cox"), support a 50 percent use limitation. They contend that such a limit represents the minimum protection necessary to prevent a *de facto* reallocation of frequencies. They also assert that a limitation would deter broadcasters from acquiring "or even stockpiling" auxiliary licenses. Cox would enforce the 50 percent limitation by adding a "yes/no" box to the broadcast renewal form asking whether a licensee had complied with the policy. NAB supports a 50 percent limitation on the secondary use of mobile stations licensed in the broadcast auxiliary service. NAB claims that without some limit, unused mobile facilities might be turned into *de facto* fixed links used exclusively for non-broadcast purposes. NAB states that such exclusive non-broadcast use might create prolonged interference. NBC suggests that, if non-broadcast use of auxiliary stations is permitted, television pickup facilities should be restricted to broadcast use between the hours of 3:00 p.m. and 7:00 p.m. According to NBC, such a restriction would ensure the legitimate broadcast use of the service during peak news periods.

7. The other parties specifically addressing this issue argue against the adoption of any percentage limitations. The limitations are opposed as preventing the maximum efficient use of the spectrum. It is asserted that such artifical limitations would encourage wasteful construction of parallel facilities or force the use of high-cost alternatives that would prevent experimentation and the development of specialized uses. Group W states that essential broadcast demands will ensure the integrity of the service. According to Group W, basic broadcast needs and growing scarcity will ensure that only truly excess capacity is utilized for non-broadcast purposes. The commenters representing noncommercial broadcasting interests argue most strenuously against any limitations. According to PBS, about one-half of all public stations use broadcast auxiliary stations to receive regional and national programming. Frequently, these stations are used less than nine hours per day. A 50 percent limitation would limit further use of the facilities for non-broadcast purposes to only 12 of the remaining 15 hours per day. The Ohio Educational Bradcasting Network Commission states that a 50 percent limitation on the use of auxiliary stations "* * * creates burdensome responsibilities on broadcasters in terms of record keeping and reporting without so much as a scintilla of evidence that there is any corresponding public benefit." In reply comments, PBS rebuts NAB's concerns about misuse of mobile facilities as a largely conjectural problem that should be dealt with on an *ad hoc* basis. PBS suggests that such a limitation would not reduce interference unless the total number of pick-up authorizations is reduced.

8. Several commenters indicate that concern over the misuse of broadcast auxiliary facilities could be addressed best through the licensing process. Bonneville International states that broadcasters must be prevented from obtaining auxiliary licenses for the sole purpose of transmitting non-licensee or non-broadcast materials. NAB adds that new authorizations should be granted only to those broadcasters needing a facility for broadcast-related uses. PBS agrees and would require all applicants for new facilities to demonstrate a legitimate broadcast need for the facility. The noncommercial licensees suggest that renewal applicants should be required to show that only excess capacity was leased.

9. *Discussion.* After careful review of the comments, we believe that broadcasters should be given the widest possible latitude in the use of excess capacity on license broadcast auxiliary facilities. We will therefore permit broadcasters to share their facilities with any other entity for the transmission of any material, broadcast or non-broadcast.[2] These measures are intended to promote the more efficient use of the increasingly crowded electromagnetic spectrum. Allowing such shared use, without limitation, should prevent any necessity to construct costly parallel facilities where existing facilities can handle an increased load. These measures also will make the construction of new facilities more cost-effective because the expenses incurred to build and operate new facilities can be partially recouped through shared use.[3]

10. In order to take the fullest advantage of the spectrum efficiencies that shared use will provide, and to afford broadcast licensees maximum flexibility in offering excess capacity to other entities, we will adopt no time limitations on the shared use of television auxiliary facilities. So long as a licensee utilizes its auxiliary stations primarily for legitimate and essential broadcast use, we see no reason to restrict the licensee's station-sharing activities. Forcing auxiliary stations to remain idle when legitimate demands for frequencies exist is precisely the situation that we are attempting to avoid. In the context of this proceeding, we believe shared use limitations would be inefficient and counterproductive to the attainment of our objectives.

11. We have also decided to delete from proposed § 74.631(f) the restriction limiting alternative uses to times when the station is not being used to transmit program material to its associated broadcast station. Technology is available that allows the simultaneous transmission of two video channels on one microwave link. Thus, one channel could feed the licensee's associated broadcast station while the second could be used for alternative purposes. The above-noted restriction, however, would preclude such simultaneous transmissions. We wish to encourage the development of these spectrum-efficient technologies, and the deletion of the proposed restriction clearly facilitates this policy.[4]

12. As indicated in the comment summary, several parties suggest that use limitations are necessary to preserve the primary purpose and continued utility of the television auxiliary service. Although we share some of the concerns voiced by the proponents of such limitations, we believe other, less obtrusive, means should be implemented to assure that the primary function of the service is maintained. To this end we are establishing several safeguards designed to ensure the integrity of the auxiliary service. First and foremost, we will not change our policy of granting broadcast auxiliary authorizations only to licensed television broadcasters. Thus, we will not allow non-broadcast entities to receive licenses in the television auxiliary service.[5] As a result, the television broadcast industry itself will retain complete control over, and responsibility for, the proper use of television auxiliary facilities. Individual television licensees will specify the conditions under which they will share their equipment. If use of a licensee's equipment by another party causes harmful interference, it is the responsibility of the sharing licensee to correct the problem expeditiously. The Commission will hold the broadcast licensee responsible for any interference or misuse of the facilities that occurs during operation by the non-licensed user. We fully expect that television licensees will take these responsibilities seriously since the willful or repeated misuse of auxiliary facilities would certainly impact upon a licensee's qualifications to hold a broadcast authorization.

13. Second, it is important to keep in mind the fact that we are authorizing only the shared use of an existing station's excess capacity. We will not grant new authorizations to licensees seeking only to provide secondary service. Also, we will not permit licensees to obtain additional authorizations in order to divide their primary transmissions between two or more facilities, thereby generating additional excess capacity. Such activity would not only tend to subvert the primary function of the broadcast auxiliary service, but it would also negate much of the spectrum efficiency we are seeking to promote. As suggested by several commenters, oversight of these licensing restrictions will be accomplished by the addition of three questions to the broadcast auxiliary station application, FCC Form 313. The first new question will request a brief statement regarding the primary purpose of the requested auxiliary link. The second question will seek information on the amount of sharing that the applicant anticipates for the new link. Third, we will ask the applicant to tell us the number of auxiliary authorizations already held and the approximate amount of time that these existing stations are being used by other entities. We readily admit that in most instances we are hesitant to add new reporting requirements. However, these new requirements represent a miniscule burden on the licensee while allowing the Commission to implement its important new facility-sharing policies.

14. We also wish to make it clear that the non-broadcast uses authorized in this proceeding are strictly secondary to the primary function of the broadcast auxiliary service. To emphasize this point, we are making two additions to the rules as proposed in the *Notice*. First, we are adding a "non-broadcast use" category to the newly established set of priorities found in § 74.604(c). This addition makes it clear that for the purpose of interference protection, any facility being used for non-broadcast purposes must give way to other facilities being used for *bona fide* transmissions to a licensee's associated broadcast station.[6] Second, we are adding language to new § 74.631(f) that obligates licensees to coordinate their channel sharing activities with other broadcast licensees in the area. This requirement is similar to the provisions recently adopted in BC Docket 81-497, in which we authorized broadcasters to utilize auxiliary frequencies for up to 30 days per year without notifying the Commission.[7] With respect to fixed link

---

[2] Facility sharing will not be permitted on the four Band B channels between 6.425 MHz and 6.525 MHz that were recently allocated to the Broadcast Auxiliary Service on a secondary basis. *Amendment of Part 2 of the Commission's Rules Governing Frequency Allocations*, 50 RR 2d 1106 (1982). The 6.425 MHz—6.525 MHz band is still allocated primarily to the Local Television Transmission Service, and it would be inappropriate to allow broadcast licensees to share those frequencies to which they have only secondary rights.

[3] In the Notice, we solicited comments concerning the degree to which the instant proposal could satisfy several requests for additional spectrum for aural broadcast STL and intercity relay stations. Although no comment was received in this issue, we encourage aural broadcasters, wherever possible, to use channels that may become available as a result of our action in this docket.

[4] At their current state of development, these channel compression techniques decrease picture quality somewhat. Although we doubt that such operations will become widespread due to this decrease in quality, in particular situations a licensee may deem the quality loss acceptable. So long as the use of these techniques does not interfere with the licensee's primary broadcast-related transmissions or other licensee's uses of the spectrum, we see no reason to prohibit the utilization of these new technologies.

[5] See also paragraph 30, *infra*.

[6] The priority system established in this *Report and Order* is discussed in detail in Section IV, *infra*.

[7] *Amendment of Part 74 of the Commission's Rules to Provide for Short-Term Operation Without Prior Approval*, 50 RR 2d 1492 (1982); § 74.24.

services, this notification process should not pose any particular hardship on the licensee. The obligation to notify other area licensees is most crucial with respect to the shared use of mobile facilities, which have a greater potential for causing interference. We believe this process is more desirable than the restrictions on the use of mobile facilities urged by NAB and NBC. No absolute restrictions are placed on mobile facility sharing, but licensees offering excess capacity for shared use have an affirmative responsibility to inform other licensees of proposed uses. This should enable all area licensees to coordinate the use of their auxiliary facilities in order to prevent interference and disruption of service.[8]

15. The flexible facility-sharing activities that we are authorizing herein represent a significant deregulation of the broadcast auxiliary service. However, with this increased freedom comes increased responsibility. Licensees choosing to share their facilities must be willing to accept that responsibility and conduct their channel sharing affairs accordingly. Certainly we will not hesitate to revisit our actions if it appears that licensees are misusing their auxiliary facilities to the detriment of the broadcast auxiliary service.

16. *Profit Making vs. Nonprofit Sharing of Facilities—The Proposal.* At paragraph 10 of the *Notice*, we solicited comment on whether licensees should be able to sell their excess capacity to other entities for a profit or instead be limited to nonprofit, cost-sharing arrangements. We noted our concern that licensees operating on a for-profit basis may take on certain characteristics of communications common carriers, but that broadcast licensees had traditionally not been subject to common carrier regulation under Title II of the Communications Act. Before deciding this issue, we noted that "* * * a record should be developed that adequately addresses all the relevant legal and policy ramifications and associated common carrier implications * * *" of the proposal to sell excess capacity for a profit.

17. *The Comments.* With one exception, all parties commenting on this issue urge that licensees be free to make a profit on their shared use of broadcast auxiliary facilities.[9] As a matter of policy, Cox contends that allowing licensees to charge for their excess time is consistent with a marketplace approach. Cox also asserts that profit making will allow greater licensee flexibility while creating more incentives for efficiency, innovation and experimentation. The Christian Broadcasting Network states that in addition to encouraging new links and program services, permitting profit making will avoid economic distortions that might develop if cost-sharing were mandated. According to CBN, cost sharing may result in overdemand for broadcast auxiliary facilities. PBS adds that there is no compelling regulatory interest to justify a prohibition on profit making so long as auxiliary facilities are used and obtained primarily for broadcast purposes. Group W contends that the line between cost sharing and profit making is sufficiently blurred to preclude restrictions on profit making. Group W avers that the differences between costs saved and dollars earned are more semantic than real. According to Group W, the record keeping and accounting burdens on licensees plus the policing burden on the FCC are further reasons not to adopt the cost-sharing option. The noncommercial licensees filing jointly aver that making a profit on the sale of excess capacity is essential. They contend that the measure will provide sorely needed revenues at a time of diminishing federal support for noncommercial stations. Several other noncommercial entities suggest that the profit-making option is consistent with Commission attempts to promote the financial self-sufficiency of public broadcasters and is just what Congress had in mind when it passed Section 399B of the Communications Act which permits public broadcasters to engage in the offering of services for remuneration. The Ohio Educational Broadcasting Network Commission states that auxiliary facilities should join earth stations, studios, towers, and remote equipment among the facilities available for resale.

18. *Discussion.* We are of the opinion that broadcast licensees should be permitted to offer the excess capacity of their auxiliary facilities to others on a for-profit basis. Several factors lead us to this conclusion. First, it clearly reflects the intent of Congress in its recent decision to permit noncommercial broadcast stations to offer their facilities to others for remuneration.[10] The noncommercial broadcasters commenting on this issue indicate that the additional revenues gained through offering their auxiliary stations to others may prove crucial in their efforts to overcome reduced federal funding. By allowing profit making, we are continuing our efforts to develop a regulatory environment that permits public broadcasters to make the most efficient use of their facilities and thereby supplement their revenues in the face of dwindling federal financial support.

19. The argument of Group W, that the distinction between dollars earned and costs saved is often more semantic than real, also supports our decision. Group W intends to transmit a programming package to various buyers across the country via its interconnected auxiliary station/satellite earth station network. Consumers will be purchasing a delivered finished product. It makes little sense to require Group W, for example, to charge for the distribution of the package on a cost-sharing basis when the company can then charge a higher price for the programming component. The total price to the buyer would remain the same. Because it would be nearly impossible to allocate monies consistently to one function or the other, establishing a cost-sharing scheme for the distribution segment of such a service would be meaningless at best and possibly counterproductive due to increased administrative costs.

20. Finally, we do not anticipate that profit making will impede the proper functioning of the broadcast auxiliary service. Any broadcasters who may be tempted to subordinate the public interest to their own private pecuniary interests run the risk of jeopardizing their standing as licensees. Also, our resolve not to permit new authorizations for secondary uses forecloses the possibility of licensees seeking additional facilities solely to engage in profit making channel sharing activities. In short, profit making offers potential

---

[8] We also note that, although available to broadcasters only on a secondary basis, licensees may utilize the spectrum between 6.425 MHz and 6.525 MHz solely for television broadcast operations. Of course, use of those channels must be cleared first with the local LTTS operator. See n. 2, *supra*.

[9] The California State Communications Division was the only commenter supporting nonprofit, cost-sharing use of auxiliary facilities. The Division, however, offered no reasons for its position. Bonneville International, while having no fundamental objection to profit making in this context, believes that guidelines should be established to prevent broadcasters from subverting public interest programming considerations to profit-making objectives. Bonneville, however, offered no suggestions as to the content of any such guidelines.

[10] Omnibus Budget Reconciliation Act of 1981, section 1231, 47 U.S.C. 399B(b)(1). The Act further requires that such an offering "shall not interfere with the provision of public television services." Because we are enacting several safeguards to prevent the misuse of auxiliary frequencies, we do not believe that permitting channel sharing will in any way interfere with the provision of public television services.

benefits to all licensees—particularly noncommercial broadcasters—without, we believe, adversely affecting the auxiliary service.

21. *Common Carrier Regulation—The Comments.* With nearly unanimous agreement, the commenters contend that offering broadcast facilities on a for-profit basis does not require the Commission to engage in common carrier regulation of such activity.[11] The parties claim that licensees will be highly selective in allowing use of auxiliary facilities by others so as not to disturb the facilities' principal broadcast use. Licensees must retain control of their facilities in order to make them available for essential broadcast purposes. Therefore, licensees will not hold out their facilities indiscriminately on a first come, first serve basis, but will make individualized decisions for each potential user. The parties argue that, under the rationale of *National Association of Regulatory Utility Commissioners* v. *FCC*, 525 F. 2d 630 (D.C. Cir. 1976), *cert. denied*, 425 U.S. 992 (1976) (*"NARUC I"*), entities that make individualized decisions whether and on what terms to deal are not common carriers subject to Title II regulations.

22. Individual commenters make several other arguments against the imposition of common carrier status. According to the Florida Public Broadcasting Service ("FPBS"), the intent of the Omnibus Budget Reconciliation Act and the Public Telecommunications Financing Act is to allow public stations to hold out facilities for hire without incurring common carrier status. FPBS also states that selling excess capacity on satellite earth stations is not a common carrier activity, and that selling excess capacity on broadcast auxiliary stations should be accorded similar treatment. Finally, Christian Broadcasting Network and Fisher suggest that any instances of common carrier activity arising from the sale of broadcast auxiliary capacity would be infrequent. Fisher adds that there is no danger of monopoly pricing practices because there will be an abundance of competition. CBN and Fisher conclude that if common carrier activity becomes substantial, the Commission can revisit the area and take appropriate action at that time.

23. *Discussion.* As most of the commenting parties stressed, the District of Columbia Circuit Court of Appeals in *NARUC I* specifically stated that a carrier will not be a common carrier where its pratice is to make individualized decisions, in particular cases, whether and on what terms to deal. 525 F. 2d at 641. The Court noted that a common carrier need not serve the whole public, and private carriers may serve a significant clientele. The Court then proceeded:

> Since given private and common carriers may therefore be indistinguishable in terms of the clientele actually served, it is difficult to envision a sensible line between them which does not turn on the manner and terms by which they approach and deal with their customers. *Id.* at 642.

The Court then stated that in determining whether a particular carrier should be accorded common carrier status, a finding must be made as to whether any legal compulsion to serve indifferently exists, or whether there are resons implicit in the nature of the operation to expect an indifferent holding out.

24. Clearly there exists no legal compulsion for licensees to offer their facilities in an indifferent manner. Such a requirement would be directly contrary to the primary broadcast-related purpose of the broadcast auxiliary service, which is intended to serve the program distribution needs of the television industry. Thus, we can not discern, nor would we establish, any legal requirement that broadcast licensees offer their broadcast auxiliary facilities on an indifferent basis.

25. With respect to the second test for classifying common carriers, whether there are reasons implicit in the nature of the operation to expect an indifferent holding out, we believe that such holding out is unlikely to occur. The demands of the licensee's broadcast transmission needs should preclude a general and indifferent holding out to all potential users. We suspect, and the commenters on this issue state, that licensees will negotiate with and select users on a highly selective basis due to licensees' own demands for the facilities. Because licensees must retain complete control of their facilities to ensure the integrity of their broadcast services, it does not appear that they will be in a position to offer indifferently their facilities to other users.[12] Moreover, with respect to the distribution services envisioned by Group W and PBS, it appears that they would be marketed on the basis of long-term syndication contracts with potential buyers. Both of these factors—the individualized selection of clients and the establishment of service through long-term contracts—were factors thought by the Court in *NARUC I* to be inconsistent with common carrier status. 525 F. 2d at 643. We can find no basis for believing that anything inherent in the channel sharing activities of broadcast licensees will lead them to make indifferent offerings of excess channel capacity. Thus, we find the imposition of common carrier regulation inappropriate in this context.

26. The Court in *NARUC I* warned that, if common carrier activity did ensue, it would be incumbent on the Commission to determine the extent to which traditional Title II regulation should be applied. *Id.* at 644. Because of the essential nature of the broadcast services performed by auxiliary facilities, and because of the safeguards we are establishing to prevent licensees from obtaining new stations solely for nonbroadcast use, we do not anticipate that our initial analysis will be proven wrong. However, in the event that licensees do begin behaving like common carriers, by indiscriminately offering their facilities to all potential users, we can certainly revisit this issue and make appropriate changes in our treatment of licensee channel sharing activities, either by treating the activity as a common carrier offering subject to Title II and state regulation, or by not permitting it to continue.

27. *Reporting Requirements/Oversight of Sharing Agreements—The Comments and Discussion.* In response to our queries regarding whether the Commission should institute any continuing reporting requirements or undertake to review any facilities-sharing agreements, the commenters universally state a lack of need for any such regulations. With respect to facility-sharing agreements, PBS notes that similar agreements concerning the use of satellite facilities are no longer submitted routinely to the Commission. PBS states that because many distribution systems utilize satellite earth stations and auxiliary stations, the Commission's treatment of both types of facilities should be the same. Aside from

---

[11] PBS suggests that even if common carrier regulation is imposed, broadcasters should have the option of filing tariffs and making a profit or offering their facilities on a nonprofit, cost-sharing basis.

[12] We realize that it is technologically possible, using channel compression techniques, for a licensee to transmit two video signals simultaneously on a single microwave link. Thus, a licensee theoretically could use these techniques to generate a full-time video channel of excess capacity. We do not anticipate, however, that licensees will make widespread or routine use of these channel compression techniques because at this stage of their development they result in decreased picture quality. Nor do we expect, given broadcasters' continuing need for a high quality video signal pathway, that licensees will be any less selective in their offering of such compression-based capacity than they would if only a single video channel were available to them. Thus, we do not believe that our common carrier analysis will be significantly affected.

the minimal additions we are making to the auxiliary station application form discussed at paragraph 12, we will not initiate any continuing reporting requirements to monitor the use of auxiliary facilities. We do not expect any problems to arise from our rule amendments, and reporting requirements would constitute a needless and costly burden on licensees. Because we are imposing no restrictions on the shared use of licensee facilities, we see no valid purpose in requiring licensees to submit copies of their shared use agreements to the Commission. Again, such a requirement would exact a burden on licensees with no corresponding benefit to the Commission or the public. Therefore, user agreements need not be filed with the Commission.[13]

28. *Miscellaneous Issues.* Several commenters raise additional issues concerning shared use of auxiliary facilities. The California State Communication Division urges the Commission to allow broadcast auxiliary licensees to interconnect their facilities with terrestrial microwave stations in the Private Operational Fixed Microwave Service (POFMS) that are operated by public entities. To the extent that broadcast auxiliary licensees utilize only their excess capacity, nothing would prevent such interconnection. However, as stated previously, we will not license new broadcast auxiliary stations for non-broadcast purposes. Thus, we would not authorize a new auxiliary station merely for interconnection with, or extension of, a POFMS network.

29. Gill Industries and Hughes Aircraft Company, Microwave Communications Products ("Hughes"), ask that the time sharing proposals being implemented in this docket be extended to Community Antenna Relay Service (CARS) operators licensed under Part 78 of the Commission's Rules. They contend that the same reasons supporting shared use for broadcast facilities also apply to CARS facilities. We agree that the logic of our actions easily might be extended to CARS. However, CARS facilities are utilized by an entirely different set of licensees, and we believe that it would be both unfair and unwise to extend our actions to CARS without first notifying those licensees of our intentions. Nothing in the instant *Notice* remotely suggested that we might extend our actions to CARS facilities, and, absent such prior notice, we will not do so.[14]

30. In the same vein, Entertainment and Sports Program Network (ESPN) asserts that non-broadcast entities should be permitted to obtain licenses in the broadcast auxiliary service. ESPN states that, because they are neither broadcasters nor cable system operators, certain entities such as ESPN which produce and distribute programming are not eligible to receive auxiliary licenses. However, because their material is intended for broadcast or cablecast purposes, they likewise are precluded from obtaining facilities in the private radio services. ESPN avers that the shared use proposals will not adequately remedy this problem, and that the only satisfactory answer is for such program producers to receive their own authorizations. We recognize ESPN's problem, but we do not believe that this proceeding is the proper forum for resolving it. As with the proposal to expand our actions to CARS, the *Notice* contained no reference to expansion of the entities eligible for broadcast auxiliary authorizations. Indeed, one of the principal safeguards against misuse of broadcast auxiliary facilities is our resolve to limit licensing to broadcast station licensees. Further, allowing non-broadcast entities to receive Part 74 licenses surely would constitute a reallocation of frequencies that must be preceded by public notice. For these reasons, we decline to act on ESPN's request in this docket.

III. Expanded Use of Multiplexed Audio Signals Transmitted Over Television Auxiliary Broadcast Stations

31. *The Proposal.* Under current Commission policy, the transmitter of a television broadcast auxiliary station may be multiplexed to provide additional communication channels for the transmission of aural program material and operational communications. However, multiplexed audio material may be used only by AM, FM, or TV broadcast stations owned by or under the common control of the licensee of the broadcast auxiliary station. Thus, broadcast or non-broadcast entities may not utilize the multiplexed audio material transmitted over another licensee's auxiliary facilities. By contrast, video programming transmitted over auxiliary facilities may be utilized by any other broadcaster if the subject programming is broadcast by the transmitting licensee. In the *Notice* we stated that the discrepancy in the permitted uses between audio and video programming transmitted via television broadcast auxiliary stations made little sense, and we proposed to allow the greatest possible latitude in the use of audio signals transmitted over television broadcast auxiliary stations.

32. *The Comments.* Fourteen of the comments filed in this proceeding specifically addressed this topic. Most of those comments merely express support for the proposal for much the same reasons they supported the facility-sharing proposals discussed above. However, several parties offer more specific comments. National Public Radio supports the proposals as promoting spectrum efficiency and providing opportunities for licensees to recoup some of the cost of maintaining auxiliary facilities. NPR specifically favors the multiplexing proposal because facilities then could be made available to public radio which would aid in the production and distribution of radio programming. The Christian Broadcasting Network argues against placing any restrictions on the type of material transmitted over broadcast auxiliary stations or on the permissible receiver of multiplexed material. Such a nonrestrictive policy would have clear spectrum and cost efficiencies, according to CBN.

33. The National Association of Broadcasters considers parallel regulation of audio and video transmission essential. NAB notes that either the multiplexed audio channels or the primary video transmission (or both) may possess excess capacity, and it concurs in the Commission's proposal to permit the greatest possible latitude in the use of multiplexed audio signals. However, NAB points out that proposed § 74.631(d) makes no specific reference to the number of audio channels or control signals that may be multiplexed, except for the general provision against causing harmful interference to stations transmitting television broadcast material. NAB contends that interference can be caused to facilities on adjacent channels by exceeding the allowable emission bandwidth and that the number of possible channels that can be multiplexed without exceeding that bandwidth is limited. NAB suggests that the Commission consider specific technical requirements "which do not preclude the number and nature of available multiplexed transmissions, yet provide a mechanism whereby a licensee can ensure that its auxiliary facility cannot reasonably be expected

[13] As suggested in the *Notice*, we will also delete the reporting requirements from § 74.631(h) of the Commission's Rules.

[14] We note that Westinghouse Broadcasting and Cable, Inc. recently filed a petition for rule making proposing, *inter alia*, that channel sharing be permitted for CARS licensees.

to cause adjacent channel interference to other television auxiliary facilities."

34. *Discussion.* The comments clearly demonstrate that greater discretion should be afforded broadcasters in their use of multiplexed audio signals transmitted over broadcast auxiliary stations. No commenter opposed expanding the permissible uses of such signals, and those commenters favoring the rule amendments argued for the widest possible latitude in the transmission of multiplexed material. In the *Notice* we proposed the unrestricted use of multiplexed audio material. However, at this time we see no need to limit multiplexed signals to audio material. We will therefore permit the transmission of all multiplexed material, such as data, telemetry, or facsimile. Thus, aside from the prevention of harmful interference to other broadcast auxiliary station licensees, we will impose no restrictions on a broadcaster's use of multiplexed signals. To the extent that a licensee has excess capacity, that capacity may be utilized to transmit any type of material to any entity. Also, for the same reasons outlined in Section II, above, licensees will be permitted to sell their excess capacity to other users on whatever basis they choose. We also do not intend to institute any reporting or oversight regulations of these secondary uses of broadcast auxiliary stations. As with sharing of the primary video channel, licensees must retain complete control of their facilities and are wholly responsible for their proper use.

35. With respect to the suggestion of NAB that we adopt specific technical standards to prevent adjacent channel interference, we believe such standards are unnecessary. As NAB notes in its comments, there is a limited number of channels that can be multiplexed without exceeding the emission limitations set forth in § 74.637 of the Rules. These emission limitations have proved adequate in the past and there is no evidence that they will be less so in the face of more intensive multiplexing. Accordingly, in view of the flexibility provided by the proposed rule, we believe that no additional action on this question is warranted at the present time.

IV. Licensing Policy

36. *The Proposals.* The final section of the *Notice* dealt with various aspects of our licensing policy and proposed to bring the Commission's rules in line with actual Commission licensing practice. First we noted that due to increased demand for auxiliary channels, exclusive channel assignments were no longer granted. We therefore sought comment on our proposals to eliminate any reference in our rules to exclusive assignments and to rescind all existing exclusive assignments. In order to further promote the more efficient use of the spectrum, we proposed to grant only single frequency authorizations for fixed link services. We also proposed to end current restrictions on the number of authorizations any one licensee could possess. In recognition of the fact that the Commission staff no longer conducts frequency coordination for every application for a new authorization that is submitted, we proposed relying on licensee assurances that the frequency selected for a proposed station was appropriate and calculated to avoid creating interference to existing services. Under the proposed rule, applicants for new stations would be free to conduct their own frequency coordination studies or rely on information provided them from local frequency coordination committees where they exist. We stated that whether the frequency coordination was done through a committee or individually, assuming the other aspects of the application were in order, the application would be granted on the assumption that the frequencies requested would not interfere with existing services.

37. Assuming that some interference complaints would be brought to the Commission, we proposed implementing a priority system as a mechanism for resolving interference disputes between existing licensees. The priority system would also be used to determine which channels would be withdrawn in case over-crowding resulted in a new licensee being unable to obtain a vital auxiliary link. Under the system proposed, STLs and CARS links were afforded highest priority. Intercity relay stations and television pickup stations tentatively were assigned the second and third priorities, respectively. Fourth priority was proposed for fixed links operating outside a licensee's local service area and translator relay stations. Lowest priority was proposed for normally unused alternate or backup facilities and television pickup stations operating outside a licensee's local service area. In the *Notice*, we anticipated utilizing the priority list for resolving interference disputes and for withdrawing existing authorizations in the unlikely event that overuse of the spectrum made additional channels unavailable.

38. *Exclusive Channels—The Comments.* The Commission's rules provide that licensees may request and obtain the right to operate exclusively on a particular frequency in a given market. In the *Notice* we sought comment on our proposal to eliminate these exclusive channel assignments. Comments in response to this proposal were mixed. CBS, Cox, Fisher, Gill, and Hughes support the elimination of exclusive assignments while NAB, two sets of noncommercial educational licensees, and NBC favor retaining at least some exclusive authorizations. Acknowledging that the Commission has not granted exclusive assignments in several years, CBS asserts that the rules should be amended to reflect the actual practice of the Commission. CBS further contends that exclusive assignments are not an efficient use of the spectrum. CBS argues that existing exclusive authorizations should be allowed to expire at the end of the licensee's current license term. Cox suggests that existing exclusive assignments could be terminated prior to expiration of the license term since the termination would be the result of a rule making of general applicability. Based on its experience in the use of Band D frequencies, Hughes states that the same frequencies can be reused extensively in the same geographic area on different azimuths. According to Hughes, exclusives preclude such reuse and are therefore wasteful.

39. NAB opposes the rescission of existing exclusive assignments and suggests that such assignments should be "grandfathered" subject to voluntary relinquishment by agreement of the licensee. NAB states that if existing exclusive authorizations are eliminated, licensees should be given advance notice of the rescissions. NBC avers that, at the very least, every licensee should be granted one exclusive assignment for use as the licensee sees fit. The noncommercial licensees state that we should retain exclusive authorizations for STLs, but otherwise allow nonexclusive grants on a strict, non-interfering basis. A second group of noncommercial licensees, represented by Schwartz, Woods & Miller (hereinafter "Schwartz"), asserts that Commission policy must be founded on the protection of essential auxiliary services, and that elimination of exclusive authorizations would preclude these necessary protections. Schwartz contends that exclusive assignments must be maintained to guarantee a legitimate expectancy of continued uninterrupted use. According to Schwartz, severe economic costs will result from disruptions in service and instability if exclusive assignments are eliminated. Schwartz states that frequency coordination costs will

increase and program disruptions will become more common and opines that these factors will offset any resulting gains in spectrum efficiency.

40. *Discussion.* As stated in the *Notice*, due to the increasing demand for channels in the bands allocated to the television broadcast auxiliary service, the Commission has not granted exclusive channels for the past several years. The commenters present no evidence that the absence of additional exclusive authorizations has jeopardized in any way the proper functioning of television broadcast stations. Further, as Hughes correctly points out, the same frequencies can be used within a market so long as the transmit and receive points are taken into consideration. For these reasons, we will formalize our recent practice and eliminate any reference in our rules to the issuance of new exclusive authorizations in the television broadcast auxiliary service. Further, nothing in the comments persuades us that existing exclusive assignments should be retained. Those existing exclusive assignments represent an inefficient use of increasingly crowded spectrum. We wish to emphasize that all licensees still will have the protected use of a particular frequency on a specific pathway. Proper frequency coordination in a given market effectively should preclude interference on those protected pathways. Thus, we do not foresee any change in circumstances for those licensees losing the "exclusive" status of their existing authorizations. At the expiration of a licensee's present license period, any exclusive authorization held by that licensee will lapse. Those auxiliary licenses will be renewed as usual, but not on an exclusive basis. This action should help alleviate the congestion arising in the use of auxiliary frequencies without making any perceptible change in the level of interference that licensees currently experience.[15]

41. *Frequency Coordination and Application Procedures—The Comments.* Section 74.604(a) of the current rules states that the Commission no longer conducts frequency coordination for the auxiliary service. We stated in the *Notice* that we grant licenses on an inference of noninterference to existing users and sought comment on whether our inferences were well-founded. We also asked interested parties to respond to our proposal to acknowledge formally the existence of local frequency coordination committees and rely on those committees to provide frequency selection information to applicants for new authorizations. Again, we received mixed reactions to our proposals and no consensus among the commenters exists. Most of the parties addressing this issue agree that frequency coordination at the local level makes sense, and they support the use of local frequency coordination committees as a reliable clearinghouse for area frequency use information. Fisher specifically endorses the use of local frequency coordination committees and adds that in Seattle and Portland local coordination is an ongoing process which to date has been quite successful. With respect to frequency selection, CBS would require applicants to make a reasonable search of other auxiliary licensees in an area and the frequencies assigned to those licensees. CBS states that the approval and recommendation of certain frequencies by a local coordinating committee should be considered *prima facie* evidence of reasonableness. In an effort to facilitate local frequency coordination, several parties suggest that the Commission establish and make available a nationwide auxiliary frequency data base, with users reimbursing the Commission for costs.

42. Although the noncommercial licensees filing jointly do not oppose local frequency studies by prospective licensees, they do object to giving local coordination committees any authority to assign frequencies or resolve disputes. According to these licensees, such committees are susceptible to local political pressures that could conceivably affect their impartiality. Another group of noncommercial licensees (Schwartz) opposes giving local committees any authority. Schwartz asserts that the Commission should not shirk its statutory responsibilities nor abdicate its essential licensing role. Cox argues that the FCC must retain an active role in frequency assignment and coordination. Citing Sections 303(a)-(d) of the Communications Act of 1934, as amended, Cox contends that the Commission is obligated to assign frequencies and locations in the public interest. Cox maintains that our proposals give local frequency coordination committees too much power. Instead, local committees should be limited to providing information. Cox suggests that any rule adopted should emphasize that the role of local coordination committees is advisory and that the Commission has ultimate authority to assign frequencies.

43. *Discussion.* After carefully reviewing the comments, we continue to believe that local frequency coordination remains the most efficient process for licensees to select appropriate television auxiliary frequencies. The Commission simply does not have the resources to coordinate every auxiliary application submitted, and the comments contain no implications that this system of local frequency coordination has created any problems for licensees. However, in light of the fears expressed by some parties over the authority we proposed to give local coordination committees, we will modify slightly the rules which we initially proposed. First, we will not include in new § 74.602(b) any reference to who may perform a frequency coordination study. Instead, we merely have added a requirement that applicants for auxiliary frequencies comply with the frequency selection provisions of § 74.604 of the Rules. Applicants must also affirm that the requested frequency will cause no interference to existing users in the area. Section 74.604, which deals with frequency selection to avoid interference, indicates that frequency selection is the primary responsibility of the applicant. This section does permit an applicant to consult a local frequency coordination committee where one exists, but such consultation is at the option of the applicant. Section 74.602(b) makes it clear that the Commission has ultimate licensing authority and that frequencies other than those requested will be assigned if the Commission deems such action appropriate.

44. This system guarantees that area licensees will retain great flexibility in the way they handle their frequency coordination matters. In areas where committees exist and function effectively, coordination of additional auxiliary authorizations should be as simple as consulting a master file of those frequencies already in use in the area.[16] Where committees do not exist, or where a particular applicant chooses not to work with an existing committee, the licensee must take it upon himself to select a frequency that will cause no interference to other users. Whichever procedure is utilized, it is clear that the Commission retains the ultimate

[15] It appears that most existing exclusive assignments are for fixed link services. As discussed below, such services retain the highest priority for purposes of interference protection.

[16] We note that private frequency coordination has worked well in the private radio service for many years. Indeed, the authority given to frequency coordinating committees in the private radio service is at least as extensive as the advisory role contemplated for such committees in this proceeding.

licensing authority and may reject the request for a particular frequency if such action is warranted.

45. With respect to the idea that a nationwide auxiliary frequency data base be established to facilitate frequency coordination, the Commission at this time does not have the resources to make such information widely available. We are in the process of expanding and updating our master frequency data base. Public access to this data base has been and will continue to be available. Concerning regional coordination, if broadcast auxiliary service coordination committees advise us as to the markets or areas they serve and provide us with information concerning their name, address, telephone number, principal staff members, geographic area, participating broadcast stations, and spectrum coordinated, we will attempt to make this information available to other broadcasters or spectrum users.

46. *Interference Protection and Channel Priorities—The Comments.* Recognizing that no system of frequency coordination is foolproof, we stated that some mechanism should be established to settle those few cases in which existing stations cause interference to one another. In response to our proposals concerning the resolution of interference disputes, several commenters opine that such disputes are handled better at the local level. For example, NAB suggests that any interference dispute mechanism adopted by the Commission should be flexible enough to take account of local procedures instituted by area coordination committees. The Ohio Educational Broadcasting Network Commission agrees that local coordination committees are the proper forum for resolving interference problems and states that in the past interference has been resolved through a "limited number of telephone calls among television chief engineers."

47. With respect to our proposed priority scheme for interference protection, most parties support the priority concept and agree that STLs and CARS stations should be afforded highest priority in terms of protection from interference. However, virtually every noncommercial licensee addressing this issue urges that intercity relay stations receive a similar priority. They reason that ICRs perform the exact same function as STLs in that they provide a "life blood" link from a central production center to noncommercial stations throughout the state. CBS and Cox argue that, because STLs are essential to maintaining a reliable signal to the public, STL backup facilities should be given the same priority as the primary STL facility. CBS states that backup facilities must be free of interference when used and that a lower priority endangers a backup's reliability while increasing the risks of interruption. Cox submits that auxiliary facilities for low power television stations should receive a lower priority than backup facilities for full service stations. Cox avers that this is consistent with the secondary status of the low power service. NBC adds that at least some provision should be made for activating backup facilities on a first priority basis if the primary facilities fail.

48. Several other suggestions were offered with respect to our interference resolution procedures. Hughes would grant second priority to all other fixed links in regular use, third priority to mobile facilities of all kinds, and fourth priority to back-up facilities. PBS suggests giving priority to all existing services over new entrants. NBC states that when ICRs and television pickups operate together to produce news material, the pickup frequency should acquire the same priority as the ICR. The Ohio Educational Broadcasting Network Commission and a group of noncommercial licensees indicate that mobile facilities present the greatest potential for interference. The noncommercial licensees urge that mobile facilities should not be authorized to operate on frequencies used by STLs within the STL's geographic area. The Ohio Commission asserts that the obligation to correct interference should rest with mobile users in disputes between mobile and fixed services. Finally, Cox and CBN state that a final priority should be added to the list indicating that non-broadcast uses of auxiliary facilities have the lowest priority with respect to interference disputes.

49. In addition to providing a mechanism for resolving interference disputes between existing stations, the priority list we proposed also was to be used as a guide for withdrawing channels in a given area. If no additional channels are available in a market, we stated that we would withdraw authorizations being utilized for low priority purposes in order to provide licensees with channels for a higher priority use. In deciding which channels to withdraw, we stated that we would take into consideration the number of channels authorized to individual licensees. Those licensees with the most channels would be more likely to lose an authorization. We also proposed to consider the recommendation of a local coordination committee as to which channel to withdraw in an area. These proposals came under sharp attack from two noncommercial commenters, Schwartz and the WGBH Educational Foundation ("WGBH"). Schwartz states that forcing existing licensees to terminate operations that conflict with proposed higher priority uses clearly is inefficient and patently unfair. Lower priority users then will be forced to seek alternative frequencies, leading to investment instability and uncertainty. This scenario will deter the operation of lower priority facilities which, Schwartz opines, is antithetical to the public interest. Schwartz suggests a requirement that higher priority users compensate and underwrite the continuation of any lower priority service forced to relinquish the use of its channel. WGBH states that existing microwave systems are fundamental to public broadcasting. WGBH asserts that deleting channels from the licensee holding the most channels ignores the reality that licensees covering the entire state are apt to have the most assignments. Further, elimination of existing microwave relays would damage WGBH by loss of capital investment and would leave it without an economically feasible alternative. As a result, WGBH claims that proven broadcast service would be traded for unproven new services such as STLs for low power television stations. WGBH concludes that the Commission should recognize the importance of microwave systems to educational broadcasting by preserving the priority of existing microwave networks.

50. *Discussion.* Based on the comments of the parties, we have decided to make a number of changes in the interference protection and channel withdrawal mechanisms proposed in the *Notice.* Briefly, the priority system we are adopting will apply only to those complaints brought to the Commission for resolution. Individual licensees acting together either on an *ad hoc* basis or through a formal coordinating committee may adopt whatever interference resolution procedures they choose. Also, the actual priority listing we are adopting is more simplified than the proposed set of priorities. Finally, we have decided against adopting any formal channel withdrawal mechanism. The following paragraphs explain these decisions more fully.

51. In the *Notice,* we stated that local frequency coordination of new authorizations should eliminate the possibility of harmful interference. In

the unlikely event that licensed stations did cause interference, we felt that some mechanism should be in place for resolving those disputes. To this end, we proposed a priority system for interference protection. In fashioning our proposed channel priorities, we asked for comment on the possibility of allowing local frequency coordination committees to set their own standards. We believe that resolving interference disputes at the local level should be encouraged. Those licensees who addressed the issue indicate that local procedures are effective and that eliminating interference often can be as easy as making a few well-placed telephone calls. We therefore see no reason to impose on all licensees a rigid interference resolution mechanism that may be inappropriate for local needs and conditions. Accordingly, licensees who choose to act together to resolve interference disputes will be afforded the utmost discretion. This decision complements our determination to leave initial frequency coordination at the local level. With respect to resolving interference disputes, the interference resolution priority system described below will be utilized only when the affected parties cannot agree among themselves and petition the Commission.

52. While most parties support the creation of an interference protection priority system, there is some disagreement on the actual prioritizing of the various broadcast auxiliary services. In an effort to make our priority system more equitable and easier to administer, we have simplified the priority listing. First priority will be given to all fixed link stations that serve full service broadcast stations and cable systems. This includes STLs, CARS links, and intercity relays. We have taken this action primarily for the reasons expressed in the comments by the noncommercial entities. Regardless of the label placed on fixed links, if the practical use of the links essentially is the same, we see no reason to distinguish between the stations.[17] Second priority for the purpose of resolving interference disputes will be accorded television pickup stations utilized in a licensee's local service area. We will also include cable television relay service pickup stations because the services share the same frequencies and have similar purposes. Third priority belongs to translator relay stations and those links used to feed low power television stations. This priority is appropriate for translators and low power stations as it recognizes that these services are secondary to full service broadcast stations.[18] Fourth priority will be given to backup facilities and television pickup stations operating outside a licensee's local service area. Although several commenters argued strenuously that backup facilities should be given the same priority as primary facilities, we conclude that the present crowding of the spectrum does not allow us the luxury of providing each licensee with two or more high priority fixed link authorizations.[19] The final and lowest priority is given to the transmission of material during times when the station is not being used to transmit program material to its associated broadcast station. Thus, the expanded uses of auxiliary facilities, which we discussed in Section II of this decision, are accorded secondary status and must always give way to *bona fide* broadcast transmissions. Disputes involving stations in the same priority category will be resolved in favor of the licensee that has held its authorization on a particular path the longest.

53. The establishment of these priorities should address adequately many of the concerns advanced by the commenting parties. For example, several parties indicate that mobile facilities present the greatest interference threat. The noncommercial licensees filing jointly suggest that mobile facilities should not be authorized to operate on frequencies used by STLs within the STL's geographic area. The priority system we have devised makes it clear that mobile facilities must yield to fixed links when interference is present. Yet, this system retains the flexibility necessary for the efficient functioning of television pickup stations. Many television pickups are authorized on multiple frequencies to take advantage of frequency-agile transmission equipment. It would be impractical to force broadcasters to refrain from using those frequencies in situations where interference is not likely to occur as, for example, when a news crew operates outside the local market. Adopting the position of the noncommercial licensees would foreclose this flexibility.

54. After careful consideration, we have decided not to implement the channel withdrawal procedures proposed in the *Notice*. We believe that summarily withdrawing an existing authorization would have a destabilizing effect on the industry and would create legal and practical problems that far outweigh any countervailing benefits. Accordingly, we will leave questions of possible channel withdrawal to local determination in the context of initial frequency coordination for new channels. As previously stated, we believe that frequency coordination matters are handled best at the local level, either by the individual applicant or through a local coordination committee. Should a case arise where existing usage in a market precludes additional uses on a particular frequency, we believe that the parties involved are well situated to come to a reasonable accommodation. If a new entrant desires the use of an unavailable frequency, the new user could negotiate with existing users for relief that could take a variety of forms, including channel sharing or offering to reimburse an existing licensee for the expenses necessary to move to another channel.[20] As we stated in the *Notice*, we do not anticipate the spectrum becoming so crowded that an existing authorization will have to be withdrawn permanently from one licensee to accommodate another licensee's use. Nonetheless, should such a situation arise, we prefer giving the parties directly involved in the matter the flexibility to fashion the most appropriate and reasonable solution possible. Our decision not to

---

[17] We recognize that by lumping all fixed links together, we may be including some links that do not perform "life blood" functions, but for administrative convenience we choose not to attempt to subcategorize every conceivable fixed link use. Should a dispute arise involving a non-essential fixed link station, we can certainly take that fact into account in resolving the dispute.

[18] In some cases, translators may be providing a network service otherwise not available in an area. In those instances, it may be argued that the translator relay providing the network feed is a higher priority than, for example, a third or fourth TV pickup for a full service station in the area. We intend to remain flexible in our administration of the priority system so that such conflicts can be resolved equitably. Similarly, a fixed link providing a "life blood" service to a low power television station might also, in a given situation, be considered a higher priority than additional pickups for a full service television station. We are confident that most disputes concerning such conflicting uses will be resolved locally. However, if a situation does arise where a low power station is not able to function because of an inability to acquire an auxiliary link, we will give expedited treatment to any request for relief brought to our attention.

[19] Of course, backup facilities providing "hot standby" on the same frequency as the primary transmitter would assume the same priority by virtue of its operating on the same frequency. Also, we recognize that several areas of the country at times experience atmospheric inversions that necessitate using alternate frequencies. We encourage licensees in such areas to come to their own agreements regarding the priority that should be given to alternate facilities in those situations.

[20] The Commission long has recognized the propriety of one licensee reimbursing another for changes in operating frequency when such changes permit the initiation of additional services. This concept is particularly useful in the area of FM and television assignments. *See, e.g., Circleville, Ohio*, 8 F.C.C. 2d 189, 193–94 (1967).

apply a rigid set of channel priorities to such disputes gives the affected licensees that necessary flexibility. Of course, in those instances when the parties cannot agree, the Commission retains the authority to take whatever action is necessary to resolve the situation.

55. *Miscellaneous Amendments.* Two proposed rule changes suggested in the *Notice* received little or no comment. The first involved our proposal to end our present limitations on the number of channels any one licensee may obtain. As a practical matter, the restrictions have not been followed in recent years, and in the absence of comments opposing this change, we will amend our rules to reflect our actual practice. A second change in the rules would limit fixed link services to single frequency authorizations. No party commented on this amendment, and we will adopt it as proposed in order to maximize the efficient use of the spectrum. Finally, because the priority system adopted today has more to do with the avoidance of interference than frequency assignment, we are placing the interference resolution procedures in § 74.604 rather than § 74.602 as originally proposed. We are also making an editorial change in the title of § 74.604 to conform the title to the new addition.

V. Conclusion

56. The actions taken today serve to deregulate substantially the television broadcast auxiliary service. By allowing licensees to utilize the excess capacity heretofore unused, we are promoting the efficient use of the increasingly crowded spectrum and giving licensees an additional revenue generating opportunity. This is important especially for noncommercial licensees faced with cutbacks in federal financial support. Our decision recognizes that in appropriate circumstances, the marketplace is an effective substitute for government regulation, and that market forces should be allowed to operate freely when possible. This concept also is evident in our revised licensing procedures, which acknowledge that individual licensees working together can act efficiently and expeditiously to assure their common interests. As broadcast operations become more efficient and the costs associated with government regulation are reduced, licensees can direct more resources to serving television consumers. Thus, the viewing public is the ultimate beneficiary of our actions.

57. *Regulatory Flexibility Act Final Analysis.* The action taken in this proceeding significantly deregulates the use of television broadcast auxiliary stations by expanding their permissible uses and allowing licensees to generate additional revenues by sharing excess capacity with other users. The amendments to our auxiliary station licensing policies for the most part conform the rules to existing Commission practice and do not constitute a substantive change in policy. Greater emphasis on local frequency coordination and interference resolution gives licensees greater flexibility in the conduct of their affairs and substantially reduces the government's presence in this area. These actions may benefit the approximately 900 Commission licensees currently holding broadcast auxiliary authorizations.

58. No party participating in this proceeding raised any regulatory flexibility issues. With minor exceptions, the rules are being adopted essentially as proposed. Those significant options not adopted are options which, in the judgement of the Commission, are more burdensome than necessary to meet our established objectives. Such options would either increase the burdens on licensees without any corresponding public benefit or result in unnecesary Commission oversight of licensee conduct.

59. Accordingly, pursuant to the authority contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, it is ordered, That effective May 23, 1983, Part 74 of the Commission's Rules is amended as set forth in Appendix A.

60. It is further ordered, that subject to approval by the Office of Management and Budget, FCC Form 313 is amended as set forth in Appendix B.

61. It is further ordered, That this proceeding is terminated.

62. For further information concerning this proceeding, contact Michael A. McGregor, Mass Media Bureau, (202) 632–7792.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A

PART 74—[AMENDED]

Part 74 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

1. Section 74.601 (a), (b), (c), and (d) are revised as follows:

§ 74.601 Classes of TV broadcast auxiliary stations.

(a) *TV pickup stations.* A land mobile station used for the transmission of TV program material and related communications from scenes of events occurring at points removed from TV broadcast station studios to TV broadcast or low power TV stations or other purposes as authorized in § 74.631.

(b) *TV STL station (studio-transmitter link).* A fixed station used for the transmission of TV program material and related communications from the studio to the transmitter of a TV broadcast or low power TV station or other purposes as authorized in § 74.631.

(c) *TV relay station.* A fixed station used for transmission of TV program material and related communications for use by TV broadcast and low power TV stations or other purposes as authorized in § 74.631.

(d) *TV translator relay station.* A fixed station used for relaying programs and signals of TV broadcast stations to LPTV, TV translator, and to other communications facilities that the Commission may authorize or for other purposes as permitted by § 74.631.

* * * * *

2. Section 74.602 (b), (c), and (g) are revised and paragraphs (d) and (e) are removed and reserved as follows:

§ 74.602 Frequency assignment.

* * * * *

(b) Subject to the conditions of paragraph (a) of this section, frequency assignments will normally be made as requested, provided that the frequency selection provisions of § 74.604 have been followed and that the frequency requested will cause no interference to existing users in the area. The Commission reserves the right to assign frequencies other than those requested if, in its opinion, such action is warranted.

(c) Fixed link stations will be authorized to operate on one channel only.

* * * * *

(g) In the event that a TV broadcast station licensee engages a communications common carrier to provide TV pickup or TV STL service, the frequencies available to the licensee may be assigned to the communications common carrier for the purpose of providing such service to that licensee.

* * * * *

3. Section 74.604 is revised as follows:

§ 74.604 Interference avoidance.

(a) Because the Commission does not undertake frequency coordination, applicants for new TV broadcast

auxiliary authorizations are responsible for selecting the frequency assignments that are least likely to result in mutual interference with other licensees in the same area. Applicants may consult local coordination committees, where they exist, for information on frequencies available in the area. In selecting frequencies, consideration should be given to the relative locations of receiving points, normal transmission paths, and the nature of the contemplated operation.

(b) Where two or more licensees are assigned a common channel for TV pickup, TV STL, or TV relay purposes in the same area and simultaneous operation is contemplated, they shall take such steps as may be necessary to avoid mutual interference, including consultation with the local coordination committee, if one exists. If a mutual agreement to this effect cannot be reached, the Commission must be notified and it will take such action as may be necessary, including time sharing arrangements, to assure an equitable distribution of available frequencies.

(c) For those interference disputes brought to the Commission for resolution, TV broadcast auxiliary channels will have the following priority for purposes of interference protection:

(1) All fixed links for full service broadcast stations and cable systems.

(2) TV and CARS pickup stations.

(3) Fixed or mobile stations serving translator or low power TV stations.

(4) Backup facilities; TV pickup stations used outside a licensee's local service area.

(5) Any transmission, pursuant to § 74.631(f), that does not involve the delivery of program material to a licensee's associated TV broadcast station.

(d) Interference between two stations having the same priority shall be resolved in favor of the station licensed first on a particular path.

4. Section 74.631 (d), (f), and (h) are revised as follows:

§ 74.631 Permissible service.

* * * * *

(d) The transmitter of an STL, TV relay station or TV translator relay station may be multiplexed to provide additional communication channels. A TV broadcast STL or TV relay station will be authorized only in those cases where the principal use is the transmission of television broadcast program material for use by its associated TV broadcast station. However, STL or TV relay stations so licensed may be operated at any time for the transmission of multiplexed communications whether or not visual program material is being transmitted, provided that such operation does not cause harmful interference to TV broadcast pickup, STL or TV relay stations transmitting television broadcast program material.

* * * * *

(f) A TV broadcast pickup, STL, or TV relay station may be used for the transmission of material to be used by others, including but not limited to other broadcast stations, cable television systems, and educational institutions. This use shall not interfere with the use of these broadcast auxiliary facilities for the transmission of programs and associated material intended to be used by the television station or stations licensed to or under common control of the licensee of the TV pickup, STL, or TV relay station. This use of the broadcast auxiliary facilities must not cause harmful interference to broadcast auxiliary stations operating in accordance with the basic frequency allocation, and the licensee of the TV pickup, STL, or TV relay station must retain exclusive control over the operation of the facilities. Prior to operating pursuant to the provisions of this Section, the licensee shall, for the intended location or area-of-operation, notify the appropriate frequency coordinatioin committee or any licensee(s) assigned the use of the proposed operating frequency, concerning the particulars of the intended operation and must provide the name and telephone number of a person who may be contacted in the event of interference.

* * * * *

(h) TV broadcast auxiliary stations authorized pursuant to this subpart may additionally be authorized to supply programs and signals of TV broadcast stations to cable television systems or CARS stations. Where the licensee of a TV broadcast auxiliary station supplies programs and signals to cable television systems or CARS stations, the TV auxiliary licensee must have exclusive control over the operation of the TV auxiliary stations licensed to it. Contributions to capital and operating expenses may be accepted only on a cost-sharing, non-profit basis, prorated on an equitable basis among all parties being supplied with program material.

5. Section 74.632(a) is revised as follows:

§ 74.632 Licensing requirements.

(a) A license for a TV pickup, TV STL, or TV relay station will be issued only to licensees of TV broadcast stations and, on a secondary basis, licensees of low power TV stations. A separate application is required for each fixed station and the application shall be specific with regard to the frequency requested. A mobile station license may be issued for any number of mobile transmitters to operate in a specific area or frequency band and the applicant shall be specific with regard to the frequencies requested. In lieu of specifying specific transmitter types, applicants shall certify that the transmitter used or to be used at the requested facility is type accepted, or was manufactured before October 1, 1981. Applications for consolidation of individual mobile station licenses into a system license will be accepted only at the time application is made for renewal of the main (Part 73) station license.

* * * * *

Appendix B

1. Form 313, Application for Authorization in the Auxiliary Radio Broadcast Service, is amended by adding the following three questions:

* * * * *

17. Describe briefly the primary broadcast-related purpose of the requested authorization.

18. For television auxiliary stations, state the anticipated percentage of time for which the station will be used for secondary uses. Secondary uses are transmissions of material at times when the station is not being used to transmit program material to its associated broadcast station.

19. For television auxiliary licensees, list the total number of existing auxiliary authorizations and indicate the combined percentage of time for which these stations are presently used for secondary uses.

[FR Doc. 83-10512 Filed 4-20-83; 8:45 am]
BILLING CODE 6712-01-M

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 107, 173, and 177

[Docket No. HM-138A; Amdt. Nos. 107-11, 173-181, 177-58]

Exemption and Enforcement Procedures and Related Miscellaneous Provisions; Corrections

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration, DOT.

ACTION: Final rule; corrections.

SUMMARY: This document makes four editorial corrections to section or office designations as published in the Federal Register on January 20, 1983 (48 FR 2846) under Docket HM-138A (FR Document 83-1241) relating to exemptions and enforcement procedures. In addition, a reference is added to § 173.22(a)(2)(i) to reflect Department of Defense (DOD) hazardous materials regulations, and two references to § 173.22 in Part 177 are corrected. Finally, § 107.319 is amended to provide that requests for hearings are made to the official who issued the notice of probable violation.

EFFECTIVE DATE: These corrections and additions are effective April 21, 1983.

FOR FURTHER INFORMATION CONTACT: George W. Tenley, Jr., Office of Chief Counsel, Research and Special Programs Administration, Room 8420, 400 Seventh Street, S.W., Washington, D.C. 20590 (202) 755-4973.

SUPPLEMENTARY INFORMATION: Three of the corrections made herein are necessary to reflect proper references, either to the assignment of responsibilities within the MTB or to the appropriate cross referenced section.

At 48 FR 2651, under Subpart C—Preemption, the blanket change of "OE" and "OOE" to "HMR" and "OHMR" failed to recognize language in § 107.205(b) which referred to "OHMR or OOE." Consequently, in order to make complete within Part 107 the assignment of the inconsistency ruling responsibility to the Office of Hazardous Materials Regulation, § 107.205(b) has been amended to delete the words "or OOE."

At 48 FR 2655, under Part 173, there is an incorrect reference in § 173.22(a)(3) to "paragraph (a)(1) of this section." The correct reference is to "paragraph (a)(2) of this section," and is changed accordingly.

Also with regard to § 173.22, the redesignation of paragraph (b) to paragraph (c) inadvertently changed a reference to § 173.22(b) appearing in § 177.825(e) and paragraph VI. A of Appendix A to Part 177 which was adopted under HM-164 (46 FR 5317; January 19, 1981). Accordingly, in order to keep the requirements of HM-164 complete, the reference in § 177.825(e) and the Appendix reference to "§ 173.22(b)" have been changed to read "§ 173.22(c)."

In addition to the corrections noted above, two additional changes have been made. First, in adopting the provisions of § 107.319 pertaining to hearing requests, the official to whom the request should be made was not identified. Although under previous requirements in § 107.353 it was the Associate Director for Operations and enforcement to whom requests were submitted, the change adopted herein requires hearing requests to be made to the official who issued the notice. This is appropriate because in a hearing matter, the Associate Director is not involved in the proceeding. The general language adopted will cover any administrative reorganizations or redelegations that might occur in the future.

Second, an additional change to § 173.22 has been made at the recommendation of the Department of Defense. As adopted under HM-138A, § 173.22(a)(2) required that the person offering a package for transportation determine that it had been manufactured, assembled, and marked in accordance with Part 178 or 179, a DOT specification in effect on the date of manufacture, or an exemption or approval. However, as noted by the DOD, and as adopted, this section presently fails to recognize shipments made by DOD in accordance with DOD requirements, as provided in § 173.7(a). Therefore, in paragraph (a)(2)(i) of § 173.22 a reference to § 173.7(a) is being added.

I. Classification of Rule; Reporting Requirements; and Impact on Small Entities

A. *Non-Major Rule.* The Materials Transportation Bureau has determined that this regulatory amendment is not a major rule under terms of Executive Order 12291 or significant under DOT's regulatory procedures (44 FR 11034), and does not require a Regulatory Impact Analysis, nor does it require an environmental impact statement under the National Environmental Policy Act (42 U.S.C. 4321 et. seq.) This determination is made on the basis that: (1) The final rule will have an annual effect on the economy not exceeding $100 million, (2) there will be no major increase in costs or prices for consumers, individual industries, Federal, State, or local governmental agencies, or geographic regions, (3) it will not result in significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets, and (4) no impacts (negative or positive) on the environment are anticipated by these minor rule changes and corrections. A regulatory evaluation is not warranted since the anticipated impact would be so minimal.

B. *Paperwork Reduction Act.* The rule change contains no information collection requirements nor does it result in any paperwork reduction.

C. *Impact on Small Entities.* Based on limited information available concerning size and nature of entities likely to be affected, I certify that this amendment

will not, as promulgated, have a significant economic impact on a substantial number of small entities primarily because this amendment contains a relatively few corrections to a rulemaking issued January 20, 1983.

II. Final Rule Without Notice and Without Usual Delay in Effective Date.

Since this rule change consists of minor editorial changes or minor corrections and it does not impose additional requirements, notice and procedures thereon are considered unnecessary. For the same reasons it is considered unnecessary to delay the effective date for the usual period of time.

Thesaurus of Indexing Terms. The following list of Federal Register Thesaurus of Indexing Terms apply to this rulemaking:

List of Subjects

49 CFR Part 107

Hazardous materials program procedures.

49 CFR Part 173

Hazardous materials transportation, Regulations and definitions.

49 CFR Part 177

Carriage by public highway.

In consideration of the foregoing, **Federal Register** Doc. 83–1241 appearing at page 48 FR 2646 in the issue of January 20, 1983, is corrected as follows, and additional amendments under Docket HM–138A are made to Parts 107, 173, and 177:

PART 107—HAZARDOUS MATERIALS PROGRAM PROCEDURES

§ 107.205 [Amended]

1. In § 107.205(b), the words "or OOE" are removed.

2. In § 107.319, the period at the end of paragraph (b)(3) is removed and replaced with a semicolon and the word "and"; and a new paragraph (4) is added to paragraph (b) to read as follows:

§ 107.319 Request for a hearing.

* * * * *

(b) * * *

(4) Be addressed to the official who issued the notice.

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

3. In § 173.22, paragraph (a)(2)(i) is revised, and paragraph (a)(3), appearing at page 48 FR 2655 is corrected, as follows:

§ 173.22 Shipper's responsibility.

(a) * * *

(2) * * *

(i) Section 173.7(a) and Parts 173, 178, or 179 of this subchapter;

* * * * *

(3) In making the determination under paragraph (a)(2) of this section, the person may accept—

* * * * *

PART 177—CARRIAGE BY PUBLIC HIGHWAY

§ 177.825 [Amended]

4. § 177.825(e), the reference to "§ 173.22(b)" is changed to read "§ 173.22(c)."

§ 172.22 [Amended]

5. In paragraph VI.A. of Appendix A to Part 177, the reference to "§ 177.22(b)" is changed to read "§ 173.22(c)."

(49 U.S.C. 1803, 1804, 1808, and 1809; 49 CFR 1.53, App. A. to Part 1)

[Docket No. HM–166L; Amdt. Nos. 171–72, 172–79, 173–163]

Regulation of Consumer Commodities; Paint and Paint Related Material Adhesive

AGENCY: Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: This action is being taken to reduce the shipping names associated with paint and paint related products from 28 to 7. This action will eliminate confusion over shipping names used by DOT and those used in the freight classification system. This action will result in a reduced burden in the shipment of these commodities without compromising safety. The proposal to expand the coverage of the consumer commodity category for flammable liquids by lowering the flash point limitation for one gallon inside containers is not adopted.

DATE: This amendment is effective April 1, 1984. However, compliance with the regulations as amended herein, is authorized April 21, 1983.

FOR FURTHER INFORMATION CONTACT: Darrell L. Raines, Chief, Exemptions and Regulations Termination Branch, Office of Hazardous Materials Regulation, Materials Transportation Bureau, 400 7th Street, SW., Washington, D.C. 20590 (202–472–2728).

SUPPLEMENTARY INFORMATION: On Monday, February 1, 1982, the Materials Transportation Bureau (MTB) published a Notice of Proposed Rulemaking (NPRM) Docket Number HM–166L (47 FR 4538) which addressed paints and paint related materials. The NPRM proposed to reduce the number of shipping names associated with paint in the Hazardous Materials Table (49 CFR 172.101) from approximately 28 to 7. In addition, the NPRM proposed to relax certain shipping requirements for paint and paint related material by allowing a flammable liquid with a flash point higher than 20°F. to be shipped as "Consumer commodity," ORM–D when in inside packagings of one gallon or less. At present, the Hazardous Materials Regulations (HMR) restrict the volume of flammable liquids having flash points below 73°F. being shipped as "Consumer commodity" to one quart. The effect of such change would be to allow four one gallon metal cans of paint in fiberboard boxes to be shipped without requiring that they be labeled or accompanied by shipping papers except when carried aboard aircraft.

MTB received a total of 37 comments in response to the NPRM. While the paint manufacturing industry and carriers generally favored the proposal, persons interested in fire protection strongly opposed those portions of the notice which would have allowed the increased quantity of paint with a flash point below 73°F. to be shipped as "Consumer commodity, ORM–D". There was little opposition to consolidation of shipping names and much support for it. Fourteen comments received from industrial firms that manufacture or ship paints and adhesives support the NPRM without exception. One manufacturer did want the shipping names "varnish" and "enamel" retained because products with these names are used to coat electrical wires, a use which most people do not associate with "paint." The purpose of shipping names in the hazardous materials table is not to pinpoint the ultimate use of a product with great exactitude, but rather to provide a standardized format which succeeds in communicating the basic properties, or kinds of hazardous materials in transportation.

In addition to industrial firms, seven trade associations, representing paint producers, carriers, and shippers supported the NPRM.

MTB received comments from four carriers. Two supported the NPRM. One air carrier expressed concern that the

relaxed requirements would exclude shipments by air and would cause confusion and inadvertent violation of the regulations because shippers may not know that one portion of a journey might be accomplished by air, requiring shipping papers. Since the package would not be labeled and marked so the contents could be identified, a violation might ensue if the package was shipped by air with no shipping papers. A rail carrier expressed concern that the proposed shipping names would not identify whether the hazardous material was a hazardous substance identified under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA or "Superfund"). The identification of CERCLA hazardous substances is addressed at length in a previous MTB publication (see Docket No. HM–145C, 46 FR 17738, March 19, 1981). It is extremely unlikely that a hazardous substance, as presently defined in the HMR, in packagings addressed in this NPRM would be a constituent of paint in sufficient quantity to constitute a reportable quantity (RQ). If a hazardous substance were present in sufficient quantity, the marking provisions of § 172.324 would apply and the package would have to be marked with the name of the hazardous substance and the letters "RQ".

If a package contains a material which is listed in the CERCLA List (§ 172.101) but which is not a hazardous material or "hazardous substance" as presently defined in § 171.8, that material is not subject to the requirements of the HMR regardless of whether it is a "Consumer commodity" or not. This issue is discussed at length in Docket HM–145C and this final rule has no effect on it.

The Air Transport Association (ATA) expressed concern that the NPRM did not include all paint related items that appear in the ICAO Technical Instructions, specifically paint driers and thinners. One purpose of the NPRM was to reduce the number of shipping names associated with paint, including thinners, driers, removers and reducers. MTB feels that these materials can all be safely shipped under the shipping names "Paint" or "Paint related material" with separate entries for the flammable liquid, combustible liquid and corrosive material hazard classes.

MTB received comments from the fire departments of 7 municipalities, two from Members of the International Associations of Fire Chiefs, one from a fire protection engineer, and one from the National Fire Protection Association, all opposing the relaxation of shipping requirements (the use of the Consumer commodity, ORM–D hazard class) for flammable liquids as proposed in the NPRM. Comments from the fire departments and fire chiefs opposed relaxation of the communications requirements (labels and shipping papers) associated with shipments under the ORM–D hazard class. They expressed the opinion that the absence of labels and shipping papers would increase the danger to fire service personnel, or the general public, or both. The fire protection engineer expressed the view that the present regulations are consistent with National Fire Protection Association (NFPA) requirements and OSHA regulations and if the NPRM became final, the HMR would no longer be consistent. He also thought that there would be precedence for opening up the Consumer commodity, ORM–D hazard class to other flammable liquids which are not paints.

Comments received from the NFPA expressed the view that hazards at warehouses storing paints would be greatly increased. The comments stated that DOT labels and markings on outside containers are used for purposes of material classification of flammable liquids into various NFPA subclasses based on flash point and that this classification system is vital to the nationally recognized and widely used Flammable and Combustible Liquids Code, NFPA 30–1981, and without it the NFPA maintained there could be severe "fire overloading" of storage and warehousing facilities.

An evaluation of the merits of the comments reveals some concern for relaxation of shipping requirements, as proposed in the NPRM, is justified. It is true that accident data compiled from incident reports do not reveal a serious fire problem with paint as it is now shipped, however, an argument can be raised that this condition exists because of the adequacy of the present regulations and that relaxation of requirements would produce more problems than benefits. Prior to issuing the notice, MTB did not fully consider the problems that could arise if paints were inadvertently shipped by air as pointed out by the air carrier, or the non-transportation impacts of the proposals, such as the storage classification problem pointed out by the NFPA. In addition, while the comments from fire service personnel did not provide any factual data to support their concerns for increased risk to fire fighters and the public, the opinions of fire protection professionals should be given further consideration before action is taken. Because of these factors MTB has decided to withdraw those portions of the NPRM which would allow paints with flash points between 20°F. and 73°F. to be shipped as "Consumer commodity, ORM–D".

The NPRM explained the reasons why a change was needed for the entry "Adhesive, n.o.s. *See* Cement, liquid, n.o.s." However, it has been noted that "liquid, n.o.s." is not a part of the proper shipping name for the entry "Adhesives" in the United Nations Recommendations for the Transportation of Dangerous Goods and "liquid, n.o.s." is not a part of the proper shipping name for the entry "Cement" in the IMDG Code. For these reasons, "liquid, n.o.s." has been deleted from both shipping names in the § 172.101 Table. Also, § 173.132 has been changed accordingly.

List of Subjects

49 CFR Part 171

Hazardous materials transportation, Regulations and definitions.

49 CFR Part 172

Hazardous materials transportation, Labeling, Packaging and containers.

49 CFR Part 173

Hazardous materials transportation, Packaging and containers.

In consideration of the foregoing, Parts 171, 172, and 173 of 49 CFR are amended to read as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

1. In § 171.16, paragraph (c)(3) is revised to read as follows:

§ 171.16 Detailed hazardous materials incident reports.

* * * * *

(c)* * *

(3) Paint and paint related material when shipped in packagings of five gallons or less.

* * * * *

PART 172—HAZARDOUS MATERIALS TABLES AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

2. In § 172.101 the Hazardous Materials Table is amended by adding and removing the following named entries to read as follows:

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

3. In § 173.128, the heading and the introductory text of paragraph (a) are revised, paragraph (c) is redesignated paragraph (b), and a new paragraph (c) is added to read to follows:

§ 173.128 Paint and paint related material (flammable liquids).

(a) Except as otherwise provided in this part, the description "Paint" is the proper shipping name for paint, lacquer, enamel, stain, shellac, varnish, liquid aluminum, liquid bronze, liquid gold, liquid wood filler, and liquid lacquer base. The description "Paint related material" is the proper shipping name for a paint thinning, reducing or removing compound. However, if a more specific description is listed in § 172.101, that description must be used. Paint and paint related material must be packaged as follows:

* * * * *

(c) Special exceptions for shipment of paint and paint related material in the ORM–D class are provided in subpart N of this Part.

4. In § 173.132, the heading, introductory text of paragraph (a), and paragraph (b) are revised to read as follows:

§ 173.132 Adhesive; cement; container cement; linoleum cement; pyroxylin cement; rubber cement; tile cement; wallboard cement, and coating solution.

(a) Except as otherwise provided in this Part, a flammable liquid which is an adhesive; cement; container cement; linoleum cement; pyroxylin cement; rubber cement; tile cement; wallboard cement, or coating solution must be packaged as follows: * * *

* * * * *

(b) The adhesive and cements identified in paragraph (a) of this section, except any adhesive or cement containing carbon bisulfide (carbon disulfide), in glass or leakproof packagings consisting of a fiberboard body and metal tops and bottoms of not over 1-quart capacity each, or metal packagings of not over 5 gallons capacity each, further overpacked in a strong outside packaging are excepted from the specification packaging requirements of this Part.

* * * * *

(49 U.S.C. 1803, 1804, 1806; 49 CFR 1.53, App. A to Part 1)

Note.—The Materials Transportation Bureau has determined that this document will not result in a "major rule" under the terms of Executive Order 12291 or a significant regulation under DOT's regulatory policy and procedures (44 FR 11034), nor require an environmental impact statement under the National Environmental Policy Act (49 U.S.C. 4321 et seq.). Based on information available concerning size and nature of entities likely to be affected by this amendment, I certify that this amendment will not have a significant economic impact on a substantial number of small entities because the overall economic impact of this amendment will be minimal. A regulatory evaluation and environmental assessment are available for review in the docket.

Issued in Washington, D.C. on April 14, 1983.

L. D. Santman,

Director, Materials Transportation Bureau.

BILLING CODE 4910–60–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 658

[Docket No. 30316–39]

Shrimp Fishery of the Gulf of Mexico

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule amending the regulations for the Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico. NOAA is modifying, temporarily, the boundary of the Tortugas Shrimp Sanctuary to reduce the area closed to trawl fishing. This action will enable fishermen to harvest marketable-sized shrimp from a small area that was previously closed. NOAA also corrects a definition for the phrase "fishery conservation zone".

EFFECTIVE DATES: April 15, 1983.

ADDRESS: A copy of the regulatory impact review may be obtained from Jack T. Brawner, Regional Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

FOR FURTHER INFORMATION CONTACT: Jack T. Brawner, 813–893–3141.

SUPPLEMENTARY INFORMATION:

Background

The Fishery Management Plan for the Shrimp Fishery of the Gulf of Mexico (FMP) was prepared by the Gulf of Mexico Fishery Management Council (Council) and was approved by the Assistant Administrator for Fisheries, NOAA, on November 7, 1980, under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act). Final regulations implementing the FMP were effective May 20, 1981 (46 FR 27489). The Council prepared an FMP amendment that provides for modification of the closed area, identified in 50 CFR 658.22 as the Tortugas Shrimp Sanctuary (Sanctuary). The FMP amendment was approved on December 28, 1981. A notice of availability and a request for comments on the amendment was published on January 28, 1982 (47 FR 4104). No written comments were received on the FMP amendment during the public comment period which ended on March 15, 1982. A proposed rule which would amend the regulations under the provisions of the

FMP amendment was published for public comment on November 26, 1982 (47 FR 53427).

The proposed rulemaking discussed in detail the reason for the management measure (i.e., temporary geographic modification of the Sanctuary through August 14, 1983, and correction of the definition of the fishery conservation zone). This information is not repeated here.

Response to Comments

The Council was the only commenter on the proposed regulations during the 45-day public comment period which ended Janauary 10, 1983. The Council requested that the proposed termination date for the temporary geographic modification of the Sanctuary be extended from August 14, 1983, to August 14, 1984. NOAA has complied with this request because there would not be sufficient time to evaluate the modification if the termination date remained August 14, 1983.

Classification

The Assistant Administrator for Fisheries, NOAA, has determined that this amendment to the regulations complies with the national standards, other provisions of the Magnuson Act, and other applicable law.

The Administrator, NOAA, has determined that this amendment is not a major rule requiring the preparation of a regulatory impact analysis under Executive Order 12291. The regulatory impact review indicated that potential benefits are significantly greater than expected costs. The rule reduces a restriction on fishermen, slightly reduces enforcement requirements and costs, and is expected to increase shrimp landings.

The Assistant Administrator has determined that there is good cause to waive the 30-day period of delayed effectiveness required under the Administrative Procedure Act (APA). The regulations re-define the geographic scope of the Sanctuary and permit fishing within a portion of the Sanctuary as it is currently defined. The primary purpose of this modification is to obtain data on the migration patterns of shrimp as they move out of the Sanctuary. It is necessary to implement this geographic modification as quickly as possible for fishing to take place during the peak spring season this year. Since the modification to the geographic scope of the Sanctuary will be in effect only through August 14, 1984, information collected this spring will significantly increase the effectiveness of this action.

The Coastal Zone Office for the State of Florida, which is the only State adjacent to the management area, was provided a copy of coastal zone consistency statement for review as to consistency with its approved Coastal Zone Management Program. NOAA concluded that, to the maximum extent practicable, implementation of these rules is consistent with the Coastal Zone Management Program of Florida.

List of Subjects in 50 CFR Part 658

Fish, fisheries, Fishing.

Dated: April 14, 1983.

Roland Finch,

Director, Office of Fisheries Management, National Marine Fisheries Service.

PART 658—[AMENDED]

For the reasons set forth in the preamble, 50 CFR Part 658 is amended as follows:

1. The authority citation for Part 658 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. The definition of fishery conservation zone in § 658.2 is revised to read as follows:

§ 658.2 Definitions.

* * * * *

Fishery conservation zone (FCZ) means that area adjacent to the United States which, except where modified to accommodate international boundaries, encompasses all waters from the seaward boundary of each of the coastal States to a line on which each point is 200 nautical miles from the baseline from which the territorial sea of the United States is measured.

* * * * *

3. Section 658.22 and Figure 1 are revised to read and appear as follows:

§ 658.22 Tortugas shrimp sanctuary.

(a) The area commonly known as the "Tortugas Shrimp Sanctuary," off the State of Florida, is closed to all trawl fishing. The area is that part of the fishery conservation zone shoreward of a line connecting the following points (see Figure 1):

Point	Latitude	Longitude	Common name
N	25°52.9'N.	81°37.95'W.	Coon Key Light.
F	24°50.7'N.	81°51. 3'W.	
G	24°40.1'N.	82°26. 7'W.	New Grounds Shoals Light.
H	24°34.7'N.	82°35. 1'W.	Rebecca Shoals Light
P	24°35 'N.	82°08 'W..	Marqueesas Keys.

(b) Notwithstanding the provisions of paragraph (a), effective through August 14, 1984, trawl fishing is allowed within that portion of the Sanctuary circumscribed by lines connecting the following points:

Point	Latitude	Longitude
F	24°50.7'N.	81°51.3'W.
Q	24°46.0'N.	81°52.4'W.
R	24°44.6'N.	82°11.3'W.
F	24°50.7'N.	81°51.3'W.

Proposed Rules

Federal Register
Vol. 48, No. 78
Thursday, April 21, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF MANAGEMENT AND BUDGET

Implementation of Executive Order 12372, Intergovernmental Review of Federal Programs; Public Meeting and Reopening of Comment Period

AGENCY: Office of Management and Budget; in conjunction with the following Departments: Agriculture, Commerce, Defense (including the Corps of Engineers), Education, Energy, Health and Human Services, Housing and Urban Development, Interior, Justice, Labor, State, Transportation, and Treasury; and in conjunction with the following agencies: ACTION, Environmental Protection Agency, Equal Employment Opportunity Commission, Federal Emergency Management Agency, General Services Administration, National Aeronautics and Space Administration, National Endowment for the Arts, National Endowment for the Humanities, National Science Foundation, Office of Personnel Management, Postal Service, Small Bussiness Administration, Tennessee Valley Authority, and the Veterans Administration.

ACTION: Notice of public meeting and reopening of public comment period.

SUMMARY: This document announces reopening of the public comment period for 28 documents previously published concerning the implementation of Executive Order 12372, "Intergovernmental Review of Federal Programs." A second public meeting has been scheduled.

The comment period is being reopened to allow the public greater time to review the various policies set forth in the proposed rules and to consider several areas of proposed change to the rules resulting from the amending of the Executive Order to include an additional statutory reference.

DATES: The public meeting will be held beginning at 9:30 A.M. on May 5, 1983. The reopened comment period on the notices of proposed rulemaking and the notices of proposed program exclusions will close on May 19, 1983.

ADDRESSES: The public meeting will be held at the GSA Auditorium, 18th and F Streets, N.W., Washington, D.C. Comments on the proposed rules during the reopened period should be sent to the addresses which agencies listed for receipt of comments in their previously published notices.

FOR FURTHER INFORMATION CONTACT: Walter S. Groszyk Jr., Office of the Deputy Associate Director for Management Reform, Office of Management and Budget, Room 10208, 726 Jackson Place N.W., Washington, D.C. 20503. Telephone (202) 395–3050. (Note: The Office of the Deputy Associate Director was recently reorganized and retitled from the Office of the Deputy Associate Director for Intergovernmental Affairs that appeared in earlier notices.)

The individual department and agency notices previously published also contain the names and addresses of individuals who can be contacted for further information on the notices.

SUPPLEMENTARY INFORMATION: Executive Order 12372, "Intergovernmental Review of Federal Programs," was signed by President Reagan on July 14, 1982. On January 24, 1983, all but two of the federal departments and agencies listed above published in the Federal Register either a notice of proposed rulemaking or a notice proposing their programs not be subject to the provisions of the Executive Order.The Department of Housing and Urban Development published a notice of proposed rulemaking on February 23, 1983 and the Tennessee Valley Authority published its notice of proposed rulemaking on March 4, 1983. A public meeting on the proposed rules was held on March 2, 1983. The Executive Order established a date of April 30, 1983 for implementing the policies of the Order. This effective date was extended by the President to September 30, 1983; 48 FR 15587, April 11, 1983.

Reopening of the Comment Period

While the public comment period of most agencies ended on March 10, 1983, the public comment periods for the Department of Housing and Urban Development and the Tennessee Valley Authority ended on April; 11, and April 4, 1983, respectively. The Department of the Interior on March 24, 1983 extended the public comment period on part of its notice until April 1, 1983. The federal departments and agencies listed above are reopening the comment period for all notices effective immediately. The comment period will now end on May 19, 1983. Any comments that were received subsequent to the end of the comment period and prior to this reopening of the comment period will be included in the agency dockets and considered.

Date, Time, and Location of Public Meeting

A public meeting will be held on May 5, 1983 to discuss possible changes to the proposed policies presented in the notices of proposed rulemaking. The meeting will be held in the Auditorium of the General Services Administration Building, 18th and F Streets, N.W., Washington, D.C., beginning at 9:30 A.M. The public meeting will be structured to allow federal officials to outline proposed changes, to discuss these changes with parties attending the public meeting, and to receive the views of the public on the proposed rules and changes contemplated to the proposed rules. If any additional federally-prepared material on proposed changes is given to those attending the public meeting, that material will also be provided to all parties previously submitting comments on the content of the proposed rules. Any additional material can also be obtained by requesting such from Walter Groszyk whose address appears above.

Areas of Change to the Proposed Rules

These changes to the proposed rules are intended to reflect the April 8, 1983, amendment of the Executive Order that cites additional statutory authority for the policies of the Order. These changes also respond to numerous commenters who sought clarification of whether and how the proposed rules would implement the provisions of Section 401 of the Intergovernmental Cooperation Act of 1968, 42 U.S.C. 4231, and Section 204 of the Demonstration Cities and Metropolitan Development Act of 1966, 42 U.S.C. 3334. The changes would encompass the entirety of Section 401. These changes do not represent final decisions on how best to carry out the amended Executive Order or to respond

to the public comments, but are possible solutions to concerns raised by the commenters and to the citation of additional statutory authority. Further public comment is sought. Alternatives to these possible solutions are also welcome. The section of the proposed rules affected by these possible solutions is identified in parentheses.

A number of other changes to the proposed rules are contemplated based on the many public comments received to date. These contemplated changes are not discussed in this notice. Public comment continues to be solicited on all of the previously published notices. Specific suggestions on the most effective means for linking assistance applications with comments by state, local, regional, or areawide entities would be particularly helpful.

Federal Agency Programs and Activities to be Covered: Agencies proposed program exclusions for public comment based on a set of government-wide criteria. Although some commenters were satisfied with the proposed exclusions and inclusions, many commenters wanted all programs included or fewer exclusions. —The scope of programs and activities covered by th Executive Order would be broadened to reflect the provisions of section 401 of the Intergovernmental Cooperation Act and Section 204 of the Demonstration Cities and Metropolitan Development Act. (—.3)

Federal Agency Responsibilities for Programs or Activities not Selected for Review: A few commenters wanted local governments to be able to select programs not included in the state process. —The manner of selecting programs or activities would be clarified, including an indication of federal responsibilities to local, regional, or areawide entities where programs or activities are not selected for inclusion under the state process. (—.5)

The Role of Areawide Agencies in Intergovernmental Review: Several commenters sought clarification on whether the proposed rules implemented all of Title IV of the Intergovernmental Cooperation Act and Section 204 of the Demonstration Cities and Metropolitan Development Act. —The rules would be changed to implement the applicable provisions of these two Acts. Section 204 allows areawide agencies established by state or local law to review and comment on applications for federal assistance for planning or construction of certain type facilities or utilities. For those programs or activities subject to areawide review which the state has included under its process, the state process would be required to pass through all comments from areawide agencies that differed from the state process recommendation. In the absence of a state process and for those programs and activities not included within a state process, applicants must provide a 60 day period for areawide agency review and comment, with comments then considered and taken into account by the appropriate federal agency. The federal agency would "accommodate or explain" any consensus comments from an areawide agency that were sent through the state single point of contact, even for programs and activities not included under the state process. (—.6)

Role of the Single Point of Contact: Many commenters did not understand the proposed role of the single point of contact or wanted it changed. —The role and responsibility of the single point of contact would be clarified. The single point of contact would transmit official, priority state process views. (The concept of priority views is being proposed as a means of highlighting for federal agency attention those recommendations involving areas of importance to state and local elected officials.) In addition, to assure federal agency awareness of views differing from a state process recommendation, the single point of contact would pass through to the federal agency all differing views, of state, local, regional, or areawide entities and officials. The single point of contact could also transmit a consensus of state, local, areawide, or regional views, as appropriate. (—.6)

Consensus Building between State and Local Officials: Comments were received suggesting that the state process foster consensus building between state and local officials. —A federal department or agency would be required to accommodate or explain (in cases of nonaccommodation) only those views transmitted by a single point of contact that represent either a state process recommendation or a consensus of state, local, areawide, or regional views, as appropriate, in the absence of a state process recommendation. Differing views passed through by the single point of contact would be considered, but the "accommodate or explain" obligation would not apply. (—.7)

BILLING CODE 3110-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Parts 1120, 1126, 1132, and 1138

[Docket Nos. AO-231-A50, et al.]

Milk in Texas and Certain Other Marketing Areas; Rescheduling of Hearing on Proposed Amendments to Tentative Marketing Agreements and Orders

7 CFR Parts	Marketing area	AO Numbers
1126	Texas	AO-231-A50.
1120	Lubbock-Plainview, Texas	AO-328-A24.
1132	Texas Panhandle	AO-262-A34.
1138	Rio Grande Valley	AO-335-A29.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Rescheduling of public hearing on proposed rulemaking.

SUMMARY: This notice reschedules for June 27, 1983, a public hearing to consider industry proposals relative to the orders regulating the handling of milk in the marketing areas listed above. One of the proposals would merge the marketing areas under one order and expand the merged area to include additional territory in the States of Texas, New Mexico, and Arkansas. The hearing was initially scheduled to begin on April 26, 1983. A cooperative association and proprietary handlers requested the rescheduling, indicating that they need additional time to prepare for the hearing.

DATE: The hearing will convene at 1:30 p.m. on June 27, 1983.

ADDRESS: The hearing will be held at the Sheraton Grand Hotel, Dallas-Ft. Worth Airport, Highway 114 and Esters Boulevard, Dallas, Texas 75261.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-4824.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of Hearing—Issued March 30, 1983, published April 5, 1983 (48 FR 14613).

A notice was issued on March 30, 1983, giving notice of a public hearing to be held April 26, 1983, with respect to proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the aforesaid specified marketing areas.

Notice is hereby given, pursuant to the rules of practice applicable to these proceedings (7 CFR Part 900), that the said hearing is rescheduled to be held at the Sheraton Grand Hotel, Dallas-Ft. Worth Airport, Highway 114 and Esters Boulevard, Dallas, Texas 75261, beginning at 1:30 p.m., local time, on June 27, 1983.

List of Subjects in 7 CFR Parts 1120, 1126, 1132, and 1138

Milk marketing orders, Milk, Dairy products.

Signed at Washington, D.C., on April 15, 1983.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 33

[Docket No. 82-ANE-49, Notice No. SC-83-1-NE]

Special Conditions; General Electric Company CT7 Series Turboprop Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This notice proposes special conditions for type certification of the General Electric Company CR7 series turboprop engines. These engines will have novel or unique design features associated with a propeller brake for which the applicable airworthiness regulations do not contain adequate or appropriate safety standards. This notice proposes the safety standards which the Administrator finds necessary to establish a level of safety equivalent to that established in the regulations.

DATE: Comments must be received by June 1, 1983.

ADDRESSES: Comments on this proposal may be mailed in duplicate to Federal Aviation Administration, Office of the Regional Counsel, Attn: Rules Docket No. 82-ANE-49, 12 New England Executive Park, Burlington, Massachusetts 01803. Comments in the Rules Docket may be examined weekdays, except Federal holidays, between 8:00 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Donald F. Perrault, Engine and Propeller Standards Staff, ANE-110, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone (617) 273-7330.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to comment on these special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communciations received on or before the closing date for comments specified above will be considered by the Administrator before taking action on this proposal. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date in the Rules Docket for examination by interested persons.

The applicable airworthiness standards for the General Electric Company CT7 series turboprop engines are those regulations designated in accordance with § 21.21 and are known as the "Type Certification Basis" for the engine design. Special conditions may be issued and amended, as necessary, as part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.17(a)(1) do not contain adequate or appropriate safety standards because of novel or unusual design features of the engine. Special Conditions are now being proposed in accordance with § 21.16, to become part

of the type certification basis in accordance with § 21.17(a)(2).

On August 6 and 14, 1981, General Electric Company, 1000 Western Avenue, Lynn, Massachusetts 01907, filed applications for type certification of its CT7–5A and –7 model turboprop engines, respectively, under Part 33 of the Federal Aviation Regulations (FAR). The CT7–5A and –7 engines are takeoff-rated at 1630 and 1700 shaft horsepower, respectively. Since these engines are turboprop derivatives of the existing type certificated CT7 turboshaft series engines, the Special Conditions proposed herein will be made applicable to the CT7 series turboprop engines to also cover future models within this engine series. The type certification basis for the CT7–5A and –7 engines is proposed to be Part 33, effective February 1, 1965, as amended by Amendments 33–1 through 33–5, Special Condition No. 33–76NE–2 (to be amended), and the Special Condition proposed herein.

The CT7–5A and –7 turboprop engines incorporate a propeller brake which will allow the propeller to be brought to a stop, while the gas generator portion of the engine remains in operation, and remain stopped during operation of the engine as an auxiliary power unit ("APU Mode").

The applicable airworthiness requirements do not contain adequate or appropriate safety standards for the type certfication of this unusual design feature.

Proposed Special Conditions

Accordingly, the FAA proposes the following Special Conditions for the General Electric Company CT7 series turboprop engines equipped with a propeller brake:

In addition to the requirement of FAR 33.87, the applicant must conduct the folowing runs:

1. Ground locking. A total of at least 45 hours with the propeller brake engaged in a manner which clearly demonstrates its ability to function without adverse effects, while the engine is operating in the "APU Mode" under the maximum conditions of engine speed, torque, temperature, air bleed, and power extraction as specified by the applicant.

2. Dynamic braking. A total of at least 400 application-release cycles of brake engagements must be made in a manner which clearly demonstrates its ability to function, without adverse effects, under the maximum conditions of engine acceleration/deceleration rate, speed, torque, and temperature. The propeller must be stopped prior to brake release.

3. Conduct at least 100 engine starts and stops with the propeller brake engaged.

This testing may be performed in conjunction with the endurance test schedule of FAR 33.87(b) if system parameter conditions permit.

List of Subjects in 14 CFR Part 33

Engines, Propellers, Aircraft safety.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c). Department of Transportation Act (49 U.S.C. 1655(c); and 14 CFR 11.28, 11.29(b), 11.45)

Note.—This action is not a proposed rule of general applicability and is therefore not covered under Executive Order 12291 or the Regulatory Flexibility Act. The FAA has determined that this document is not considered to be significant as defined in Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the regulatory evaluation prepared for this action is contained in the docket. A copy of it may be obtained by contacting the person identified as the information contact.

Issued in Burlington, Massachusetts, on April 7, 1983.

Robert E. Whittington,

Director, New England Region.

14 CFR Ch. I

[Summary Notice No. PR–83–3]

Petitions for Rulemaking; Summary of Petitions Received and Dispositions of Petitions Denied or Withdrawn

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for rulemaking and of dispositions of petitions denied or withdrawn.

SUMMARY: Pursuant to FAA's rulemaking proivisions governing the applications, processing, and disposition of petitions for rulemaking (14 CFR Part 11), this notice contains a summary of certain petitions requesting the initiation of rulemaking procedures for the amendment of specified provisions of the Federal Aviation Regulations and of denials or withdrawals of certain petitions previously received. The purpose of this notice is to improve the public's awareness of this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and be received on or before, June 21, 1983.

ADDRESSES: Send comments on the petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204), Petition Docket No. ———, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–204), Room 916, FAA Headquarters Building (FOB–10A), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–3644.

This notice is published pursuant to paragraphs (b) and (f) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C. on April 15, 1983.

Richard C. Beitel,

Acting Assistant Chief Counsel, Regulations and Enforcement Division.

PETITIONS FOR RULEMAKING

Docket No.	Petitioner	Description of the petition
23525	Leonard E. Wolff	*Description of petition:* Amendment of § 21.191 to allow operation of an aircraft of which 41% has been fabricated and assembled by persons who have constructed the aircraft solely for the purpose of their own education or recreation. *Regulations affected:* 14 CFR 21.191(g).

PETITIONS FOR RULEMAKING—Continued

Docket No.	Petitioner	Description of the petition
23544	Raisbeck-Weslorn	*Petitioner's reason for rule:* The existing rule penalizes and discriminates against those aircraft designers whose aircraft designs meet the overall tone and purpose of § 21.191(g) but do not meet the "over 50%" condition of the rule. Changing the rule would result in an increased activity in amateur-built aircraft, which in turn will stimulate the economy by creating additional demands for engines, parts, accessories, etc. This in turn will result in a stronger aircraft industry. The rules applying to this part are 20 to 30 years old. The rules were developed at a time when the methods of construction entailed primary usage of wood, fabric, steel tubing and aluminum. Today's composite structure (reinforced plastics) are evident in a number of new designs. The methods of construction differ with each design, and eliminates some of the actual fabrication. Therefore, the present 51" requirement is not consistent with present day composite structure (Kits) technology. *Description of petition:* To amend § 21.195 to permit aircraft modifiers to use those aircraft for market survey purposes in the same manner as airfram manufacturers. *Regulations affected:* 14 CFR 21.195(a). *Petitioner's reason for rule:* The existing rule penalizes and discriminates against those aircraft modifiers who should be allowed to use their aircraft for Market Survey the same as aircraft manufacturers.

PETITIONS FOR RULEMAKING: WITHDRAWN OR DENIED

Docket No.	Petitioner	Description and disposition of the rule requested
None this period

CIVIL AERONAUTICS BOARD

14 CFR Part 212

[EDR-457; Docket 41415]

Charter Trips by Foreign Air Carriers

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The CAB proposes to prohibit some foreign air carriers from advertising and selling charters until they receive permission to perform those charters. This action is taken to protect potential passengers and U.S. international aviation interests.

DATES: Comments by: May 23, 1983.

Comments and relevant information received after this date will be considered by the Board only to the extent practicable.

Requests to be put on Service List by: May 6, 1983.

The Docket Section prepares the Service List and sends it to each person listed on it, who then serves comments on others on the list.

ADDRESSES: Twenty copies of comments should be sent to Docket 41415, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C., as soon as they are received.

FOR FURTHER INFORMATION CONTACT: David Schaffer, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428 (202) 673-5442.

SUPPLEMENTARY INFORMATION: Section 212.4 of the Board's rules (14 CFR 212.4) prohibits a foreign air carrier from performing certain charters until it receives approval from the Board. The charters subject to this prior approval requirement are fifth freedom charters (charters that originate and terminate in countries other than the foreign carrier's home country), long-term wet leases (leases for more than 60 days where the lessor provides both aircraft and crew), part charters (flights carrying both charter and scheduled passenger traffic), and other charters for which the Board requires prior approval under § 212.4 (e) or (f). A foreign carrier's application for approval must be filed between 5 and 45 days before the proposed flight depending on the type of charter or the reasons that the Board has imposed the prior approval requirement on it.

Recently, the Board has become concerned that foreign carriers may undermine the prior approval system by advertising and selling passenger charter flights before receiving the required approval. This presents both international aviation and consumer protection problems.

The Board adopted the prior approval system to monitor and control charter activity by foreign air carriers and thereby ensure that there was charter flight reciprocity between the United States and foreign countries. It is now based on the Congressional directives in sections 102(a)(12) and 1102(b) of the Federal Aviation Act (49 U.S.C. 1302(a)(12) and 1502(b)) and section 2(a) of the Fair Competitive Practices Act (49 U.S.C. 1159b(a)) to ensure equal competitive opportunities for U.S. carriers.

The prior approval requirement gives the Board the opportunity to review aviation relations with the foreign country involved and decide whether there are problems that would warrant denial of the charter request. If the charter in question has already been marketed and sold to prospective passengers, however, those persons' plans would be disrupted if the Board took the strong action that might be necessary to protect U.S. aviation interests. Advertising and selling may therefore place pressure on the Board to grant approval even where reciprocity problems might call for a denial. The rule proposed here, by making advertising and selling contingent on prior Board approval, would relieve some of that pressure.

An additional benefit of the proposed rule is that it would tend to prevent travelers from being deceived about the status of their charter flight. Section 411 of the Act (49 U.S.C. 1381) prohibits foreign air carriers from engaging in unfair and deceptive practices. The Board tentatively concludes that advertising and selling transportation on a flight that is unlikely to be performed is a violation of that section. Most prospective passengers are not aware that a flight is subject to government approval, or if they are, assume that approval is merely a formality. They make plans based on the reasonable assumption that, barring some unexpected event such as bad weather, the flight will run more or less on schedule. If the Board must disapprove the charter for foreign policy reasons, however, their travel plans will be disrupted. Section 411 and this rule are designed to avoid such disruptions.

Of course, not all charters subject to prior approval are likely to be disapproved by the Board. Where there are no reciprocity problems, the Board grants the necessary approval as a

matter of course. Therefore, to apply this advance marketing prohibition to all foreign air carrier charters would be an unwarranted departure from our general policy of allowing the charter industry the greatest degree of freedom consistent with the public interest. The proposed prohibition is needed only where the Board has found reciprocity defective and has imposed extraordinary prior approval requirements under § 212.4(e) of the Board's rules. Currently only ten nations' carriers are subject to these procedures.

Since the basis for this rule is in part passenger protection, its restrictions would not apply to cargo charters. In the case of cargo charters, the carrier normally does not seek Board approval under Part 212 until the flight has been chartered by the shipper.

Regulatory Flexibility Act

In accordance with 5 U.S.C. 605(b), as added by the Regulatory Flexibility Act, Pub. L. 96–354, the Board certifies that this rule would not, if adopted, have a significant economic impact on a substantial number of small entities. The change proposed here will affect only foreign airlines providing international air service. These are typically not small airlines.

Because of the important U.S. aviation and consumer protection interests that remain unprotected in the absence of this rule, the Board finds that it is in the public interest to allow only 30 days for comments. In addition, the increasing popularity of charters and the fact that the high season for charters is almost upon us justify a shorter than normal comment period. For the same reasons, if adopted the Board expects to make the rule effective less than 30 days after it is published in the **Federal Register**. Carriers subject to this rule would have to stop advertising and selling unapproved passenger charters after the effective date.

List of Subjects in 14 CFR Part 212

Air transportation—foreign, Charter flights, Reporting requirements, Surety bonds, Travel agents.

PART 212—[AMENDED]

Accordingly, the Board proposes to amend paragraph (a) of § 212.4 of 14 CFR Part 212, *Charter Trips by Foreign Air Carriers*, by adding another sentence at the end thereof so that it would read as follows:

§ 212.4 Prior authorization requirements.

(a) A foreign air carrier shall not perform any charter trip for which a statement of authorization is required until one has been granted by the Board. In addition, if the carrier is one that is required to obtain a statement of authorization under paragraph (e) of this section, it shall not advertise or sell any passenger charter services except those that have been specifically authorized by the Board.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 210 and 239

[Release Nos. 33–6461; 34–19674; File No. S7–968]

Accounting for Internal Costs of Developing Computer Software for Sale or Lease to Others

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rules.

SUMMARY: The Commission is proposing to prohibit the capitalization of internal costs of developing computer software for sale or lease to others by registrants that have not previously disclosed the adoption of such a practice. This action is proposed in order to prevent further divergence in practice in accounting for such costs. The proposed rules would also require registrants that have previously disclosed the adoption of such a practice to disclose the effect on net income of not expensing all such costs as incurred. When the authoritative accounting literature provides better guidance for determining (1) which activities associated with developing such computer software are not research and development activities, and (2) the appropriate accounting for costs of those activities, if any, which are not research and development activities, the Commission will reconsider any rules adopted by it in this area.

DATE: Comments should be received by the Commission on or before May 31, 1983.

ADDRESS: Comment letters should refer to File No. S7–968 and should be submitted in triplicate to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. All comments received will be available for public inspection and copying in the Commission's Public Reference Room, 450 5th Street, NW., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT: Marc D. Oken or Robert K. Herdman (202/272–2130), Office of the Chief Accountant, or Howard P. Hodges 272–2553), Division of Corporation Finance, Securities and Exchange Commission, Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION:

Background

The Commission believes that most registrants engaged in the business of selling, leasing or otherwise marketing computer software to others expense all internal software development costs as incurred. However, the Commission is concerned about the increasing number of registrants that are capitalizing internal costs of developing computer software. Since these costs can constitute a significant percentage of operating costs incurred by registrants in the computer software industry, the method of accounting for them can have a material impact on financial position and results of operations. Furthermore, the existence of differing accounting practices has created a source of incomparability between the financial statements of those registrants that are capitalizing such costs and others in the industry that are expensing them.

As discussed further below, two separate pronouncements of the Financial Accounting Standards Board ("FASB") and an FASB staff technical bulletin have addressed the accounting for internal software development costs in the context of the relationship of computer software development activities to research and development activities.[1] Nonetheless, the existing literature has not prevented the diversity of practice which is developing. Because of the increasing diversity of practice in this area, the Commission believes that the existing accounting literature should be clarified to provide more explicit guidance for determining which computer software development activities do not constitute research and development activities and to specify the appropriate accounting for the costs of any such activities that are

[1] In Statement of Financial Accounting Standards No. 2, "Accounting for Research and Development Costs" ("SFAS No. 2"), the FASB required that the costs of research and development activities be charged to expense as incurred.

determined not to be research and development activities.

In recognition of this need for clarification, the Accounting Standards Executive Committee ("AcSEC") of the AICPA and the Association of Data Processing Service Organizations ("ADAPSO") have formed a joint task force to develop issues papers for consideration by the FASB. The Commission understands that the objectives of the proposed issues papers are to clarify the requirements for accounting for software development costs, as well as to address other financial reporting issues of importance to the computer software industry (such as principles governing revenue recognition and guidance concerning amortization periods for purchased and any internally developed software that is capitalized). The Commission is concerned that until such time as the accounting literature is clarified for software development activities, the present diversity in practice will lead to increased use of the capitalization method without adequate guidance as to either its propriety or the proper subsequent accounting of costs that have been capitalized. Therefore, the Commission is issuing this release to propose a prohibition on the capitalization of such costs by any registrant that has not previously followed that practice. When adequate guidance has been developed, the Commission will reconsider any rules adopted by it in this area.

Existing Accounting Literature

The FASB's conclusion in SFAS No. 2 (October 1974) that the costs of all research and development activities should be expensed as incurred was stated to be based on both the uncertainty of future benefits derived from such activities and the lack of causal relationship between expenditures made and any future benefits.[2] SFAS No. 2 provides general examples, applicable to companies in all industries, of activities that typically would be included in or excluded from the definition of research and development. In paragraph 31, it also provides the following example specifically applicable to computer software development:

> [E]fforts to develop a new or higher level of computer software capability intended for sale (but not under a contractual arrangement) would be a research and development activity encompassed by this Statement.

[2] SFAS No. 2, paragraphs 30–41. The concept of future benefits discussed by the FASB includes commercial success in the marketplace.

Soon thereafter, in February 1975, the FASB issued FASB Interpretation No. 6, "Applicability of FASB Statement No. 2 to Computer Software" ("Interpretation No. 6"), in an effort to explain further the relationship of costs incurred to develop computer software to the general examples used in SFAS No. 2 for the identification of research and development costs. Paragraph 7 of Interpretation No. 6 addresses development of software as a product or process to be sold, leased, or otherwise marketed. It provides that:

> [I]f the development of software is undertaken to create a new or significantly improved product or process without any contractual arrangement, costs incurred for *conceptual formulation or the translation of knowledge into a design* would be research and development costs. Other costs, including those incurred for programming and testing software, are research and development costs when incurred in the search for or the evaluation of product or process alternatives or in the design of a pre-production model. On the other hand, costs for programming and testing are *not* research and development costs when incurred, for example, in routine or other on-going efforts to improve an existing product or adapt a product to a particular requirement or customer's need. (Emphasis in original.)

This language basically tracks the general examples of SFAS No. 2 in an equally broad manner and, until recently, has generally been interpreted in practice as requiring that all internal computer software development costs, other than those incurred for relatively minor modifications of existing products, be expensed.

Finally, in December 1979 the FASB staff issued Technical Bulletin No. 79–2, "Computer Software Costs" (TB 79–2"), in response to a request by the software industry for clarification of SFAS No. 2 and Interpretation No. 6. In TB 79–2, by reference to the criteria of SAFS No. 2, the FASB staff stated that not all computer software *production* costs must necessarily be considered research and development costs.[3] However, neither a specific definition of production nor any other guidance as to the activities which are not research and development activities was provided.

[3] "Production" is a term generally used by the industry to denote programming and testing activities. In this regard, the Commission staff has learned that some believe that the nature of production activities is such that they should never be considered to be research and development activities. They base this conclusion on their opinion that these activities represent routine implementation of a program's design, and point out that a working pre-production model does not exist in the conventional sense. Thus, they would consider production activities associated with both new products and routine enhancements of existing products to be other than research and development activities.

TB 79–2 did, however, add the warning that "a determination that software production costs are not research and development costs does not necessarily mean that they would be inventoriable or deferrable to future operations. Those decisions can only be made in light of all of the facts and circumstances surrounding the particular situation."

Recent Developments

The Commission's staff has recently noted that an increasing number of registrants in the computer software sales and service industry are capitalizing material amounts of internal software development costs. Through the comment process, the staff has learned that these registrants believe that the existing accounting literature permits such capitalization because they have expensed costs that they consider to be related to research and development activities (essentially those incurred through the "conceptual formulation and design" phase), and have capitalized only what they consider to be "production" costs. In some instances these registrants have limited capitalization to projects which contend are intended to result in "routine improvements of existing products."[4] Other registrants have also capitalized production costs associated with new products.

The Commission is concerned about the propriety of capitalization of costs of all production activities in the absence of more definitive guidance. The nature of the attendant programming and testing functions may continually require revisions to the original plans such that the "conceptual formulation or the translation of knowledge into a design" phase may continue throughout the length of the project. Further, even

[4] Following are two examples of the types of products characterized as routine improvements by these registrants. The first involves adaptation of a previously developed software application to a higher level of computer hardware capability. The second involves integration of a new processing application into a previously developed package of applications. In some cases, the package of applications can be marketed either with or without the new application; in others, only the upgraded package can be marketed. In both situations, as well as in the development of new products, these activities have often required that significant costs be expended over an extensive period of time. In order to distinguish their activities from the development of new products, the registrants have contended that, since their basic "product" has already been developed, the current activities are "routine or other on-going efforts to improve an existing product" which are assured of successful completion. The Commission believes, however, that because of the nature of these activities, the amounts expended, and the extended development period, these efforts might also be viewed as the "creation of a new or significantly improved product or process."

though the companies may engage in these activities only after studying market needs, there typically is uncertainty whether any products ultimately produced will effectively meet those needs, or that the needs will still exist when the development project is completed. For example, others may develop programs that perform the application more efficiently or may create the same capability with a reduced expenditure of cost, thus creating a competitive advantage. Also, rapid changes in industry technology may result in some product obsolescence by the time the product is introduced. These latter considerations were among the factors inherent in the FASB's conclusions on accounting for research and development costs in general. They should also be important facts and circumstances to be evaluated in connection with a descision to capitalize production costs.

Conclusion

The above matters are expected to be addressed by the joint task force AcSEC, and ultimately by the FASB so that registrants in the computer software development industry will have sufficient guidance in accounting for the various costs involved to ensure comparable financial reporting for similar situations. In view of these anticipated private sector actions, the Commission has concluded that it should not seek to develop definitive accounting guidelines in this area at the present time. However, the Commission is concerned that the current trend toward capitalization will continue until such time as appropriate clarification of the existing standards is accomplished. This would increase the incomparability of financial information among registrants in the computer software industry and also may result in inappropriate capitalization of costs by some registrants.

Accordingly, the Commission has determined to propose a new Rule 3–21 of Regulation S–X [17 CFR Part 210]. This rule would provide that companies which had not disclosed the practice of capitalizing internal computer software development costs [5] either in audited financial statements issued prior to the date of this release,or in a report or registration statement filed with the Commission prior to the date of this release, shall not follow such a practice in financial statements filed with the Commission after that date.[6] Companies which have so disclosed such a practice prior to that date may continue to apply it on a consistent basis to the extent the methods of applying the practice are not inconsistent with the accounting literature that does exist. In view of the Commission's understanding as to the predominant accounting practice of the industry, the proposed rules would also require disclosure by registrants that are permitted to continue to capitalize such costs, of the effect on net income (and earnings per share) of following such a practice as opposed to charging to expense all such costs as incurred.

The Commission also reminds registrants that have capitalized such costs that their financial statements should include disclosure of the policies being followed, together with the amounts of such costs and related amortization. The method and period of amortization, as well as the bases therefor, should also be disclosed in the notes to the financial statements.

In reviewing specific registrant cases, the Commission staff has noted that the period over which capitalized costs of purchased and internally developed software are currently being amortized has ranged from three years to as many as seven years. In determining an appropriate amortization period based on the relevant facts and circumstances, registrants should carefully consider the rapid pace of technological development and the increased competition and growth in this industry. The Commission believes that such factors dictate the use of very short amortization periods.

Accounting, Reporting and recordkeeping requirements, Securities.

Text of Proposed Rules

Chapter II Title 17 of the Code of Federal Regulations is proposed to be amended as follows:

PART 210—FORM AND CONTENT OF AND REQUIREMENTS FOR FINANCIAL STATEMENTS, SECURITIES ACT OF 1933, SECURITIES EXCHANGE ACT OF 1934, PUBLIC UTILITY HOLDING COMPANY ACT OF 1935, INVESTMENT COMPANY ACT OF 1940, AND ENERGY POLICY AND CONSERVATION ACT OF 1975

1. By adding § 210.3–21 to read as follows:

§ 210.3–21 Special provisions as to financial statements of companies engaged in marketing computer software.

(a) Companies which had not disclosed the practice of capitalizing internal costs of developing computer software as a product or process to be sold, leased, or otherwise marketed to others in either: (1) Audited financial statements issued prior to April 14, 1983; or (2) a report or registration statement filed with the Commission prior to April 14, 1983; shall not follow such a practice in financial statements filed with the Commission after April 14, 1983.

(b) Because the term product also encompasses services that are sold, leased, or otherwise marketed to others, the prohibition in paragraph (a) of this section applies, for example, to a data processing service bureau or a computer time-sharing company.

(c) A company which, pursuant to paragraph (a) of this section continues to follow the practice of capitalizing internal costs of developing computer software as a product or process to be sold, leased, or otherwise marketed to others, shall disclose for each period for which an income statement is required to be presented, the effect on net income (and earnings per share) of not charging all such costs to expense as incurred.

PART 239—FORMS PRESCRIBED UNDER THE SECURITIES ACT OF 1933

2. By adding Item 21(j) in Form S–18 in § 239.28 to read as follows (Form S–18 does not appear in the Code of Federal Regulations):

§ 239.28 [Form S–18, amended]

* * * * *

Item 21(j) Special instructions for companies engaged in marketing computer software

(1) Companies which had not disclosed the practice of capitalizing internal costs of developing computer software as a product or process to be sold, leased, or otherwise marketed to others in either: (1) Audited financial statements issued prior to April 14, 1983; or (2) a report or registration statement filed with the Commission prior to April 14, 1983; shall not follow such a practice in financial statements filed with the Commission after April 14, 1983.

(2) Because the term product also encompasses services that are sold, leased, or otherwise marketed to others, the prohibition in (1) above applies, for example, to a data processing service bureau or a computer time-sharing company; or

(3) A company which, pursuant to (1) above, continues to follow the practice of capitalizing internal costs of developing computer software as a product or process to be sold, leased, or otherwise marketed to others, shall disclose for each period for which an income statement is required to be

[5] This conclusion applies to all development of software as a product or process to be sold, leased, or otherwise marketed. For the reasons set forth in paragraph 7 of Interpretation No. 6, it also applies to internal costs incurred in developing software to be used by a data processing service bureau or a computer time-sharing company.

[6] A revision to form S–18 is also proposed since financial statements included in registration statements on that form are not prepared pursuant to all of the provisions of Regulation S–X.

presented, the effect on net income (and earnings per share) of not charging all such costs to expense as incurred.

* * * * *

Authority: These rules are being proposed pursuant to the authority in Sections 5, 6, 7, 10, 19a and Schedule A(25) and (26) of the Securities Act of 1933, 15 U.S.C. 77e, 77f, 77g, 77j, 77s(a), 7nn(25) and (26); and Sections 12, 13, 14, 15(d), and 23(a) of the Securities Exchange Act of 1934, 15 U.S.C. 78l, 78m, 78n, 78o(d), 78w(a).

Pursuant to Section 23(a)(2) of the Securities Exchange Act, the Commission has considered the impact of these proposals on competition and it is not aware at this time of any burden that such rules, if adopted, would impose on competition. However, the Commission specifically invites comments as to the competitive impact of these proposals, if adopted.

In addition, the Commission is mindful of the cost to registrants and others of its proposals and recognizes its responsibilities to weigh with care the costs and benefits which result from its rules. Accordingly, the Commission specifically invites comments on the costs to registrants and others of the adoption of the proposals published herein.

By the Commission.

George A. Fitzsimmons,

Secretary.

April 14, 1983.

Initial Regulatory Flexibility Analysis

This initial regulatory flexibility analysis, which relates to proposed rules for financial statements of companies engaged in marketing computer software, has been prepared in accordance with 5 U.S.C. 603.

1. *Reasons for Proposed Action*—The Commission is proposing amendments to Regulation S–X and Form S–18 to prohibit the capitalization of internal costs of developing computer software for sale or lease to others by registrants that had not previously adopted such a practice.

As discussed in the section of the release entitled, "Recent Developments," the Commission staff has recently noted that an increasing number of registrants in the computer software sales and service industry are capitalizing material amounts of internal software development costs. Because cost registrants in the industry continue to expense all such costs as incurred, the trend towards capitalization has created a source of incomparability between the financial statements of those registrants that are capitalizing such costs and those registrants that are expensing them.

While the private sector has initiated activities intended ultimately to result in clarification of the requirements for accounting for such costs, the Commission is concerned that, until such time as appropriate clarification occurs, the present diversity in practice will lead to increased use of the capitalization method without adequate guidance as to either its propriety or the proper accounting for costs that have been capitalized. Should this occur, incomparability of financial information among registrants in the computer software industry would increase. Also, inappropriate capitalization of costs by some registrants might occur.

2. *Objectives*—As stated in the "Summary" to the release, the primary objective of the proposed rules is to prevent further divergence in practice in accounting for internal computer software development costs. To that end, the proposed rules would prohibit the capitalization of internal costs of developing computer software for sale or lease to others by registrants that had not previously adopted such a practice. When the accounting literature provides better guidance for determining (1) which activities associated with developing such computer software are not research and development activities, and (2) the appropriate accounting for costs of those activities, if any, which are not research and development activities, the Commission will reconsider any rules adopted by it in this area.

Further, in order to facilitate comparison of financial information of registrants engaged in such activities, and in view of the Commission's understanding as to the predominant accounting practice of the industry, the proposed rules would also require disclosure by registrants that have capitalized such costs of the effect on net income of following such a practice as opposed to charging to expense all such costs as incurred.

3. *Legal Basis*—The Commission is proposing the rules for financial statements of companies engaged in marketing computer software pursuant to the authority in Sections 5, 6, 7, 10, 19a and Schedule A(25) and (26) of the Securities Act of 1933, 15 U.S.C. 77e, 77f, 77g, 77j, 77s(a), 77nn(25) and (26); and Sections 12, 13, 14, 15(d), and 23(a) of the Securities Exchange Act of 1934, 15 U.S.C. 78l, 78m, 78n, 78o(d), 78w(a).

4. *Small Entities Subject to Rule*—For purposes of this analysis, the Commission is using the definition of "small business" as adopted in Securities Act Release No. 6380.[7] That release provides that when used in reference to the Securities Act, small business means any issuer whose total assets on the last day of its most recent fiscal year were $3 million or less and is engaged or proposes to engage in "small business financing." [8] When used with reference to an issuer or a person other than an investment company under the Securities Exchange Act, small business means an issuer or person that, on the last day of its most recent fiscal year, had total assets of $3 million or less. Accordingly, the amendments would affect all entities engaged in marketing computer software which fall within the Commission's definition of a "small entity." Since Form S–18 is available to non-reporting entities seeking to raise $5 million through the sale of their securities, a substantial portion of the registrants using the form would be "small businesses" as described above. It is not possible to estimate the number of small businesses that would be affected by the proposal, since issuers may use Form S–18 when they elect to make a public offering based on, among other things, general economic and market conditions and trends within the particular industry.

5. *Reporting, Recordkeeping, and Other Compliance Requirements*—The proposed rules would introduce no new data collection or recordkeeping requirements for any companies which are engaged in marketing computer software. Information about internal costs of developing such software is already generally available as an integral part of existing accounting records and the proposed rules would only affect whether such costs are expensed as incurred or capitalized and amortized over future periods. For companies for which the latter accounting practice is permitted, the proposed requirement to disclose the effect on net income of not charging all internal software development costs to expense as incurred can be satisfied by a relatively simple calculation based on data already generally available as an integral part of existing accounting records.

---

[7] Securities Act Release No. 6380 (January 28, 1982) [47 FR 5215].

[8] Small business financing is defined to mean conducting or proposing to conduct an offering of securities which does not exceed the dollar limitation prescribed by Section 3(b) of the Securities Act. The Section 3(b) limitation is presently $5 million.

Because the proposed rules would prohibit registrants from capitalizing internal software development costs if they had not disclosed such practice in the past, the proposed rules could have a significant impact on an individual registrant's reported net income. (There will be no effect on actual cash flows.) However, in view of the Commission's understanding that the predominant practice in the industry is to charge all such costs to expense as incurred, the Commission does not believe that this potential book income impact will have an effect on competitive position or the ability to sell securities in the capital markets.

6. *Overlapping or Conflicting Federal Rules*—The Commission believes that no present Federal rules duplicate or conflict with the proposals.

7. *Significant Alternatives*—Because the proposed rules are intended to prevent further incomparability of financial information among registrants in the computer software industry, the Commission believes that an exemption or an alternative approach designed particularly for small entities would not be appropriate. With respect to the reporting requirements of the proposed rules, the consideration of differing reporting or compliance requirements is not necessary since the proposed rules would not change the recordkeeping requirements or other compliance burdens.

In the Commission's view, the use of performance rather than design standards was not applicable since the proposals are not related to either performance or design standards.

8. *Solicitation of Comments*—The Commission encourages the submission of comments with respect to any aspect of this initial regulatory flexibility analysis and such comments will be considered in the preparation of the final regulatory flexibility analysis if the proposed amendments are adopted. The Commission is especially interested in any empirical data on the costs and/or benefits of the proposed amendments. Persons wishing to submit written comments should file four copies thereof with George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549. All submissions should refer to File No. S7–968 and will be available for public inspection at the Commission's Public Reference Room, 450 5th Street, N.W., Washington, D.C. 20549.

[Release No. 34–19673; File No. S7–967]

Initiation or Resumption of Quotations Without Specified Information

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Commission is reevaluating whether there is a continuing need to regulate the publication by broker-dealers of quotations for certain over-the-counter securities. In connection with this examination, it is proposing for comment amendments to an existing rule that regulates the submission and publication of such quotations. The amendments would require those broker-dealers to maintain information concerning certain issuers of securities, including foreign issuers. The Commission is considering whether these actions are necessary to protect investors against fraudulent, deceptive and manipulative practices. Alternatively, the Commission is considering whether to rescind the Rule.

DATE: Comments must be received on or before June 14, 1983.

ADDRESSES: Interested persons should submit three copies of their written data, views and arguments to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, Washington, D.C. 20549 and should refer to File No. S7–967. All submissions will be made available for public inspection at the Commission's Public Reference Section, Room 1024, 450 Fifth Street, N.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Kenneth B. Orenbach at (202) 272–7391; Office of Legal Policy and Trading Practices, Division of Market Regulation, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission is today proposing for comment amendments to Rule 15c2–11 (the "Rule") [1] under the Securities Exchange Act of 1934 (the "Act").[2] Rule 15c2–11 generally requires a broker-dealer to have information concerning an issuer before the broker-dealer may publish quotations in the issuer's securities. As more fully discussed in this release, the Commission has decided to review whether Rule 15c2–11 achieves its intended purposes and whether there is a continuing need for it. In connection with that review, the Commission is proposing amendments that would strengthen the Rule, particularly as it applies to foreign securities and certain other securities traded over-the-counter.

One of the proposed amendments would modify paragraph (f)(2), which currently excepts quotations regarding securities issued by certain foreign non-reporting issuers.

The proposal would require broker-dealers to maintain in their files the information that such issuers have furnished to the Commission during the preceding fiscal year pursuant to Rule 12g3–2(b). The proposal also requires broker-dealers that initiate quotations in American Depositary Receipts to maintain certain information concerning the issuer of the deposited foreign shares.

The Commission is also proposing an amendment which would extend the information maintenance and other requirements of the Rule to brokers and dealers who submit unpriced entries to inter-dealer quotation media. Unpriced entries based on unsolicited customer orders or indications of interest would continue to be excepted. Another amendment would prohibit the initiation of quotations for the securities of reporting companies that are delinquent in meeting their filing obligations under the Act.

In addition, the Commission is announcing that it is undertaking a review of paragraph (f)(3) of the Rule. Paragraph (f)(3), commonly known as the "piggyback" provision, excepts quotations from the substantive requirements of the Rule if the security being quoted has been the subject of two-way priced quotations on a certain number of days within the last thirty calendar days. This review will determine whether current compliance practices under the piggyback provision are consistent with the purposes of the Rule.

Finally, the Commission is soliciting comment on the compliance burdens associated with the information requirements of the Rule, and whether these burdens are warranted in view of the regulatory purposes of the Rule.

I. Background

Adopted in 1971,[3] Rule 15c2–11 was designed primarily to prevent certain manipulative and fraudulent trading schemes that had arisen in connection with the distribution and trading of unregistered securities issued by companies that had little or no assets,

[1] 17 CFR 240.15c2–11.

[2] 15 U.S.C. 78a–jj.

[3] Securities Exchange Act Release No. 9310 (Sept. 13, 1971).

earnings, or operations ("shell companies") [4] or other companies having outstanding but infrequently traded securities. The Rule was intended to prevent brokers and dealers from furnishing arbitrary initial quotations, and activity that was critical to the success of many of the unlawful schemes.

The Rule prohibits a broker or dealer from entering a quotation for a security in a quotation medium at a price unless it has specified information concerning the quoted security and the issuer [5] and, with respect to certain quotations, it furnishes certain information to the appropriate quotation medium two days prior to the publication of such quotation.[6] The Rule does not, however, apply to the publication of any entry in a quotation medium that is not a specified price ("name only entries").[7] It also excepts from its coverage the publication of quotations in securities that are quoted regularly (*i.e.*, that are the subject of both bid and asked quotations for a specified number of days during the preceding 30 day period) ("piggyback provision") as well as quotations for most exchange-traded and all municipal securities.

Today, most entries of quotations or indications of interest in inter-dealer quotation systems are not subject to the Rule. There are several reasons for this. In 1971 the NASD inaugurated an automated inter-dealer quotation system—NASDAQ—in which market-makers enter quotations for securities on a "real-time" basis and generally quote securities continuously. Those quotations therefore are eligible for an exception from Rule 15c2–11. The enhanced efficiency of the NASDAQ system over pre-existing inter-dealer quotation systems, such as The National Daily Quotation Service (the "pink sheets"), has caused most eligible securities to be quoted in that system. As a result, NASDAQ has become the principal quotation system for many over-the-counter securities while other inter-dealer quotation systems, such as the pink sheets, are now used as the principal quotation medium for the generally less frequently traded securities of lesser-known issuers or as a supplement to the typically more active securities in NASDAQ.

In fact, most securities that are quoted in the pink sheets relate to the thousands of lesser-known securities that are traded in what might be called the "residual" over-the-counter market.[8] Compared with "third market" stocks and the majority of over-the-counter stocks quoted in the NASDAQ system, those pink sheet securities are, in general, characterized by low levels of trading activity and dealer competition. Information concerning such stocks is often not readily available to the market place, few professional analysts regularly follow these stocks, and there is no tape or electronic display system designed to disseminate widely current quotations and other market information about these securities. Moreover, pink sheet stocks generally do not enjoy substantial liquidity, owing in large part to a lack of broad-based investor interest and dealer competition and the absence of any rules requiring the maintenance of continuous markets or firm priced quotes for such securities. Because the residual over-the-counter stocks are not quoted in NASDAQ, the pink sheets are critical to the dissemination of quotations by broker-dealers that wish to make a market in such securities. Rule 15c2–11 is the Commission's only oversight mechanism secifically designed to ensure that such quotations (and any upward movement in such quotations) are not clearly inconsistent with available information about the security being quoted.

In addition, perhaps because of the availability of priced quotations on a real-time basis in the NASDAQ system, broker-dealers using other inter-dealer quotation media, particularly the pink sheets, have increasingly elected to advertise their interest in a particular security by publishing name only entries, which are not subject to the Rule, rather than priced quotations, which may in those systems be stale when published.

Finally, as discussed more fully in this release, other practices appear to have developed under the piggyback provision that have decreased the efficacy of the Rule.

As a result of these developments, the Commission has determined to review all aspects of the Rule, including whether the self-regulatory surveillance mechanisms play, or can play, an important role in assuring compliance with the Rule. In that connection, the Commission is publishing for comment a number of proposed amendments to the Rule. The proposed amendments are discussed below.

II. Proposed Amendments

A. Rescission of Exemption for Foreign Issuers Granted by Paragraph (f)(2) of the Rule

Rule 15c2–11 does not apply, by reason of paragraph (f)(2), to securities of foreign issuers that are exempt from Section 12(g) of the Act pursuant to Rule 12g3–2(b). Although Section 12(g) applies to many foreign issuers, Rule 12g3–2(b) represents the Commission's resolution of the problem associated with imposing the burdens and obligations of Section 12(g) on foreign issuers that have not taken any initiative to introduce those securities into, or to promote, U.S. markets for those securities.[9]

Most securities of foreign issuers that are not listed on an exchange but otherwise would be required to be registered under, and subject to the reporting provisions of, Section 12(g) of the Act are exempted from those requirements by Rule 12g3–2(b).[10]

The Commission is concerned, however, about the increasing frequency with which unregistered foreign securities are quoted in inter-dealer quotations systems, including NASDAQ, often under circumstances where little or no current information about the issuer of the securities is available to the market place. For non-reporting foregin securities that satisfy the information-supplying exemption of

---

[4] *See* Securities Exchange Act Release Nos. 9310 (Sept. 13, 1971) and 8909 (June 24, 1970).

There were several typical practices. One, for example, involved the acquisition of publicly-held shell companies by promoters who then engaged in various activities designed to raise the market price of the securities and, along with other insiders, took advantage of the subsequent price rise by selling their shares to the public at an inflated price Securities Exchange Act Release No. 4982 (July 2, 1969).

[5] The information requirements of the Rule are set forth in paragraph (a). They generally require a broker or dealer that wishes to enter a quotation for the securities of an issuer to maintain (i) in the case of an issuer that has conducted a recent public offering that was registered under the Securities Act of 1933 or effected pursuant to Regulation A, a copy of the prospectus or offering circular or (ii) in the case of a company that is required to file certain reports pursuant to Sections 13 or 15(d) of the Act or is an insurance company of the kind specified in Section 12(g)(2)(G), the issuer's most recent annual report and interim reports that have been filed thereafter. In the alternative, or where the issuer falls into none of the categories described above, the broker or dealer may acquire and maintain the information specified in paragraph (a)(4), including certain financial information.

[6] 17 CFR 240.15c2–11(d).

[7] Rule 15c2–11(e)(3) defines "quotation" as "any bid or offer at a specified price with respect to a security." Consequently, if a broker or dealer furnishes an entry in name only, offer wanted ("OW") or bid wanted ("BW"), it is not subject to the Rule. See text at n. 14, *infra*.

[8] In this regard, *see* Rogoff, *Legal Regulation of Over-the-Counter Market Manipulation: Critique and Proposal*, 28 Maine L. Rev. 149, 198 (1976).

[9] *See* generally H.R. Rep. No. 1418, 88th Cong., 2d Sess. 11 (1964).

[10] The Rule 12g3–2(b) exemption is conditioned upon, among other things, a requirement that the issuer (or an appropriate government agency in its domicile) furnish to the Commission copies of certain information required to be made public pursuant to the law of its domicile (or which is otherwise made available to its shareholders).

Rule 12g3–2(b), the Commission is proposing to amend Rule 15c2–11 to add a new paragraph (a)(4) that would require a broker or dealer quoting securities of a foregin private issuer that furnishes information to the Commission pursuant to Rule 12g3–2(b) to maintain in its records (and make available to investors upon request) the information furnished to the Commission since the beginning of the issuer's last fiscal year.[11] The broker or dealer would be permitted to rely on such information if it had no reasonable basis for believing that the materials so furnished and in its records were not true and correct. Such a proposal is consistent with the requirements and purpose of Rule 12g–3–2(b), but would also enhance investor protection without imposing undue burdens on broker-dealers or issuers.

The Commission also has certain concerns that arise when brokers or dealers make a market in American Depositary Receipts ("ADRs") that represent shares of a foreign issuer deposited with a depositary. In many instances, the information provided in Form F–6 under the Securities Act of 1933 will not relate to the issuer of the deposited security, notwithstanding that the ADR is the functional equivalent of shares of such issuer's securities.[12] Accordingly, in order to ensure that market-makers in ADRs maintain information concerning the issuer of the deposited foreign shares represented by the ADRs, the Commission is proposing for comment certain additional modifications to Rule 15c2–11.

First, the Commission is proposing to amend paragraph (a)(1) of the Rule, which permits quotations if the broker or dealer has in its records the prospectus relating to a registration statement under the Securities Act of 1933 which became effective within 90 days, to exclude specifically Form F–6 from the registration statements as to which paragraph (a)(1) is available, since a registration statement on that form relates to the ADRs and not to the issuer of the deposited foreign shares.

In addition, the Commission is proposing a new paragraph (e)(4) that will specifically provide that, for purposes of Rule 15c2–11, the issuer of the deposited foreign shares shall be deemed to be the issuer of any ADR proposed to be quoted under the Rule. The effect of this amendment would be to require brokers and dealers that wish to publish quotations for ADRs to maintain the information required by the Rule concerning the issuer of the deposited shares.

These amendments should not, as a practical matter, impose an undue burden on brokers and dealers. Form F–6 requires that the foreign private issuer of foreign shares represented by ADRs registered on that form be in compliance with the periodic reporting requirements of the Act or Rule 12g3–2(b).[13] Consequently, the information required by Rule 15c2–11 will be publicly available. At the same time, the amendments would ensure that a market-maker in an ADR maintains information regarding the issuer of the foreign shares as if it were quoting the foreign shares directly.

B. Amendment to Paragraph (e): Unpriced Entries Subject to the Rule

The Commission is also proposing an amendment to the Rule that would require a broker or dealer to comply with its provisions when such broker-dealer publishes an entry without stating a price at which it would be willing to effect a transaction in the security.[14]

As originally published for comment in 1970, the Rule would have covered all unpriced entries.[15] At that time, however, commentators argued that the publication by a broker or dealer of an unpriced entry should not be made subject to the Rule's requirements because such a requirement would impose a substantial burden on brokers and dealers who effect isolated transactions in a security but do not have any interest in making a market in the security.[16] It was noted that a firm may publish an unpriced entry on behalf of a customer solely for the purpose of executing an unsolicited buy or sell order or when it is interested only in acquiring an investment position in a security. In adopting the Rule, the Commission decided to exclude all unpriced entries from its requirements.

As previously noted, since the adoption of the Rule, the practice of publishing unpriced entries, instead of priced quotations, has become increasingly common in quotation media that permit such entries. The result has been that dealers interested in making a market in a security on a continuous basis can and frequently do so without having to comply with the Rule. Specifically, such dealers can publish unpriced entries daily in quotation media and, when contacted regarding their trading interest, furnish quotations in the security. Those quotations may be the primary indications of trading interest in a security and the broker or dealer may influence the development of an active trading market that would not otherwise have existed. As a result of the increased use of this practice, the Rule may no longer reach activities that it was intended to cover. Accordingly, the Commission has determined to publish for comment an amendment that would require a broker or dealer to comply fully with the Rule if it publishes an unpriced entry. Another amendment proposed today would, however, exclude from the Rule all entries that represent unsolicited customer orders and thus should largely resolve the concerns that lay behind the original exclusion of unpriced entries.

C. Amendment to Paragraph (f): Exception for Quotations Representing Unsolicited Customer Orders

When an order is unsolicited, the trading interest is not initiated by the broker, and the broker generally would not have a motive to affect the market price for the security involved. If a quotation or indication of interest represents such an order, there appears to be little potential for manipulative abuse. Accordingly, the Commission is

---

[11] Existing paragraph (a)(4) would be redesignated paragraph (a)(5). The Commission has also proposed amendments to Rule 12g3–2 that would require issuers to become reporting companies if their securities are to be quoted in NASDAQ. *See* Securities Act Release No. 6433 (October 28, 1982)

[12] The Commission recently adopted Form F–6, which replaces Form S–12. The new F–6 is a form for the registration of ADRs under the Securities Act of 1933. *See* Securities Act Release No. 6459 (March 18, 1983). Form F–6, among other things, requires that the foreign private issuer of securities represented by the ADR become a reporting company or comply with the information supplying exemption of Rule 12g3–2(b).

[13] In contrast, Form S–12 contained an undertaking pursuant to which the depositary agreed, among other things, to furnish to the Commission any information that it actually received from the issuer of the underlying securities.

[14] Brokers and dealers may indicate their trading interest in an inter-dealer quotation system in several ways. In certain systems, such as the pink sheets, a broker or dealer may enter a priced quotation on both the buy and sell sides or on one side only. As an alternative, a broker or dealer may advertise that it is interested in buying or selling a particular security without entering a bid or offer price. Specifically, it may insert (i) "OW" (offer wanted), indicating that the firm is interested in receiving quotations from persons who want to sell the security; (ii) "BW" (bid wanted), indicating that it is interested in receiving quotations from persons who want to buy the security; or (iii) the firm's name only, indicating that the firm wants to advertise its general interest in both purchasing and selling the security. In the NASDAQ system, however, a firm may insert only two-sided quotations, *i.e.*, entries at a price on both the buy and sell sides of the market.

[15] Securities Exchange Act Release No. 8909 (June 24, 1970).

[16] *See* letter from Gordon S. Macklin, President, National Association of Securities Dealers, Inc., to Orval L. DuBois, Secretary, SEC, dated July 27, 1970, and letter from Carl W. Schneider, Esq., to Orval L. DuBois, Secretary, SEC, dated August 12, 1970, which are contained in the Commission's public file relating to the original rulemaking proceeding for the Rule.

proposing an amendment to the Rule that would except from its provisions the publication or submission of any quotation on behalf of a customer whose order was unsolicited.[17] The exception would not be available if the quotation represented an unsolicited order from another registered broker or dealer.

D. Review of the "Piggyback" Provision and Existing Compliance Practices

Paragraph (f)(3) excepts from the Rule's provisions any quotation with respect to a security that has been the subject of both bid and asked quotations on at least twelve of the preceding thirty days and for which no more than four consecutive business days during that period have elapsed since such a two-way quotation has been published. This provision, which is commonly referred to as the "piggyback" provision, is designed to limit the application of the Rule to securities that have not been actively quoted in the recent past.[18] Because of certain procedures in the National Quotation Bureau's application process, however, brokers and dealers may be able to enter quotations in the pink sheets for a security in purported reliance on the piggyback provision during the thirty days after the publication of any other quotation or unpriced entry for the same security, although it is not clear to what extent this practice has become prevalent.[19]

The practice described above is not permissible under the current piggyback provision and may undermine the original purpose of the provision.[20] It raises particular concerns in the context of trading suspensions, many of which are associated with an issuer's failure to satisfy its statutory disclosure obligations. If, after a trading suspension expires, brokers and dealers resume quoting securities before a disclosure deficiency has been cured in reliance on quotations that were entered before the trading suspension began, those quotations may be made on the basis of inadequate information about the issuer. Strict compliance with the piggyback provision would normally prevent broker-dealers from entering quotations in reliance on it if at any time during the previous thirty days there had been a trading suspension in the security.[21]

The Commission intends to review current compliance practices under the provision and specifically solicits the views of interested persons on current compliance practices under it. The review is designed to determine whether current practices by broker-dealers are satisfactory and whether any modification of the provision by the Commission would be appropriate, and specifically, whether there are other formulations that would achieve the same result while at the same time imposing fewer constraints on brokers and dealers.

E. Amendment to Present Paragraph (a)(4): Information Requirement Concerning Reporting Companies and Exempt Insurance Companies

Present paragraph (a)(4) of the Rule (to be redesignated paragraph (a)(5)) permits a broker or dealer to publish or submit quotations for a security if it maintains in its records certain specified financial and other information relating to the issuer and the security. The paragraph does not specify the type of issuer with respect to which, or the circumstances under which, brokers and dealers may rely upon paragraph (a)(4). Consequently, although the provision was intended primarily to regulate quotations for the securities of small non-reporting companies that have not conducted recent public offerings, in its current form, it would permit a broker or dealer to rely on paragraph (a)(4) in other circumstances.

When a reporting company is delinquent in complying with its periodic reporting requirements under the Act, or an exempt insurance company has not filed its required annual statement with the appropriate state regulatory agency, brokers and dealers may not rely on paragraph (a)(3) to quote the company's securities. As currently drafted, however, paragraph (a)(4) would permit a broker or dealer to publish quotations for the company's securities if it had the requisite information specified in that paragraph. That result would obtain under the Rule even though the information called for under paragraph (a)(4) frequently would fall short of the information the company is required to make public under the Act.

The Commission believes that brokers and dealers should not be permitted to enter quotations for the securities of a company that is delinquent in meeting its statutory disclosure obligations. In the Act, the Congress established a system of continuous disclosure by issuers that (i) have a class of equity securities traded on a national securities exchange, (ii) meet certain minimum criteria relating to assets and number of shareholders, or (iii) have sold securities to the public pursuant to an effective registration statement.[22] In enacting this framework, the Congress determined that such issuers have a special obligation to their shareholders to makes certain information available to investors and the market place.

In view of the congressional policy concerning disclosure by issuers, it seems inappropriate to permit brokers and dealers to enter quotations concerning the securities issued by companies that have not met their reporting obligations. Consequently, the Commission is proposing an amendment that would prohibit a broker or dealer from relying on paragraph (a)(4) (new paragraph (a)(5)) when it enters quotations for the securities of a reporting company or an exempt insurance company.

III. Deregulatory Alternative

As noted above, the Commission believes that the purposes of Rule 15c2–11 cannot be fully achieved unless certain changes are made. At the same time, however, the Commission recognizes that such changes may be accompanied by certain additional

---

[17] If the amendment that subjects all unpriced entries to the Rule is adopted, this amendment would except all unpriced entries, as well as priced quotations, on behalf of customers whose orders are unsolicited.

[18] As a practical matter, subsequent to the initiation of quotations, securities quoted in NASDAQ today are excepted from the operation of the Rule by the piggyback provision, since these securities are the subject of two-sided quotations for at least 12 days during the preceding 30 day period without a four day interruption. Because securities quoted on NASDAQ generally raise none of the concerns on which the Rule is based, the Commission invites comment on whether the Rule should be amended to except NASDAQ securities. Commentators are also requested to address the question whether such an exception, if appropriate, should exclude securities in the system that have been summarily suspended from trading for ten days by the Commission on the basis of a disclosure deficiency by the issuer, since such securities would no longer qualify for the piggyback provision and information relating to the security would not be current until the deficiency is cured.

[19] This practice, if permitted, would allow piggybacked quotations to be made without requiring current information to be maintained about an issuer and under circumstances in which significant market activity for the security may not exist.

[20] In this connection, the Commission seeks comment as to whether market-makers generally maintain, apart from the requirements of the Rule, "due diligence" files containing current information on some or all over-the-counter stocks in which they make markets.

[21] Summary trading suspensions under Section 12(k) of the Act typically last ten days. Such a cessation in trading and in activities designed "* * * to induce the purchase or sale of, any security in which trading is so suspended," would preclude brokers and dealers from complying with the strict terms of the piggyback provision because they would be unable to show that there has been "* * * no more than four business days in succession without * * * a two-way quotation * * *" during the previous thirty days, as required by the piggyback provision.

[22] *See* Sections 12(b), 12(g) 13(a), 13(b) and 15(d) of the Act; 15 U.S.C. 78*l*(b), 78*l*(g) 78m(a), 78m(b), and 78*o*(d).

regulatory restraints on some broker-dealers and the markets which they serve.

The proposed revisions to the Rule would require some broker-dealers to obtain and maintain information that they otherwise might not acquire. Also, tighter enforcement of the piggyback provision might cause some broker-dealers to discontinue placing quotations in the pink sheets for some thinly traded securities. This might decrease market liquidity. Similar arguments might be made against application of the Rule to quotations not at a price or the proposed requirement that certain information be maintained respecting securities of foreign issuers exempt from Section 12(g) of the Act.

In this regard, the Commission intends to reevaluate Rule 15c2–11 in its entirety and determine whether there is a continuing need for some or all of its provisions. In this connection, the Commission invites comments on the following questions:

1. What are the burdens on issuers of preparing the information required by the Rule and providing it to requesting broker-dealers and how should these costs be weighed against the purposes of the Rule?

Can some portion of the information requirement of the Rule be rescinded with little additional risk to investors but substantial savings to issuers?

2. What are the burdens to broker-dealers associated with obtaining the information required by the Rule and are these burdens significant in light of the regulatory purposes of the Rule?

3. Will a significant number of broker-dealers cease market-making in securities subject to the Rule rather than comply with its provisions as proposed to be amended?

4. To what extent do market-makers that publish quotations currently excepted from the Rule nevertheless maintain the information required by the Rule?

IV. Summary of Initial Regulatory Flexibility Analysis

The Commission has prepared an Initial Regulatory Flexibility Analysis in accordance with 5 U.S.C. 603 regarding the proposed amendments to Rule 15c2–11. The Analysis notes that the objective of requiring the Rule to apply to ADRs as well as foreign issuers that furnish information to the Commission pursuant to Rule 12g3–2(b) is to ensure that brokers and dealers have adequate information upon which to evaluate initial quotations for foreign securities and ADRs. The Analysis further states that the proposal to subject unpriced entries to the Rule lessens the possibility that brokers and dealers can engage in manipulative conduct by publishing unpriced entries on a regular basis without being subject to the Rule. Finally, the Analysis notes the inappropriateness of allowing broker-dealers to rely on present paragraph (a)(4) to quote securities of reporting companies that are delinquent in their statutory reporting obligations.

A copy of the Initial Regulatory Flexibility Analysis may be obtained by contacting Kenneth B. Orenbach, Division of Market Regulation, Securities and Exchange Commission, Washington, D.C. 20549 (202–272–7391).

Reporting requirements, Securities.

V. Statutory Basis and Text of Proposed Rule

Pursuant to sections 3, 10, 15, 17 and 23, 15 U.S.C. 78c, 78j, 78o, 78q and 78w, the Commission proposes to amend § 240.15c2–11 in Chapter II of Title 17 of the Code of Federal Regulations by revising paragraphs (a)(1), (e)(3) and (f)(2); redesignating paragraph (a)(4) as (a)(5) and inserting a new introductory clause in paragraph (a)(5); and adding new paragraphs (a)(4) and (e)(4) to read as follows:

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

§ 240.15c2–11 Initiation or resumption of quotations without specified information.

(a)* * *

(1) The issuer has filed a registration statement under the Securities Act of 1933, other than a registration statement on Form F–6, which became effective less than 90 calendar days prior to the day on which such broker or dealer publishes or submits the quotation to the quotation medium, *Provided* That such registration statement has not thereafter been the subject of a stop order which is still in effect when the quotation is published or submitted, and such broker or dealer has in his records a copy of the prospectus specified by Section 10(a) of the Securities Act of 1933;

* * * * *

(4) (i) The issuer is exempt from Section 12(g) of the Act by reason of compliance with the provisions of § 240.12g3–2(b), and

(ii) The broker or dealer wishing to submit for publication a quotation for such security has in its records, and makes reasonably available upon request to any person expressing an interest in a proposed transaction in the security with such broker or dealer, the information furnished to the commission pursuant to § 240.12g3–2(b) since the beginning of the issuer's last fiscal year, which the broker or dealer has no reasonable basis for believing is not true and correct; or

* * * * *

(5) The issuer of the security is not required to file reports pursuant to Section 13 or 15(d) of the Act, and is not an issuer exempted from Section 12(g) of the Act by Section 12(g)(2)(B) or (G) of the Act, and * * *

* * * * *

(e) * * *

(3) Except as otherwise specified in this rule, "quotation" shall mean any bid or offer at a specified price with respect to a security, or any indication of interest by a broker or dealer in receiving bids or offers from others for a security, or any indication by a broker or dealer that it wishes to advertise its general interest in buying or selling a particular security.

(4) "Issuer," in the case of quotations represented by American Depositary Receipts, shall mean the issuer of the deposited shares represented by such American Depositary Receipts.

(f) * * *

(2) The publication or submission by a broker or dealer, on behalf of a customer (other than a broker or dealer), of a quotation that represents the customer's indication of interest and a transaction not involving the solicitation of the customer's order.

* * * * *

VI. Solicitation of Comments

All interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should submit three copies thereof to George A. Fitzsimmons, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549, not later than June 14, 1983.

By the Commission.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 64

[DOD Directive 1352.xx]

Management and Mobilization of Regular and Retired Military Members

AGENCY: Defense Department.

ACTION: Proposed rule.

SUMMARY: This proposed rule is being issued to implement the provisions of the Defense Officer Personnel Management Act and to implement Section 672(a) (as amended December 23, 1980), Pub. L. 96–584. This proposed rule provides specific DOD guidance on the peacetime management of retired military personnel, both regular and reserve, in preparation for their use during a mobilization or other emergency.

DATE: Written comments must be received by May 23, 1983.

ADDRESS: Office of the Deputy Assistant Secretary of Defense (Reserve Affairs), the Pentagon, Room 3C980, Washington, D.C. 20301.

FOR FURTHER INFORMATION CONTACT: Major Robert F. Norton, USAR, 202–697–0824.

SUPPLEMENTARY INFORMATION: This proposed rule is being submitted to the **Federal Register** under 5 U.S.C. 552(a)(1)(D) and 1 CFR 305.76–2.B.

List of Subjects in 32 CFR Part 64

Retired regular and reserve military personnel, Mobilization of retired military personnel.

Accordingly, it is proposed to amend Chapter I, 32 CFR by adding a new Part 64, reading as follows:

PART 64—MANAGEMENT AND MOBILIZATION OF REGULAR AND RETIRED MILITARY MEMBERS

Sec.
64.1 Purpose.
64.2 Applicability.
64.3 Definitions.
64.4 Policy.
64.5 Procedures.
64.6 Responsibilities.

Authority: 10 U.S.C. 688 and 672(a).

§ 64.1 Purpose.

This Part implements sections 688 and 672(a) of Title 10, United States Code by prescribing uniform policy and procedures governing the peacetime management of retired military personnel, both regular and reserve, in preparation for this use during a mobilization.

§ 64.2 Applicability.

This Part applies to the Office of the Secretary of Defense, the Military Departments (including their National Guard and reserve components), the Organization of the Joint Chiefs of Staff, and the Defense Agencies (hereafter referred to collectively as "DoD Components"). The term "Military Services," as used herein, refers to the Army, Navy, Air Force, Marine Corps, and Coast Guard (by agreement with the Department of Transportation).

§ 64.3 Definitions.

(a) *Key Employee.* A civilian employee who is vital to the defense of the United States in his or her civilian capacity and cannot be mobilized with the Military Services in the event of an emergency (see Part 44 of this title).

(b) *Retired Military Members* (hereafter called "military retirees"). All regular and reserve officers and enlisted members who retire from the Military Services under Chapters 61, 63, 65, 67, 367, 571, 573, or 867 of Title 10, United States Code and Chapters 11 and 21 of Title 14, United States Code; all reserve officers and enlisted members who are otherwise eligible for retirement under one of the above provisions of law but who have not reached age 60 and who have not elected discharge or are not members of the Ready Reserve or Standby Reserve (including members of the inactive Standby Reserve who meet the above criteria); and all members of the Fleet Reserve and the Fleet Marine Corps Reserve under section 6330 of Title 10, United States Code.

(c) *Military Retiree Categories.* (1) *Category I.* Nondisability military retirees under age 60 who have been retired less than 5 years.

(2) *Category II.* Nondisability military retirees under age 60 who have been retired 5 years or more.

(3) *Category III.* Military retirees, including those retired for disability, other than category I or II retirees.

§ 64.4 Policy.

It is the policy of the Department of Defense to use military retirees to meet the demands of mobilization or other emergencies. The Secretaries of the Military Departments are authorized to order any retired regular member to active duty at any time to perform duties deemed necessary in the interests of national defense in accordance with section 688 of Title 10, United States Code. Military retirees, both regular and reserve, may be ordered to active duty by the Secretaries of the Military Departments to satisfy mobilization requirements.

§ 64.5 Procedures.

(a) *Premobilization.* (1) *Preassignment of Categories I and II Military Retirees.* Generally, military retirees who are physically qualified shall be preassigned in peacetime, either voluntarily or involuntarily, to installations or to mobilization positions that must be filled within 30 days after mobilization and that are determined appropriate for retirees by the Secretary of the Military Department concerned. Key employees and category III retirees will not be preassigned. Severe hostilities may prevent the transmittal of mobilization orders to military retirees. Therefore, all military retirees preassigned to mobilization positions or installations, either voluntarily or involuntarily, shall be issued preassignment or contingent preassignment orders.

(2) *Category III Military Retirees.* The nature and extent of the mobilization of category III retirees shall be determined by each Military Service based on the retiree's military skill and the nature and degree of the retiree's disability. Age or disability alone may not be basis for excluding a retiree from service during mobilization.

(3) *Military Retirees Living Overseas.* Military retirees who live overseas shall be preassigned in peacetime to the maximum extent possible, as determined by the Military Service concerned, to meet mobilization augmentation requirements at overseas U.S. or an Allied military installations or activities that are near their places of residence. Preassignment orders shall be sufficiently complete so that written confirmation after the start of a mobilization is not necessary. Military retirees who do not reside within reasonable distances from U.S. military installations or activities shall have included in their preassignment orders a statement ordering them to report to the nearest U.S. military activity with follow-on reporting to their unit of assignment.

(4) *Military Retiree Information.* The development and maintenance of current information pertaining to the mobilization availability of military retirees shall be the responsibility of the Military Services. Such information shall include, but not be limited to, date of retirement, date of birth, current address, and military qualifications. In addition, the Military Services shall maintain information on categories I and II military retirees concerning availability for mobilization and physical condition. Indication of physical condition may be from certification by the individual military retiree. Moreover, each Military Service shall develop procedures for identifying categories I and II retirees and shall conduct screening of retirees using Part 44 of this title as guidance in formulating screening criteria.

(5) *Refresher Training.* Each Military Service shall determine the necessity for and the frequency of refresher training of military retirees, based on the needs of the Military Service and the specific military skill of the military retiree.

(b) *Mobilization.* (1) *General.* The Military Services shall establish plans and procedures to use, during a

mobilization, military retirees who meet specific skill and experience requirements.

(2) *Involuntary Order to Active Duty.* (i) *Regular.* The Secretary of a Military Department may order any retired regular member to active duty at any time to perform duties deemed necessary in the interests of national defense in accordance with section 688 of 10 U.S.C.

(ii) *Reserve.* The Secretary of a Military Department may order a retired member of a reserve component of a Military Service to active duty for the duration of a war or emergency and for 6 months thereafter on the basis of required skills, provided:

(A) War or national emergency has been declared by the Congress.

(B) The Secretary of the Military Department concerned, with the approval of the Secretary of Defense, determines there are not enough qualified reserves in an active status or in the Inactive National Guard, pursuant to 10 U.S.C. 672(a).

(3) *Time-Phased Mobilization.* The Military Services shall develop plans and procedures for ordering military retirees to active duty in accordance with a schedule that includes pre- and post-M-day requirements. These procedures shall consider mobilization manpower requirements and the incremental mobilization of National Guard and reserve components.

(4) *Partial Mobilization.* The Military Services shall develop plans and procedures for ordering to active duty only the number of military retirees required during partial mobilizations.

§ 64.6 Responsibilities.

(a) The *Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics)* shall establish policy for the management and mobilization of military retirees.

(b) The *Secretaries of the Military Departments* shall ensure that plans for the management and mobilization of military retirees are consistent with this Directive.

(c) The *Heads of the Military Services* shall:

(1) Prepare plans and establish procedures for mobilization of military retirees in conformance with this Directive.

(2) Determine the extent of military retiree mobilization requirements based on existing inventories and inventory projections for mobilization of qualified reservists in an active status in the Ready Reserve, the Inactive National Guard, or the Standby Reserve.

(3) Develop procedures for identifying category I and II retirees and conduct screening of retirees using Part 44 of this title for guidance.

(4) Maintain personnel records for military retirees and other necessary records, including date of birth, date of retirement, current address, documentation of military technical skills, and, for categories I and II military retirees and key employees, availability for mobilization, civilian employment as necessary, and physical condition. Data shall be maintained on retired reserve members in accordance with Part 114 of this title.

(5) Advise military retirees of their duty to provide the Military Services with accurate mailing addresses and any changes in civilian employment, military qualifications, availability for service, and physical condition.

(6) Preassign retired members, as necessary.

(7) Determine refresher training requirements.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

April 18, 1983.

BILLING CODE 3810-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD3 82-034]

Drawbridge Operation Regulations; South River, New Jersey

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of Consolidated Railroad Corporation, the Coast Guard is considering a change to the regulations governing the South River railroad drawbridge at South River, New Jersey. It is being proposed that the bridge be left in the open position from June 1 through October 31 except for the transit of a train. From November 1 through May 31 the draw would be opened upon 12 hours notice Monday through Friday, while openings on Saturdays and Sundays would require that notice be given prior to 6 p.m. on the preceeding Friday. This proposal is being made because there have been few requests to open the draw from November through May. This action should relieve the bridge owner of the burden of having a person constantly available to open the draw, and should still provide for the reasonable needs of navigation.

DATE: Comments must be received on or before June 6, 1983.

ADDRESS: Comments should be submitted to and are available for examination from 9 a.m. to 3 p.m., Monday. through Friday, except holdays, at the office of the Commander (oan-br), Third Coast Guard District, Bldg. 135A, Governors Island, New York 10004. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: William C. Heming (212) 668–7994.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their name and address, identify the bridge, and give reasons for concurrence with or for any recommended change in the proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Third Coast Guard District, will evaluate all communications received and will determine a final course of action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information: The drafters of this notice are Richard A. Gomez, project manager and LCDR Frank E. Couper, project attorney.

Discussion of Proposed Regulations: The South River drawbridge provides access across South River for rail freight traffic traveling between East Brunswick and South River, New Jersey. This drawbridge provides a vertical clearance of four feet above mean high water when in the closed position. The waterway is used principally by recreational boaters, so it is being proposed that the bridge remain in the open postion from June 1 until October 31 except for closure for passage of about four trains per day. The bridge would require 12 hours notice from November 1 through May 31 except that notice would have to be given prior to 6 p.m. on Friday to obtain openings on Saturday and Sunday, or on the last working day to obtain openings before a holiday. A draft economic evalution has not been prepared since the bridge will remain in the open position (except for passage of a train) during the prime boating season.

Economic Assessment and Certification: These proposed regulations have been reviewed under the provisions of Executive Order 12291

and have been determined not to be a major rule. In addition, these proposed regulations are considered to be nonsignificant in accordance with guidelines set our in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 5–22–80). As explained above, an economic evaluation has not been conducted since its impact is expected to be minimal. In accordance with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is certified that these rules, if promulgated, would not have a significant economic impact on a substantial number of small entities because there are none above the drawbridge that will be impacted as a result of this rule.

Bridges.

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Proposed Regulations: In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations by adding a new § 117.210(h) immediately after § 117.210(g) to read as follows:

§ 117.210 Raritan River and Arthur Kill and their navigable tributaries; bridges.

* * * * *

(h) South River, mile 2.8, (CONRAIL bridge) at South River, NJ. From June 1 through October 31, the draw shall remain in the open position except for passage of a train. From November 1 through May 31, the draw shall open on signal upon 12 hours notice during weekdays, and the draw shall open on signal on Saturday, Sunday, and holidays upon notice given prior to 6 p.m. on Friday or the last workday before a holiday.

(33 U.S.C. 499; 49 U.S.C. 1655(g)(2); 49 (CFR 1.46(c)(5); 33 CFR 1.05–1(g)(3))

Dated: April 4, 1983.

W. E. Caldwell,

Vice Admiral, U.S. Coast Guard Commander, Third Coast Guard District.

[FR Doc. 83–10849 Filed 4–20–83; 8:45 am]
BILLING CODE 4910–14–M

---

33 CFR Part 165

[Reg. 83–03]

COTP Wilmington, NC, Safety Zone Regulations; Upper Cape Fear River, North Carolina

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is considering a proposal to close the Cape Fear River to all traffic from the Hilton Bascule Bridge down river to the Cape Fear Lighted Daymark #57 during the period of the annual Riverfest raft race on Sunday, 2 October 1983. The regulations are intended to reduce river congestion and ensure the safety of the participants in the Riverfest raft race.

DATE: Comments must be received on or before June 6, 1983.

ADDRESSES: Comments should be mailed to Commanding Officer, Marine Safety Office, 201 N. Front St., Suite 20, Wilmington, NC 28401. The comments will be available for inspection and copying at the Marine Safety Office, 201 N. Front St., Suite 20, Wilmington, NC. Normal office hours are between 7:30 a.m. and 4:00 p.m., Monday through Friday except holidays. Comments may also be hand delivered to this address.

FOR FURTHER INFORMATION CONTACT: Lieutenant K. C. Olds, Chief, Operations Department, Coast Guard Marine Safety Office, Wilmington, North Carolina, Phone: (919) 343–4892.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rule making by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice COTP Regulation 83–03 and the specific section of the proposal to which their comments apply, and give reasons for each comment. Receipt for comments will be acknowledged if a stamped self-addressed post card or envelope is enclosed. The rules may be changed in light of the comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information: The drafters of this notice are Lieutenant K. C. Olds, project officer for the Captain of the Port and Commander D. J. Kanter, project attorney, Fifth Coast Guard District Legal Office.

Discussion of Proposed Regulations: The Coast Guard received a proposal for a safety zone from Captain F. S. Conlon, USN (Ret) on behalf of Old Wilmington Riverfront, Inc., requesting that traffic on the Cape Fear River from the Hilton Bascule Bridge to the Cape Fear Lighted Daymark #57 be halted during the period of the annual Riverfest raft race on Sunday, October 2, 1983. More specifically, the proposed safety zone would prohibit any vessel (sailboat, pleasure craft, commercial vessel) other than designated safety boats and raft race participants, from movement within or through the safety zone. This will eliminate the extreme safety hazard created by moving vessels throwing large wakes, thereby upsetting raft race participants. The tenative duration of this safety zone will be from 1100 to 1500 on Sunday, October 2, 1983.

Economic Assessment and Certification: This proposed regulation is considered to be non-significant in accordance with DOT Policies and Procedures for Simplification, Analysis and Review of Regulations (DOT Order 2100.5). Its economic impact is expected to be minimal since the period of closure to river traffic will only be four hours. Vessel movement records indicate that commercial river traffic in this area of the Cape Fear River would be minimal during the period of closure and scheduling of commercial vessel movements can be adjusted if necessary to avoid the area during the closure times. The most impact, though non-economic, will be to the pleasure boat operators who have in past years lined the riverbanks during past raft races. They have in the past created safety hazards and much congestion in this area of the river during the raft race. Based upon this assessment, it is certified in accordance with Section 805(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, the regulation has been reviewed in accordance with Executive Order 12291 of February 17, 1981, on Federal Regulation and has been determined not to be a major rule under the terms of that order.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

PART 165—[AMENDED]

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is amended by adding a new § 165.T503 to read as follows:

§ 165.T503 Safety Zone.

(a) *Location.* The following area is a safety zone: The Northeast Cape Fear River from the Hilton Bascule Bridge down river to Point Peter and the Cape Fear River from Point Peter down river to Cape Fear Lighted Daymark #57.

(b) *Regulations.* (1) In accordance with General Regulation in § 165.23 of this part entry into or remaining in this

zone is prohibited unless authorized by the Captain of the Port.

(33 U.S.C. 1225 and 1231; 49 CFR Part 146; 33 CFR 165.3)

Dated: April 18, 1983.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 86

[AMS-FRL-2351-1]

Control of Air Pollution From New Motor Vehicles and New Motor Vehicle Engines; Gaseous Emission Regulations for 1985 and Later Model Year Heavy-Duty Engines

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of information and extension of comment period.

SUMMARY: This Notice announces the availability of an EPA staff paper on certain issues related to emission standards and test procedures for 1985 and later model year heavy-duty engines (HDEs) and an extension of the comment period available for written comment on these issues. These actions are being taken as a continuation of EPA's rulemaking process to establish final regulations for 1985 and later HDEs.

DATES: The comment period on those issues covered in the staff paper will remain open until May 6, 1983.

ADDRESSES: The staff paper has been placed in Public Docket No. A-81-11, located at the Environmental Protection Agency, Central Docket Section, West Tower Lobby, Gallery 1, 401 M Street SW., Washington, D.C. 20460. The docket is open for inspection weekdays between 8:00 a.m. and 4:00 p.m. A reasonable fee may be charged for copying.

In addition, single copies of the staff paper may be obtained by contacting: Mrs. Jennifer A. Criss, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, MI 48105, (313) 668-4272.

Those persons desiring to provide written comment on the Staff paper should submit those comments to Docket No. A-81-11 at the Central Docket Section address given earlier.

Commenters desiring to submit proprietary information should clearly distinguish such information from other comments to the greatest extent possible, and label it "Confidential Business Information." Submissions containing such proprietary information should be sent directly to the EPA contact person indicated below, and not to the Public Docket, to ensure that proprietary information is not inadvertently placed in the docket.

Information covered by such a proprietary claim will be disclosed by EPA only to the extent, and by means of the procedures, set forth in 40 CFR Part 2. If no claim of confidentiality accompanies the information when it is received by EPA, it may be made available to the public without further notice to the commenter.

FOR FURTHER INFORMATION CONTACT: Mr. Glenn W. Passavant, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, MI 48105, (313) 668-4408.

SUPPLEMENTARY INFORMATION:

Background

EPA published a proposal in 1982 (47 FR 1642, January 13, 1982) to revise certain portions of the emission regulations for 1984 and later model year light-duty trucks and HDEs. In January 1983, the Agency finalized provisions for the 1984 model year (48 FR 1406, January 12, 1983) and proposed revised useful-life provisions for 1985 and later model years (48 FR 1472, January 12, 1983).

Today's Notice provides commenters further opportunity to comment on issues dealing with intermediate and long-term standards for HDEs and implementation of transient test procedures. These issues are discussed in depth in the EPA staff paper.

II. Review of EPA Staff Paper

The following discussion provides a brief overview of the staff paper's contents.

In approaching the issue of emission standards, the paper develops five options beginning with a baseline case and progressing in stringency to the implementation of the statutory 90 percent reduction levels on all HDEs. After considering the factors of cost, technical feasibility, and environmental impact, the analysis in the paper indicates that an intermediate strategy is the most desirable. That strategy involves heavy-duty diesel engines meeting the statutory standards of 1.3 grams per brake horsepower-hour (g/BPH-hr) hydrocarbon (HC) and 15.5 g/BHP-hr carbon monoxide (CO) in 1985, while heavy-duty gasoline engines would meet non-catalyst standards of 2.5 g/BHP-hr HC and 35 g/BHP-hr CO beginning in 1985. Beginning in either 1987 or 1988, (the choice of model year is discussed in the staff paper, but not resolved) emissions from heavy-duty gasoline engines would be further reduced by requiring those engines used in gasoline-engine powered trucks sold in Gross Vehicle Weight (GVW) categories IIB and III (less than 14,000 lbs. GVW) to meet the statutory levels of 1.3 g/BHP-hr HC and 15.5 g/BHP-hr CO.

Turning to test procedures, the staff paper analyzes questions surrounding alternative test procedures to the EPA transient test. The analysis suggests that, if alternative test procedures are allowed, they should be accompanied by adjustments in the emission standards to maintain equivalent emission rates to the statutory standards under the EPA test.

III. Public Participation

The Agency held a public workshop on April 6, 1983 to provide interested parties an opportunity to ask EPA questions regarding the contents of the staff paper, as well as to provide an opportunity for public reaction to the paper. No formal transcript of the workshop was taken, but it was recorded and a summary of the proceedings will be prepared and placed in the docket.

All previous commenters on this rulemaking were notified of the workshop by advance mail and given copies of the staff paper for review. In addition, it was EPA's intent to publish this Notice in advance of the public workshop. However, due to an inadvertent oversight this was not accomplished. The workshop was still held as scheduled, since all know parties to the rulemaking had been notified by mail. It is EPA's belief that this approach has not denied any party adequate opportunity to participate in the rulemaking. Any party questioning whether they have been afforded adequate opportunity should contact EPA through the person identified earlier under the heading "**For Further Information Contact:**."

Written comments on EPA's staff paper are invited. The record will remain open until May 6, 1983 and comments should be submitted to the EPA docket identified above. It is also requested, but not required, that a copy of any submittal be sent directly to the contact person indicated above.

Dated: April 11, 1983.

Kathleen M. Bennett,

Assistant Administrotor for Air, Noise and Radiation.

[FR Doc. 83-10817 Filed 4-20-20 83, 8:45 am]

BILLING CODE 6560-50-M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 298

Vessel Obligation Guarantees; Waivers for Foreign Built Main Diesel Engines

AGENCY: Maritime Administration, DOT.

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: One of the requirements for eligibility to receive vessel obligation guarantees under Title XI of the Merchant Marine Act, 1936 (46 U.S.C. 1271–1279) is that the vessel be of United States construction. The applicable Maritime Administration (MARAD) regulation implementing this requirement is at 46 CFR 298.11. MARAD proposes to issue an amendment to this regulation that would adopt a policy to allow all applications for waiver of the "Buy American" requirement with respect to foreign-built high and medium speed diesel engines that are not built in the United States and which afford a specified energy savings.

DATE: All written comments by interested persons received on or before June 20, 1983, will be considered. Anyone submitting comments who wishes acknowledgment of its receipt by MARAD should include a stamped, self-addressed post card.

ADDRESS: Send the original and five copies of comments to the Secretary, Maritime Administration, Room 7300, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590.

All comments will be made available for inspection during normal business hours in Room 7300 at this address.

FOR FURTHER INFORMATION CONTACT: Mr. John Walter, Office of Ship Construction, Room 2103, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590, (202) 426-5727.

SUPPLEMENTARY INFORMATION: The Maritime Administration recognizes that there is an increased interest in the use of ship propulsion diesel engines that are capable of burning residual blended fuel. The availability of such engines from U.S. manufacturers, in certain power levels, is severely limited. The utilization of blended fuels in these diesel engines can result in substantial savings in vessel operating costs and will also conserve valuable distillate fuels. Accordingly, MARAD is giving consideration to a change in the Title XI regulations (§ 298.11 "Vessel requirements"). This amendment would adopt a policy to allow all applications for waivers to use foreign-built high and medium speed diesel engines, where the use of foreign engines would: (1) Result in a 10 percent energy savings (on a thermal basis); or (2) allow vessel operation using a lower quality fuel such that the magnitude of the distillate fuel consumed by the engine would be reduced by 50 percent over the best comparable U.S. built engine. Waiver procedures would follow current practice. Slow speed diesels would be covered by the existing MARAD Slow Speed Diesel Policy.[1] The cost of these foreign-built engines would be included in the total "actual cost" of the vessel, which is the basis for determining the limit for vessel obligation guarantees.

After reviewing the comments, MARAD will determine whether to proceed by publishing a Notice of Proposed Rulemaking, proposing specific changes to the regulations in 46 CFR Part 298. Pursuant to DOT Order 2100.5, this would be considered to be a nonsignificant regulation.

List of Subjects in 46 CFR Part 298

Banks, Banking, Loan programs—transportation, Mortgages, Mortgage insurance, Maritime carriers, and Uniform system of accounts.

Dated: April 15, 1983.

By Order of the Maritime Administrator.

Georgia P. Stamas,

Secretary

BILLING CODE 4910-81-M

[1] **Federal Register** Notice Vol. 41, No. 90 of May 7 1976 (41 FR 18896) announced that: The Maritime Administration (MarAd) has determined that an exclusively domestic capability for the manufacturer of slow speed diesel engines for ship propulsion would be a valuable asset towards the national goal of having a modern and efficient U.S Merchant Marine * * *, that such a capability does not presently exist, * * * that a substantial time period as well as a significant capital expenditure will be required for its development * * * [and] that domestic manufacturers could produce slow speed diesel engines in a much shorter time period if certain foreign components may temporarily be incorporated therein. In view of the foregoing considerations, MarAd has determined that, as a matter of policy and under the authority provided by the "so far as practicable" exception of Section 505 * * * it, for a period of time reasonably required for the development of domestic sources for such components, will not withhold approval, for purposes of Title V [CDS], of vessel designs incorporating slow speed diesels solely on the basis of the presence of foreign components therein.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 649

American Lobster Fishery; Availability of Fishery Management Plan and Request for Comments

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability of a fishery management plan and request for comments.

SUMMARY: NOAA issues this notice that the New England Fishery Management Council has submitted a fishery management plan for the American lobster for Secretarial review and is requesting comments from the public. The plan proposes measures for managing the American lobster fishery in the Northwest Atlantic. Copies of the plan may be obtained from the address below.

DATE: Comments on the plan should be submitted on or before July 1, 1983.

ADDRESS: All comments should be sent to Mr. Allen E. Peterson, Jr., Regional Director, National Marine Fisheries Service, Northeast Regional Office, 14 Elm Street, Gloucester, MA 01930. Clearly mark, "Comments on Lobster Plan", on the envelop.

Copies of the plan are available upon request from Mr. Douglas G. Marshall, Executive Director, New England Fishery Management Council, Suntaug Office Park, 5 Broadway (route 1), Saugus, MA 01906.

FOR FURTHER INFORMATION CONTACT: Bruce Nicholls, Lobster Management Coordinator, 617–281–3600, ext. 324.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) requires that each regional fishery management council submit any fishery management plan or plan amendment it prepares to the Secretary of Commerce (Secretary) for review and approval or disapproval. The act also requires that the Secretary, upon receiving the plan or amendment, must immediately publish a notice that the plan or amendment is available for public review and comment. The Secretary will consider the public comments in determining whether to approve the plan or plan amendment.

The plan proposes measures for managing the American lobster fishery in the Northwest Atlantic. On September 24, 1982, the Environmental

Protection Agency published a notice of availability of a draft environmental impact statement for this plan (47 FR 42157).

Regulations proposed by the Council and based on this plan are scheduled to be published within 30 days.

(16 U.S.C. 1801 *et seq.*)

Dated: April 18, 1983.

Joe P. Clem,

Acting Chief, Plan Review Division, National Marine Fisheries Service.

Notices

Federal Register
Vol. 48, No. 78
Thursday, April 21, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Judicial Review; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. No. 92–463), notice is hereby given of a meeting of the Committee on Judicial Review of the Administrative Conference of the United States, to be held at 10 a.m. Tuesday, May 3, 1983, in the seventh floor conference room at Cadwalader, Wickersham & Taft, 1333 New Hampshire Avenue, NW., Washington, D.C. The Committee will meet to discuss a draft recommendation on certification of claims under the Contract Disputes Act, based on a study by Thomas Madden and a study by Professor Colin Diver on articulation of agency policies.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administrative Conference at least two days in advance. The Committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting contact Mary Candace Fowler, Office of the Chairman, Adminsitrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, D.C. (Telephone: 202–254–7065.) Minutes of the meeting will be available on request.

Dated: April 18, 1983.

Richard K. Berg,

General Counsel.

BILLING CODE 6110–01–M

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

1983 Crop Upland Cotton; Determinations Regarding 1983 Upland Cotton Loan Rate, Established (Target) Price, Advance Deficiency Payment Rate, Acreage Reduction Program, Paid Diversion Program, and Seed Cotton Loan Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of determinations of the 1983 upland cotton loan rate, established (target) price, advance deficiency payment rate, acreage reduction program, paid diversion program, and seed cotton loan program.

SUMMARY: This notice affirms the following determinations made by the Secretary of Agriculture September 27, 1982 with respect to the 1983 crop of upland cotton: (1) A loan rate for Strict Low Middling one-and-one-sixteenth-inch upland cotton (micronaire 3.5 through 4.9) of 55.00 cents per pound; (2) an established (target) price of 76 cents per pound; (3) an advance deficiency payment rate of 6.4 cents per pound; (4) an acreage reduction program of 20 percent; (5) a paid land diversion program of up to 5 percent; and (6) the availability of a seed cotton loan program. These determinations are required to be made in accordance with sections 103 (g) and 107C of the Agricultural Act of 1949, as amended (hereinafter referred to as the "Act").

EFFECTIVE DATE: September 27, 1982.

ADDRESS: Director, Analysis Division, ASCS, USDA, Room 3741 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Charles V. Cunningham, Deputy Director, Analysis Division, USDA–ASCS, P.O. Box 2415, Washington, D.C. 20013, (202) 447–7954. The Final Regulatory Impact Analysis describing the options considered in developing these determinations is available on request from the above named individual.

SUPPLEMENTARY INFORMATION: These determinations have been reviewed in accordance with the provisions of Executive Order 12291 and Secretary's Memorandum No. 1512–1 and have been designated as "major." These determinations have been designated as "major" because they are expected to affect the supply and price of upland cotton during the 1983–84 marketing year, which will in turn impact upon producers, processors, exporters and consumers of cotton and cotton products.

The titles and numbers of the federal assistance programs that this notice applies to are: Title—Commodity Loans and Purchases, number 10.051, and Title—Cotton Production Stabilization, number 10.052, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since there is no requirement that a notice of proposed rulemaking be published in accordance with 5 U.S.C. 553 or anyi other provisions of law with respect to the subject matter of these determinations.

1. *Loan Rate for Upland Cotton.* Section 103(g)(1) of the Act provides that the loan level for 1983-crop upland cotton must reflect for Strict Low Middling one-and-one-sixteenth-inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States, the smaller of: (1) 85 percent of the average price (weighted by market and month) of Strict Low Middling one-and-one-sixteenth-inch cotton as quoted in the designated United States spot markets during three years of the five-year period ending July 31, 1982, excluding the years of the highest and lowest average prices, or (2) 90 percent of the average, for the fifteen week period beginning July 1, 1982, of the five lowest priced growths of the growths quoted for Middling one-and-three-thirty-seconds-inch cotton, C.I.F. northern Europe (adjusted downward by the average difference during the period April 15, 1982 through October 15, 1982 between such average northern European quotation and quotations in the designated United States spot markets for Strict Low Middling one-and-one-sixteenth-inch cotton (micronaire 3.5 through 4.9)). The loan level cannot be less than 55 cents per pound. If the northern European calculation is less than the spot market calculation, the Secretary may adjust the loan level upward, not to exceed the spot market calculation. The 1983 loan rate must be announced not later than

November 1, 1982 and cannot thereafter be changed.

2. *Established (Target) Price.* Section 103(g)(3)(B) of the Act provides that the established price for 1983-crop upland cotton shall not be less than the higher of: (a) 76 cents per pound plus any adjustments for changes in production costs or (b) 120 percent of the loan level determined in accordance with section 103 (g)(3)(1). Section 103(g)(3)(c) provides that the price of 76 cents per pound quoted in the preceding sentence may be adjusted as the Secretary determines to be appropriate to reflect any change in (a) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made (1981 and 1982) from (b) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made (1980 and 1981). The adjusted cost of production for each of such years may be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate and may include variable costs, machinery ownership costs, and general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop.

3. *Advance deficiency payments.* Section 107C(b)(1) of the Act provides that if the Secretary establishes an acreage reduction program for the 1983 crop of upland cotton and determines that deficiency payments will likely be made, the Secretary shall make available advance deficiency payments to producers who agree to participate in such program. Section 107C(b)(2) further provides that advance deficiency payments shall be made as soon as practicable after the producer files a notice of intention to participate in such program, but in no case prior to October 1, 1982. The advance deficiency payments shall be in such amounts as the Secretary determines to be appropriate to encourage adequate participation in the program, except that any such amounts may not exceed an amount determined by multiplying the estimated farm program acreage for the crop times the farm program payment yield for the crop times 50 percent of the projected payment rate, as determined by the Secretary.

4. *Acreage Reduction Program.* Section 103(g)(9)(A) of the Act provides that the Secretary may establish a limitation on planted acreage if the Secretary determines that the total supply of upland cotton, in the absence of such limitation, will be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be achieved by applying a uniform percentage reduction to the acreage base for each cotton-producing farm. Producers who knowingly produce cotton in excess of the permitted acreage determined for a farm shall be ineligible for cotton loans and payments with respect to that farm. The acreage base for any farm for the purpose of determining any reduction required to be made for any year shall be the acreage planted on the farm to upland cotton for harvest in the immediately preceding year or, at the discretion of the Secretary, the average acreage planted to upland cotton for harvest in the two crop years immediately preceding the year for which the determination is made. For the purpose of determinng the acreage base, the acreage planted to upland cotton for harvest shall include any acreage which producers were prevented from planting to cotton or other nonconserving crop in lieu of cotton because of a natural disaster or other condition beyond the control of the producers. The Secretary may make adjustments to reflect established crop-rotation practices and such other factors as the Secretary determines necessary to establish a fair and equitable base. A number of acres on the farm determined by dividing (a) the product obtained by multiplying the number of acres required to be withdrawn from the production of upland cotton times the number of acres actually planted to upland cotton, by (b) the number of acres authorized to be planted to upland cotton in accordance with the acreage limitation established by the Secretary shall be devoted to approved conservation uses in accordance with regulations issued by the Secretary. If an acreage limitation is in effect for any crop, the national program acreage, program allocation factor, and voluntary reduction provisions of section 103(g) of the Act are not applicable to such crop. The individual farm program acreage shall be the acreage planted on the farm to upland cotton for harvest within the permitted upland cotton acreage established for the farm under the acreage reduction program.

5. *Land Diversion Program.* Section 103(g)(9)(B) of the Act provides that the Secretary may make land diversion payments, whether or not an acreage limitation is in effect, if the Secretary determines that such payments are necessary to assist in adjusting the total national acreage of upland cotton to desirable goals. Such land diversion payments shall be made to producers who, to the extent prescribed by the Secretary, devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers.

6. *Seed Cotton Loan Program.* Section (103)(g)(18) of the Act provides that in order to assist producers in the orderly ginning and marketing of their cotton production, the Secretary shall make recourse loans available to such producers on seed cotton in accordance with authority vested in the Secretary under the Commodity Credit Corporation Charter Act (15 U.S.C. 714 *et seq.*).

Production of upland cotton in 1982 is projected to be approximately 10.9 million bales. With estimated beginning stocks of 6.4 million bales, the total 1982 supply of upland cotton is projected to be 17.4 million bales. Total disappearance of upland cotton during the marketing year that began on August 1, 1982 is estimated to be 11.8 million bales. If these estimates are accurate, then carryover stocks on August 1, 1982 will equal about 5.7 million bales, which is deemed an excessive level.

Because of the large projected beginning stock level, it is likely that the supply of cotton in the 1983–84 marketing year again will be excessive. Therefore, options for an acreage reduction program ranging from 0 to 20 percent and options for a paid diversion program ranging from 0 to 10 percent were considered to reduce the production of upland cotton in 1983. A 20 percent acreage reduction program in combination with a 5 percent voluntary paid diversion program was selected because it was deemed the most cost-effective option to reduce supplies, raise market prices, and improve farm income.

A notice that the Secretary was preparing to make determinations with respect to these provisions was published in the **Federal Register** on July 16, 1982 (47 FR 31025). A total of forty-one comments was received, seventeen from producer associations and marketing cooperatives, twenty-three from individual producers, and one from a member of Congress. A summary of responses with respect to the 1983 crop of upland cotton is as follows:

1. *Loan rate:* Twenty-three respondents commented on the 1983 upland cotton loan rate. Five favored the statutory minimum of 55 cents; three suggested that the loan rate be

increased from 55 cents; five recommended a loan rate of between 60 and 65 cents; one requested a loan rate of 70 percent of parity; one a loan rate of 90 to 100 percent of parity; one favored a loan rate equal to production costs; one recommended establishing the loan rate at the cost of production plus a profit; two respondents suggested a loan rate equal to 90 percent of the cost of production if no acreage reduction program is implemented; one asked that production costs be considered; one recommended a loan rate of 95 cents; and two proposed that the loan program be discontinued altogether.

2. *Target price:* Fifteen respondents comment on the target price. Seven respondents favored a target price of 76 cents; one suggested a target price of 76 cents with no limitation on the amount of deficiency payments which a producer could receive; one recommended a target price of 81 cents; one recommended a target price of 86 cents; one recommended a target price of 88 cents; one respondent suggested a target of 70 cents for short staple cotton and 86 cents for longer staples; one respondent requested an increase of 30 percent in the target price; and two comments favored a target price commensurate with the cost of production.

3. *Acreage reduction program:* Nineteen comments were received with respect to the implementation of an acreage reduction program separate from a paid land diversion program. One respondent favored a 30 percent acreage reduction program with a 30 percent increase in the target price for program participants; four comments proposed a 25 percent acreage reduction program; one favored a mandatory 25 percent acreage reduction; one suggested a 15 to 20 percent acreage reduction; one recommended a mandatory 20 percent acreage reduction; two respondents favored a 15 percent acreage reduction; one suggested a reduction of at least 15 percent in combination with a cotton reserve program; one recommended a 10 percent acreage reduction; three recommended mandatory acreage reductions with no level specified; one favored an acreage reduction, if needed; one suggested an acreage reduction with no level specified; one favored an acreage reduction if 90 to 100 percent participation could be achieved; and one respondent opposed an acreage reduction program.

4. *Land diversion program.* Thirteen comments were received with respect to the implementation of a paid land diversion program separate from an acreage reduction program. Eight comments favored a paid diversion with no level specified; three comments suggested a 15 percent paid diversion; one recommended a 25 percent paid diversion; and one respondent opposed a paid diversion.

5. *Acreage reduction program in combination with a land diversion program.* Fourteen comments were received with respect to the combination of an acreage reduction program and a land diversion program. One respondent suggested a 50 percent acreage reduction with a 25 percent paid diversion; one favored a 25 percent acreage reduction with a 25 percent paid diversion; one proposed a 20 percent acreage reduction with a 15 percent paid diversion; three respondents recommended a 15 percent acreage reduction with a 10 percent paid diversion; one requested a total reduction of 25 percent; one proposed a 10 to 15 percent acreage reduction with a 10 percent paid diversion; one recommended a 15 to 20 percent acreage reduction with a 5 percent paid diversion; one favored a 15 percent acreage reduction with a 5 percent paid diversion; one comment suggested a 10 percent acreage reduction in combination with a 15 percent paid diversion; and three respondents recommended that the Secretary of Agriculture use all available resources to reduce the cotton carryover to 3.5 to 4.0 millon bales as rapidly as possible.

6. *Diversion payment rate.* Seven comments were received on the appropriate level for the diversion payment rate. Two respondents favored a diversion payment rate of 30 cents per pound; two suggested a rate of 20 cents per pound; one recommended 20 cents per pound times 75 percent of the farm program yield; one proposed that the government pay the costs of conservation practices which are required to be installed on diverted acres; and one recommended that a rate be established which would maximize program participation by producers.

7. *Seed cotton loan rate.* Seven comments were received with respect to the loan rate for seed cotton. Four respondents favored establishing a loan rate for seed cotton at the same level as the loan rate which is established for lint cotton adjusted to a lint basis. One comment suggested a rate of from 57.2 to 62.2 cents; one suggested 50 percent of the estimated yield at the lint rate; and one opposed a seed cotton loan rate.

8. *National program acreage (NPA).* Two comments were received on the national program acreage. One respondent favored an NPA level that would assure an adequate, but not excessive, supply and one suggested an NPA of 12,066,400 acres.

All comments received were duly considered by the Secretary. The purpose of this notice is to affirm determinations which were announced by the Secretary with respect to the 1983 crop of upland cotton in a press release issued on September 27, 1982. The following determinations were made by the Secretary on that date with respect to the 1983 crop of upland cotton:

Determinations

1. *Upland Cotton Loan Rate.* Based on the formula prescribed in Section 103(g)(1) of the Act, the loan rate for Strict Low Middling, one-and-one-sixteenth-inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States is determined to be 55.00 cents per pound. This loan rate is the minimum statutory level specified by Section 103(g)(1).

The spot market calculation is as follows: (1) Weighted average spot market prices for Strict Low Middling one-and-one-sixteenth-inch upland cotton, micronaire 3.5 through 4.9:

August 1977 through July 1978—51.15 cents;
August 1978 through July 1979—61.01 cents;
August 1979 through July 1980—68.87 cents;
August 1980 through July 1981—83.77 cents;
August 1981 through July 1982—57.66 cents;

(2) Average of the five years, excluding the highest and lowest years: $61.01+68.87+57.66/3=62.51$ cents; and (3) Loan rate based on U.S. spot market calculation: $62.51\times0.85=53.13$ cents.

The northern European calculation is as follows:

(1) Average northern European quotation for Middling one-and-three-thirty-seconds-inch cotton July 1 through October 13, 1982	75.35
(2) Average difference between average northern European quotation and the U.S. spot market average for Strict Low Middling one-and-one-sixteenth-inch, (micronaire 3.5 through 4.9) April 15 through October 15, 1982	13.85
(3) Adjusted northern European average	61.50
(4) 90 percent of adjusted average	55.35

The smaller of the two calculations is the spot market calculation. Since the loan rate based on the spot market calculation is less than the statutory minimum loan rate of 55 cents per pound, the 1983 loan rate is 55 cents per pound.

2. *Established (Target) Price.* In accordance with the provisions of section 103(g)(3) of the Act, the 1983 established (target) price for upland cotton is determined to be 76 cents per pound, the statutory minimum level.

3. *Advance deficiency payments.* In accordance with the provisions of Section 107 C of the Act, it is hereby

determined that advance deficiency payments shall be made for the 1983 crop of upland cotton. The rate of payment is determined to be 6.4 cents per pound, which is 50 percent of the estimated 1983 deficiency payment rate.

4. *Acreage Reduction Program (ARP).* In accordance with the provisions of Section 103(g)(9)(A) of the Act, it is hereby determined that an acreage reduction program shall be in effect for the 1983 crop of upland cotton. The reduction shall be achieved by applying a uniform reduction of 20 percent to the acreage base for each cotton-producing farm. Acreage bases for farms which participated in the 1982-crop acreage reduction program shall be the same as the acreage bases established for the 1982 crop, in order to assure fair and equitable treatment of program participants. Acreage bases on farms that did not comply with the 1982-crop acreage reduction program shall be established using the average of the acres planted to upland cotton in 1981 and 1982. An acreage reduction program is being established because it has been determined that the total supply of upland cotton will be excessive in the absence of a program.

Producers who knowingly produce cotton in excess of the permitted acreage shall be ineligible for loans and payments under the Upland Cotton Program with respect that farm. A number of acres equal to 25.0 percent of the planted acres (not to exceed the acres permitted to be planted) must be devoted to approved conservation uses in accordance with regulations issued by the Secretary. It is hereby determined that, because an acreage reduction program has been established, the national program acreage, program allocation factor, and voluntary reduction provisions shall not be applicable to the 1983 crop of upland cotton.

5. *Land Diversion Program (LDP).* It is hereby determined that a 5 percent land diversion program shall be in effect for the 1983 crop of upland cotton in accordance with the provisions of Section 103(g)(9)(B) of the Act. Producers who comply with the acreage reduction program shall have the option of reducing an additional 0 to 5 percent of their acreage bases in order to be eligible to receive diversion payments at a rate of 25 cents per pound times the acres diverted times the farm program yield. The maximum acres eligible to receive diversion payments shall be 6.67 percent times the acres actually planted to upland cotton not to exceed the permitted acres under the combined acreage reduction and land diversion programs. Acres reduced under the land diversion program must be devoted to conservation uses approved by the Secretary in accordance with regulations issued by the Secretary. Producers who file a notice of intention to comply with the land diversion program may receive advance diversion payments at a rate of 12.5 cents per pound, which is 50 percent of the diversion payment rate.

6. *Seed Cotton Loan Program.* It is hereby determined that a recourse seed cotton loan program shall be available for upland cotton. Seed cotton shall be converted to a lint basis for loan-making purposes and loan levels with respect to such cotton will be the same as those applicable to lint cotton.

(Secs. 4, 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 101, 103 (g)(1), 107 C and 401, 66 Stat. 758, as amended, 95 Stat. 1234, as amended, 96 Stat. 766, 63 Stat. 1054, as amended (7 U.S.C. 1441, 1444, 1445b–2, 1421))

Signed at Washington, D.C. on April 15, 1983.

C. Hoke Leggett,

Acting Executive Vice President, Commodity Credit Corporation.

CIVIL RIGHTS COMMISSION

Kentucky Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Kentucky Advisory Committee to the Commission will convene at 1:00 p.m. and will end at 4:00 p.m., on May 17, 1983, in the White Hart Room, at the Executive Inn East, 978 Phillips Lane, Louisville, Kentucky, 40213. The purpose of this meeting is to discuss followup plans to the Community Development Block Grant study.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, James M. Rosenblum, 33 Ten Broeck Way, Louisville, Kentucky, 40222; (502) 636–1411 or the Southern Regional Office, Citizens Trust Bank Building, 75 Piedmont Street, North East, Room 362, Atlanta, Georgia, 30303; (404) 221–4391.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., April 18, 1983.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335-01-M

Ohio Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Ohio Advisory Committee to the Commission will convene at 10:00 a.m., and will end at 3:00 p.m., on May 14, 1983, in Room 1115, at the Holiday Inn, 404 West First, Dayton, Ohio 45402. The purppose of this meeting is to discuss the subcommittee report on Hispanic educational issues and the re-use of urban renewal land in Akron.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Marian A. Spencer, 940 Lexington Avenue, Cincinnati, Ohio 45229; (513) 221-5656 or the Midwestern Regional Office, 230 South Dearborn Street, 32nd Floor, Chicago, Illinois 60604; (312) 353-7479.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., April 18, 1983.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335-01-M

South Carolina Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the South Carolina Advisory Committee to the Commission will convene at 1:00 p.m., and will end at 3:30 p.m., on May 11, 1983, in Room 405, at the Gressette Senate Office Building, State Capitol Complex, Columbia, South Carolina 29201. The purpose of this meeting is to review the draft report on Block Grand Education Funds, Chapter 2.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Oscar P. Butler, Jr., Post Office Box 1705, South Carolina State College, Orangeburg, South Carolina 29115; (803) 536-7040 or the Southern Regional Office, Citizens Trust Bank Building, 75 Piedmont Street, North East, Room 362, Atlanta, Georgia 30303; (404) 221-4391.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., April 18, 1983.

John I. Binkley,

Advisory Committee Management Officer.

[FR Doc. 83-10660 Filed 4-20-83; 8:45 am]

BILLING CODE 6335-01-M

Washington Advisory Committee; Agenda and Notice Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Washington Advisory Committee to the Commission will convene at 2:00 p.m. and will end at 5:00 p.m., on May 5, 1983, in the Conference Room, at the Seattle Hilton, Sixth and University, Seattle, Washington, 93101. The purpose of this meeting is to discuss plans for future Committee Activities.

Persons desiring additional information or planning a presentation to the Committee, should contact the Chairperson, Kathjarine M. Bullitt, 1125 Harvard Avenue, East, Seattle, Washington, 98102; (206) 447-9800 or the Northwestern Regional Office, 915 Second Street Room 2852, Seattle, Washington, 98174; (206) 442-1246.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., April 18, 1983.

John I. Binkley,

Advisory Committee Management Officer.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

Termination of Countervailing Duty Investigation; Prestressed Concrete Steel Wire Strand From Brazil

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Termination of countervailing duty investigation.

SUMMARY: Since the U.S. International Trade Commission (ITC) determined that an industry in the United States is not materially injured or threatened with material injury, nor is the establishment of an industry in the United States materially retarded, by reason of subsidized imports of prestressed concrete steel wire strand (PC strand) from Brazil, the countervailing duty investigation on that product is terminated. Further, the suspension agreement on PC strand from Brazil has no force or effect.

EFFECTIVE DATE: March 23, 1983.

FOR FURTHER INFORMATION CONTACT: Francis R. Crowe, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230, telephone: (202) 377-3051.

SUPPLEMENTARY INFORMATION:

Product Description

The product covered by this notice is prestressed concrete steel wire strand manufactured in Brazil and exported, directly or indirectly, from Brazil to the United States. The term "prestressed concrete steel wire strand" covers wire strand of steel other than stainless steel for prestressed concrete, as currently provided for in item 642.1120 of the *Tariff Schedules of the United States Annotated.*

Case History

On the basis of a petition filed on behalf of the U.S. industry producing PC strand, we initiated a countervailing duty investigation on March 30, 1982 (47 FR 13396).

On April 19, 1982, the ITC determined that there is a reasonable indication that these imports are materially injuring, or threatening to materially injure, a U.S. industry (47 FR 18200).

On August 2, 1982, we preliminarily determined that the government of Brazil was providing its manufacturers, producers, or exporters of PC strand with benefits that constitute subsidies (47 FR 34609).

On October 15, 1982, the Department and the government of Brazil signed an agreement suspending the investigation (47 FR 47048). Under the agreement, the government of Brazil agreed to offset completely by an export tax the amount of the net subsidy determined by the Department to exist on Brazilian exports of PC strand to the United States.

By letter of November 12, 1982, counsel for the petitioners requested that the investigation be continued under 19 U.S.C. 1671c(g). Accordingly, we completed the investigation and determined that certain benefits that constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers or exporters in Brazil of PC strand (48 FR 4516).

On March 23, 1983, the ITC published notice of its unanimous final determination that an industry in the

U.S. is not materially injured or threatened with material injury, nor is the establishment of an industry in the United States materially retarded by reason of subsidized imports of PC strand from Brazil (48 FR 12143).

Since the ITC made a final negative injury determination, the suspension agreement on PC strand from Brazil between the Department and the government of Brazil has no force or effect and the investigation on this product is terminated (19 U.S.C. 1671c(f)(3)).

Dated: April 15, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

Office of the Secretary

Advisory Committees; Availability of Report on Closed Meetings

AGENCY: Department of Commerce.

ACTION: Announcing Public Availability of Report on Closed Meetings of Advisory Committees.

SUMMARY: The Department of Commerce has prepared its report on the activities of closed or partially-closed meetings of advisory committees, as required by the Federal Advisory Committee Act.

ADDRESSES: Copies of the reports have been filed and are available for public inspection at two locations:

Library of Congress, Newspaper and Current Periodicals Reading Room, Room 1026, John Adams Building, 2nd and Independence Avenue, SE., Washington, D.C. 20540.

Department of Commerce, Central Reference and Records Inspection Facility, Room 6628, Herbert C. Hoover Building, 14th and Constitution Avenue, NW., Washington, D.C. 20230, telephone (202) 377-4217, Attention Mrs. G. LeBoo or Mr. A. Pinkney.

SUPPLEMENTARY INFORMATION: The reports cover the closed and partially-closed meetings held in 1982 for 25 of the Department's 36 advisory committees and several subcommittees, the names of which are listed below. The (*) indicates the committees whose reports are not included with this submission but will be submitted under separate cover. Their availability will be announced in the **Federal Register**.

Committee (Subcommittee)

Advisory Committee on East-West Trade
*Committee of Chairmen of the Industry Sector Advisory Committee (ISAC) for Trade Policy Matters (TPM)
Computer Peripherals, Components, and Related Test Equipment Technical Advisory Committee
Computer Systems Technical Advisory Committee
—Hardware Subcommittee
*Electronic Instrumentation Technical Advisory Committee
*Industry Functional Advisory Committee on Customs Matters for Trade Policy Matters
Industry Functional Advisory Committee on Standards for Trade Policy Matters
Industry Policy Advisory Committee for Trade Policy Matters
*ISAC on Aerospace Equipment for TPM
ISAC on Capital Goods for TPM
ISAC on Chemicals and Allied Products for TPM
ISAC on Consumer Goods for TPM
*ISAC on Electronics and Instrumentation for TPM
ISAC on Energy for TPM
ISAC on Ferrous Ores and Metals for TPM
ISAC on Footwear, Leather, and Leather Products for TPM
*ISAC on Industrial and Construction Materials and Supplies for TPM
ISAC on Lumber and Wood Products for TPM
*ISAC on Nonferrous Ores and Metals for TPM
ISAC on Paper and Paper Products for TPM
*ISAC on Services for TPM
*ISAC on Small and Minority Business for TPM
*ISAC on Textiles and Apparel for TPM
*ISAC on Transportation, Construction, and Agricultural Equipment for TPM
ISAC on Wholesaling and Retailing for TPM
Land Remote Sensing Advisory Commission
Marine Fisheries Advisory Committee
New England Fishery Management Council
Numerically Controlled Machine Tool Technical Advisory Committee
Pacific Fishery Management Council
President's Export Council
President's Export Council Subcommittee on Export Administration
Sea Grant Review Panel
Semiconductor Technical Advisory Committee
—Discrete Semiconductor Device Subcommittee
—Microcircuit Subcommittee
—Semiconductor Manufacturing Materials and Equipment Subcommittee
Telecommunications Equipment Technical Advisory Committee
—Fiber Optic Subcommittee
—Switching Subcommittee
Western Pacific Fishery Management Council

At the end of the year the Department of Commerce had 44 other advisory committees which did not hold any closed or partially-closed meetings during the reporting period.

FOR FURTHER INFORMATION CONTACT: Mrs. Yvonne Barnes, Committee Management Analyst, U.S. Department of Commerce, Washington, D.C. 20230, telephone (202) 377-4217.

Dated: March 31, 1983.

BILLING CODE 3510-CW-M

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board: Closed Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (92-463), announcement is made of the following Committee Meeting:

Name of committee: Army Science Board (ASB).

Dates of meeting: Friday, 13 May 1983.

Times: 0830-1700 hours (Closed).

Place: Pentagon, Washington, D.C.

Agenda: The Army Science Board Ad Hoc Subgroup on Army Initiatives—Equipment Upgrade will meet for classified briefings and discussions on recent Army actions regarding planned combat capability upgrades to existing equipment and on the emerging need for innovative technology for application to future equipment. This meeting will be closed to the public in accordance with Section 552b(c) of Title 5 U.S.C., specifically subparagraph (1) thereof, and Title 5, U.S.C. App. 1, subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The ASB Administrative Officer, Helen M. Bowen, may be contacted for further information at (202) 695-3039 or 697-9703.

Helen M. Bowen,

Administrative Officer.

BILLING CODE 3710-08-M

Military Traffic Management Command; Military Personal Property Symposium; Open Meeting

Announcement is made of a meeting of the Military Personal Property Symposium. This meeting will be held

on May 19, 1983 at Headquarters, Military Traffic Management Command, 5611 Columbia Pike, Falls Church, VA and will convene at 0930 hours.

Proposed agenda: The purpose of the Symposium is to provide an open discussion and free exchange of ideas with the public on procedural changes to the Personal Property Traffic Management Regulation (DOD 4500.34–R), and the handling of other matters of mutual interest relating to the movement and/or storage of household goods and unaccompanied baggage, as well as proposed changes and innovations in the Department of Defense Personal Property Movement and Storage Program.

All interested persons desiring to submit topics to be discussed should submit them in writing to the Commander, Military Traffic Management Command, ATTN: MT–PPM, Washington, DC 20315. Topics to be discussed should be received on or before May 2, 1983.

Dated: April 8, 1983.

John O. Roach, II,

Army Liaison Officer with the Federal Register.

[FR Doc. 83–10625 Filed 4–20–83; 8:45 am]

BILLING CODE 3710–92–M

Department of the Army; Corps of Engineers

National Dredging Study

AGENCY: Water Resources Support Center, U.S. Army Corps of Engineers.

ACTION: Announcement of study.

SUMMARY: The U.S. Army Corps of Engineers has asked the National Research Council of the National Academy of Sciences, through its Marine Board, to undertake a study of national needs and capabilities for dredging of ports and harbors and of navigational channels.

DATES: Comments must be received by May 23, 1983.

ADDRESSES: Send written comments to Aurora Gallagher, Staff Officer, Study of National Dredging Issues, Marine Board, National Academy of Sciences, 2101 Constitution Avenue, NW., Washington, D.C. 20418.

SUPPLEMENTARY INFORMATION: A committee appointed by the National Research Council will undertake an interdisciplinary assessment of national needs for improvement and maintenance dredging in coastal ports and harbors, including their navigational channels. These needs will be evaluated as a function of (1) demands for shipborne trade, (2) likely trends in the world shipping fleet to carry that trade, (3) relationship of inland and marine transportation systems, (4) design criteria for safe and efficient navigation of the projected ship types and levels of traffic, (5) identification of opportunities for improvement dredging or development or alternatives such as deepwater ports, ships of high beam-to-draft ratios, and others, as well as critically needed maintenance dredging. The period covered by the study is the near-term and mid-term future (to about the year 2000).

In making its assessment, the committee will consider the likelihood and value of trade for various channel and port configurations, appropriateness of various institutional and financial arrangements, design criteria and disposal plans for dredged materials, mutual implications of port development and the physical and biological environment, and needed research and development.

Of particular interest of the Marine Board in the conduct of this study are the judgments of those with interests in the navigational channels and other facilities of the coastal ports created or maintained by dredging. Examples of areas to be addressed include (1) the extent of the current and future national dredging needs, (2) whether existing regulatory and institutional arrangements for dredging are adequate, and (3) the implications for the marine and inland environment of dredging operations and disposal of dredged materials.

Comments may be general or directed to specific concerns: general comments should be supported by facts or examples. Interested people are invited to participate in this study by submitting written data, views, suggestions, or other statements, or by offering to make their expertise available in the course of the study. Commentators should include their affiliation and reasons for comments.

Dated: April 13, 1983.

John O. Roach, II,

DA Liaison Officer with the Federal Register.

BILLING CODE 3710–08–M

DEPARTMENT OF EDUCATION

National Advisory Council on Vocational Education

AGENCY: National Advisory Council on Vocational Education, Education

ACTION: Amendment of notice.

SUMMARY: This document is intended to notify the general public of the locations of coming Forums on Industry and Vocational Education, and change of date of one Forum, first published in the **Federal Register** on March 31, 1983, Pages 13479–13480. The Forums are being conducted by the National Advisory Council on Vocational Education in cooperation with the National Commission for Employment Policy, and the State Advisory Councils on Vocational Education. Notice of these meetings is required under Section 10(a)(2) of the Federal Advisory Committee Act, and is intended to notify the general public of its opportunity to attend. The schedule follows:

Dates and locations:

May 3, 1983, the Clift Hotel, Geary & Taylor Streets, San Francisco, CA;

May 17, 1983, the Standard Oil Building, 200 East Randolph Drive, Chicago, IL (Changed from the 19th);

May 24, 1983, Visiting Nurse Association of Boston, 100 Boylston Street.

SUPPLEMENTARY INFORMATION: These regional forums are open to the public. The purpose of the Forums is to hear from representatives of the private sector regarding their views on the condition of vocational education. The Forums will elicit business community perspectives on the effectiveness of vocational education at the secondary and postsecondary levels, the ability of vocational education to respond to changes in technology and training methods, the degree to which business works with vocational education to help upgrade program and instruction, examples of good working relationships and cooperative effort between business and education, and other education/business linkages. The panels at each Forum will be made up of Members of the National Advisory Council on Vocational Education, the National Commission for Employment Policy, and State Advisory Councils. A report with findings and recommendations drawn from the proceedings will be prepared.

Records are kept of Council proceedings and are available for public inspection at the office of the National Advisory Council on Vocational Education from 9:00 a.m. to 5:00 p.m., 425 13th Street, NW., Suite 412, Washington, DC 20004. For further information contact: Virginia Solt, NACVE Staff, at above address. Telephone (202) 376–8873.

Signed at Washington, DC on April 18, 1983.

James W. Griffith,

Executive Director, National Advisory Council on Vocational Education.

[FR Doc. 83-10590 Filed 4-20-83; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Office of Conservation and Renewable Energy

[Case No. F-008]

Energy Conservation Program for Consumer Products; Petition for Waiver of Furnace Test Procedures From Duo-Matic/Olsen, Inc.

AGENCY: Department of Energy.

SUMMARY: Today's notices publishes a "Petition for Waiver" from Duo-Matic/Olsen, Inc., of Ontario, Canada, requesting a waiver from the existing Department of Energy (DOE) test procedures for furnaces. Duo-Matic/Olsen manufactures and plans to market in the U.S. a gas-fired forced air condensing furnace. The petition requests DOE to grant relief from the test procedure requirements relating to the annual fuel utilization efficiency (AFUE) improvement attributable to the condensing of flue gases. Duo-Matic/Olsen seeks to use a National Bureau of Standards (NBS) condensate test method for AFUE instead of the present DOE test procedures which base condensation calculations on the average flue gas temperature. Duo-Matic/Olsen further seeks to modify the NBS test method in order to calculate steady state efficiency improvement due to condensing of flue gases in order to determine output capacity. DOE is soliciting comments, data, and information respecting the petition.

DATE: DOE will accept comments, data, and information not later than May 23, 1983.

ADDRESS: Written comments and statements shall be sent to: Department of Energy, Office of conservation and Renewable Energy, Case No. F-008, Mail Stop CE-113.1, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT:

Michael J. McCabe, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE-113.1, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585; (202) 252-9127;or

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Station GC-33, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585; (202) 252-9513.

SUPPLEMENTARY INFORMATION:

Background

The energy Conservation Program for Consumer Products (other than automobiles) was established pursuant to the Energy Policy and Conservation Act (EPCA), Pub. L. 94-163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act (NECPA), Pub. L. 95-619, 92 Stat. 3266, which requires DOE to prescribe standardized test procedures to masure the energy consumption of certain consumer products, including furnaces. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchasing decisions. These test procedures appear at 10 CFR Part 430, Subpart B.

DOE has amended the prescribed test procedures by adding 10 CFR 430.27, Petitions for Waiver, to allow the Assistant Secretary for Conservation and Renewable Energy temporarily to waive test procedures for a particular basic model. 45 FR 64108 (September 26, 1980.) Waivers may be granted when one or more design characteristics of a basic model either prevent testing of the basic model according to the prescribed test procedures or lead to results so unrepresentative of the model's true energy consumption as to provide materially inaccurate comparative data.

The Duo-Matic/Olsen petition seeks a waiver from the DOE test method basing condensation calculations on the average flue gas temperature. Instead, Duo-Matic/Olsen requestes the use of the condensate measureing method as set forth in Appendix C of National Bureau of Standards Interagency Report 80-2210, "Recommended Testing and Calculation Procedures for Estimating the Seasonal Performance of Residential Condensing Furnaces and Boilers," dated April 1980, to determine the AFUE of its condensing furnace. The firm also is requesting to use a similar condensate measurement method for determining the steady state efficiency improvement of its condensing furnace instead of using the flue loss method in the existing test procedures.

Pursuant to paragraph (b) of 10 CFR 430.27, DOE is hereby publishing the "Petition for Waiver" in its entirety including the additional request. The petition contains no confidential information. DOE solicits comments, data, and information respecting the petition.

Issued in Washington, D.C. April 18, 1983.

Howard S. Coleman,

Principal Deputy Assistant Secretary, Conservation and Renewable Energy.

Re: Energy Conservation Program for Consumer Products, Petition for Waiver of Furnace Test Procedures

Gentlemen: Under the provisions of 10 CFR 430.27 a petition for waiver from the test procedures in 10 CFR Part 430, Subpart B, Appendix N, dated August 12, 1980, is requested by Duo-Matic/Olsen Inc., Tilbury, Ontario.

Duo-Matic/Olsen Inc. manufactures a complete line of residential heating equipment. At the present time we are manufacturing and have available a gas fired forced air condensing furance in Canada. Plans to market this gas fired forced air condensing furnace in the United States requires testing under the provisions of 10 CFR Part 430, Subpart B, Appendix N.

Duo-Matic/Olsen Inc. requests a waiver from the existing Department of Energy test procedure requirements relating to the measurement of losses due to cycling in determining the annual fuel utilization efficiency (AFUE) improvement attributable to the condensing of flue gases. We ask that the waiver be granted to permit the optional use of tests outlined in the National Bureau of Standards document NBS1R 81-2110, April 1981, entitled, "Recommended Testing and Calculation Procedures for Estimating the Seasonal Performance of Residential Condensing Furnaces and Boilers."

Duo-Matic/Olsen Inc. also seeks to use a direct measurement method to determine the steady state efficiency improvement attributable to the condensing of flue gases needed to determine output capacity. The disclosure of the direct measurement method is published in the **Federal Register** Notice of December 3, 1982, "Energy Conservation Program for Consumer Products, Petition for Waiver of Furnace; Test Procedures From Amana Refrigeration, Inc."

If there is any other information required regarding this petition, please contact us.

Yours truly,

Duo-Matic/Olsen Inc.

Dennis Koestler,

P. Eng., Project Engineer.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, Energy.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: Under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), Department of Energy (DOE) notices of proposed collections under review will be published in the **Federal Register** on the Thursday of the week following their submission to the Office of Management and Budget (OMB). Following this notice is a list of the DOE proposals sent to OMB for approval since Thursday, April 14, 1983. The listing does not contain information collection requirements contained in regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The form number; (2) Form title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to fill out the form; and (9) A brief abstract describing the proposed collection.

DATES: Last Notice published Thursday, April 14, 1983.

FOR FURTHER INFORMATION CONTACT:

John Gross, Director, Forms Clearance and Burden Control Division, Energy Information Administration, M.S. 1H-023, Forrestal Building, 1000 Independence Ave., NW., Washington, DC 20585; (202) 252-2308;

Jefferson B. Hill, Department of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503; (202) 395-7340; or

Vartkes Broussalian, Federal Energy Regulatory Commission Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503; (202) 395-3087.

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this list should be directed to the OMB reviewer; comments should also be provided Mr. Gross. If you anticipate commenting on a form, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise the OMB reviewer of your intent as early as possible.

Issued in Washington, D.C. April 15, 1983.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450-01-M

[Form EIA-119M]

Monthly Report of Electric Energy, Capability and Peak Load; Cancellation

Correction

In FR Doc. 83-6468 beginning on page 10732 in the issue of Monday, March 14, 1983, the Draft-Form EIA-714 which began in the first column of page 10733 and ended on page 10734 should have read as follows:

BILLING CODE 1505-01-M

DRAFT-FORM EIA-714-DRAFT
ANNUAL UTILITY OPERATIONS REPORT
SCHEDULE 5

NET GENERATION, ENERGY RECEIPTS AND DELIVERIES AND SYSTEM PEAKS BY MONTHS FOR THE YEAR

General Instructions

1. In column 2, show the total net generation of system plants by months for the year.

2. In columns 3, 4, 5, and 6 give a monthly accounting of all energy transfers to and from the facilities of other systems during the year, including gross sales for resale, purchases, interchanges and transfers for resale, whether on a firm interchange or any other basis, and all energy received from small power producers, cogenerators, other industrial power, or off-system share of jointly owned units.

Energy Transfer Instructions Part A & B

Part A is for the recording of "air-lead", other systems's in-load, and borderline energy transfers; and Part B is for the recording of all other energy transfers.

Part A

A1. Show in column 3 the amounts of energy received as firm purchases and reported as firm sales for resale by the other system. Firm sales for resale are full or partial requirement power intended to meet the full customer load requirement of another system or the partial customer load of another system taking into account the other system's generation resources. If customers of respondent received energy directly from another system for the account of the respondent, (border-line receipts), such transfers should be included in column 3. If part of the energy deliveries to systems were delivered as firm sales and reported in column 4 are received back into the reporting system through another interconnection, such receipts should also be entered in column 3. All other receipts should be entered in column 5.

A2. Show in column 4 the amounts of energy delivered as firm sales for resale. If the respondent's system delivered energy to customers of another system ("border-line customers"), such deliveries should be included in column 4.

Part B

B1. Report in column 5 all energy (except that reported in column 3) received from each utility system, small power producer, cogenerator, or off-system generating plant or unit as the case may be.

B2. Report in column 6 the amounts of energy delivered for resale except those amounts reported in column 4. Do not report sales to industrial customers.

3. In column 10, enter the total maximum load which a generating unit, generating station, or other apparatus can carry under specific conditions without exceeding approved limits of temperature and stress at the time of the monthly peak load which were owned or operated by the respondent regardlessof whether they were available or unavailable for load at the time of the peak load. This should be the respondent's best estimate of the net generating capability of the system at the time of the monthly peak load.

4. In column 11, enter the capability of respondent-owned or -operated generating units that were unavailable at the time of the peak load due to scheduled maintenances, full forced outages, and other outages. These other outages may be partial outages, legal restriction on generating unit or plant output, or derating not considered in the determination of generating unit capability according to the system's rating criteria.

5. In column 12, show the maximum megawatt load on the system for each month of the year. Load data in this column should be the maximum integrated demand based on net energy for load as computed in column 7 for 60-minute clock-hour intervals. Enter the numerical day of the reporting month and hour of the day in columns 13 and 14, respectively. Where integrated demands for 60-minute clock-hour intervals are not available, it is desired that available data be adjusted to approximate such intervals. Adjustments made should be explained in notes. Where such adjustments cannot be made, load data should be furnished in the form available.

6. In column 15, the minimum hourly loads experienced during each month should be based on net energy for load as computed in column 7.

NOTES:

BILLING CODE 1505-01-C

Federal Energy Regulatory Commission

[Docket No. ER83-451-000]

Carolina Power & Light Co.; Filing

April 15, 1983.

The filing Company submits the following:

Take notice that Carolina Power & Light Company (Carolina) on April 8, 1983, tendered for filing changes outlined below in its agreement with Lumbee River EMC and Randolph EMC.

1. *Lumbee River EMC.*

Laurinburg 23 KV—The termination and removal of special metering facilities that had been required to provide metering pulse information. The metering pulse information was provided under the Company's additional facilities plan. The name of the point of delivery also was changed to reflect the delivery voltage.

Red Springs 23 KV—The termination and removal of special metering facilities that had been required to provide metering pulse information. The metering pulse information was provided under the company's additional facilities plan. The name of the point of delivery also was changed to reflect the delivery voltage.

Rockfish 115 KV—Customer has allowed Company to purchase energy generated from a hydroelectric facility located on customer's distribution facilities served from the Rockfish 115 KV POD. The name of the point of delivery also was changed to reflect the delivery voltage.

2. *Randolph EMC.*

Gray's Chapel 115 KV—A change in delivery voltage from 69 KV to 115 KV.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 3, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10606 Filed 4-20-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-455-000]

Centel Corp; Filing

April 15, 1983.

The filing Company submits the following:

Take notice that on April 8, 1983, Centel Corporation-Western Power tendered for filing an addendum to its Rate Schedule FPC No. 75, with CMS Electric Cooperative, Inc., providing for the addition of one point of delivery.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 3, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10607 Filed 4-20-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-454-000]

Centel Corp.; Filing

April 15, 1983

The filing Company submits the following:

Take notice that on April 8, 1983, Centel Corporation-Western Power tendered for filing an addendum to its Rate Schedule FPC No. 81, with Smoky Hill Electric Cooperative Association, Inc., providing for the addition of one point of delivery and increased capacities at two existing points of delivery.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 3, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-453-000]

Centel Corp.,

April 15, 1983.

The filing Company submits the following:

Take notice that Centel Corporation-Western Power on April 8, 1983, tendered for filing an addendum to its Rate Schedule FPC No. 79, with Ninnescah Rural Electric Cooperative Association, providing for an increase in capacity at one existing point of delivery.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 3, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-452-000]

Central Illinois Public Service Co.; Filing

April 15, 1983.

The filing Company submits the following:

Take notice that on April 8, 1983, Central Illinois Public Service Company (CIPS) tendered for filing Appendix A—CIPS–IP Connection 2—North Pana.

dated February 28, 1983, to the Interconnection Agreement between CIPS, Illinois Power Company and Union Electric Company dated February 18, 1972. Also included in the filing is Appendix "T" dated February 28, 1983, to the Facility Use Agreement between CIPS and Illinois Power Company dated February 14, 1972.

Copies of this filing were sent to the Public Service Commission of Missouri, Union Electric Company, Illinois Power Company and the Illinois Commerce Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 3, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 82-10610 Filed 4-20-82; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-449-000]

Duke Power Co.; Filing

April 15, 1983.

The filing Company submits the following:

Take notice that on April 6, 1983, Duke Power Company (Duke) tendered for filing an interconnection agreement between Duke and the South Carolina Public Service Authority (Santee Cooper) dated March 7, 1983. This agreement provides for an interconnection between Duke and Santee Cooper at the Southeastern Power Administration's Clarks Hill Project and for the delivery of capacity and energy pursuant to service schedules included as part of such agreement.

Duke states that the rates filed are the same as the rates previously filed for similar contracts and accepted for filing by the Commission.

Duke has requested that the contract become effective on the date of tender for filing or May 1, 1983, or as soon as the Commission deems appropriate. If waiver is not granted, however, Duke requests an effective date no later than sixty days after the date of tender for filing or June 6, 1983.

Copies of the filing were served on the South Carolina Public Service Authority, The North Carolina Utilities Commission, and the South Carolina Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protests with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10611 Filed 4-20-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-450-000]

Pennsylvania Power & Light Co.; Filing

April 15, 1983.

The filing Company submits the following:

Take notice that Pennsylvania Power & Light Company (PP&L) tendered for filing on April 6, 1983, as a rate schedule an executed agreement dated as of March 1, 1983 between PP&L and Niagara Mohawk Power Corporation (Niagara Mohawk). The proposed rate schedule provides for the sale of interruptible energy by PP&L to Naiagra Muhawk.

PP&L states that the rate schedule provides for a maximum energy reservation charge rate of $24.70 per megawatt hour and an energy charge rate based upon the incremental cost of providing the energy.

PP&L requests an effective date of April 6, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served upon Niagara Mohawk and the Pennsylvania Public Utility Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-10612 Filed 4-20-83; 8:45 am]

BILLING CODE 6717-01-M

Office of the Secretary

International Atomic Energy Agreement; Proposed Subsequent Arrangement; European Atomic Energy Community and Sweden

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended, and the Agreement for Cooperation Between the Government of the United States of America and the Government of Sweden Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreements involves approval for the following retransfer: RTDF/SW(EU)-125, from the Federal Republic of Germany to Sweden, 8000 kilograms of uranium, enriched to 3.5% in U-235. This material is being returned to Sweden after purification of unirradiated scrap, for use as power reactor fuel.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

Dated: April 18, 1983.

For the Department of Energy.

George Bradley,

Principal Deputy Assistant Secretary for International Affairs.

[FR Doc. 83-10630 Filed 4-20-83; 8:45 am]

BILLING CODE 6450-01-M

International Atomic Energy Agreements; Proposed Subsequent Arrangement; Japan

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation Between the Government of the United States of America and the Government of Japan Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreement involves approval of the following sale:
Contract Number S–JA–330, to the Japan Atomic Energy Research Institute, 20 grams of uranium-235, 20 grams of uranium-238, and 14.8 grams of plutonium-239, to be used as standards for small sample perturbation measurements at the fast critical assembly.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of the nuclear material will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

Dated: April 18, 1983.

For the Department of Energy.

George Bradley,

Principal Deputy Assistant Secretary for International Affairs.

[FR Doc. 83–10640 Filed 4–20–83; 8:45 am]

BILLING CODE 6450–01–M

Oak Ridge Operations Office; Trespassing on DOE Property

AGENCY: Department of Energy.

ACTION: Designation of cylinder storage yard K–1066–K as off-limits area.

SUMMARY: The Department of Energy hereby designates the Cylinder Storage Yard K–1066–K an Off-Limits Area in accordance with 10 CFR Part 860, making it a federal crime under 42 U.S.C. 2278a for unauthorized persons to enter into or upon the Cylinder Storage Yard K–1066–K. If unauthorized entry into or upon the site is into an area enclosed by a fence, wall, roof, or other standard barrier, conviction for such unauthorized entry may result in a fine of not more than $5,000 or imprisonment for not more than one year or both. If unauthorized entry into or upon the site is into an area not enclosed by a fence, wall, roof, or other standard barrier, conviction for such unauthorized entry may result in a fine of not more than $1,000.

FOR FURTHER INFORMATION CONTACT:

William Luck, Office of General Counsel, U.S. Department of Energy, 1000 Independence Ave. SW., Washington, D.C. 20585, (202) 252–6975; or

James Leonard, Supply Division, U.S. Department of Energy, Oak Ridge Operations Office, P.O. Box E, Oak Ridge, Tennessee 37830; (615) 576–0999.

Notice: Pursuant to section 229 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2278a), Section 104 of the Energy Reorganization Act of 1974 (42 U.S.C. 5814), as implemented by 10 CFR Part 860 published in the **Federal Register** on July 9, 1975 (40 FR 28789), and Section 301 of the Department of Energy Organization Act (42 U.S.C. 7151), the Department of Energy hereby gives notice that the Cylinder Storage Yard K–1066–K is designated an Off-Limits Area and prohibits the unauthorized entry and the unauthorized introduction of weapons or dangerous materials, as provided in 10 CFR 860.3 and 860.4 into or upon the Cylinder Storage Yard K–1066–K of the Oak Ridge Operations Office of the Department of Energy.

The Cylinder Storage Yard K–1066–K is located in the Third Civil District, Roane County, Tennessee, within the corporate limits of the City of Oak Ridge, on Perimeter Road, approximately 1.3 miles in a northerly direction from the point of intersection between State Route 58 and Perimeter Road. This facility covers approximately 11.9 acres of land, bounded on the east by Perimeter Road which circumscribes the Oak Ridge Gaseous Diffusion Plant, bounded on the north, west, and south by open Federal Government land, and is enclosed by a chain link fence seven feet in height, topped by three strands of barbed wire.

Notices stating the pertinent prohibitions of 10 CFR 860.3 and 860.4 and penalties of 10 CFR 860.5 will be posted at all entrances of said areas and at intervals along its perimeter as provided in 10 CFR 860.6.

Dated at Washington, D.C. this 31 day of March 1983.

Troy E. Wade, II,

Acting Assistant Secretary for Defense Programs.

[FR Doc. 83–10637 Filed 4–20–83; 8:45 am]

BILLING CODE 6450–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS–53048; TSH–FRL 2350–6]

Premanufacture Notices; Monthly Status Report for March 1983

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(d)(3) of the Toxic Substances Control Act (TSCA) requires EPA to issue a list in the **Federal Register** at the beginning of each month reporting the premanufacture notices (PMNs) pending before the Agency and the PMNs for which the review period has expired since publication of the last monthly summary. This is the report for March 1983.

DATE: Written comments are due no later than 30 days before the applicable notice review period ends on the specific chemical substance. Nonconfidential portions of the PMNs may be seen in Rm. E–106 at the address below between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

ADDRESS: Written comments are to be identified with the document control number "[OPTS–53048]" and the specific PMN number should be sent to: Document Control Officer (TS–793), Management Support Division, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–409, 401 M Street, SW., Washington, D.C. 20460, (202–382–3532).

FOR FURTHER INFORMATION CONTACT:

Kirk Maconaughey, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–208, 401 M Street, SW., Washington, D.C. 20460, (202–382–3746).

SUPPLEMENTARY INFORMATION: The monthly status report published in the **Federal Register** as required under section 5(d)(3) of TSCA (90 stat. 2012 (15 U.S.C. 2504)), will identify: (a) PMNs received during March; (b) PMNs received previously and still under review at the end of March; (c) PMNs for which the notice review period has ended during March; (d) chemical substances for which EPA has received a notice of commencement to manufacture during March; and (e) PMNs for which the review period has been suspended. Therefore, the March 1983 PMN Status Report is being published.

Dated: April 12, 1983.

Linda A. Travers,

Acting Director Management Support Division.

83-540	Generic name: Polyamidoamine	48 FR 11500 (3/18/83)	Do.
83-541	Generic name: Polymer of carbonic acid and mixed aromatic diols containing sulfone diol	48 FR 11500 (3/18/83)	Do
83-542	Generic name: Alkyl, alkylene maleate	48 FR 11500 (3/18/83)	Do
83-543	Generic name: Polymer of diethylenetriamine and higher polyamines with dibasic esters, reacted with epichlorohydrin	48 FR 11500 (3/18/83)	June 6, 1983
83-544	Generic name: Unsaturated polyester	48 FR 11501 (3/18/83)	June 7, 1983
83-545	Benzene, 1-3-bis(isocyanatomethyl)	48 FR 11501 (3/18/83)	Do.
83-546	Generic name: Substituted phenolazo, substituted pyrazolone	48 FR 11501 (3/18/83)	Do
83-548	Carboxylic acids, C_6-C_{10} mono-and C_6-C_{10} di-, C_6-C_{11} di-, polymers with phthalic anhydride and propylene glycol	48 FR 11501 (3/18/83)	Do
83-549	Generic name: Substituted acetamide	48 FR 11501 (3/18/83)	Do.
83-550	Generic name: Polymer of formaldehyde and substituted phenols	48 FR 12590 (3/25/83)	June 8, 1983
83-551	Generic name: Modified polymer of formaldehyde and substituted phenols	48 FR 12590 (3/25/83)	Do.
83-552	Generic name: Phenol formaldehyde butanol resin	48 FR 12591 (3/25/83)	Do.
83-553	Ethanesulfonic acid, 2-[bis (2-cyanoethyl)phosphinol]-potassium salt	48 FR 12591 (3/25/83)	June 11, 1983
83-554	Generic name: 1,3-benzenedicarboxylic acid, 5-substituted polymer with 1,2-ethanediol and oxo-heteropolycycle	48 FR 12591 (3/25/83)	Do.
83-555	Generic name: 1,3-benzenedicarboxylic acid, 5-substituted polymer with 1,2-ethanediol and oxo-heteropolycycle	48 FR 12591 (3/25/83)	Do.
83-556	Generic name: Polyester polyurethane	48 FR 12591 (3/25/83)	June 12, 1983
83-557	Generic name: Disubstituted heteromonocycle	48 FR 12591 (3/25/83)	Do.
83-558	Generic name: Modified epoxy resin	48 FR 12591 (3/25/83)	Do.
83-559	Generic name: Organo phosphate	48 FR 12591 (3/25/83)	Do.
83-560	Generic name: Organo phosphate polymer	48 FR 12591 (3/25/83)	Do.
83-561	Generic name: Acrylic alkyd polymer	48 FR 12591 (3/25/83)	Do
83-562	Generic name: Acrylic alkyd polymer	48 FR 12591 (3/25/83)	Do
83-563	Generic name: Substituted indolium, salt	48 FR 12591 (3/25/83)	Do.
83-564	Generic name: Dialkyl cycloaliphatic diester	48 FR 12591 (3/25/83)	Do.
83-565	Generic name: Sodium salt of a polymer of acrylic acid, acrylamide, and substituted acrylamide	48 FR 12592 (3/25/83)	June 13, 1983.
83-566	Generic name: Substituted chlorobenzene	48 FR 12592 (3/25/83)	June 14, 1983
83-567	Generic name: Modified acrylic copolymer	48 FR 12592 (3/25/83)	Do.
83-568	Generic name: Substituted styrene	48 FR 12592 (3/25/83)	Do.
83-569	Generic name: Phenyl substituted butane	48 FR 12592 (3/25/83)	Do.
83-570	Generic name: Subetituted alkane diols	48 FR 14035 (4/1/83)	June 15, 1983
83-571	Generic name: Fatty acids, carbomonocyclic ester	48 FR 14035 (4/1/83)	Do.
83-572	Generic name: Polyester polycarboxylate salt	48 FR 14035 (4/1/83)	Do.
83-573	Generic name: Unsaturated polyester	48 FR 14035 (4/1/83)	Do
83-574	Polymer of malonic acid, diethyl ester, trimethylolpropane, 1,6-hexanediol, neopentylglycol	48 FR 14035 (4/1/83)	Do
83-575	Polymer of bisphenol A-oxirane polymer neodecanoic acid, 2,3-epoxypropyl ester, diethylaminopropylamine, diethanolamine	48 FR 14035 (4/1/83)	Do
83-576	Generic name: Polymer of diphenylmethane diisocyanate, alkyl epoxides, alkane triol, and tnsubstituted alkanol	48 FR 14035 (4/1/83)	Do.
83-577	Generic name: 2-(2-haloaryl)amino-6-(N,N-dialkylamino)fluoran	48 FR 14036 (4/1/83)	June 18, 1983
83-578	Generic name: Alkoxymethylpolysilazanes	48 FR 14036 (4/1/83)	Do.
83-579	Invalid		
83-580	Generic name: Thio-substituted aromatic amine	48 FR 14036 (4/1/83)	Do.
83-581	Generic name: (Substituted-acetacetanilidylazophenyl)-(substituted) benzothiazole alkanolamine salt	48 FR 14036 (4/1/83)	June 19, 1983
83-582	Dimethylsila-14-crown-5	48 FR 14036 (4/1/83)	Do
83-583	Generic name: Organotrimethoxysilane	48 FR 14036 (4/1/83)	Do
83-584	Generic name: Blocked isocyanate	48 FR 14036 (4/1/83)	Do
83-585	Generic name: Polymer of styrene, mixed acrylates and acrylic amide	48 FR 14036 (4/1/83)	June 20, 1983
83-586	Generic name: Mixed acrylic copolymer	48 FR 14036 (4/1/83)	Do
83-587	Generic name: Mixed metal oxide	48 FR 14036 (4/1/83)	June 21, 1983
83-588	2,6-bis(pcrylamino)pyridine	48 FR 15180 (4/7/83)	June 22, 1983
83-589	2,6-bis(pcrylamino)-3,5-dinitropyridine	48 FR 15180 (4/7/83)	Do
83-590	Generic name: Arylsulfonic acid, [[(arylamino) phenyl]azol] compound with alkanolamine	48 FR 15180 (4/7/83)	Do
83-591	Generic name: Styrene-acrylic terpolymer	48 FR 15181 (4/7/83)	Do
83-592	Generic name: Acrylic acid polymer	48 FR 15181 (4/7/83)	Do
83-593	Generic name: Dialkylamino xylenol	48 FR 15181 (4/7/83)	Do
83-594	Generic name: Alkyl amino propyl carbamide	48 FR 15181 (4/7/83)	Do
83-595	Generic name: Alkyl amino propyl amine	48 FR 15181 (4/7/83)	Do.
83-596	Generic name: Modified acrylic polymer	48 FR 15181 (4/7/83)	June 26, 1983
83-597	Generic name: Cycloaliphatic isocyanate-amine based polyol prepolymer	48 FR 15181 (4/7/83)	Do.
83-598	Generic name: Polyester resin of aliphatic polyols, mixed aromatic diacids and aliphatic diacid	48 FR 15181 (4/7/83)	Do.
83-599	Generic name: Polyester resin of aliphatic polyol, mixed aromatic diacids, aliphatic diacid, and aromatic diisocyanate	48 FR 15181 (4/7/83)	Do
83-600	Generic name: Modified rosin ester	48 FR 15181 (4/7/83)	Do

I. 87 Premanufacture Notices Received During the Month—Continued

PMN No.	Identity and generic name	FR citation	Expiration date
83-601	Generic name: Halogenated alkene acid ester	48 FR 15181 (4/7/83)	Do.
83-602	Generic name: Brominated polyol diester	48 FR 15181 (4/7/83)	June 27, 1983.
83-603	Generic name: Substituted nitrile	48 FR 15181 (4/7/83)	Do.
83-604	Generic name: Reaction product of a mixture of mono and disubstituted dioxocarbopolycyclic compounds and 1,4-disubstituted benzene with sulfur.	48 FR 15182 (4/7/83)	June 28, 1983.
83-605	Anthraquinone, 2,2'-benzo[1,2-d:4,5-d']bisthiazole-2,6-diylbis[1-amino-	48 FR 15182 (4/7/83)	Do.
83-606	9,10-Anthracenedione, 2-methyl-1-nitro	48 FR 15182 (4/7/83)	Do.
83-607	Generic name: Di (mixed alkyl) magnesium	48 FR 15182 (4/7/83)	Do.

II. 74 Premanufacture Notices Received Previously and Still Under Review at the End of the Month:

PMN No.	Identity and generic name	FR citation	Expiration date
83-445	Iso hexadecyl isostearate	48 FR 6588 (2/14/83)	May 1, 1983.
83-447	Generic name: Polyvinyl alcohol derivative	48 FR 6589 (2/14/83)	Do.
83-448	2,6-bis(picrylamino)-3,5-dinitropyridine	48 FR 6589 (2/14/83)	Do.
83-449	2-ethyl-2-methyl butanoic acid	48 FR 6589 (2/14/83)	Do.
83-450	2,2-dimethyl pentanoic acid	48 FR 6589 (2/14/83)	Do.
83-451	Generic name: Disubstituted bis(phenylazo) 4-amino-5-hydroxy-2,7-naphthalenedisulfonic acid, alkali metal salt	48 FR 6589 (2/14/83)	May 2, 1983.
83-452	Generic name: Substituted 2-phenylazo-1-hydroxy-3-naphthalenesulfonic acid, metal complex, alkali metal salt	48 FR 6589 (2/14/83)	Do.
83-453	Generic name: Polymer of mixed alkane diols, alkane triol, propylene oxide, alkanoic acid, aliphatic isocyanate, and isophorone diisocyanate.	48 FR 6589 (2/14/83)	Do.
83-454	Generic name: Acrylamide copolymer	48 FR 6589 (2/14/83)	May 3, 1983.
83-455	Generic name: Alkenoyl disubstituted cycloalkane	48 FR 6589 (2/14/83)	Do.
83-456	Generic name: Substituted anthraquinone	48 FR 6589 (2/14/83)	Do.
83-457	N,N'-hexanedioyl-bis[3,4,5,6-tetrahydro-2(1H) pyrimidinone]	48 FR 7299 (2/18/83)	May 4, 1983
83-458	Generic name: Substituted polyhydric alcohol	48 FR 7300 (2/18/83)	Do.
83-459	Generic name: Dialkyl dithiophosphate	48 FR 7300 (2/18/83)	Do.
83-460	Generic name: Dialkyl dithiophosphate	48 FR 7300 (2/18/83)	Do.
83-461	Generic name: Substituted alkoxy silane	48 FR 7300 (2/18/83)	Do.
83-462	Generic name: Succinate ester amide	48 FR 7300 (2/18/83)	May 7, 1983.
83-463	Generic name: Amino aliphatic propoxylate	48 FR 7300 (2/18/83)	Do.
83-464	Generic name: Sodium sulfosuccinate of ethoxylated substituted phenol	48 FR 7300 (2/18/83)	Do.
83-465	Generic name: Metal polyisobutenylsuccinate	48 FR 7300 (2/18/83)	Do.
83-466	Generic name: Ether-olefin-sulfone terpolymer	48 FR 7300 (2/18/83)	Do.
83-467	Generic name: Alkyl cyclohexane carboxaldehyde	48 FR 7300 (2/18/83)	Do.
83-468	Complex sodium polyethylene glycolate salt	48 FR 7300 (2/18/83)	Do.
83-469	Generic name: Aromatic polyamide solution	48 FR 7300 (2/18/83)	May 8, 1983.
83-470	Generic name: Polymer of substituted acrylic ester and substituted acrylamide	48 FR 7300 (2/18/83)	Do.
83-471	Generic name: Metal salt of saccharin	48 FR 7301 (2/18/83)	Do.
83-472	2-propenoic acid, (2,4,6-trioxo-1,3,5-triazine-1,3,5 (2H, 4H, 6H)-triyl) di-2,1-ethanediyl ester	48 FR 7301 (2/18/83)	Do.
83-473	2-propenoic acid, (2,4,6-trioxo-1,3,5-triazine-1,3,5 (2H, 4H, 6H)-triyl) di-2,1-ethanediyl ester	48 FR 7301 (2/18/83)	Do.
83-474	2-propenoic acid, (2,4,6-trioxo-1,3,5-triazine-1,3,5 (2H, 4H, 6H)-triyl) di-2,1-ethanediyl ester	48 FR 7301 (2/18/83)	Do.
83-475	Generic name: Chlorendic anhydride based alkyd polymer	48 FR 7301 (2/18/83)	Do.
83-476	Generic name: Polyether modified alkyd	48 FR 7301 (2/18/83)	Do.
83-477	Generic name: Aliphatic phosphite ester	48 FR 7301 (2/18/83)	May 9, 1983
83-478	Generic name: Carboxylic acid derivatives of alkoxylated phenol derivatives and alkoxylated polyamines	48 FR 7301 (2/18/83)	Do.
83-479	Generic name: Monoazo substituted aromatic	48 FR 7301 (2/18/83)	Do.
83-480	Aminopropyl aminoethyl piperazine	48 FR 7301 (2/18/83)	May 10, 1983.
83-481	C_{11}-C_{14} alkoxy propylamino propylamine	48 FR 7301 (2/18/83)	Do.
83-482	Generic name: Modified polyester of a carbomoncyclic anhydride and a substituted alkanediol	48 FR 7301 (2/18/83)	Do.
83-483	Generic name: Mixed fatty acids, alkanopolyol; benzenecarboxylic acids polymer	48 FR 7302 (2/18/83)	Do.
83-484	Generic name: Copolymer of unsaturated organic compounds with polyols and isocyanates	48 FR 8343 (2/28/83)	May 14, 1983.
83-485	Generic name: Alkyl branched alkanoate	48 FR 8343 (2/28/83)	Do.
83-486	Generic name: Zirconium propanoate, substituted	48 FR 8343 (2/28/83)	May 15, 1983.
83-487	Generic name: Alkyl sulfide	48 FR 8343 (2/28/83)	Do.
83-488	Generic name: Polymer of acrylic ester and substituted acrylamide	48 FR 8344 (2/28/83)	Do.
83-489	Generic name: Styrene, acrylate methacrylate copolymer	48 FR 8344 (2/28/83)	Do.
83-490	Generic name: Modified coconut-phthalic-mixed polyol alkyd polymer	48 FR 8344 (2/28/83)	May 16, 1983.
83-491	Generic name: Sodium carboxyalkyl thiosulfate	48 FR 8344 (2/28/83)	May 17, 1983.
83-492	4-(4-methyl-1-pipendinyl) pyridine	48 FR 8344 (2/28/83)	Do.
83-493	Generic name: Alkoxylated alcohol compounds	48 FR 8344 (2/28/83)	Do.
83-494	Generic name: Propylene glycol compounds	48 FR 8344 (2/28/83)	Do.
83-495	Generic name: Metal complexed substituted aromatic salt	48 FR 9366 (3/4/83)	May 18, 1983.
83-496	Generic name: Polyester from a carbomonocyclic anhydride and alkanediol	48 FR 9366 (3/4/83)	May 22, 1983
83-497	Generic name: Reaction product of 1,3-benzenediamine, hydroxybenzene, and oxo alkane with sodium sulfide	48 FR 9366 (3/4/83)	Do.
83-498	Generic name: Polymer of alkyl diamine and substituted oxiranes	48 FR 9366 (3/4/83)	Do.
83-499	Generic name: Reaction product of polyalkylene polyamines, phenols and polymeric epoxide derivatives	48 FR 9366 (3/4/83)	Do.
83-500	Generic name: Reaction product of polyalkylene polyamines, phenols and polymeric epoxide derivatives	48 FR 9366 (3/4/83)	Do.
83-501	Generic name: Modified rosin condensation	48 FR 9366 (3/4/83)	Do.
83-502	Generic name: Aminoheterocyclyl branched alkane	48 FR 9366 (3/4/83)	Do.
83-503	Generic name: Substituted alkoxy silane	48 FR 9366 (3/4/83)	Do.
83-504	Generic name: α-cyano carbocyclccarboxylate	48 FR 9366 (3/4/83)	Do.
83-505	Generic name: Polyester resin-saturated	48 FR 9367 (3/4/83)	Do.
83-506	Generic name: Modified acrylic polymer	48 FR 9367 (3/4/83)	May 23, 1983.
83-507	Generic name: Monocyclic sulfur derivative	48 FR 9367 (3/4/83)	Do.
83-508	Generic name: Substituted benzenesulfonic acid salt	48 FR 10468 (3/11/83)	May 25, 1983.
83-509	Generic name: Disubstituted benzotriazole	48 FR 10469 (3/11/83)	Do.
83-510	Generic name: Reaction product of an aromatic dianhydride with a substituted C_{8-14} alcohol and epichlorohydrin	48 FR 10469 (3/11/83)	Do.
83-511	Generic name: Polyester	48 FR 10469 (3/11/83)	Do.
83-512	Generic name: Polymer of amino-alkyl-carbomono-cycle, hexamethylene diisocyanate, propylene oxide, alkane triol, alkan-one, and disubstituted alkane diol.	48 FR 10469 (3/11/83)	Do.
83-513	Generic name: Polymer of isophorone diisocyanate, alkanoic acid, mixed alkane diols, alkane triol, oxo-heteropolycycle, and neopentyl glycol.	48 FR 10469 (3/11/83)	Do.
83-514	Generic name: Substituted indolium, salt	48 FR 10469 (3/11/83)	Do.
83-515	Generic name: Styrene co-polymer	48 FR 10469 (3/11/83)	Do.
83-516	Generic name: Aromatic polyester with substituted alkanes	48 FR 10469 (3/11/83)	Do.
83-517	Generic name: Polyurethane polymer, with an aromatic polyester	48 FR 10469 (3/11/83)	Do.

II. 74 PREMANUFACTURE NOTICES RECEIVED PREVIOUSLY AND STILL UNDER REVIEW AT THE END OF THE MONTH:—Continued

PMN No.	Identity and generic name	FR citation	Expiration date
83-518	1, 1' [isopropylidenebis (6-hydroxy-m-phenylene)]bis[tetrahydiathiophenium hydroxide) bis (inner salt) tetrahydrate	48 FR 10469 (3/11/83)	Do
83-519	Generic name: Functionalized acrylic polymer	48 FR 10469 (3/11/83)	Do

III. 191 PREMANUFACTURE NOTICES FOR WHICH THE NOTICE REVIEW PERIOD HAS ENDED DURING THE MONTH. (EXPIRATION OF THE NOTICE REVIEW PERIOD DOES NOT SIGNIFY THAT THE CHEMICAL HAD BEEN ADDED TO THE INVENTORY)

PMN No.	Identity and generic name	FR citation	Expiration date
83-23	Generic name: Substituted phenol	47 FR 46373 (10/18/82)	Mar. 22, 1983
83-24	Generic name: Substitute pyridine	47 FR 46373 (10/18/82)	Mar. 19, 1983
83-35	Generic name: Sulfophenylazonaphthyl dye	47 FR 47067 (10/22/82)	Mar. 27, 1983
83-38	Generic name: Sulfophenylazonaphthyl dye	47 FR 47068 (10/22/82)	Do.
83-49	Generic name: Substituted pyridine	47 FR 49073 (10/29/82)	Mar. 30, 1983
83-75	Generic name: Sodium 2-substituted propanoate	47 FR 50339 (11/5/82)	Mar. 9, 1983
83-111	Generic name: Aromatic acid diester	47 FR 52223 (11/19/82)	Mar. 4, 1983
83-129	Syncrude (full range, dewaxed dearsenited shale oil)	47 FR 54357 (12/2/82)	Mar. 31, 1983
83-130	Light straight run naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-131	Heavy straight run naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-132	Straight run middle distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-133	Straight run gas oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-134	Atmosphere tower residuum (shale oil)	47 FR 54357 (12/2/82)	Do.
83-135	Vacuum tower condensate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-136	Light vacuum gas oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-137	Heavy vacuum gas oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-138	Vacuum residuum (shale oil)	47 FR 54357 (12/2/82)	Do
83-139	Full range catalytic cracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-140	Light catalytic cracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-141	Catalytic cracked clarified oil (shale oil)	47 FR 54357 (12/2/82)	Do.
83-142	Catalytic cracked light olefins (shale oil)	47 FR 54357 (12/2/82)	Do
83-143	Full range catalytic reformed naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-144	Full range alkylate naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-145	Light hydrocracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-146	Heavy hydrocracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-147	Light hydrocracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-148	Light thermal cracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-149	Heavy thermal cracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-150	Light thermal cracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-151	Heavy thermal cracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-152	Coke (shale oil)	47 FR 54357 (12/2/82)	Do
83-153	Sweetened naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-154	Hydrodesulfurized heavy naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-155	Hydrodesulfurized middle distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-156	Full range straight run naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-157	Straight run kerosive (shale oil)	47 FR 54357 (12/2/82)	Do.
83-158	Light paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-159	Heavy paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-160	Light catalytic cracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-161	Heavy catalytic cracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-162	Intermediate catalytic cracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-163	Heavy catalytic cracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-165	Light catalytic reformed naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-166	Heavy catalytic reformed naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-167	Catalytic reformer fractionator residue (shale oil)	47 FR 54357 (12/2/82)	Do
83-168	Light alkylate naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-169	Heavy alkylate naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-170	Alkylate distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-171	Polymerization naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-172	Viscous polymer (shale oil)	47 FR 54357 (12/2/82)	Do
83-173	Isomerization naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-174	Heavy hydrocracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-175	Hydrocracked residuum (shale oil)	47 FR 54357 (12/2/82)	Do
83-176	Sweetened middle distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-177	Normal paraffins (shale oil)	47 FR 54357 (12/2/82)	Do
83-178	Sorption process raffinate (shale oil)	47 FR 54357 (12/2/82)	Do
83-179	Solvent refined light naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-180	Solvent refined heavy naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-181	Solvent refined middle distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-182	Solvent refined gas oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-183	Solvent refined light paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-184	Solvent refined heavy paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-185	Solvent deasphalted residual oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-186	Solvent decarbonized heavy paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-187	Solvent refined residual oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-188	Solvent refined spent lube oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-189	Light naphtha solvent extract (shale oil)	47 FR 54357 (12/2/82)	Do
83-190	Heavy naphtha solvent extract (shale oil)	47 FR 54357 (12/2/82)	Do.
83-191	Middle distillate solvent extract (shale oil)	47 FR 54357 (12/2/82)	Do
83-192	Gas oil solvent extract (shale oil)	47 FR 54357 (12/2/82)	Do
83-193	Light paraffinic distillate solvent extract (shale oil)	47 FR 54357 (12/2/82)	Do
83-194	Heavy paraffinic distillate solvent extract (shale oil)	47 FR 54357 (12/2/82)	Do
83-195	Residual oil solvent extract (shale oil)	47 FR 54357 (12/2/82)	Do
83-196	Heavy paraffinic distillate decarbonization raffinate (shale oil)	47 FR 54357 (12/2/82)	Do
83-197	Clay treated light paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-198	Clay treated heavy paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-199	Clay treated paraffin wax (shale oil)	47 FR 54357 (12/2/82)	Do.
83-200	Chemically neutralized spent lube oil (shale oil)	47 FR 54357 (12/2/82)	Do.
83-201	Hydrotreated light naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-202	Hydrotreated heavy naphtha (shale oil)	47 FR 54357 (12/2/82)	Do

III. 191 PREMANUFACTURE NOTICES FOR WHICH THE NOTICE REVIEW PERIOD HAS ENDED DURING THE MONTH. (EXPIRATION OF THE NOTICE REVIEW PERIOD DOES NOT SIGNIFY THAT THE CHEMICAL HAD BEEN ADDED TO THE INVENTORY)—Continued

PMN No.	Identity and generic name	FR citation	Expiration date
83-203	Hydrotreated light distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-204	Hydrotreated middle distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-205	Hydrotreated light paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-206	Hydrotreated heavy paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-207	Hydrotreated paraffin wax (shale oil)	47 FR 54357 (12/2/82)	Do
83-208	Hydrotreated microcrystalline wax (shale oil)	47 FR 54357 (12/2/82)	Do.
83-209	Hydrotreated vacuum gas oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-210	Hydrotreated residual oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-211	Solvent dewaxed light paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-212	Solvent dewaxed heavy paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-213	Solvent dewaxed residual oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-214	Slack wax (shale oil)	47 FR 54357 (12/2/82)	Do.
83-215	Petrolatum (shale oil)	47 FR 54357 (12/2/82)	Do.
83-216	Foots oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-217	Paraffin wax (shale oil)	47 FR 54357 (12/2/82)	Do.
83-218	Microcrystalline wax (shale oil)	47 FR 54357 (12/2/82)	Do.
83-219	Catalytic dewaxed naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-220	Catalytic dewaxed middle distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-221	Catalytic dewaxed light paraffinic oil (shale oil)	47 FR 54357 (12/2/82)	Do.
83-222	Catalytic dewaxed heavy paraffinic oil (shale oil)	47 FR 54357 (12/2/82)	Do.
83-223	Hydrodesulfurized light naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-224	Hydrosulfurized kerosine (shale oil)	47 FR 54857 (12/2/82)	Do.
83-225	Hydrosulfurized gas oil (shale oil)	47 FR 54357 (12/2/82)	Do.
83-226	Hydrodesulfurized atmospheric tower residuum (shale oil)	47 FR 54357 (12/2/82)	Do.
83-227	Hydrodesulfurized heavy vacuum gas oil (shale oil)	47 FR 54357 (12/2/82)	Do.
83-228	Hydrodesulfurized heavy vacuum gas oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-229	Steam cracked residuum (shale oil)	47 FR 54357 (12/2/82)	Do.
83-230	Light aliphatic solvent naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-231	Medium aliphatic solvent naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-232	Heavy aliphatic solvent naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-233	Light aromatic solvent naphtha (shale oil)	47 FR 54358 (12/2/82)	Do.
83-234	Heavy aromatic solvent naphtha (shale oil)	47 FR 54358 (12/2/82)	Do.
83-235	Calcined coke (shale oil)	47 FR 54358 (12/2/82)	Do.
83-264	Condensation polymer of ethyl acrylate and ethanol amine	47 FR 55423 (12/9/82)	Mar. 1, 1983
83-265	Generic name: Substituted alkyl polyalkylene oxy quaternary ammonium chloride compound	47 FR 55423 (12/9/82)	Do.
83-266	Generic name: Poly(oxyalkyl disubstituted silane) alkyl, alkoxy-terminated, polymer with titanium alkoxide	47 FR 57333 (12/23/82)	Mar 2, 1983
83-267	Generic name: Polyester from carbomonocyclic anhydrides and substituted alkanediols	47 FR 57333 (12/23/82)	Do
83-268	Generic name: Azobis-(nitrosulfophenyl-alkylsulfobenzene) compound with oxyalkylamine	47 FR 57333 (12/23/82)	Do.
83-269	Generic name: Substituted naphthalenylazo naphthalenedsulfonic acid salt	47 FR 57333 (12/23/82)	Do.
83-270	Generic name: Tetra(substituted sulfonic acid) derivative of transition metal—arylcyanine complex	47 FR 57333 (12/23/82)	Do.
83-271	Generic name: Hydrocarbon complex with platinum halide	47 FR 57333 (12/23/82)	Do.
83-272	Generic name: Substituted pyridine	47 FR 57333 (12/23/82)	Mar 8, 1983
83-273	Generic name: Blocked isocyanate	47 FR 57333 (12/23/82)	Mar 5, 1983
83-274	Generic name: Polymer of alkane polyols, alkanedioic acids and aromatic polyacid	47 FR 57333 (12/23/82)	Do
83-275	Generic name: Modified polyisocyanate	47 FR 57333 (12/23/82)	Do.
83-276	Generic name: Modified polyisocyanate	47 FR 57333 (12/23/82)	Do.
83-277	2-Oxepanone, polymer with 2,2'-[oxybismethylene)] bis[2-(hydroxymethyl)-1,3-propanediol	47 FR 57333 (12/23/82)	Do.
83-278	2-Oxepanone, polymer with 2,2-bis[3-(hydroxy-2,2-bis(hydroxymethyl)propoxy]methyl]-1,3-propanediol	47 FR 57333 (12/23/82)	Do.
83-279	Generic name: Chlorinated, oleated hydrocarbon polymer	47 FR 57334 (12/2/82)	Do.
83-280	Generic name: 2-Anthracenesulfonic acid, 1-amino-9,10-dihydro-9,10-dioxo-4-[(substituted phenyl)amino]	47 FR 57334 (12/23/82)	Mar. 6, 1983
83-281	Generic name: Benzenesulfonamide salt	47 FR 57334 (12/23/82)	Do.
83-282	Generic name: Polyester based complex alkanediol	47 FR 57334 (12/23/82)	Do.
83-283	Generic name: Substituted cyclosiloxane	47 FR 57334 (12/23/82)	Do.
83-284	Generic name: Polyester polyol	47 FR 57334 (12/23/82)	Do.
83-285	Generic name: Phosphate ester	47 FR 57334 (12/23/82)	Do
83-286	Generic name: 1,1-dimethyl ethyl peroxyester	47 FR 57334 (12/23/82)	Do.
83-287	Generic name: 1,1-dimethylpropyl peroxyester	47 FR 57334 (12/23/82)	Do.
83-288	Generic name: 1-methyl-1-phenyl ethyl peroxyester	47 FR 57334 (12/23/82)	Do.
83-289	Copolymer from acrylonitrile, styrene and p-isopropenylphenol	47 FR 57334 (12/23/82)	Do.
83-290	Generic name: Asphalt styrenated resin	47 FR 57334 (12/23/82)	Do.
83-291	Generic name: Vinylic copolymer	47 FR 57334 (12/23/82)	Do.
83-292	Generic name: N-substituted-N-mixed alkoxy-propylmaleamic acid derivatives	47 FR 57335 (12/23/82)	Mar. 7, 1983
83-293	Hydrogenated acrylonitrile-butadiene copolymer (H-NBR)	47 FR 57335 (12/23/82)	Do.
83-294	Generic name: Organophosphorus compound	47 FR 57335 (12/23/82)	Do.
83-295	Generic name: Organosulfur compounds	47 FR 57335 (12/23/82)	Mar. 8, 1983
83-296	Generic name: Rosin metallic salt	47 FR 57335 (12/23/82)	Do.
83-297	Generic name: (Substituted) anthracenylimino-(substituted) carbomonocylic acid alkylamine salt	47 FR 57336 (12/23/82)	Mar. 9, 1983
83-303	Polymer of: trimethyl pentane diol, adipic acid and phthalic anhydride	47 FR 57336 (12/23/82)	Do.
83-304	Bis (benzyl-thioureidoethyl)-dithio carbamic acid-s-propoylester- -sulfonic acid sodium	47 FR 57337 (12/23/82)	Do.
83-305	Generic name: Urethane polyester prepolymer acrylate capped	47 FR 57337 (12/23/82)	Mar. 12, 1983
83-311	3-dimethylureidyimethyl-3,5,5-trimethylcyclo-hexyl dimethyl urea	47 FR 57337 (12/23/82)	Mar 18, 1983
83-312	Generic name: Aromatic aliphatic branched polyester resin	47 FR 57337 (12/23/82)	Do.
83-313	Generic name: Polymer of alkane polyols, alkane dioic acid and aromatic acid	47 FR 57337 (12/23/82)	Do.
83-314	Generic name: Ester of aromatic acids and aliphatic polyols	47 FR 57337 (12/23/82)	Do.
83-315	Generic name: 2-substituted propanoic acid	47 FR 57337 (12/23/82)	Do.
83-316	Generic name: Modified ethylene-chlorotri-fluoroethylene polymer	47 FR 57338 (12/23/82)	Mar 14, 1983
83-317	Generic name: Modified polyester polyurethane from substituted alkanediols, alkandioic acid and a disocyanate		

III. 191 PREMANUFACTURE NOTICES FOR WHICH THE NOTICE REVIEW PERIOD HAS ENDED DURING THE MONTH. (EXPIRATION OF THE NOTICE REVIEW PERIOD DOES NOT SIGNIFY THAT THE CHEMICAL HAD BEEN ADDED TO THE INVENTORY)—Continued

PMN No.	Identity and generic name	FR citation	Expiration date
83-318	Generic name: Acrylic copolymer of styrene and methacrylate monomers	47 FR 57338 (12/23/82)	Mar. 15, 1983.
83-319	Generic name: Modified alkyd polymer from mixed fatty oils, carbomonocyclic anhydride, carbomonocyclic acid and a substituted alkane diol.	47 FR 57338 (12/23/82)	Do.
83-320	Generic name: Polymeric acrylate	47 FR 57338 (12/23/82)	Do.
83-321	Generic name: Mixed glycol oligoesters of mixed dicarboxylic acids	48 FR 72 (1/3/83)	Mar. 16, 1983
83-322	Generic name: Polyester of aliphatic polyol, mono basic acids and aromatic diacids	48 FR 72 (1/3/83)	Do.
83-323	Generic name: Polyester of aliphatic polyols, vegetable oil, and aromatic dibasic acid	48 FR 72 (1/3/83)	Do.
83-324	Generic name: Modified bisphenol A, epichlorohydrin polymer	48 FR 72 (1/3/83)	Do.
83-325	Generic name: Polyester polyurethane from carbomonocyclic anhydride, alkanediols and diisocyanates	48 FR 72 (1/3/83)	Do.
83-326	Generic name: Functionalized acrylic polymer	48 FR 72 (1/3/83)	Do.
83-327	Generic name: Blocked isocyanate	48 FR 72 (1/3/83)	Do.
83-328	Generic name: Modified copolymer of alkenoic esters and substituted alkenoic esters with styrene	48 FR 72 (1/3/83)	Do.
83-329	Generic name: Substituted phenyl, azo substituted naphthalenedisulfonic acid, sodium salt	48 FR 72 (1/3/83)	Do.
83-330	Generic name: Substituted phenate	48 FR 73 (1/3/83)	Do.
83-331	Generic name: Bis-alkylated phenol	48 FR 73 (1/3/83)	Do.
83-332	Generic name: Aromatic alkyd—silicone modified	48 FR 73 (1/3/83)	Do.
83-334	Generic name: Polymer of alkane polyols, alkanedioic acid, and aromatic diacid	48 FR 73 (1/3/83)	Do.
83-336	Methanesulfonic acid, tin (2+) salt	48 FR 73 (1/3/83)	Do.
83-337	Methanesulfonic acid, lead (2+) salt	48 FR 73 (1/3/83)	Do.
83-338	Generic name: Substituted-1,8-triphenodioxazine-disulfonic acid, sodium salt	48 FR 862 (1/7/83)	Mar. 26, 1983
83-339	Generic name: 5-[4-chloro-6-[3-[2-(hydroxy-sulfonyloxy)ethylsulfonyl]anilino]-1,3,5-triazin-2-ylamino]-3-[1,5-disulfo-2-naphthylazo)-4-hydroxy-2, 7-naphthalenedisulfonic acid, pentasodium salt.	48 FR 862 (1/7/83)	Do.
83-340	Generic name: 3-[4-[4-[4-chloro-6-[3-[2-(hydroxysulfonyloxy)ethylsulfonyl]anilino]-1,3,5-triazin-2-ylamino]-5-sulfonaphthylazo]-6-sulfonaphthylazo-1,5-naphthalenedisulfonic acid, pentasodium salt.	48 FR 862 (1/7/83)	Do.
83-342	Generic name: 3-[5-[4-chloro-6-[3-[2-(hydroxysulfonyloxy)ethylsulfonyl]anilino]-1,3,5-triazin-2-ylamino]-2-sulfophenylazo]-4-hydroxy-5-propionylamino-2,7-naphthalenedisulfonic acid tetrasodium salt.	48 FR 862 (1/7/83)	Do.
83-343	Generic name: 4-amino-6-[5-[4-chloro-[3-[2-(hydroxysulfonyloxy)ethylsulfonyl]anilino]-1,3,5-triazin-2-ylamino]-2-sulfophenylazo]-5-hydroxy-3-(4-sulfophenylazo]-2,7-naphthalenedisulfonic acid, pentasodium salt.	48 FR 862 (1/7/83)	Do.
83-344	Generic name: Mercapto-substituted, heterocyclic nitrogen compound	48 FR 862 (1/7/83)	Do.
83-345	Generic name: Alkyl thiocyanate	48 FR 862 (1/7/83)	Do.
83-346	Polymer of 2-propenoic acid, 2-methyl-, methyl ester and 1,3-butylenegiycol diacrylate	48 FR 862 (1/7/83)	Do.
83-347	Partially hydrogenated polybenzylated toluene	48 FR 862 (1/7/83)	Mar. 27, 1983
83-348	Polybenzylated toluene	48 FR 862 (1/7/83)	Do.
83-349	Generic name: Poly polymethacrylate	48 FR 862 (1/7/83)	Do.
83-351	Polymer of trimethylol propane, ethylene glycol, adipic acid, phthalic anhydride	48 FR 862 (1/4/83)	Mar. 29, 1983
83-352	Generic name: Aliphatic secondary naphthalene	48 FR 862 (1/14/83)	Do.
83-353	Generic name: Aliphatic secondary naphthalene	48 FR 862 (1/14/83)	Do.
83-354	Generic name: Aliphatic bis(secondary naphthalene amine)	48 FR 862 (1/14/83)	Do.
83-355	Generic name: Substituted aromatic secondary naphthalene amine	48 FR 862 (1/14/83)	Do.

IV. 53 CHEMICAL SUBSTANCES FOR WHICH EPA HAS RECEIVED NOTICES OF COMMENCEMENT TO MANUFACTURE

PMN No.	Chemical identification	FR citation	Date of commencement
80-50	Polymer of: methyl methacrylate; methyl acrylate; butylacrylate; 2-hydroxyethyl acrylate	45 FR 25131 (4/14/80)	Mar. 5, 1983.
80-223	1,6-Hexanediol, terephthalic acid, neopentyl glycol, trimelletic anhydride, adipic acid, and isophthalic acid	45 FR 61019 (9/15/80)	Oct. 9, 1981
80-327	Generic name: Toluene diisocyanate blocked prepolymer	45 FR 83020 (12/17/80)	Feb. 10, 1983.
81-51	Polymer of tall oil fatty acids, neopentyl glycol, pentaerythritol, isophthalic acid, and benzoic acid	46 FR 16319 (3/12/81)	Feb. 9, 1983.
81-64	Polymer of neopentyl glycol, adipic acid, trimellitic anhydride, and an aromatic aliphatic ester	46 FR 16933 (3/16/81)	Apr 15, 1982.
81-226	Polymer of acrylic acid, acrylonitrile, butylacrylate, 2-hydroxyethyl acrylate, and vinylidene chloride	46 FR 31940 (6/16/81)	Mar 5, 1983
81-331	Generic name: Acrylic modified alkyd resin	46 FR 38580 (7/28/81)	Feb. 17, 1983
81-464	Generic name: Alkyl styrenated acrylate terpolymer	46 FR 47855 (9/30/81)	Aug. 3, 1982
81-500	2-dodecyl-9-H-thioxanthen-9-one	46 FR 50147 (10/9/81)	Feb. 15, 1983.
81-621	Generic name: Polyester of propanediol, adipic acid, phthalic anhydride, aromatic aliphatic ester	46 FR 60982 (12/14/81)	Apr. 7, 1982.
81-625	Generic name. Blocked isocyanate	46 FR 61505 (12/17/81)	Mar. 4, 1983.
81-656	Generic name: Halogenated nitrotoluene derivative	47 FR 1020 (1/8/82)	Dec 16, 1982
82-59	Generic name: Aromatic disazo dye	47 FR 5330 (2/4/82)	June 21, 1982
82-233	Generic name: Organic salt of phosphorus	47 FR 15407 (4/9/82)	Mar 21, 1983
82-272	Generic name: Heterocyclic-alkylphenyl azo substance	47 FR 18405 (4/16/82)	Dec. 9, 1982.
82-277	Generic name: Polymer of aliphatic and aromatic diacids and an aliphatic diol	47 FR 17666 (4/23/82)	Mar. 7, 1983.
82-319	Generic name: Alkyl oligoglycosides	47 FR 19782 (5/7/82)	Feb. 21, 1983.
82-327	Generic name: Hydroxy, amine-substituted anthraquinone	47 FR 20853 (5/14/82)	Oct. 11, 1982.
82-386	Generic name: Metal complex of disazo aromatic acids, sodium salt	47 FR 25400 (6/11/82)	Sept. 21, 1982.
82-483	Generic name: Polymer of acrylic acid and acrylic esters	47 FR 31063 (7/16/82)	Mar. 10, 1983
82-485	Generic name: Chlorotriazine modified copper phthalocyanine, sodium salt	47 FR 31063 (7/16/82)	Oct. 21, 1982
82-567	Generic name: Alkylbenzenesulfonic acid compound with dialkyl amine	47 FR 39242 (9/7/82)	Feb. 14, 1983.
82-502	Generic name: Mixed glycol oligoesters of mixed dicarboxylic acids	47 FR 39243 (9/7/82)	Mar. 7, 1983.
82-630	Generic name: Unsaturated alkyl fatty amine	47 FR 39885 (9/10/82)	Mar. 4, 1983.
82-631	Generic name: Unsaturated amine adduct	47 FR 39885 (9/10/82)	Mar. 8, 1983.
82-661	Generic name: Modified polyurethane	47 FR 42152 (9/24/82)	Mar. 4, 1983.
82-662	Generic name: Modified polyurethane	47 FR 42152 (9/24/82)	Do.
82-663	Generic name. Modified diol	47 FR 42152 (9/24/82)	Do.
82-671	Generic name: Vinyl chloride-ethylene copolymer	47 FR 42153 (7/16/82)	May 2, 1983
82-683	Generic name: Halogenated ketone	47 FR 43161 (9/30/82)	Mar. 15, 1983
82-701	Generic name: Aromatic disazo dye	47 FR 44809 (10/8/82)	Feb. 25, 1983
82-702	Generic name: Metal complexed, substituted aromatic azo compound	47 FR 44809 (10/8/82)	Feb. 14, 1983.
83-24	Generic name: Substituted pyridine	47 FR 46373 (10/18/82)	Mar. 16, 1983.
83-32	Generic name: Modified polyester polyurethane from substituted alkanediols, alkanedioic acid and a diisocyanate	47 FR 47067 (10/22/82)	Feb. 17, 1983.
83-51	Generic name: Alkoxylated alkyl amine	47 FR 49072 (10/29/82)	Mar. 17, 1983.
83-91	Polymer of tall oil rosin, gum rosin, paraformaldehyde, calcium hydroxide, phenol	47 FR 52222 (11/19/82)	Feb. 8, 1983.
83-105	1,2-benzenediamine, 4-ethoxy, sulfate (1:1)	47 FR 52223 (11/19/82)	Feb. 28, 1983.
83-119	Generic name: Polyester from a carbomonocyclic anhydride and substituted alkanediols	47 FR 52224 (11/19/82)	Feb. 15, 1983.
83-127	Polymer of acrylic acid, butyl acrylate, 2-hydroxy ethyl acrylate, methyl acrylate, and 2-ethylhexyl acrylate	47 FR 53782 (11/29/82)	Mar. 5, 1983.
83-242	Generic name: Polymer of aliphatic polyols, aliphatic and aromatic dicarboxylic acids	47 FR 53783 (11/29/82)	After Mar. 1, 1983.
83-258	Generic name: Polymer of styrene, methacrylate ester, acrylic ester, and acrylic acid	47 FR 55422 (12/9/82)	Do.
83-261	2,2-bis[4-(4-amino phenoxy)phenyl] hexafluoro-propene	47 FR 55422 (12/9/82)	Mar. 7, 1983.

IV. 53 Chemical Substances for Which EPA Has Received Notices of Commencement To Manufacture—Continued

PMN No.	Chemical identification	FR citation	Date of commencement
83-269	Generic name: Substituted naphthalenylazo naphthalenedisulfonic acid salt	47 FR 57333 (12/23/82)	Mar. 3, 1983.
83-270	Generic name: Tetra(substituted sulfonic acid) derivative of transition metal-acrylcyanine complex	47 FR 57333 (12/23/82)	Do.
83-271	Generic name: Hydrocarbon complex with platinum halide	47 FR 57333 (12/23/82)	Do.
83-290	Generic name: Asphalt styrenated resin	47 FR 57334 (12/23/82)	Mar. 11, 1983.
83-291	Generic name: Vinylic copolymer	47 FR 57334 (12/23/82)	Mar. 6, 1983.
83-294	Generic name: Organophosphorus compound	47 FR 57335 (12/23/82)	Mar. 8, 1983.
83-295	Generic name: Organosulfur compound	47 FR 57335 (12/23/82)	Do.
83-382	Generic name: N-substituted-N-mixed alkyloxy-propylmaleamic acid derivatives	47 FR 57334 (12/23/82)	Apr. 15, 1983.
83-383	Generic name: N-substituted-N-mixed alkyloxy-propylmaleamic acid derivatives	47 FR 57334 (12/23/82)	Do.
83-384	Generic name: N-substituted-N-mixed alkyloxy-propylmalmeamic acid derivatives	47 FR 57334 (12/23/82)	Do.
83-385	Generic name: N-substituted-N-mixed alkyloxy-propylmalmeamic acid derivatives	47 FR 57334 (12/23/82)	Do.

V. 142 Premanufacture Notices for Which the Review Period Has Been Suspended

PMN No.	Identity and generic name	FR citation	Date suspended
80-137	Benzeneamine, 4,4'-methylene bis [N-(1-methylbutylidene)]	45 FR 48243 (7/18/80)	Sept. 22, 1980.
80-138	Benzeneamine, 4,4'-methylene bis [N-(1-methylbutylidene)]	45 FR 48243 (7/18/80)	Do.
80-146	Phosphorodithioic acid O,O'-di(isohexyl, isoheptyl, isooctyl, isononyl, isodecyl) mixed esters, zinc salt	45 FR 49153 (7/23/80)	Sept. 17, 1980.
80-147	Phosphorodithioic acid O,O'-di(isohexyl, isoheptyl, isooctyl, isononyl, isodecyl) mixed esters	45 FR 49153 (7/23/80)	Do.
80-254	Generic name: benzeneamine, [N-(1-methylhexylidene)-N-(1-methyl butylidene)-4,4'-methylene bis]	45 FR 73127 (11/4/80)	Dec. 24, 1980.
81-558	4-hydroxy-3-(5-(2-hydroxysulfonyloxy) ethyl-sulfonyl)-2-methoxyphenylazo)-7-succinyl-amino-2-naphthalenesulfonic acid disodium salt.	46 FR 55146 (11/6/81)	Jan. 27, 1982.
81-561	4-[4-[2-(hydroxysulfonyoxy)ethylsulfonyl]-5-methyl-2-methoxyphenylazo]-3-methyl-1-(3-sulfophenyl)-5-pyrazolone disodium salt	45 FR 55146 (11/6/81)	Do.
81-660	4-hydroxy-3-(2-methoxy-5-methyl-4-(2-(hydroxy-sulfonyloxy)ethylsulfonyl)phenylozo)-1-naphthalene sulfonic acid disodium salt	47 FR 1021 (1/8/82)	Mar. 28, 1982
81-661	4-hydroxy-3-(2-methoxy-5-methyl-4-(2-(hydroxy-sulfonyloxy)ethylsulfonyl)phenylazo)-6-(3-sulfophenyl)amino-2-naphthalenesulfonic acid trisodium salt.	47 FR 1021 (1/8/82)	Do.
82-60	Generic name: Zinc, O,O-bis alkylphosphoro dithioate	47 FR 5932 (2/9/82)	Apr. 15, 1982.
82-387	Phosphorodithioic acid, O,O', secondary butyl and isooctyl mixed esters	47 FR 25401 (6/11/82)	July 30, 1982.
82-388	Phosphorodithioic acid, O,O', secondary butyl and isooctyl mixed esters, zinc salt	47 FR 25401 (6/11/82)	Do.
82-678	Generic name: Chlorinated aromatic azo anthraquinone pigment	47 FR 43161 (9/30/82)	Nov. 22, 1982.
82-679	Generic name: Chlorinated aromatic azo pigment	47 FR 43161 (9/30/82)	Do.
83-1	Generic name: Polyhalogenated aromatic alkylated hydrocarbon	47 FR 46371 (10/18/82)	Oct. 22, 1982.
83-25	Generic name: Substituted pyridine	47 FR 46373 (10/18/82)	Dec. 24, 1982.
83-36	Generic name: Acrylated alkoxylated aliphatic glycol	47 FR 47068 (10/22/82)	Dec. 27, 1982.
83-37	Generic name: Acrylated alkoxylated aliphatic glycol	47 FR 47068 (10/22/82)	Do.
83-110	Generic name: Saturated acid diester	47 FR 52223 (11/19/82)	Jan. 26, 1983
83-129	Syncrude (full range, dewaxed deasensted shale oil	47 FR 54357 (12/2/82)	Mar. 1 through 31, 1983.
83-130	Light straight run naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-131	Heavy straight run naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-132	Straight run middle distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-113	Straight run gas oil (shale oil)	47 FR 54357 (12/2/82)	Do.
83-134	Atmosphere tower residuum (shale oil)	47 FR 54357 (12/2/82)	Do.
83-135	Vacuum tower condensate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-136	Light vacuum gas oil (shale oil)	47 FR 54357 (12/2/82)	Do.
83-137	Heavy vacuum gas oil (shale oil)	47 FR 54357 (12/2/82)	Do.
83-138	Vacuum residuum (shale oil)	47 FR 54357 (12/2/82)	Do.
83-139	Full range catalytic cracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-140	Light catalytic cracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-141	Catalytic cracked clarified oil (shale oil)	47 FR 54357 (12/2/82)	Do.
83-142	Catalytic cracked light olefins (shale oil)	47 FR 54357 (12/2/82)	Do.
83-143	Full range catalytic reformed naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-144	Full range alkylate naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-145	Light hydrocracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-146	Heavy hydrocracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-147	Light hydrocracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-148	Light thermal cracked naphtha(shale oil)	47 FR 54357 (12/2/82)	Do
83-149	Heavy thermal cracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-150	Light thermal cracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-151	Heavy thermal cracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-152	Coke (shale oil)	47 FR 54357 (12/2/82)	Do
83-153	Sweetened naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-154	Hydrodesulfurized heavy naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-155	Hydrodesulfurized middle distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-156	Full range straight run naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-1a57	Straight run kerosive (shale oil)	47 FR 54357 (12/2/82)	Do.
83-158	Light Paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-159	Heavy paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-160	Light catalytic cracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-161	Heavy catalytic cracked naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-162	Intermediate catalytic cracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-163	Heavy catalytic cracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-165	Light catalytic reformed naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-166	Heavy catalytic reformed naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-167	Catalytic reformer fractionator residue (shale oil)	47 FR 54357 (12/2/82)	Do.
83-168	Light alkylate naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-169	Heavy alkylate naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-170	Alkylate distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-171	Polymerization naphtha (shale oil)	47 FR 54357 (12/2/82)	Do.
83-172	Viscous polymer (shale oil)	47 FR 54357 (12/2/82)	Do.
83-173	Isomerization naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-174	Heavy hydrocracked distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-175	Hydrocracked residuum (shale oil)	47 FR 54357 (12/2/82)	Do.
83-176	Sweetened middle distillate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-177	Normal paraffins (shale oil)	47 FR 54357 (12/2/82)	Do.
83-178	Sorpton process raffinate (shale oil)	47 FR 54357 (12/2/82)	Do.
83-179	Solvent refined light naphtha (shale oil)	47 FR 54357 (12/2/82)	Do

V. 142 PREMANUFACTURE NOTICES FOR WHICH THE REVIEW PERIOD HAS BEEN SUSPENDED—Continued

PMN No	Identity and generic name	FR citation	Date suspended
83-180	Solvent refined heavy naphtha (shale oil)	47 FR 54357 (12/2/82)	Do
83-181	Solvent refined middle distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-182	Solvent refined gas oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-183	Solvent refined light paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-184	Solvent refined heavy paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-185	Solvent deasphalted residual oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-186	Solvent decarbonized heavy paraffinic distillate (shale oil)	47 FR 54357 (12/2/82)	Do
83-187	Solvent refined residual oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-188	Solvent refined spent lube oil (shale oil)	47 FR 54357 (12/2/82)	Do
83-189	Light naphtha solvent extract (shale oil)	47 FR 54357 (12/2/82)	Do
83-190	Heavy naphtha solvent extract (shale oil)	47 FR 54357 (12/2/82)	Do
83-191	Middle distillate solvent extract (shale oil)	47- FR 54357 (12/2/82)	Do
83-192	Gas oil solvent extract (shale oil)	47- FR 54357 (12/2/82)	Do
83-193	Light paraffinic distillate solvent extract (shale oil)	47- FR 54357 (12/2/82)	Do
83-194	Heavy paraffinic distillate solvent extract (shale oil)	47- FR 54357 (12/2/82)	Do
83-195	Residual oil solvent extract (shale oil)	47- FR 54357 (12/2/82)	Do
83-196	Heavy paraffinic distillate decarbonization raffinate (shale oil)	47- FR 54357 (12/2/82)	Do
83-197	Clay treated light paraffinic distillate (shale oil)	47- FR 54357 (12/2/82)	Do
83-198	Clay treated heavy paraffinic distillate (shale oil)	47- FR 54357 (12/2/82)	Do
83-199	Clay treated paraffin wax (shale oil)	47- FR 54357 (12/2/82)	Do
83-200	Chemically neutralized spent lube oil (shale oil)	47- FR 54357 (12/2/82)	Do
83-201	Hydrotreated light naphtha (shale oil)	47- FR 54357 (12/2/82)	Do
83-202	Hydrotreated heavy naphtha (shale oil)	47- FR 54357 (12/2/82)	Do
83-203	Hydrotreated light distillate (shale oil)	47- FR 54357 (12/2/82)	Do
83-204	Hydrotreated middle distillate (shale oil)	47- FR 54357 (12/2/82)	Do
83-205	Hydrotreated light paraffinic distillate (shale oil)	47- FR 54357 (12/2/82)	Do
83-206	Hydrotreated heavy paraffinic distillate (shale oil)	47- FR 54357 (12/2/82)	Do
83-207	Hydrotreated paraffin wax (shale oil)	47- FR 54357 (12/2/82)	Do
83-208	Hydrotreated microcrystalline wax (shale oil)	47- FR 54357 (12/2/82)	Do
83-209	Hydrotreated vacuum gas oil (shale oil)	47- FR 54357 (12/2/82)	Do
83-210	Hydrotreated residual oil (shale oil)	47- FR 54357 (12/2/82)	Do
83-211	Solvent dewaxed light paraffinic distillate (shale oil)	47- FR 54357 (12/2/82)	Do
83-212	Solvent dewaxed heavy paraffinic distillate (shale oil)	47- FR 54357 (12/2/82)	Do
83-213	Solvent dewaxed residual oil (shale oil)	47- FR 54357 (12/2/82)	Do
83-214	Slack wax (shale oil)	47- FR 54357 (12/2/82)	Do
83-215	Petrolatum (shale oil)	47- FR 54357 (12/2/82)	Do
83-216	Foots oil (shale oil)	47- FR 54357 (12/2/82)	Do
83-217	Paraffin wax (shale oil)	47- FR 54357 (12/2/82)	Do
83-218	Microcrystalline wax (shale oil)	47- FR 54357 (12/2/82)	Do
83-219	Catalytic dewaxed naphtha (shale oil)	47 FR 54358 (12/2/82)	Do
83-220	Catalytic dewaxed middle distillate (shale oil)	47 FR 54358 (12/2/82)	Do
83-220	Catalytic dewaxed light paraffinic oil (shale oil)	47 FR 54358 (12/2/82)	Do
83-222	Catalytic dewaxed heavy paraffinic oil (shale oil)	47 FR 54358 (12/2/82)	Do
83-223	Hydrodesulfurized light naphtha (shale oil)	47 FR 54358 (12/2/82)	Do
83-224	Hydrosulfurized kerosene (shale oil)	47 FR 54358 (12/2/82)	Do
83-225	Hydrosulfurized gas oil (shale oil)	47 FR 54358 (12/2/82)	Do
83-226	Hydrodesulfurized atomospheric tower residuum (shale oil)	47 FR 54358 (12/2/82)	Do
83-227	Hydrodesulfurized heaby vacuum gas oil (shale oil)	47 FR 54358 (12/2/82)	Do
83-228	Hydrodesulfurized heavy vacuum gas oil (shale oil)	47 FR 54358 (12/2/82)	Do
83-229	Steam cracked residuum (shale oil)	47 FR 54358 (12/2/82)	Do
83-230	Light aliphatic solvent naphtha (shale oil)	47 FR 54358 (12/2/82)	Do
83-231	Medium aliphatic solvent naphtha (shale oil)	47 FR 54358 (12/2/82)	Do
83-232	Heavy aliphatic solvent naphtha (shale oil)	47 FR 54358 (12/2/82)	Do
83-233	Light aromatic solvent naphtha (shale oil)	47 FR 54358 (12/2/82)	Do
83-234	Heavy aromatic solvent naphtha (shale oil)	47 FR 54358 (12/2/82)	Do
83-235	Calcined coke (shale oil)	47 FR 54358 (12/2/82)	Do
83-237	Generic name: Substituted pyridine	47 FR 53782 (11/29/82)	Jan. 25, 1983
83-[illegible]	Generic name: Dicarboxylic acid monoester	47 FR 54537 (12/3/82)	Feb. 17, 1983
83-263	Generic name: Substituted thiocyclic compound	47 FR 56423 (12/9/82)	Feb. 27, 1983
83-298	Generic name: Toluene alkylate	47 FR 57336 (12/23/82)	Mar. 4, 1983
83-299	Generic name: Toluene alkylate	47 FR 57336 (12/23/82)	Do
83-300	Generic name: Dialkyl benzene	47 FR 57336 (12/23/82)	Do
83-301	Generic name: Dialkyl benzene	47 FR 57336 (12/23/82)	Do
83-302	Generic name: Alkyl benzene	47 FR 57336 (12/23/82)	Do
83-306	Generic name: Poly alkyl benzene sulfonate	47 FR 57337 (12/23/82)	Do
83-307	Generic name: Poly alkyl benzene sulfonate	47 FR 57337 (12/23/82)	Do
83-308	Generic name: Poly alkyl benzene sulfonate	47 FR 57337 (12/23/82)	Do
83-309	Generic name: Poly alkyl benzene sulfonate	47 FR 57337 (12/23/82)	Do

BILLING CODE 6560-50-M

[OPTS-51451B; TSH-FRL 2351-7]

Naphthalenetrisulfonic Acid, Chlorotriazinylamino-Methoxymethylphenylazo; Premanufacture Notice; Extension of Review Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is extending the review period for an additional 90 days for premanufacture notice (PMN) PMN 83-401, under the authority of section 5(c) of the Toxic Substances Control Act (TSCA). The review period will now expire on July 16, 1983.

FOR FURTHER INFORMATION CONTACT: Richard Green, Chemical Control Division (TS-794), Environmental Protection Agency, Rm. E-201, 401 M St., SW., Washington, D.C. 20460; (202-382-3740).

SUPPLEMENTARY INFORMATION: Under section 5 TSCA, anyone who intends to manufacture or import a new chemical substance for commercial purposes in the United States must submit a PMN to EPA 90 days before manufacture or import begins. Under section 5(c) EPA may, for good cause, extend the notice period for additional periods, not to exceed a total of 180 days from the date of receipt.

On January 18, 1983, EPA received PMN 83-401 to be imported for use as an industrial dye for fibers and fabric. The submitter of the PMN claimed its identity, and the specific chemical identity to be confidential business information. Notice of receipt of the PMN was published in the **Federal Register** of February 4, 1983 (48 FR 5304). The original 90-day review period is scheduled to expire on April 17, 1983.

EPA's detailed analysis of the substance described in the PMN addressed the following: chemical analysis of the PMN substance, effects on human health, human exposure, import volume, environmental release, ecological effects, degree of risk relative to available commercial substitutes, potential marketability, and the identification of other information which may be required to resolve outstanding issues.

As a result of this analysis, EPA has reason to believe the following:

1. Human exposure to the PMN substance may result in adverse health effects, among which may be carcinogenicity.

2. During processing of the PMN substance, the potential exists for significant worker exposure.

3. Processing and use of the PMN substance may result in its release to waterways.

4. Consumers may be exposed to the PMN substance in drinking waters.

Based on this analysis, EPA finds that there is a possibility that the substance submitted for review in PMN 83-401 may be regulated under section 5(e) of TSCA. The Agency requires an extension of the review period to further investigate potential health effects and use conditions, to examine its regulatory options and to prepare the necessary documents, should regulatory action be required. An administrative order under section 5(e) must be issued no later than 45 days prior to expiration of the review period. Therefore, EPA has determined that good cause exists to extend the review period for an additional 90 days, to July 16, 1983.

PMN 83-401 is available for public inspection in Rm. E-107, at the EPA Headquarters, address given above, from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

Dated: April 14, 1983.

Don R. Clay,

Acting Assistant Administrator for Pesticides and Toxic Substances.

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed de Novo Nonbank Activities; Barclays Bank PLC

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for a hearing should identify clearly the specific application to which they relate, and should be submitted in writing and

received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Barclays Bank PLC* and its subsidary, Barclays Bank International Limited, each a bank holding company whose principal office is in London, England (consumer finance and insurance activities; North Carolina): To engage through their subsidiaries, BarclaysAmerican/Financial, Inc. ("BAF"), BarclaysAmerican/Mortgage, Inc. ("BAM"), and BarclaysAmerican/Financial Services, Inc. ("BAFS"), all of which are subsidiaries of BarclaysAmerican Corporation ("BAC"), in making direct consumer loans, including loans secured by real estate, and purchasing sales finance contracts representing extensions of credit such as would be made or acquired by a consumer finance company, and wholesale financing (floor planning); and acting as agency for the sale of related credit life, credit accident and health and credit property insurance. Credit life and credit accident and health insurance sold as agent may be underwritten or reinsured by BAC's insurance underwriting subsidiaries. These activities would be conducted from an office of BAF, BAM and BAFS in Kinston, North Carolina, serving customers in Kinston and surrounding areas in North Carolina. This notification is for the relocation of an existing office located in Kinston, North Carolina. Comments on this application must be received not later than May 10, 1983.

B. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Texas Commerce Bancshares, Inc.*, Houston, Texas (insurance activities; Texas): To engage *de novo* through its subsidiary, Pyramid Agency, Inc. in acting as a managing general agency with respect to property and casualty insurance directly related to extensions of credit by its banking subsidiaries. These activities would be conducted from a branch office of Pyramid Agency, Inc. in El Paso, El Paso County, Texas, serving the State of Texas. Comments on this application must be received not later than May 13, 1983.

C. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *BankAmerica Corporation*, San Francisco, California (financing, servicing, and insurance activities; Florida): To engage, through its two indirect subsidiaries, FinanceAmerica Corporation and FinanceAmerica Industrial Plan Inc., both Florida corporations, in the activities of making or acquiring for its own account loans and other extensions of credit such as would be made or acquired by a finance company; servicing loans and other extensions of credit; and offering credit-related life insurance and credit-related accident and health insurance. The aforementioned types of credit-related insurance permissible under Section 4(c)(8)(A) of the Bank Holding Company Act of 1956, as amended by the Garn-St Germain Depository Institutions Act of 1982. Credit-related property insurance will not be offered. Such activities will include, but not be limited to, making consumer installment loans, purchasing installment sales finance contracts, making loans secured by real and personal property, and offering credit-related life and credit-related accident and health insurance directly related to extensions of credit made or acquired by FinanceAmercia Corporation and FinanceAmercia Industrial Plan Inc. Credit-related life and credit-related accident and health insurance may be reinsured by BA Insurance Company, Inc., an affiliate of both FinanceAmerica Corporation and FinanceAmerica Industrial Plan Inc. these activities will be conducted from a *de novo* office located in Gainesville, Florida serving the entire State of Florida. Comments on this application must be received not later than May 13, 1983.

Board of Governors of the Federal Reserve System, April 15, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-10594 Filed 4-20-83; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed de Novo Nonbank Activities; Manufacturers Hanover Corp.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the office of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Manufacturers Hanover Corporation*, New York, New York (finance and insurance activities; Idaho, Utah): To continue to engage through its subsidiary, Finance One Mortgage of Arizona, Inc. ("Finance One"), in the activities of arranging, making, or acquiring, for its own account or the account of others, extensions of credit, such as could be made by a finance company, and of selling as agent or broker credit life and credit accident and health insurance directly related to extensions of credit by Finance One. These activities are permissible under section 601(A) of the Garn-St Germain Depository Institutions Act of 1982. These activities would continue to be conducted from Finance One's existing office in Phoenix, Arizona, after this office expands its service area to include the states of Idaho and Utah. This application does not involve the commencement of any new activities. Comments on this application must be received not later than May 17, 1983.

B. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Citizens and Southern Georgia Corporation*, Atlanta, Georgia (finance and insurance activities; Florida): To engage, through its subsidiaries, Family Credit Services, Inc., Family Credit Services, Inc. (FLA), and Family Mortgage Brokers, Inc., in consumer and commercial finance activities, including

the extension of direct loans to consumers, the discount of retail and installment notes or contracts, the purchase of real estate notes, the extension of direct loans to dealers for the financing of inventory (floor planning), and for working capital purposes and the making, acquiring, or soliciting, for its own account or for the account of others, loans and other extensions of credit; and to engage, through Family Credit Service, Inc. and Family Credit Services, Inc. (FLA), in the activity of acting as agent for the sale of credit life, accident and health, and physical damage insurance directly related to their extensions of credit. These insurance activities are permissible pursuant to Section 601 (A) and (D) of the Garn- St Germain Depository Institutions Act of 1982, since both subsidiaries engaged in these insurance activities prior to May 1, 1982. These activities would be conducted from offices located in St. Petersburg and South Daytona, Florida, serving the areas in and surrounding Tampa/St. Petersburg and South Daytona, Florida, and central Florida. Comments on this application must be received not later than May 10, 1983.

C. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Franklin Capital Corporation,* Wilmette, Illinois (servicing activities; Illinois): To engage, through its subsidiary, Affiliated Secured Lending Services, Inc., in servicing asset based loans for the account of affiliated banks. The activity would be performed from an office in Wilmette, Illinois, serving the State of Illinois. Comments on this application must be received not later than May 11, 1983.

Board of Governors of the Federal Reserve System, April 15, 1983.

James McAfee,

Associate Secretary of the Board.

Office of Human Development Services

Federal Council on the Aging; Meeting

Agency Holding the Meeting: Federal Council on the Aging.

Time and Date: Meeting begins at 8:45 a.m. on Monday, May 16, 1983 and ends at 12:30 p.m. on Tuesday, May 17, 1983.

Place: Room 800, Hubert H. Humphrey Building (HHH), 200 Independence Avenue, SW, Washington, DC 20201 on May 16, 1983 from 8:45 a.m.–2:30 p.m. Rooms 303–305A on May 16, from 3:30 p.m.–5:30 p.m. and on May 17, from 9:00 a.m.–12:30 p.m.

Status: Meeting is open to the public.

Contact Person: Rita Lowry, Room 309D, HHH Building, 245–2451.

The Federal Council on the Aging (FCA) was established by the 1973 Amendments to the Older Americans Act of 1965 (Pub. L. 93–29, 42 U.S.C. 3015) for the purpose of advising the President, the Secretary of Health and Human Services, the Commissioner on Aging and the Congress on matters relating to the special needs of older Americans.

Notice is hereby given pursuant to the Federal Advisory Committee Act (Pub. L. 92–453, 5 U.S.C. App. 1, Sec. 10, 1976) that the Council will hold a meeting May 16 and 17, 1983.

As part of the activities in celebration of Older Americans Month, the Federal Council on the Aging, in conjunction with the Administration on Aging (AoA), will participate in the AoA-sponsored symposium on Community-Based Care on May 16, from 8:45 a.m.–2:30 p.m. in Room 800, HHH Building. At 2:30 p.m., the FCA will convene in Rooms 303–305A, HHH Building, at which time committee discussions will take place. FCA Committees will reconvene on May 17, from 9:00 a.m.–12:30 p.m. in Rooms 303–305A, HHH Building.

Dated: April 18, 1983.

Adelaide Attard,

Chairperson, Federal Council on the Aging.

BILLING CODE 4310-02-M

Bureau of Land Management

[M 53205-B(SD)]

South Dakota; Order Providing for Termination of Classification and Opening of Public Lands

AGENCY: Bureau of Land Management, Interior.

ACTION: Order.

SUMMARY: This order restores certain lands which were segregated from settlement, sale, location or entry under the public land laws including the mining laws to the operation of those laws. The segregation took effect on February 12, 1982, when the State of South Dakota filed an application to select these and other lands under the provisions of Sections 2275 and 2276 of the Revised Statutes. The application included lands in excess of the States entitlement and since the full amount of land due has been certified to the State and they have withdrawn their application for these lands, this

segregation serves no purpose. The order also revokes the classification made pursuant to the petition included in the application.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: Roland F. Lee, Montana State Office; 406–657–6090.

By virtue of the authority vested in me it is ordered as follows:

1. The segregative effect of the application filed by the South Dakota Commissioner of School and Public Lands on February 12, 1982 pursuant to Sections 2275 and 2276 of the Revised Statutes, as amended, 43 U.S.C. 851, 852 (1976) shall terminate on the effective date of this order. The lands affected by this order are described as follows:

Black Hills Meridian

T. 20 N., R. 10 E.,
Sec. 5, Lot 4.
T. 3 S., R. 22 E.,
Sec. 12, E½NW¼;
Sec. 17, SW¼NW¼;
Sec. 29, NW¼NW¼.
T. 2 S., R. 23 E.,
Sec. 33, S½SE¼.
T. 3 S., R. 23 E.,
Sec. 2, SE¼SW¼;
Sec. 3, SE¼SE¼.
T. 2 S., R. 24 E.,
Sec. 25, S½SE¼.

Fifth Principal Meridian

T. 103 N., R. 73 W.,
Sec. 5, Lot 1 and S½NE¼.
T. 104 N., R. 73 W.,
Sec. 32, SE¼SE¼.
T. 103 N., R. 75 W.,
Sec. 22, Lot 4.

Aggregating 617.12 acres.

2. The order classifying the lands described in Paragraph 1 pursuant to Section 7 of the Act of June 28, 1934, as amended, 43 U.S.C. 315(f)(1976) was published as **Federal Register** Document No. 82–19138 on pages 30877 and 30878 of the issue of July 15, 1982. That classification shall terminate on the effective date of this order.

3. At 8 a.m. on the effective date of this order the lands described in Paragraph 1 shall be open to settlement, sale, location and entry under the public land laws subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All applications received prior to that time shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

4. The lands described in Paragraph 1 will be open to location under the mining laws at 8 a.m. on the effective date of this order. They remain open to applications and offers under the mineral leasing laws.

Inquiries concerning these lands should be addressed to the Chief, Branch of Land Resources (934), Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107.

Dated: April 14, 1983.

Kannon Richards,

Acting State Director.

Montana; Invitation Coal Exploration License Application

Members of the public are hereby invited to participate with Western Energy Company in a program for the exploration of coal deposits owned by the United States of Amercia in the following described lands located in Big Horn and Treasure Counties; Montana:

T. 1 N., R. 38 E., P.M.M.,
Sec. 22, all;
Sec. 23, SW¼;
Sec. 26, all;
Sec. 28, Lots 1,2, E½;
Sec. 34, NE¼.
T. 2 N., R. 38 E., P.M.M.,
Sec. 10, W½SE¼;
Sec. 14, S½NE¼;
Sec. 22, W½;
Sec. 28, Lots 1,2, E½NE¼.

1961.45 acres, Big Horn County.
648.50 acres, Treasure County.
2609.95 Total Acres.

Any party electing to participate in this exploration program shall notify, *in writing* both the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107; and Western Energy Company, P.O. Box 1899, 115 N. Broadway, Billings, Montana 59101. Such written notice must refer to serial number M 58046 and be received no later than 30 calendar days after publication of this Notice in the **Federal Register** or 10 calendar days after the last publication of this Notice in the Hardin Herald, whichever is later. This Notice will be published for two consecutive weeks.

This proposed exploration program is fully described and will be conducted pursuant to an exploration plan to be approved by the District Mining Supervisor, Bureau of Land Management, 2525 4th Avenue North, Billings, Montana, and the Bureau of Land Management, Montana State Office, Granite Tower Building, 222 North 32nd Street, Billings, Montana. The exploration plan is available for public inspecton at either of these offices at the addresses given.

Dated: April 13, 1983.

Judith I. Reed,

Acting Chief, Branch of Adjudication

Wyoming Availability of Draft Environmental Assessment and Public Comment Period

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of availability of draft environmental assessment and public comment period.

SUMMARY: In the matter of Wyoming; Amoco Production Company, Cave Creek Pipeline Project Draft, Environmental Assessment (DEA), Uinta County, Rock Springs District, Wyoming, Rich and Summit Counties, Salt Lake District, Utah.

Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, notice is hereby given that the Bureau of Land Management, U.S. Department of the Interior, has prepared a draft environmental assessment for a gas transmission and gathering system proposed from the Cave Creek and Deep Yellow Creek fields to the Whitney Canyon gas plant, Uinta County, Wyoming, and has made copies available for public review and comment.

Amoco Production Company proposes to construct and operate a 40-mile gas gathering and transmission system and related central facility. The transmission system would consist of a 12-inch sour gas pipeline, a 6-inch sour condensate liquid pipeline, and a 4.5-inch sweet fuel gas pipeline. The gathering system would include a combination of 8.6-inch, 6.6-inch, and 4.5-inch flowlines, and a 4.5-inch fuel gas line. A central facility for dehydration, gas-liquid separation, and line heating, would be constructed. An above-ground 4.16 KV powerline would be necessary to service the central facilities.

The DEA also analyzes the impacts of alternatives to the proposed location of the transmission system pipelines, central facility location, and no action.

DATES: Written comments on the proposal contained in the draft environmental assessment will be accepted up to and including June 13, 1983.

ADDRESSES: Written comments on the proposal in the document are to be addressed to: Kemmerer Resource Area Manager, Bureau of Land Management, Kemmerer Resource Area, P.O. Box 632,

Kemmerer, Wyoming 83101; (307) 877–3933.

A limited number of single copies of the DEA may be obtained from the above address. Copies are also available at the following locations:

Bureau of Land Management, Rock Springs District Office, P.O. Box 1869, Rock Springs, Wyoming 82901; (307) 382–5350; or

Bureau of Land Management, Bear River Resource Office, 2370 South 2300 West, Salt Lake City, Utah 84119; (801) 524–5348.

Donald Sweep,

District Manager.

Colorado, Filing of Plats of Survey and Protraction Diagrams

April 14, 1983.

The plats of survey of the following described lands were officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado, effective 10:00 a.m., April 14, 1983.

Sixth Principal Meridian

T. 17 S., R. 72 W.

The plat representing the corrective dependent resurvey of a portion of the south boundary, T. 17 S., R. 71 W., portions of the south and west boundaries and subdivisional lines, T. 17 S., R. 72 W., Sixth Principal Meridian, Colorado, Group No. 721, was accepted March 14, 1983.

T. 1 N., R. 80 W.

The plat representing the dependent resurvey of a portion of the subdivisional lines, the survey of the subdivision of section 15, and a portion of the center line of U.S. Highway No. 40, T. 1 N., R. 80 W., Sixth Principal Meridian, Colorado, Group No. 731, was accepted March 23, 1983.

These surveys were executed to meet certain administrative needs of this Bureau.

Protraction diagrams of the following described lands approved March 25, 1983, will be officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado, effective June 3, 1983.

Sixth Principal Meridian

T. 1 N., R. 77 W.

Protraction Diagram No. 33, prepared to delineate the remaining unsurveyed public lands in T. 1 N., R. 71 W., Sixth Principal Meridian, Colorado, was approved March 25, 1983.

New Mexico Principal Meridian

T. 48 N., R. 15 W.

Protraction Diagram No. 34, prepared to delineate the remaining unsurveyed public lands in T. 48 N., R. 15 W., New Mexico Principal Meridian, Colorado, was approved March 25, 1983.

These diagrams were prepared to meet certain administrative needs of this Bureau.

All inquiries about these lands should be sent to the Colorado State Office, Bureau of Land Management, 1037 20th Street, Denver, Colorado 80202.

Harold R. Martin,

Chief, Division of Operations.

Roswell District Advisory Council Meeting

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of district advisory council meeting.

SUMMARY: The Bureau of Land Management Roswell District Advisory Council will meet May 12, 1983. The primary objectives of the meeting will be briefings on recent and upcoming District activities. The meeting will be held May 12, 1983, in the Roswell District Office Conference Room, 1717 W. 2nd Street, Roswell, New Mexico, beginning at 1:00 p.m. The meeting will conclude by 4:00 p.m.

SUPPLEMENTARY INFORMATION: Agenda items scheduled for the advisory council briefing are:

1. BLM Minerals and Realty programs;
2. WIPP Site;
3. Roswell Land Use Plan;
4. Asset Management;
5. Public Land Access.

The meeting is open to the public. Interested persons may make oral statements to the council or may file written statements for the Council's consideration. Anyone wishing to make oral statements may do so at 3:00 p.m. the day of the meeting.

Summary minutes of the Council Meeting will be maintained in the District Office and will be available during regular business hours for public inspection or a copy can be obtained for the cost of duplication within 30 days following the meeting.

Jim Gillham,

Acting District Manager.

Salem District Advisory Council; Meeting

Notice is hereby given in accordance with Section 309 of the Federal Land Policy and Management Act of 1976 that the first meeting of the newly appointed Salem District Advisory Council will be held on May 19, at 8:30 a.m. at the BLM Salem District Office, 1717 Fabry Road SE, Salem, Oregon.

Agenda for the meeting will include:

1. Introduction of members.
2. Discussion of the function of the council.
3. Election of officers.
4. Briefing and discussion of Salem District programs.
5. A review of the West Salem Decision Document.
6. Oral statements from public.

The meeting is open to the public. Anyone wishing to make an oral statement must notify the District Manager at the Salem District Office, 1717 Fabry Road SE, Salem, Oregon 97302 by May 12, 1983. Written comments will also be received for the council's consideration.

Summary minutes will be maintained in the District Office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

Dated: April 12, 1983.

Joseph C. Dose,

District Manager.

BILLING CODE 4310–84–M

[M–56401]

Realty Action—Proposed Modified Competitive Sale of Public Land in McCone County, Montana

AGENCY: Bureau of Land Management, Miles City District Office, Interior.

ACTION: Notice of realty action M–56401, proposed modified competitive sale of public land in McCone County.

SUMMARY: The following described lands have been examined and identified as suitable for disposal by sale pursuant to Section 203 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1713 (1976), at no less than the fair market value:

Principal Meridian

T. 25 N., R. 47 E.,

Sec. 4, NE¼SW¼, NE¼SE¼.

The area described contains 80 acres.

The land will be offered for sale by sealed bid utilizing modified competitive bidding procedures at 9 a.m. on July 20, 1983, at: Montana State Office, Bureau of Land Management, 222 North 32nd Street, P.O. Box 30157, Billings, Montana 59107.

The subject lands are currently leased by Delbert Vine of Vida, Montana, for grazing purposes and are within his allotment boundary. This sale will be conducted as a modified competitive

bid, allowing Mr. Vine the right to meet any high bid.

The 40-acre tract in the NE¼SW¼ is isolated, adjoined by Montana State land on the west side and deeded land around the remainder. There is no legal access and physical access is available via 2-wheel drive vehicle across country trails. There are no improvements on this tract, and vegetation is native grasses with some brush species in a small drainage on the south end. A reservoir on adjoining deeded land backs water on about 5 acres of this tract. Oil and gas lease M–30545 is in effect on this tract.

The 40-acre tract in the NE¼SE¼ is isolated, adjoined by 40 acres of public land on the east side and deeded land around the remainder. Legal and physical acess are available via the county road which traverses the east side of this tract from north to south. There is one range improvement of record, a fence on the east side. A water well drilled by the U.S. Geological Survey (USGS) is present on this tract but will not be available for use, as it is for research purposes by that agency. Vegetation is native grasses with brush species in the small drainage on the south end. An oil and gas lease (M–30545) is in effect on this tract.

The proposed sale is consistent with the Bureau's planning system and McCone County government officials have been notified of the sale. The transfer of the tract into private ownership will benefit the public interest and provide for better land management.

Terms and Conditions:

The terms and conditions applicable to this sale are as follows:

1. Delbert Vine of Vida, Montana, will be the designated bidder and will have the right to meet any high bid if he so chooses.
2. Only the surface estate will be patented. All minerals and the right to construct and use ditches and canals will be reserved to the United States.
3. No bids less than the appraised fair market value of $8,000 will be accepted. Any bid must be for the entire 80 acres.
4. Rights of record which will be coveted in the patent will be—the county road right-of-way and the USGS well in the NE¼SE¼.
5. If Mr. Vine is not the successful bidder, the successful bidder must compensate Mr. Vine for the fence on public land in the NE¼SE¼, Section 4, T. 25 N., R. 47 E., as per the regulations in 43 CFR 4120.6–6(c).

FOR FURTHER INFORMATION CONTACT: For a period of 45 days from the date of this "Notice", interested parties may submit comments to the Miles City District Manager, P.O. Box 940, Miles City, Montana 59301. A copy of the Land Report/EAR is available at this address for review. Any comments will be evaluated by the District Manager and forwarded to the State Director for final determination.

SUPPLEMENTARY INFORMATION: *Bidder Qualifications:* The bidder must be a U.S. citizen or, in the case of a corporation, subject to the laws of any state or the U.S. a state, state instrumentality or political subdivision submitting a bid must be authorized to hold property. Any other entity submitting a bid must be legally capable of holding and conveying lands or interests therein under the laws of the State of Montana. Bids must be made by the principal or his agent.

Bid Standards: No bid will be accepted for less than the appraised value of $8,000, and bids must include all of the land identified in this notice.

Method of Bidding: The land will be sold by sealed bid. Each bid must be accompanied by a certified check, postal money order, bank draft or cashier's check, made payable to the Bureau of Land Management for not less than one-fifth of the amount bid.

The sealed bid envelope must be marked in the lower left hand corner as follows: Public Land Sale M–56401, July 20, 1983.

The sealed bid must be received at the following address prior to July 20, 1983: Bureau of Land Management, Montana State Office, P.O. Box 30157, Billings, Montana 59107.

Modified Bidding: For a period of 30 days following the date of the sale, Delbert Vine, the designated bidder, will be offered the right to meet the highest qualifying bid. The designated bidder must submit a bid of at least the fair market value prior to the sale date to be considered under the modified bidding provisions. If he meets the highest bid, the land will be sold to him and the other bid will be returned. His refusal to meet the highest bid or to submit any bid at all prior to the sale date shall consitute a waiver of such bidding provisions.

Final Details: Once a high bid is accepted, the successful bidder shall submit the remainder of the full bid price within the time period designated by the authorized officer. Failure to submit the required amount within the allotted time will result in cancellation of the sale and the deposit will be forfeited.

All bids will be either returned, accepted or rejected within 60 days of the sale date. If no bids are received prior to the sale date, the land will remain available for sale on a countinuing basis until a sale is completed, and any sealed bids received will be opened at 9:00 a.m. on each succeeding first and third Wednesdays.

Alan R. Pierson,

District Manager, Acting for the State Director.

BILLING CODE 4310–84–M

[CA 8297]

California; Proposed Withdrawal and Reservation of Land

April 14, 1983.

The Bureau of Indian Affairs, U.S. Department of the Interior, has filed application to amend Serial No. CA 8297 to withdraw from settlement sale, location, or entry, including the mining and mineral leasing laws, the following described public land, subject to valid existing rights, in aid of legislation as an addition to the Bridgeport Indian Colony, California. The land is located in Mono County and adjoins the Bridgeport Indian Colony to the east. Acquisition of this parcel will provide homesites and economic development for the Indian people residing in the region.

Mount Diablo Meridian

T. 5 N., R. 25 E.,
Sec. 21, E½NE¼, NE¼SE¼, S½SE¼;
Sec. 28, N½NE¼, SW¼NE¼.

The area described aggregates 320 acres within Mono County, California.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned authorized officer of the Bureau of Land Management.

Pursuant to Section 204(h) of the Federal Land Policy and Management Act of 1976, notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal. All interested persons who desire to be heard on the proposed withdrawal must submit a written request for a hearing to the undersigned. Notice of the public hearing will be published in the **Federal Register**, giving the time and place of such hearing. The public hearing will be scheduled and conducted in accordance with BLM Manual Section 2351.16.B.

The Department of the Interior's regulations provide that the authorized officer of the BLM will undertake such investigations as are necessary to

determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of assuring that the area sought is the minimum essential to meet the applicant's needs, providing for the maximum concurrent utilization of the lands for purposes other than the applicant's, and reaching agreement on the concurrent management of the lands and their resources.

The authorized officer will also prepare a report for consideration by the Secretary of the Interior, who will determine whether or not the lands will be withddrawn and reserved as requested by the applicant agency. The determination of the Secretary on the application will be published in the **Federal Register.** The Secretary's determination shall, in a proper case, be subject to the provisions of Section 204(C) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2752.

For a period of two years from the date of publication of this notice in the **Federal Register,** the lands will be segregated from entry as specified above, unless the application is rejected or the withdrawal is approved prior to that date. If the withdrawal is approved by the Congress, it will be segregated for a period of 20 years from date of approval, or for such period of time as designated in the Act.

All communications in connection with this proposed withdrawal should be addressed to the undersigned, Bureau of Land Management, Department of the Interior, Room E–2841, Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

Eleano Wilkinson,

Chief, Lands and Locatable Minerals Section, Branch of Lands and Minerals Operations.

BILLING CODE 4310–84–M

[ES 32062, Survey Group 110]

Minnesota; Filing of Plat of Survey

1. On October 1, 1982, the plat representing the reestablishment of the record meander lines and a survey of new meander lines to include lands omitted from the original survey in Sec. 31, T. 62 N., R. 1 E., fourth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia at 7:30 a.m. on June 6, 1983.

The lots listed below describe the lands omitted from the original survey.

Fourth Principal Meridian, Minnesota

T. 62 N, R. 1 E.,
Sec. 31, Lots 9, 10, 11, 12, 13, 14, 15, 16, and 17.

2. The greater portion of omitted land in Sec. 31 is of a rolling nature with ridges approximately 110 feet above the mean high water line of Monker Lake; however, there are some legal subdivisions that are swamp in character. The soil content within the omitted area is mostly stoney clay loam in the upland and muskeg in the swamp land.

The omitted land is covered mostly by fir, birch, black spruce, poplar, maple, and cedar. Only the pine timber has been logged. The size of the remaining pine stumps and the character of the land attest to its existence at the time of the original survey.

3. Lots 15, 16 and 17, Sec. 31, were found to be over 50 percent swamp and overflowed in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). Therefore, these lots will only be open to selection by the State of Minnesota, under that Act. Lots 9, 10, 11, 12, 13, and 14 sec. 31, were found to be over 50 percent upland in character within the purview of the Act mentioned above. They are therefore held to be public lands.

45. All inquiries relating to these lands should be sent to the Deputy State Director for Lands and Minerals Operations, 350 South Pickett Street, Alexandria, Virginia 22304 on or before June 6, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

[ES 32063, Survey Group 110]

Minnesota; Filing of Plat of Survey

1. On October 12, 1982, the plat representing an extension survey and the reestablishment of a portion of the record meander lines and the survey of a portion of the new meander lines of Pickerel Lake to include lands omitted from the original survey in Secs. 11 and 12, T. 62 N., R. 1 E., Fourth Principal Meridian, Minnesota was accepted. It will be oficially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m., on June 6, 1983.

The lots listed below describe the lands omitted from the original survey.

Fourth Principal Meridian, Minnesota

T. 62 N., R. 1 E.,
Sec. 11, Lots 9 and 10; and
Sec. 12, Lots 8, 9 and 10.

2. The greater portion of omitted land in Secs. 11 and 12 is of a rolling nature with ridges approximately 40 feet above the mean high water line of Pickerel Lake. There is no evidence that a lake has ever existed in this area at all. The soil content within the omitted area is mostly gravelly loam soils in the upland, while in the lowland, swamp areas of highly organic soils are found on a base of sand and gravel.

Both tracts are covered mostly by pine, fir, birch, black spruce, poplar, maple, and cedar. Large pine stumps show evidence that the area was once logged. The pine stumps, located south of the lake, were estimated to be over 100 years old. The east end of the lake was dotted with old cedar trees that are 12 to 16 inches in diameter. The size of the remaining pine stumps and the character of the land attest to its existence at the time of the original survey.

3. Lots 9 and 10 Sec. 11, and Lots 8, 9 and 10 Sec. 12, were found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). They are therefore held to be public lands.

4. All inquiries relating to these lands should be sent to the Deputy State Director for Lands and Minerals Operations, 350 South Pickett Street, Alexandria, Virginia 22304 on or before June 6, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

BILLING CODE 4310–84–M

[ES 32064, Survey Group 110]

Minnesota; Filing of Plat of Survey

1. On October 19, 1982, the plat representing the reestablishment of the record meander lines of Binagami Lake, a partial subdivision of Sec. 12, and the survey of new meanders to include lands omitted from the original survey in Sec. 19, T. 62 N., R. 1 E., Fourth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia at 7:30 a.m., on June 6, 1983.

The lots listed below describe the lands omitted from the original survey.

Fourth Principal Meridian, Minnesota

T. 62 N., R. 1 E.,
Sec. 19, Lots 10, 11, 12, 13, and 14.

2. The omitted area is of a rolling nature with portions of swamp lying therein. The upland ranges up to 40 feet above the lake. Drainage of this land is to the lake and small ponds by small

streams. The soil is a heavy clay-sand, interspersed with large rocks and gravel deposits. The formation is of glacial origin. The soil in the swamps is a thin organic muck, overlying boulder beds.

Distinct vegetative types are related to topographic position. Most of the upland area is forested with birch, poplar, maple, and pine. Cedar, balsam fir, and tamarack are found in the lowland boggy sites. Large pine stumps show evidence that the area was once logged. The size of the remaining pine stumps and the character of the land attest to its existence at the time of the original survey.

3. Lot 10 Sec. 19, was found to be over 50 percent swamp and overflowed in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). Therefore, this lot will only be open to the State of Minnesota under that Act.

Lots 11, 12, 13, and 14 were found to be over 50 percent upland in character within the purview of the Act referenced above. They are therefore held to be public lands.

4. All inquiries relating to these lands should be sent to the Deputy State Director for Lands and Minerals Operations, 350 South Picket Street, Alexandria, Virginia 22304 on or before June 6, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

[ES 32065, Survey Group 110]

Minnesota; Filing of Plat of Survey

1. On October 12, 1982, the plat representing an extension survey and the reestablishment of record meander lines in T. 62 N., R. 1 E., Fourth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m., on June 6, 1983.

The lots listed below describe the lands omitted from the original survey

Fourth Principal Meridian, Minnesota

T. 62 N., R. 1 E.,
Sec. 25, Lot 2;
Sec. 26, Lot 2;
Sec. 35, Lot 4, 5 and 6; and
Sec. 36, Lot 3.

2. The greater portion of omitted land in Secs. 25 and 26 is swamp in nature. This area consists of dense cedar and alder swamp. The size of the cedar stumps and trees attest to its existence at the time of the original survey.

The omitted land in Sec. 35 consists of rolling hills ranging up to 40 feet above the portions of swamp and marsh. Little Lake is located almost entirely within the omitted area in Sec. 35. There is no evidence that Little Lake was ever any larger than it is now and it appears to have been a non-navigable body of water at the time of statehood.

The omitted land in Sec. 36 is mostly upland in nature with ridges approximately 80 feet above the mean high water line of Little Lake. The omitted areas found in Secs. 35 and 36 are covered mainly by poplar, fir, birch, maple, and cedar trees. Large pine stumps are found throughout this area. This along with the character of the land attest to its existence at the time of the original survey.

The soil content in the omitted areas consists primarily of gravelly loam in the upland with muskeg in the swamp areas. Large boulders were found on the uplands.

3. Lot 2 Sec. 25, Lot 2 Sec. 26, and Lot 4 Sec. 35 were found to be over 50 percent swamp and overflowed in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). Therefore, these lots will only be open to the State of Minnesota under that Act

Lots 5 and 6 Sec. 35, and Lot 3 Sec. 36, were found to be over 50 percent upland in character within the purview of the Act referenced above. They are therefore held to be public lands.

4. All inquiries relating to these lands should be sent to the Deputy State Director for Lands and Minerals Operations, 350 South Pickett Street, Alexandria, Virginia 22304 on or before June 6, 1983.

It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on June 6, 1983.

The lots listed below describe the lands omitted from the original survey.

Fourth Principal Meridian, Minnesota

T. 62 N., R. 1 E.,
Sec. 10, Lots 6 and 7;
Sec.11, Lot 11;
Sec.14, Lots 7 and 8; and
Sec. 15, Lots 8, 9, 10, 11, and 12.

2. The omitted land area is of a rolling nature with portions of swamp lying therein. The upland ranges up to 65 feet above the lake. Drainage of this land is by Elbow Creek and other small creeks. The soil in the omitted area consists mainly of a heavy clay-sand, interspersed with large rocks and gravel deposits. The formation is of glacial origin. The soil in the swamps is a thin organic muck, overlying boulder beds.

Distinct vegetative types are related to topographic position. Most of the upland area is forested with birch, poplar, maple, and pine. Cedar, balsam fir, and tamarack are found in the lowland boggy sites. Large pine stumps show evidence that the area was once logged. The size of the remaining pine stumps and the character of the land attest to its existence at the time of the original survey.

3. Lot 7 Sec. 14, was found to be over 50 percent swamp and overflowed in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). Therefore, this lot will only be open to the State of Minnesota under that Act.

Lots 6 and 7 Sec. 10, Lot 11 Sec. 11, Lot 8 Sec. 14, and Lots 8, 9, 10, 11 and 12 Sec. 15, were found to be over 50 percent upland within the purview of the Act mentioned above. They are therefore held to be public land. 4. All inquiries relating to these lands should be sent to the Deputy State Director for Lands and Minerals Operations, 350 South Pickett Street, Alexandria, Virginia 22304 on or before June 6, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

BILLING CODE 4310-84-M

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that Pennzoil Exploration and Production Company has submitted a Development and Production Plan describing the activities it proposes to conduct on

Leases OCS-G 2078 and 1140, Blocks 228 and 215, Vermilion Area, offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837–4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in a revised Section 250.34 of Title 30 of the Code of Federal Regulations.

Dated: April 13, 1983.

John L. Rankin,

Acting Regional Manager, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

Office of the Secretary

[516 DM 6, App. 9]

National Environmental Policy Act; Revised Implementing Procedures

AGENCY: Department of the Interior.

ACTION: Notice of final revised instructions for the Bureau of Reclamation.

SUMMARY: This notice announces revisions to the actions categorically excluded from the NEPA process for the Bureau of Reclamation. The proposed revised instructions were published in the **Federal Register** on December 16, 1981 (46 FR 61337).

EFFECTIVE DATE: April 13, 1983.

FOR FURTHER INFORMATION CONTACT: Bruce Blanchard, Director, Office of Environmental Project Review, Office of the Secretary, Department of the Interior, Washington, DC 20240; telephone (202) 343–3891. For Bureau of Reclamation, contact Wayne Deason; telephone (202).

SUPPLEMENTARY INFORMATION: This is a final revision to Section 9.4 of Appendix 9 to Chapter 6, Part 516 of the Departmental Manual (516 DM 6, App. 9.4). It revises and updates categorical exclusions previously published in the **Federal Register**, July 17, 1980 (45 FR 47944). The Department's NEPA procedures (516 DM 1–6) were published on April 23, 1980 (45 FR 47941). This revision is based on continued experience with the NEPA process in the Bureau of Reclamation.

Response to Comments

One letter of comment was received from the Missouri River Coordinator, Office of the Governor, Des Moines, Iowa, indicating that all water service contracts should be considered major Federal actions having significant impacts on the environment and, therefore, these minor contracts should not be categorically excluded. This comment was directed to 9.4D(4) which had been proposed to read "approval, execution, and implementation of water service contracts for minor amounts of long-term water use, or temporary or interim water use, where the action does not lead to long-term changes."

Our experience has been that contracts for small amounts of water have not historically involved or caused significant impacts, and, therefore, should be categorically excluded from the NEPA process, subject to the Departmental exceptions in 516 DM 2.3A(3). We have, however, further qualified this exclusion with the clause "and where the impacts are expected to be localized."

We do recognize that major water service contracts may cause significant impacts and have already indicated this in the list of actions that normally require an EIS in Section 9.3A(3).

Minor changes in wording have been made in other categorical exclusions and for ease in reference Section 9.4 in its entirely is published herewith.

Dated: April 13, 1983.

Wm. D. Bettenberg,

Deputy Assistant Secretary, Policy, Budget and Administration.

516 DM 6, Appendix 9—Bureau of Reclamation

9.4 *Categorical Exclusions.* In addition to the actions listed in the Departmental categorical exclusions outlined in Appendix 1 of 516 DM 2, many of which the Bureau also performs, the following Bureau actions are designated categorical exclusions unless the action qualifies as an exception under 516 DM 2.3A(3):

A. General Activities

1. Changes in regulations or policy directives and legislative proposals where the impacts are limited to economic and/or social effects.

2. Training activities of enrollees assigned to the various youth programs. Such training may include minor construction activities for other entities.

3. Research activities, such as nondestructive data collection and analysis, monitoring, modeling, laboratory testing, calibration, and testing of instruments or procedures and nonmanipulative field studies.

B. Planning Activities

1. Routine planning investigation activities where the impacts are expected to be localized, such as land classification surveys, topographic surveys, archeological surveys, wildlife studies, economic studies, social studies, and other study activity during any planning, preconstruction, construction, or operation and maintenance phases.

2. Special, status, concluding, or other planning reports that do not contain recommendations for action, but may or may not recommend further study.

3. Data collection studies that involve test excavations for cultural resources investigations or test pitting, drilling, or seismic investigations for geologic exploration purposes where the impacts will be localized.

C. Project Implementation Activities

1. Classification and certification of irrigable lands.

2. Minor acquisition of land and rights-of-way or easements.

3. Minor construction activities associated with authorized projects which correct unsatisfactory environmental conditions or which merely augment or supplement, or are enclosed within existing facilities.

4. Approval of land management plans where implementation will only result in minor construction activities and resultant increased operation and maintenance activities.

D. Operations and Maintenance Activities

1. Maintenance, rehabilitation, and replacement of existing facilities which may involve a minor change in size, location and/or operation.

2. Transfer of the operation and maintenance of Federal facilities to water districts, recreation agencies, fish and wildlife agencies, or other entities where the anticipated operation and maintenance activities are agreed to in a contract or a memorandum of agreement, follow approved Reclamation policy, and no major change in operation and maintenance is anticipated.

3. Administration and implementation of project repayment and water service contracts, including approval of organizational or other administrative changes in contracting entities brought about by inclusion or exclusion of lands in these contracts.

4. Approval, execution, and implementation of water service contracts for minor amounts of long-term water use or tempoarary or interim water use where the action does not lead to long-term changes and where the impacts are expected to be localized.

5. Approval of changes in pumping power and water rates charged contractors by the Bureau for project water service or power.

6. Execution and administration of recordable contracts for disposal of excess lands.

7. Withdrawal termination, modification, or revocation where the land would be opened to discretionary land laws and where such future discretionary actions would be subject to the NEPA process, and disposal or sale of acquired lands where no major change in usage is anticipated.

8. Renewal of existing grazing, recreation management, or cabin site leases which do not increase the level of use or continue unsatisfactory environmental conditions.

9. Issuance of permits for removal of gravel or sand by an established process from existing quarries.

10. Issuance of permits, licenses, easements, and crossing agreements which provide right-of-way over Bureau lands where the action does not allow for or lead to a major public or private action.

11. Implementation of improved appearance and soil and moisture conservation programs where the impacts are localized.

12. Conduct of programs of demonstration, educational, and technical assistance to water user organizations for improvement of project and on-farm irrigation water use and management.

13. Follow-on actions such as access agreements, contractual arrangements, and operational procedures for hydropower facilities which are on or appurtenant to Bureau facilities or lands which are permitted or licensed by the Federal Energy Regulatory Commission (FERC), when FERC has accomplished compliance with NEPA (including actions to be taken by the Bureau) and when the Bureau's environmental concerns have been accommodated in accordance with the Bureau/FERC Memorandum of Understanding of June 22, 1981.

14. Approval, renewal, transfer, and execution of an original, amendatory, or supplemental water service or repayment contract where the only result will be to implement an administrative or financial practice or change.

15. Approval of second party water sales agreements for small amounts of water (usually less than 10 acre-feet) where the Bureau has an existing water sales contract in effect.

16. Approval and execution of contracts requiring the repayment of funds furnished or expended on behalf of an entity pursuant to the Emergency Fund Act of June 26, 1948 (43 U.S.C. 502) where the action taken is limited to the original location of the damaged facility.

17. Minor safety of dams construction activities where the work is confined to the dam, abutment areas, or appurtenant features, and where no major change in reservoir or downstream operation is anticipated as a result of the construction activities.

E. Grant and Loan Activities

1. Rehabilitation and Betterment Act loans and contracts which involve repair, replacement, or modification of equipment in existing structures or minor repairs to existing dams, canals, laterals, drains, pipelines, and similar facilities.

2. Small Reclamation Projects Act grants and loans where the work to be done is confined to areas already impacted by farming or development activities, work is considered minor, and where the impacts are expected to be localized.

3. Distribution System Loans Act loans where the work to be done is confined to areas already impacted by farming or developing activities, work is considered minor, and where the impacts are expected to be localized.

[FR Doc. 83-10570 Filed 4-20-83; 8:45 am]

BILLING CODE 4310-09-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-123]

CT Scanner and Gamma Camera Medical Diagnostic Imaging Apparatus; Cancellation of Commission Hearing on the Presiding Officer's Recommended Determination, Remedy, the Public Interest, and Bonding

AGENCY: U.S. International Trade Commission.

ACTION: Cancellation of a public hearing in investigation No. 337-TA-123, Certain CT Scanner and Gamma Camera Medical Diagnostic Imaging Apparatus, previously scheduled for Friday, April 22, 1983, in the Commission's Hearing Room, 701 E Street NW., Washington, D.C. 20436, beginning at 10:00 a.m.

SUMMARY: In the **Federal Register** of March 23, 1983 (48 FR 12141), the Commission announced the scheduling of a public hearing in this investigation for the purpose of hearing: (a) Oral arguments on the presiding officer's recommended determination that there is no violation of section 337 of the Tariff Act of 1930 in this case and (b) presentations concerning the appropriate remedy, the effect that such remedy would have upon the public interest, and the proper amount of the bond during the Presidential review period (in the event that the Commission determines that there is a violation and that relief should be granted). Notice is hereby given that the hearing is cancelled.

SUPPLEMENTARY INFORMATION: On March 4, 1983, the presiding officer issued a recommended determination that there is no violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the unauthorized importation into the United States and in the sale of the CT scanner and gamma camera imaging apparatus that are the subject of the investigation. The presiding officer's recommendation and the record upon which it is based were certified to the Commission for review and a Commission determination. All parties filed written exceptions to the recommended determination on March 23, 1983.

On April 8, 1983, the complainant, Technicare Corp., filed a motion to withdraw its complaint and terminate the investigation in its entirety (Motion No. 123-21C). The Commission investigative attorney subsequently filed a response supporting the complainant's motion. On April 15, 1983, the respondents, Elscint Ltd. and Elscint, Inc., filed an alternate motion to terminate (Motion No. 123-23C). Since the period of time for the non-moving parties to respond to each motion has not yet expired, these motions are not ripe for decision. The Commission cancels the public hearing in this investigation pending a ruling on Motions Nos. 123-23C.

Copies of the nonconfidential version of the recommended determination, the parties exceptions, the motions to terminate, and any other documents on the public record of the investigation may be obtained by contacting the Office of the Secretary, Docket Section, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202-523-0176.

The notice instituting this investigation was published in the **Federal Register** of June 3, 1982, 47 FR 24232.

FOR FURTHER INFORMATION CONTACT: P. N. Smithey, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0350.

By order of the Commission.

Issued: April 19, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE-7020-02-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Notice of Approved Exemptions

Correction

In FR Doc. 83-8113 beginning on page 13283 in the issue of Wednesday, March 30, 1983, make the following correction

On page 13284, first column, the following motor carrier was

inadvertently omitted and should be inserted above MC–F–15052:

MC–F–15046, UNITED VAN BUS DELIVERY—continuance in control exemption—SERVICE EXPRESS TRANSPORT, INC. Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423, and (2) Petitioner's representative: Andrew R. Clark, 1600 TCF Tower, Minneapolis, MN 55402. Pleadings should refer to MC–F–15.46. Under 49 U.S.C 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a), the continuance in control by United Van Bus Delivery Nos. MC–139066 and MC–141620), and, in turn, Arnie Hillman, who owns stock in United, of Service Express Transport LTD, upon institution of operations by Service under the authority it seeks in MC–165235.

BILLING CODE 1505–01–M

Motor Carriers; Approved Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of approved exemptions.

SUMMARY: The motor carriers shown below have been granted exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 1343,* 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATES: The exemptions will be effective on May 23, 1983. Petitions for reconsideration must be filed by May 11, 1983. Petitions for stay must be filed by May 2, 1983.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood (202) 275–7977.

SUPPLEMENTARY INFORMATION: For further information, see the decision(s) served in the proceeding(s) listed below. To purchase a copy of the full decision contact: TS Infosystems, Inc., Room 2227, 12th and Constitution Ave., NW, Washington, DC 20423; or call (202) 289–4357 in the DC metropolitan area; or (800) 424–5403 Tool-free outside the DC area.

Agatha L. Mergenovich,

Secretary.

MC–F–15043, Wendy Roche, David Roche, and Lloyd B. Clark—Continuance in Control Exemption—Pawtuxet Valley Motor Express, Inc., and C–Line, Inc.

Addresses: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and (2) Petitioner's representatives: Ronald N. Cobert, Joseph Michael Roberts, 1730 M Street, N.W., Suite 501, Washington, DC 20036.

Pleadings should refer to No. MC–F–15043.

Decided: April 13, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement for prior reivew and approval under 49 U.S.C. 11343(a), the continuance in control by Wendy Roche, David Roche, and Lloyed B. Clark of Pawtuxet Valley Motor Express, Inc., (MC–39507) and C-Line, Inc. (MC–138861).

By the Commission, Division 1, Commissioners Andre, Taylor and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

MC–15051, Bob's Transport and Storage Company Inc.—Purchase Exemption—Haulmark Transfer, Inc.

Addresses: Send pleadings to: (1) Motor Section, Team 5, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and (2) Petitioner's representative: Michael R. Werner, 241 Cedar Lane, Teaneck, NJ 07666.

Pleadings should refer to No. MC–F–15051.

Decided: April 14, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a), the purchase by Bob's Transport and Storage Company, Inc., (MC–148624) of a portion of Haulmark Transfer Inc., (MC–127579 (Sub-No. 40)) authorizing the transportation of general commodities (with exceptions) between points in the conterminous United States.

By the Commission, Division 1, Commissioners Andre, Taylor and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

MC–F–15071, Leaseway Transportation Corp.—Continuance in Control Exemption—Leaseway Deliveries, Inc., et al.

Addresses: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and (2) Petitioner's representative: J. Andrew Kundtz, Thompson, Hine and Flory, 1100 National City Bank Building, Cleveland, OH, 44114.

Pleadings should refer to No. MC–F–15071.

Decided: April 14, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a), the continuance in control by Leaseway Transportation Corp. of its subsidiary, Leaseway Deliveries, Inc. (MC–164713), and of the other carriers presently controlled by Leaseway Transportation: Amac Trucking, Inc. (MC–140619); Anchor Motor Freight, Inc. (MC–808); Better Home Deliveries, Inc. (MC–150511); Charlton Transport (Quebec) Limited (MC–141250); Contract Trucking Corporation (MC–156146); Cryogenic Carriers, Inc. (MC–157690); Custom Deliveries, Inc. (MC–142963); Dedicated Freight Systems, Inc. (MC–139583); Fleet Transport Company, Inc. (MC–103051 and MC–114106); General Trucking Service, Inc. (MC–143308); Gypsum Haulage, Inc. (MC–112113); LDF, Inc. (MC–147101); Leaseway Trucking, Inc. (MC–153610); Max Binswanger Trucking (MC–116314); Balser Truck Co. (MC–96630), which is controlled by Max Binswanger; Geo. McNeil Teaming Company (MC–153315); Midwestern Distribution, Inc. (MC–144901); Mitchell Transport, Inc. (MC–124212); Pep Lines Trucking Co. (MC–130184 and MC–135280); Refiners Transport & Terminal Corporation (MC–50069); A. R. Gundry, Inc. (MC–25562), which is controlled by Refiners Transport; Signal Delivery Service Inc. (MC–108393); Stam-Win, Inc. (MC–147294 and MC–150185); Sugar Transport, Inc. (MC–115924); United Home Delivery, Inc. (MC–153685); and Vernon Equipment, Inc. (MC–150412)

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

MC–F–15081, Murrell Enterprises, Inc.—Continuance in Control Exemption—Earl C. Smith, Inc. and Magra, Inc.

Address: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and (2) Petitioner's representatives: Ronald J. Mastej and Neill T. Riddell, 900 Guardian Building, Detroit, MI 48226.

Pleadings should refer to No. MC–F–15081.

Decided: April 14, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirements of prior review and approval under 49 U.S.C. 11343(a), the continuance in control by Murrell Enterprises, and in turn, by Ronald C. Murrell, Lorraine M. Burman,

Robert S. Boris and James Byrne, of Earl C. Smith, Inc. (No. MC–80498) and Magra, Inc. (No. MC–164848).

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

MC–F–15076, Anderson & Webb Trucking Co. Inc.—Purchase Exemption—Cal-Tex, Inc.

Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and (2) Petitioner's representative: Eric Meierhoefer, Sims Meierhoefer, Walker, & Steinfeld, 915 Pennsylvania Building, 425 13th Street, N.W., Washington, DC 20004.

Pleadings should refer to No. MC–F–15076.

Decided: April 14, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a), the purchase by Anderson & Webb Trucking Co., Inc., (No. MC–14415) of the operating rights of Cal-Tex, Inc. in Nos. MC–141097 and MC–146041 and subnumbers thereunder.

By the Commission, Division 2, Commissioners Gradison, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

MC–F–15085, Etranco, Inc.—Control Exemption—Ecoff Trucking, Inc., and Liquid Transport Corp.

Addresses: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and (2) Petitioner's representative: Robert W. Loser II, 512 Chamber of Commerce Bldg., Indianapolis, IN 46204.

Pleadings should refer to No. MC–F–15085.

Decided: April 14, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a)(4), the acquisition of control of Ecoff Trucking, Inc. (MC–119934 and MC–128161) and Liquid Transport Corp. (MC–119226) by Etranco, Inc., a noncarrier holding company controlled by Rex V. Ecoff.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

MC–F–15087, Patrick M. Porritt—Continuance in Control Extension—Kramer Trucking Co., Inc. and Gabor Trucking, Inc.

Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and (2) Petitioner's representative: Patrick M. Porritt, P.O. Box 687, Detroit Lakes, MN 56501.

Pleadings should refer to No. MC–F–15087.

Decided: April 13, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a), the continuance in control of the operating rights of Kramer Trucking Inc. (No. MC–116923) and Gabor Trucking, Inc. (No. MC–118838), motor common carriers.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

MC–F–15101, Flatlands Express, Inc.—Purchase Exemption—Midwest Refrigerated Express, Inc.

Addresses: Send pleadings to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and (2) Petitioner's representative: Arlyn L. Westergren, Westergren, Hauptman & O'Brien, P.C., Suite 201, 9202 W. Dodge Road, Omaha, NE 68114.

Pleadings should refer to No. MC–F–15101.

Decided: April 14, 1983.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11344(e), the purchase by Flatlands Express, Inc. (No. MC–127602) of a portion of the operating authority of Midwest Refrigerated Express, Inc. (No. MC–124774).

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

BILLING CODE 7035–01–M

Motor Carrier; Finance Applications; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,

Secretary.

For the following, please direct status calls to Team 3 at 202–275–5223.

Volume No. OP3–MCFC–167

Decided: April 13, 1983.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC–FC–81240. By decision of April 13, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 3 approved the transfer to WINONA AIR EXPEDITING, INC., Winona, MN of a portion of Certificate No. MC–153114 (Sub-No. 3) (Part 2), issued October 6, 1981, to Olympic Express, Inc., of Bloomington, MN, authorizing the transportation of *general commodities* (except classes A and B explosives), between points in LaCrosse and Douglas Counties, WI, and Goodhue, Olmsted, St. Louis, Wabash and Winona Counties, MN, on the one hand, and, on the other, points in Anoka, Carver, Dakota, Hennepin,

Ramsey, Scott and Washington Counties, MN. Representative: Stanley C. Olsen, Jr., 5200 Willson Road, Suite 307, Edina, MN 55424, (612) 927–8855.

Volume No. OP5–FC–187

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC–FC 81336. By decision of April 13, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 1, approved the transfer to H.T.L. Inc., d.b.a., HUNTER TRUCK LINE, of Council Bluffs, IA, of all of the authority in Certificate No. MC–141489 and in Permit No. MC–145064. In No. MC–141489 Sub 16X, issued July 15, 1981, and the underlying authority thereto in MC–141489 issued November 7, 1980, and in Sub 2, issued March 14, 1980, Sub 3, issued July 29, 1980, Sub 6, issued September 22, 1981, Sub 8, issued November 23, 1979, Sub 10, issued March 9, 1981, Sub 12, issued November 6, 1980, Sub 15, issued January 5, 1981, Subs 16, 17, 18, and 19, issued August 28, 1980, No. MC–140241 Sub 44 and 46 reentitled issued July 29, 1980, and that portion of No. MC–138328 issued July 26, 1974 (acquired and authorized in MC–F–13639). MC–141489 Sub 9 issued September 24, 1980, and Sub 14, issued January 5, 1981. Permit No. MC–141489 Sub 19 issued June 22, 1982. In permit No. MC–145064 Sub 13X, issued August 7, 1981 and the underlying authority thereto in Sub 3, issued October 10, 1979, Sub 4, issued July 14, 1980, Sub 6, issued April 18, 1979, Sub 9, issued July 28, 1980, Sub 10, issued April 28, 1981 and Permit No. MC–136817 issued November 22, 1972 (acquired and authorized in MC–F–13639). Permit No. MC–145064 Sub 7 issued September 7, 1979, Sub 8, issued April 18, 1979 and Sub 12, issued May 5, 1981 to Hunter Trucking, Inc., of Council Bluffs, IA. Such authority authorizes the transportation of specified commodities over regular and irregular routes, between specified points in the U.S. Representative: James F. Crosby, 7363 Pacific Street, Suite 210B, Omaha, NE.

MC–81354. By decision of April 14, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 1, approved the transfer to K–C & CO. TRUCKING, INC., of Evanston, WY, of Certificate No. MC–155428 issued June 28, 1982, to K–C & CO. Trucking of Lima, MT, authorizing the transportation of Mercer commodities (a) between points in Idaho, Montana, Nevada, Utah, and Wyoming, and (b) between points in Idaho, Montana, Nevada, Utah, and Wyoming, on the one hand, and, on the other, points in Colorado, North Dakota, Oregon, South Dakota, Washington, and Wyoming. Representative: Wayne Koerner, P.O. Box 1196, Evanston, WY 82930.

MC–FC–81372. By decision of April 13, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 1, approved the transfer to B. J. McCONNELL AND JACK HELMS, d/b/a ALASKA MOBILE HOME MOVERS of Anchorage, AK, of Certificate No. MC–119558 Sub 8X issued September 7, 1982 and the underlying authority thereto in Sub 7 issued July 15, 1982, to Glenn Phillips and Cecil Blanton, d/b/a. Alaska Mobile Home Movers of Anchorage, AK, authorizing the transportation of lumber or wood products, except furniture, including buildings, and mobile homes, (1) between points in AK, and (2) mobile homes, between points in AK, and points in CO, ID, IN, KS, MI, MN, MT, NE, OK, SD, WA, and WI. An application for temporary authority has been filed. Representative: Arthur R. Hauver, 750 West Second Ave., Suite 200, Anchorage, AK 99501.

MC–FC–81382. By decision of April 14, 1983, issued under 49 U.S.C. 10926 and the transfer rules of 49 CFR Part 1181, Review Board Number 1 approved the transfer to SEA RAIL CARTAGE, INC., of Portland, OR, of Certificate No. MC–149118 issued December 12, 1980, authorizing the transportation of (1) contractors equipment, materials and supplies, and (2) commodities which, because of their size or weight, require the use of special equipment (except those in (1) above), between points in Oregon, Washington, and Del Norte, Siskiyou, Modoc, Trinity and Shasta Counties, CA, restricted to the transportation of traffic originating at or destined to the facilities of Pacific Power & Light Company, MC–149118 Sub 1F issued January 5, 1981, authorizing the transportation of equipment, materials and supplies used in the transmission and switching of telephonic communications and empty telephone cable reels, between points in Oregon, Washington, and Nez Perce Counties, ID, restricted to transportation of traffic from, to, or between the facilities of Pacific Northwest Bell Telephone Company, MC–149118 Sub 2F issued January 21, 1981, authorizing the transportation of general commodities (except household goods as defined by the Commission, hazardous or secret materials, and sensitive weapons and munitions), for the United States Government, between points in United States, and MC–149118 Sub 3F issued March 20, 1981, authorizing the transportation of commodities, which because of size or weight, require the use of special equipment, beween points in Oregon and Washington, Transferee holds authority under MC–162578. Representative: Lawrence V. Smart, Jr., 419 23rd Ave., Portland, OR 97210.

BILLING CODE 7035–01–M

Motor Carrier; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods).

The following applications for motor common or contract carriage of property and for a borker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract."

Please direct status inquiries to Team 1, (202) 275–7992.

Volume No. OP1–140

Decided: April 15, 1983.

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing.

MC 167230, filed April 4, 1983. Applicant: SCHUEFFNER TRUCKING, INC., Route 2, Sheboygan Falls, WI 53085. Representative: James A. Spiegel, Olde Towne Office Park, 6333 Odana Rd., Madison, WI 53719, (608)–273–1003. Transporting (1) *food and other edible products and by-products intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners* by the owner of the motor vehicle in such vehicle, and (2) for or on behalf of the U.S. Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), between points in the U.S. (except AK and HI).

MC 167301, filed April 8, 1983. Applicant: JOE SCHMID, d.b.a. JS INTERNATIONAL CUSTOMHOUSE BROKER, 110 W. Ocean Blvdi, Suite 361, Long Beach, CA 90802. Representative: Frank Rivera (same address as applicant), (213) 436–9927. As a *broker* of *general commodities* (except household goods), between points in the U.S.

For the following, please direct status calls to Team 3 at 202–275–5223.

Volume No. OP3–158

Decided: April 13, 1983.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC 76574 (Sub-6), filed March 23, 1983. Applicant: ARMSTRONG TRANSFER AND STORAGE CO., INC., 3927 Winchester Rd., Memphis, TN 38118. Representative: Carroll B. Jackson, 1810 Vincennes Rd., Richmond, VA 23229, (804) 282–3809. As a *broker* of *general commodities* (except household goods), between points in the U.S.

MC 155114 (Sub-1), filed April 6, 1983. Applicant: LONERGAN'S CHARTER SERVICE, INC., 1109 Boucher Ave., Annapolis, MD 21403. Representative: Steven L. Weiman, Suite 200, 444 N. BILLING CODE 7035–01–M

Motor Carrier; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, U.S.C., and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportion to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the U.S.C.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 4 at (202) 275–7669.

[Vol. No. OP1-139]

Motor Carriers; Proposed Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of proposed exemptions.

SUMMARY: The motor carriers shown below seek exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATE: Comments must be received within 30 days after the date of publication in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Joyce D. Lannon, (202) 275-7992.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: April 15, 1983.

By the Commission, Herber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,
Secretary.

Petitioners

MC-F-15216. Eby Bros. Inc., No. MC-114840, seeks an exemption from the requirement of prior regulatory approval for its purchase of authorities issued to Shoemaker Trucking Company in No. MC-138875, paragraphs 1, 6 and a portion of paragraph 27 of Sub-No. 312X which involve the transportation of building materials and lumber and wood products between certain points in Idaho and Arizona, New Mexico and Wyoming and waste or scrap materials between certain points in Idaho and Oregon, Utah, Wyoming, Nevada, California, Oregon and Washington. This purchase would necessarily entail the transfer of paragraphs 5 and 13 of Sub-No. 1, paragraph 1 of Sub-No. 22 and Sub-Nos. 62 and 72, which were superceded by paragraphs 1, 6 and a portion of 27 Sub-No. 312X. *Stewart Trucking Company*, MC-FC-79592 (December 1, 1982). Petitioner's Gateway application to tack these authorities with its existing authority has already been dismissed. Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423, and (2) Petitioner's Representative: Timothy R. Stivers, P.O. Box 1576, Boise, ID 83701. Comments should refer to MC-F-15216.

MC-F-15226, filed: April 4, 1983. STATE TRANSPORTATION, INC. (State) (P.O. Box 1349, Portsmouth, NH 03801)—purchase exemption—ADAMS TRUCKING, INC. (Adams) (P.O. Box 890, Sanford, ME 04073). State Transportation, Inc. (No. MC-145895), and Adams Trucking, Inc. (No. MC-157101), seek an exemption from the requirement of prior regulatory approval for the purchase by State of all of Adams' operating rights. Joseph J. O'Brien, who controls State, and who also controls Rockingham Carriage Service, Inc. (No. MC-153553) and North American Driveway, Inc. (No. MC-144983), seeks authority to acquire control of the said rights through the transaction. No application for TA has been filed. Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423. (2) Petitioner's representative: Robert G. Parks, Suite 101, 20 Walnut St., Wellesley Hills, MA 02181. Comments should refer to No. MC-F-15226.

MC-F-15227, ROBERT P. LAYMAN—Continuance in Control Exemption—ALEX CITY SALT TERMINAL, INC. and NORTH ALABAMA EXPRESS, INC. Robert P. Layman seeks an exemption from the requirement under section 11343 of prior regulatory approval for his continuance in control of Alex City Salt Terminal, Inc. (No. MC-158507) and North Alabama Express, Inc. (No. MC-97260), both motor common carriers. Addresses: Send Comments to: Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423, and (2) Petitioner's representative, Donald B. Sweeney, Jr., Esq., P.O. Box 2366, Birmingham, AL 35201. Comments should refer to No. MC-F-15227.

[Finance Docket No. 30169]

Indiana Hi-Rail Corporation; Temporary Exemption; Lease and Operate Between New Castle and Rushville, IN

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission temporarily exempts the Indiana Hi-Rail Corporation's (IHR) lease and operation of a 22.21-mile rail line between Rushville and New Castle, IN from prior approval under 49 U.S.C. 10901.

DATES: This exemption shall be effective on April 15, 1983. Petitions to reopen must be filed by May 5, 1983.

ADDRESSES: Send pleadings referring to Finance Docket No. 30169 to:

(1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423; or
(2) Petitioner's representative: Anthony J. Ciccone, Jr., 2033 K Street NW., Washington, DC 20006.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the entire decision, write to T. S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423 or call 289-4357 (D.C. Metropolitan Area) or toll free 800-424-5403.

Decided: April 15, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

BILLING CODE 7035-01-M

[Ex Parte No. 388; Sub-20]

State Intrastate Rail Rate Authority, Pub. L. 96-448, New Hampshire

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time for filing to notice of certification decision and filing schedule for new plans.

SUMMARY: In the **Federal Register** notice of January 27, 1983 (48 FR 3892), the date comments were due in this proceeding was March 14, 1983, which date was subsequently extended to April 13, 1983, by order not published. At the request of the New Hampshire Public Utilities Commission, the date has been postponed another 30 days to May 13, 1983.

DATES: Revised standards and procedures are due May 13, 1983. Comments of interested parties on the submission are due June 13, 1983.

ADDRESS: Send an original and, if possible, 15 copies of all comments to: Rail Section, Room 5344, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275-7278.

By the Commission, Reese H. Taylor, Jr., Chairman.

Dated: April 14, 1983.

BILLING CODE 7035-01-M

[Ex Parte No. 387]

Exemptions for Contract Tariffs; Burlington Northern Railroad Co. et al.

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice. These exemptions may be revoked if protests are filed.

DATE: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275-7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101(a) or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

Sub-No	Name of railroad, contract No., and specifics	Review Board [1]	Decided date
897	Burlington Northern Railroad Co., ICC-BN-C-0289, (Grain or grain products) via ports in State of Washington	1	4-14-83
898	Southern Pacific Transportation Co., ICC-SP-C-0496, (Plate or sheet, iron or steel)	2	4-14-83
899	Southern Pacific Transportation Co., ICC-SP-C-0495, (Plate or sheet, iron or steel)	3	4-14-83

[1] Review Board No. 1, Members Parker, Chandler, and Fortier. Review Board No. 2, Members Carleton, Williams, and Ewing. Review Board No. 3, Members Krock, Joyce, and Dowell.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

Authority: 49 U.S.C. 10505.

BILLING CODE 7035-01-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Music Advisory Panel; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Composers Prescreening) to the National Council on the Arts will be held on May 9-20, 1983, from 9:00 a.m.-5:30 p.m. in Room 730-731 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, N.W., Washington, D.C.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6070.

Dated: April 13, 1983.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537-01-M

Humanities Panel Meetings

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended) notice is given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, D.C. 20506:

Date: May 12–13, 1983.
Time: 8:00 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review applications submitted for General Research: Conference Panel, Division of Research Programs, for projects beginning after October 1, 1983.

Date: May 16–17, 1983.
Time: 8:30 a.m. to 5:00 p.m.
Room: 415.
Program: This meeting will review applications submitted for Humanistics Projects in Media, Division of General Programs, for projects beginning after October 1, 1983.

Date: May 19–20, 1983.
Time: 8:30 a.m. to 5:00 p.m.
Room: 415.
Program: This meeting will review applications submitted for Humanistics Projects in Media. (Special Deadline for Children's Media and Continuing Projects that have already received NEH support and need notification before April 1, 1984 that they can move to the next phase of their projects.) Division of General Programs, for Projects beginning after October 1, 1983.

The proposed meetings are for the purpose of Panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c) (4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, D.C. 20506, or call (202) 786–0322.

Stephen J. McCleary,
Advisory Committee Management Officer.

Music Advisory Panel (Composers Prescreening); Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Music Advisory Panel (Composers Prescreening) to the National Council on the Arts will be held on May 17–20, 1983, from 9:00 a.m.–5:30 p.m. in Room 730–731 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, N.W., Washington, D.C.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634–6070.

John H. Clark,
Director, Office of Council and Panel Operations, National Endowment for the Arts.

National Council on the Humanities Advisory Committee; Amendment to Notice of Meeting

AGENCY: National Endowment for the Humanities.

ACTION: Amendment to notice of meeting.

SUMMARY: On April 11, 1983 the National Endowment for the Humanities published a notice in the **Federal Register** at page 15554 (48 FR 15554) of a meeting of the National Council on the Humanities to be held May 4–6, 1983. That notice is hereby amended by the following addition to the agenda for May 4, 1983. The Council Committee on the 1984 Jefferson Award and Address will meet from 9:30 a.m. to 5:00 p.m. in the Chairman's Conference Room, Room 506, Old Post Office, 1100 Pennsylvania Avenue, N.W., Washington, D.C. This portion of the meeting will not be open to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code for the reasons stated in the original notice.

Stephen J. McCleary,
Advisory Committee Management Officer.

BILLING CODE 7536–01–M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–440–OL and 50–441–OL]

Cleveland Electric Illuminating Company, et al. (Perry Nuclear Power Plant, Units 1 and 2); Hearing

April 15, 1983.

May 23–27 and May 31–June 3, 1983, the Atomic Safety and Licensing Board (Board) will receive limited appearance statements and conduct an evidentiary hearing at the Lake County Administration Center, Public Assembly Room, 105 Main Street, Painesville, Ohio. The principal purpose of the hearing is to receive evidence on the adequacy of Cleveland Electric Illuminating Company, *et al.*'s system for assuring itself that its contractors are doing quality work, consistent with the safety of the Perry Nuclear Power Plant and the surrounding community.

Ordinary hours of hearing, on May 24 to May 27 and June 1 to June 3, will be from 9 a.m. to 5 p.m., subject to periodic recesses and to extension of hours in order to complete the hearing during the scheduled time period.

Members of the public who are not parties to the proceeding are invited to submit written limited appearance statements and to make brief oral presentations to the Board during a limited-appearance session to be held beginning at 7:30 p.m. on May 23 and 31, 1983. The principal purpose of these statements is to inform the Board about safety and environmental issues that have been place before it by the parties or about other issues of such importance that the Board may decide to consider them even though the parties have not raised them.

Although statements generally will be permitted regardless of their direct relevance, the Board's authority is limited; in particular, it is prohibited from reaching decisions contrary to the Commission's rules and regulations. Consequently, some questions may be more effectively addressed in petitions

to the Nuclear Regulatory Commission or the Congress of the United States.

Limited appearance statements will become part of the record of the case. Generally, written statements are not limited in length. However, oral presentations will be limited to 5 minutes, subject to extension at the Board's discretion. Oral presentations should summarize the key points made in written testimony and, if additional time may be needed, these statements should indicate the specific subjects to be discussed if an extension of time is granted.

People wishing to appear may notify the Board of their intention by writing to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Attention: Docketing and Service Branch, Washington, D.C. 20555. Please refer to the Docket Nos. 50–440 and 50–441. People unable to provide advance notice of their intention to participate may schedule an oral appearance by notifying the Board of their intention, in writing, no later than 10 a.m. on Friday morning, May 20, 1983.

For the Atomic Safety and Licensing Board.

Peter B. Bloch,

Chairman, Administrative Judge.

[Docket No. 50–255]

Consumers Power Co.; Order Confirming TMI Commitments; Correction

On March 23, 1983 (48 FR 12170) an Order issued by the U.S. Nuclear Regulatory Commission (NRC) was published in the **Federal Register**. This Order confirms commitments made by the Consumers Power Company for Post-TMI related issues involving the Palisades Plant, which is located in Van Buren County, Michigan.

The March 1, 1983 completion date for Item II.F.1, Accident Monitoring, appearing in Page 4 of the Order and Attachment 1 thereto, has been changed to July 1, 1983.

For additional details, see NRC's letter to the licensee dated April 14, 1983.

Dated at Bethesda, Maryland, this 14th day of April 1983.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Chief, Operating Reactors Branch #5, Division of Licensing.

[Docket No. 50–409]

Dairyland Power Cooperative, La Crosse Boiling Water Reactor; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 33 to Provisional Operating License No. DPR–45, issued to Dairyland Power Cooperative (the licensee), which revised the Technical Specifications for operation of the La Crosse Boiling Water Reactor (the facility) located in Vernon County, Wisconsin. This amendment is effective as of its date of issuance.

The amendment authorizes Technical Specification changes pertaining to the required frequency of certain surveillance tests to preclude requiring the plant to shut down from power operation to perform certain routine surveillance tests.

The applications for amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The applications for amendment dated July 14, 1980, September 29, 1982, October 29, 1982, and supplement thereto dated April 6, 1983, and application dated February 3, 1983; (2) Amendment No. 33 to License No. DPR–45; and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the La Crosse Public Library, 800 Main Street, La Crosse, Wisconsin 54601. A single copy of item (2) may be obtained by request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 15th day of April 1983.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Chief, Operating Reactors Branch #5, Division of Licensing.

BILLING CODE 7590–01–M

[Docket Nos. 50–369 and 50–370]

Duke Power Co.; Issuance of Amendments Facility Operating License Nos. NPF–9 and NPF–17

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 20 to Facility Operating License No. NPF–9 and Amendment No. 1 to Facility Operating License No. NPF–17, issued to Duke Power Company (licensee) for the McGuire Nuclear Station, Units 1 and 2 (the facilities) located in Mecklenburg County, North Carolina. These amendments are effective as of their dates of issuance.

These amendments increase the maximum flow rate for the centrifugal charging pump and correct several typographical errors in the initial issuance of the Technical Sspecifications.

Issuance of these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see: (1) Duke Power Company letter dated March 24, 1983. (2) Amendment No. 20 to Facility Operating License No. NPF–9, (3) Amendment No. 1 to Facility Operating License No. NPF–17, and (4) the Commission's related Safety Evaluation.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and the Atkins Library, University of North Carolina, Charlotte (UNCC Station), North

Carolina 28223. A copy of these items may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 13th day of April 1983.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

[Docket Nos. 50-315 and 50-316]

Indiana and Michigan Electric Co.; Issuance of Amendment To Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 71 to Facility Operating License No. DPR-58, and Amendment No. 53 to Facility Operating License No. DPR-74 issued to Indiana and Michigan Electric Company (the licensee), which revised Technical Specifications for operation of Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2 (the facilities) located in Berrien County, Michigan. The amendments are effective as of the date of issuance.

The amendment revise the Technical Specifications to reflect revised surveillance requirements for safety-related snubbers. These amendments also add a section 4.0.5 to the Unit 1 Technical Specifications on surveillance requirements for inservice inspection and testing of components and deletes a portion of section 4.0.4 in Unit 1 and 4.0.5.a.1 in Unit 2, which are no longer applicable. These latter changes are made to clarify the Technical Specifications and make them consistent with Standard Technical Specification requirements.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see: (1) The application for amendments dated November 11, 1981, as supplemented February 25, 1983, (2) Amendment Nos. 71 and 53 to License Nos. DPR-58 and DPR-74, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 13th day of April 1983.

BILLING CODE 7590-01-M

[Docket No. 50-387]

Pennsylvania Power & Light Co., and Allegheny Electric Cooperative, Inc.; Issuance of Amendment to Facility Operating License and Exemption From Regulations

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 13 to Facility Operating License No. NPF-14, issued to Pennsylvania Power & Light Company and Allegheny Electric Cooperative, Inc., for Susquehanna Steam Electric Station, Unit 1 (the facility) located in Luzerne County, Pennsylvania. The amendment incorporates, as an administrative change, Change M of the Susquehanna Steam Electric Station Physical Security Plan into the license condition regarding the physical security plan. This amendment also provides an exemption from the requirements of Appendix J to 10 CFR Part 50 for the first fuel cycle when performing local leak rate testing of Residual Heat Removal (RHR) relief valves in accordance with Technical Specification 4.6.1.2. The amendment and exemption are effective as of the date of issuance.

The application for the amendment and for the exemption complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment and exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment and exemption.

For further details with respect to this action, see: (1) The application for amendment dated March 14, 1983, (2) Amendment No. 13 to License; NPF-14, dated April 14, 1983; and (3) the Commission's evaluation dated April 14, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555, and at the Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701. A copy of items (1), (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

[Docket No. 50-259]

Tennessee Valley Authority; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 89 to Facility Operating License No. DPR-33 issued to Tennessee Valley Authority (the licensee), which revised the Technical Specifications for operation of the Browns Ferry Nuclear Plant, Unit No. 1 (the facility) located in Limestone County, Alabama. The amendment was effective January 25, 1983.

This amendment changed the Technical Specifications to permit operation of 50% power between January 25, 1983 and January 31, 1983

with one recirculation loop out of service.

The application for this amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated January 25, 1983 (2) Amendment No. 89 to License No. DPR-33, and (3) the Commission's related Safety Evaluation. RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

Summary of Proposal(s):

(1) Collection title: Statement of death by funeral director.

(2) Form(s) submitted: G-273.

(3) Type of request: Revision.

(4) Frequency of use: On occasion.

(5) Respondents: Funeral home directors.

(6) Annual responses: 12,000.

(7) Annual reporting hours: 600.

(8) Collection description: The railraod retirement Act provides for payment of benefits to qualified individuals due to death of a railroad worker. The statement will obtain information needed to support a claim for death benefits.

Additional Information or Comments: Copies of the proposed forms and supporting documents may be obtained from Pauline Lohens, the agency clearance officer (312-751-4692). Comments regarding the information collection should be adressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Milo Sunderhauf (202-395-6880), Office of Management and Budget Room 3201, New Executive Office Building, Washington, D.C. 20503.

William A. Oczkowski,

Director of Planning and Information Management.

SECURITIES AND EXCHANGE COMMISSION

Cincinnati Stock Exchange; Application for Unlisted Trading Privileges and of Opportunity for Hearing

April 15, 1983.

The above named national securities exchange has filed an application with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the common stock of:

BSN Corp.

Common Stock, $.01 Per Value (File No. 7-6572)

This security is listed and registered on one or more other national securities exchange and is reported on the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 6, 1983 written data, views and arguments concerning the above-referenced application. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the application if it finds, based upon all the information available to it, that the extension of unlisted trading privileges pursuant to such application is consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19682; File No. SR-Amex-83-7]

Filing and Immediate Effectiveness Of Proposed Rule Change by the American Stock Exchange, Inc.

April 15, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 7, 1983, the American Stock Exchange, Inc. ("Amex") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The Amex's proposed rule change provides that "all-or-none" option orders entrusted to a specialist be disclosed to the trading crowd if they match or better the bid or offer for the series. The orders would be announced to the trading crowd as part of the quoted market, but not as part of the bid or offer.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of rule 19b-4 under the Act. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, DC 20549. Reference should be made to File No. SR-Amex-83-7.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed

rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

Midwest Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

April 15, 1983.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Acco World Corporation
Common Stock, $.05 Par Value (File No. 7-6573)
Grubb & Ellis Co.
Common Stock, $1 Par Value (File No. 7-6574)
Perry Drug Stores, Inc.
Common Stock, $.05 Par Value (File No. 7-6575)
Prairie Producing Co.
Common Stock, $.01 Par Value (File No. 7-6576)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 6, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19675; File No. SR-NASD 83-1]

Self-Regulatory Organizations; Proposed Rule Change By National Association of Securities Dealers, Inc.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on January 20, 1983, the National Association of Securities Dealers, Inc. ("Association") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing the notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change adds a new section to Schedule D to Article XVI of the Association's By-Laws for the purpose of implementing a system for the exchange of information on direct participation program (primarily limited partnership) securities ("System"). The provisions of the proposed rule change describe qualifications for subscribers to the System and the securities on which information may be entered into the System.

II. Self-Regulatory Organization's Statement Regarding the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these comments may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) *Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.* This proposed rule change is the result of many months study by the Association's Real Estate Committee of possible means for developing a system for the exchange of information on direct participation program securities, during which a survey of members was conducted in early 1980 to determine interest in such a System. Almost 20 percent of the membership responded, with 68 percent favoring establishment of a System.

In order to implement such an information system, the Association is proposing to amend Schedule D to Article XVI of the Association's By-Laws to incorporate certain technical rules as new Part XV. This proposed rule change is consistent with Sections 15A(b)(6) and 15A(b)(11) of the Securities Exchange Act of 1934, as amended ("Exchange Act").

Description of System

The proposed rule change would enable the Association to establish an "electronic bulletin board" that will provide a means of communications for an exchange of information but no execution capability. Broker/dealers participating in the System will not be required to maintain firm, continuous or two-sided quotations and will not necessarily function as market-makers in the normal sense. The System will be accessed through NASDAQ terminals and will provide subscribing members with on-line ability to enter and update indications of interest in any security approved for the System and to query a data base to review information on individual securities or groups.

Analysis of Proposed Amendment To Schedule D to By-Laws

Following is a discussion of the provisions of proposed part XV to Schedule D.

Section A: General. Section A contains a general prohibition on the entry of information into the System except in accordance with the proposed rule.

Section B: Definitions. Section B incorporates definitions of "direct participation program system," "eligible broker/dealer," "authorized security," and "trading unit" into the proposed rule. The terms defined in Section B are, for the most part, self-explanatory. The term "trading unit" is defined to be the minimum number of direct participation program securities which can be transferred as a unit pursuant to the terms contained in the partnership agreement of the program.

Section C: Eligible Broker/Dealers. Paragraph 1 of Section C sets forth the qualifying criteria which a broker/

dealer must meet in order to be considered eligible to enter information into the System. The first two criteria, Subparagraphs 1.a. and b., are the familiar requirements that a broker/dealer must be registed with the Securities and Exchange Commission and a member in good standing of the Association, as well as qualified with the Association to conduct a general securities business or a business in direct participation programs.

Subparagraph 1.c. of Section C requires that a broker/dealer must maintain net capital of at least $25,000 to be eligible to enter information into the System. The Association's interpretation of the $25,000 net capital requirement relates only to actual capital held and not to the firm's ability to hold customer funds or securities. Under this interpretation, a firm can elect to participate in the System by obtaining the requisite additional capital, although the firm is not qualified to handle customer funds and securities.

In addition, the Association has determined that broker/dealers unable to meet the $25,000 net capital standard may be able to arrange to have access to the System through other broker/dealers. Under this interpretation, a firm without sufficient net capital may be able to enter into a relationship with a firm with the requisite $25,000 net capital to clear the transaction in the System.

Paragraph 2 of Section C establishes the general requirement that a broker/dealer entering information into the System must have reasonable grounds to believe that the information represents a bona fide indication of interest in the purchase or sale of a trading unit of securities. In addition, where the indication of interest is for the sale of a trading unit, the broker/dealer must have reasonable grounds to believe that the unit will be transferred to a purchaser.

Section D: Authorized Securities. Paragraph 1 of Section D requires that the security be issued by a direct participation program and be currently registered under Section 12(g) of the 1934 Act; that the issuer be current in its reporting requirements under the 1934 Act; that the partnership have issued and outstanding at least 10,000 trading units owned by not less than 300 persons; and that at least one broker/dealer stands ready to enter information into the System on the security.

Paragraph 2 of Section D describes the circumstances under which an otherwise eligible security shall not be authorized for entry into the System and an authorized security will be subject to suspension or cancellation of its authorization. Such circumstances include the suspension of the security from being traded over-the-counter, failure by the issuer to promptly disclose to the public any material information which may affect the value of its securities or influence investors' decisions, and the fact that the security is no longer registered under Section 12(g) of the 1934 Act. Paragraph 2 of Section D also includes the restriction that an eligible security is not authorized where the security is the subject of a public offering which has not yet been terminated.

(B) *Self-Regulatory Organization's Statement on Burden on Competition.* The proposed rule change will promote competition to the extent that the System will provide a more efficient means to publicize offers to buy or sell partnership securities, resulting in a more efficient pricing mechanism for such securities. At the same time, the proposed rule change will have an impact on competition to the extent that only members of the Association qualified to deal in direct participation program securities that maintain net capital of at least $25,000 will be eligible to enter information into the System, while other members of the Association and non-members will not be similarly eligible. However, the Association believes that the burden imposed is not unduly burdensome or inappropriate in light of the regulatory objectives sought to be achieved in furtherance of the Association's obligations under the Exchange Act.

(C) *Self-Regulatory Organization's Statement of Comments on the Proposed Rule Change Received from Members, Participants, or Others.* The proposed rule change was published for member comment in Notice to Members 82-13 (March 9, 1982). The Association received a total of 18 comments on the rule proposal. After due consideration of the comments received, the Board of Governors approved an amended version of the rule.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the publication of this Notice in the Federal Register or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. Copies of such filings will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation pursuant to delegated authority.

April 14, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13164; (812-5493)]

Sun Life Assurance Company of Canada (U.S.), et al.; Application

April 15, 1983.

Notice is hereby given that Sun Life Assurance Company of Canada (U.S.) ("Company"), Sun Life of Canada (U.S.) Variable Account A and Sun Life of Canada (U.S.) Variable Account B ("Accounts A and B"), and Sun Life of Canada (U.S.) Variable Account C ("Account C"), separate accounts of the Company registered under the Investment Company Act of 1940 ("Act") as unit investment trusts, Money Market Variable Account, Capital Appreciation Variable Account, and High Yield Variable Account ("3 Accounts"), separate accounts registered under the Act as management investment companies, Suncan Equity Services Company, 1 Sun Life Executive Park, Wellesley Hills, MA 02181, and

Clarendon Insurance Agency, Inc., 200 Berkeley Street, Boston, MA 02116, (collectively, "Applicants"), filed an application on March 11, 1983 and an amendment thereto on April 14, 1983 for an order pursuant to Section 11 of the Act approving the terms of certain offers of exchange. All interested persons are referred to the application and amendment on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act for a statement of the relevant statutory provision.

The Company established Accounts A and B, Account C, and the 3 Accounts to fund variable annuity contracts. Suncan Equity Services Company is the distributor of the Account A and B contracts. Clarendon Insurance Agency, Inc. is the distributor of the Account C and 3 Account contracts.

Applicants propose to permit Account A contractowners to exchange their contracts for tax qualified Account C or 3 Account contracts. Applicants also propose to permit Account B contractowners to exchange their contracts for 3 Account contracts. Applicants represent that exchanges of the contracts will be made on the basis of the relative net asset values of the contracts to be exchanged without the deduction of any fees or charges. Additionally, the contingent deferred sales charge imposed on the Account C or 3 Account contract received in exchange will not be imposed on purchase payments made for the exchanged Account A or B contract or on any appreciation attributable thereto transferred pursuant to the exchange. Finally, Applicants state that the company will pay its agents a fixed amount per contract regardless of whether such contract is exchanged as reimbursement for such agents' expenses associated with this exchange offer.

Applicants request an order pursuant to Section 11 of the Act to the extent necessary approving the terms of the proposed offer of exchange described in the application.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 10, 1983, at 5:30 p.m., do so by submitting a written request setting forth the natue of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon applicants at the addresses stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

Proposed Revisions Regarding Accounting for Internal Costs of Developing Computer Software for Sale or Lease to Others
No. 270-3 (Regulation S-X)
No. 270-119 (Form S-18)

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission has submitted for clearance proposed amendments to Regulation S-X and Form S-18 relating to the accounting for internal costs of developing computer software for sale or lease to others. A copy of this submission is available for public inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. 20549. Inquiring parties should refer to File No. 270-3.

Comments should be submitted to Mr. Robert Veeder, OMB Desk Officer, Office of Information and Regulatory Affairs, Room 3235 NEOB, Washington, D.C. 20503.

Dated: April 15, 1982.

BILLING CODE 8010-01-M

Forms Under Review By Office of Management and Budget

Agency Clearance Officer: Kenneth Fogash 202-272-2142.

Upon written request copy available from: Securities and Exchange Commission, Office of Consumer Affairs and Information Services, Washington, D.C. 20549.

Amendment

Rule 15c2-11

No. 270-196. Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission has submitted for clearance a proposed amendment to Rule 15c2-11 under the Securities Exchange Act of 1934 (the "Act") which concerns initiation and resumption of quotations of securities by brokers and dealers. The potential respondents are broker-dealers that publish quotations for over-the-counter securities in certain quotation media. The proposed amendments would: (a) Extend the Rule's information-maintenance and other substantive requirements to brokers and dealers who submit unpriced entries to inter-dealer quotation media, (b) require brokers and dealers that publish quotations for American Depository Receipts or securities of a foreign private issuer that furnishes information to the Commission pursuant to Rule 12g3-2(b) of the Act to maintain in their records certain information furnished to the Commission, and (c) prohibit the initiation of quotations for the securities of reporting companies that are delinquent in meeting their filing obligations under the Act.

Submit comments to OMB Desk Officer: Robert Veeder 202-395-4814.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[License No. 09/09-5272]

Los Angeles Capital Corp.; Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*), has been filed by Los Angeles Capital Corporation with the Small business Administration (SBA), pursuant to 13 CFR 107.102 (1983).

The officers, directors, and stockholders of the Applicant are as follows:

Kuytae Hwang, 2280 Hobart Boulevard, Los Angeles, California 90027, President, CEO, Director (50 Percent Stockholder);

Whami Hwang, 2280 N. Hobart Boulevard, Los Angeles, California 90027, Secretary, Treasurer, Director (50 Percent Stockholder);
Richard Young Lim, 5232 Los Grandes Way, Los Angeles, California 90027, Vice President.

The Applicant, a California Corporation, with its principal place of business at 1177 Myra Avenue, Suite A, Los Angeles, California 90029, will begin operations with $506,500 of paid-in capital and paid-in surplus.

The Applicant will conduct its activities principally in the State of California.

As a small business investment company under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended, from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the application include the general business reputation and character of shareholders and management, and the probability of successful operations of the new compnay in accordance with the Act and Regulations.

Notice is hereby given that any person may not later than 15 days from the date of publication of this Notice, submit written comments to the Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in Los Angeles, California.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: April 15, 1983.

Edwin T. Holloway,

Associate Administrator for Finance and Investment.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Radio Technical Commission for Aeronautics (RTCA) Executive Committee; Meeting

Pursuant to section 10(a) (2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. I) notice is hereby given of a meeting of the RTCA Executive Committee to be held on May 13, 1983, in RTCA conference Room, 1425 K Street, N.W., Suite 500, Washington, D.C. commencing at 9:30 a.m.

The Agenda for this meeting is as follows: (1) Approval of Minutes of Meeting Held on March 25, 1983; (2) Chairman's Report on RTCA Administration and Activities; (3) Special Committee Activities Report for March and April, 1983; (4) Approval of RTCA fiscal year 1984 Budget; (5) Approval of Procedures and Guidelines for RTCA Special Committee Activities; (6) Consideration of Establishing New Special Committees; (7) Approval of Special Committee 136 Report on Minimum Operational Performance Standards For Emergency Locator Transmitters (ELT) Operating on 121.5 and 243 Megahertz; (8) Approval of Special Committee 147 Report on Functional Guidelines for Traffic Alert and Collision Avoidance System Type 1 (TCAS-1); (9) Approval of Special Committee 147 Report on Minimum Operational Performance Standards for Traffic Alert and Collision Avoidance System Airborne Equipment; and (10) Other Business.

Attendance is open to the interested public but limited to space available. With the approval of the Chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, 1425 K Street, N.W., Suite 500, Washington, D.C. 20005, (202) 682-0266. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, D.C. on April 13, 1983.

Karl F. Bierach,

Designated Officer.

BILLING CODE 4910-13-M

Central Region Field Element Change

AGENCY: Federal Aviation Administation (FAA), DOT.

ACTION: Notice of Field Element Change.

SUMMARY: Notice is hereby given that on May 1, 1983, the General Aviation District Offices at Des Moines, Iowa, Lincoln, Nebraska, and Wichita, Kansas will be redesignated as Flight Standards District Offices (FSDOs). Each FSDO will assume responsibility for all Flight Standards functions within its present geographic area of jurisdiction, including those subject to Federal Aviation Regulations Part 121. This information will be reflected in the FAA Organization Statement the next time it is reissued.

EFFECTIVE DATE: May 1, 1983.

FOR FURTHER INFORMATION CONTACT: James O. Robinson, Manager, Flight Standards Division (ACE-200), Central Region, Federal Aviation Administration 601 East 12th Street, Kansas City, Missouri 64106; Telephone (816) 374-5003.

(Sec. 313(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a))

Issued in Kansas City, Missouri, on April 1, 1983.

Murray E. Smit,

Director, Central Region.

BILLING CODE 4910-13-M

National Airspace Review; Meeting

AGENCY: Federal Aviation Administration, Department of Transportation.

ACTION: Notice of meeting.

SUMMARY: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. 1) notice is hereby given of a meeting of Task Group 2-1 of the Federal Aviation Administration (FAA) National Airspace Review Advisory Committee. The agenda for this meeting is as

follows: An evaluation of the Severe Weather Avoidance Plan.

DATE: Beginning May 9, 1983, at 11 a.m., continuing daily, except Saturdays, Sundays, and holidays, not to exceed two weeks.

ADDRESS: The meeting will be held at the Federal Aviation Administration, conference room 9 A/B, 800 Independence Avenue, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: National Airspace Review Program Management Staff, Room 1005, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, (202) 426–3560. Attendance is open to the interested public, but limited to the space available. To insure consideration, persons desiring to make statements at the meeting should submit them in writing to the Executive Director, National Airspace Review Advisory Committee, Air Traffic Service, AAT–1, 800 Independence Avenue, SW., Washington, D.C. 20591, by May 4, 1983. Time permitting and subject to the approval of the chairman, these individuals may make oral presentations of their previously submitted statements.

Issued in Washington, D.C., on April 8, 1983.

Anthony Borden,

Acting Manager, Special Projects Staff, Air Traffic Service.

[FR Doc. 83–10465 Filed 4–20–83; 8:45 am]

BILLING CODE 4910–13–M

Federal Highway Administration

Environmental Assessment: New Castle County, Delaware

AGENCY: Federal Highway Administration (FHWA) DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental assessment will be prepared for a proposed highway project in New Castle County, Delaware.

FOR FURTHER INFORMATION CONTACT:

George Ostensen, Field Operations Engineer, Federal Highway Administration, Delaware Division, P.O. Box 517, Dover, Delaware, 19901, Telephone: (302) 734–5323;

Nicholas S. Blendy, Environmental Planner, Environmental Studies Office, Delaware Department of Transportation, P.O. Box 778, Dover, Delaware, 19903, Telephone (302) 736–4642.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Delaware Department of Transportation, has prepared an environmental assessment (EA) for a proposal to improve Delaware Route 7 in northern New Castle County, Delaware. The intent to process an EA differs from the original intent to prepare an Environmental Impact Statement (EIS) as announced in the July 31, 1980, **Federal Register** (Vol. 45, No. 149). This reduction in scope of the environmental document is a result of scoping and an ongoing location planning study that has enabled FHWA to conclude that the proposed action will lack any significant social, economic or environmental impacts. The location planning study is being undertaken for the portion of Delaware Route 7 from the existing Interstate I–95 Interchange near the town of Christiana south to U.S. Route 13, a distance of approximately six miles. The purpose is to establish an alignment for a relocated Delaware Route 7 within the corridor area. Improvements to the corridor are considered necessary to provide for the existing and projected traffic demand. Also included in this proposal will be a crossing of the Christina River and interchange connections with U.S. Route 13, U.S. Route 40 and the proposed Christiana Bypass (route 273).

Alternatives considered to date have included: (1) Taking no action; (2) widening the existing two-lane highway to four lanes; and (3) constructing a four-lane facility on new location. Alignment and preliminary design variations have been incorporated into and studied with the various build alternatives. A series of public information meetings and formal scoping meetings were held.

Comment or questions concerning this proposed action and the EA should be directed to the FHWA address provided above.

Issued on April 8, 1983.

George Ostensen,

Acting Division Administrator, Dover, Delaware.

[FR Doc. 83–10420 Filed 4–20–83; 8:45 am]

BILLING CODE 4910–22–M

[FHWA Docket No. 83–10]

Construction and Maintenance: Use of Innovative Technologies

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice and request for comments.

SUMMARY: The purpose of this document is to set forth the text of an FHWA Notice which contains procedures to increase the Federal-aid matching share for highway construction projects using innovative technologies. Section 142 of the Surface Transportation Assistance Act of 1982 (Pub. L. 97–424, 96 Stat. 2097) authorized the Secretary of Transportation to increase the Federal-aid matching share by 5 percent for certain highway projects, submitted by State highway departments, which would employ materials produced from recycled materials or contain asphalt additives to strengthen such materials. To be eligible, significant amounts of asphalt additives or recycled materials must be used in the project. Approvals for increased Federal-aid shares under this program are authorized only through September 30, 1985. Section 142 further required that a procedure be established within ninety days to implement this program. Such procedures are established by the FHWA Notice, which was issued on April 6, 1983. While the program will have effect only for a limited period, comments from the public are invited and will be fully considered should any later amendment or further guidance be deemed appropriate.

DATE: Comments must be received on or before June 20, 1983.

ADDRESS: Submit written comments, preferably in triplicate to the Federal Highway Administration, FHWA Docket No. 83–10, Room 4205, HCC–10, 400 Seventh Street, SW., Washington, D.C. 20590. All comments received will be available for examination at the above address between 7:45 a.m. and 4:30 p.m. ET, Monday through Friday. Those persons desiring notification of receipt of comments must include a self-addressed, stamped postcard.

FOR FURTHER INFORMATION CONTACT: Mr. Gary L. Kleindinst, Chief, Geotechnical and Materials Branch, Construction and Maintenance Division, (202) 426–0355, or Mr. James R. Dann, Office of the Chief Counsel, (202) 426–0786, Federal Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

Issued on: April 15, 1983.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

Use of Innovative Technologies

1. *Purpose.* To describe the procedures to increase the Federal-aid matching share for projects as prescribed by Section 142, Innovative Technologies, of

the Surface Transportation Assistance Act (STAA) of 1982.

2. *Definitions.* a. *Asphalt Additive*—a substance added to an asphalt paving mixture. Additives include rubber, chemical and/or natural products. Such materials as mineral fillers, chemical anti-strip agents, and defoaming agents or any other additive product routinely used should not be considered under this program. Asphalt additives could include any product not routinely used which has been proven to improve the asphalt mixture, achieve longer pavement life cycles, and lower maintenance costs.

b. *Binding Agents*—cement, asphalts, and other agents that impart increased stability to the recycled materials.

c. *Bituminous Paving Materials*—those paving materials consisting of a mixture of mineral aggregates and asphalt binder.

d. *Paving Materials*—those materials used for highway and bridge surfacing and resurfacing.

e. *Pavement*—composite of all the paving materials placed above the subgrade.

f. *Recycled Paving Materials*—a paving material containing a significant amount of salvaged materials, such as ground rubber tires, and also contains the addition of a binding agent. Salvaged materials include suitable industry by-products.

3. *Discussions.* The need to conserve energy and optimize expenditures in highway construction requires that special effort be made to identify and make maximum use of procedures that will result in reduced energy usage and minimum cost. Congress has found it to be in the national interest to encourage and promote utilization of highway materials which are produced from recycled material or which contain asphalt additives to strengthen the materials, prolong the life of the pavement, and lower maintenance costs. In an effort to support these technologies, the Congress authorized a Federal-aid share increase of 5 per centum for projects utilizing significant amounts of these materials.

a. The only additive specifically mentioned in Senate Report 97–676 was recycled rubber tires; however, reference was also made to "United States patented asphalt strengthening additives." It is also clear that the project share increase was being proposed for only those products where were "proven" to prolong pavement life and lower maintenance costs. Criteria set forth in paragraph 4a(1)(a) were developed as an aid in determining whether an asphalt additive is "proven."

b. The provisions in paragraph 4a are intended to enable the 5 per centum increase in Federal share to apply to an entire highway and bridge 3R or paving project which incorporates the qualifying paving materials as described in 4a(1)(a) and 4a(1)(b).

4. *Procedures.* When preparing plans and specifications the State may select cost-effective innovative technologies which will meet its needs for a particular project and incorporate them into its proposed plans and specifications. States that utilize a "permissive specification" which allows the contractor, at his/her option, to incorporate recycled materials qualifying for this program should have the contractor declare at bid opening the intended use of such qualifying recycled material. This is necessary to determine if the 5 per centum increase in the Federal-aid share will be applicable.

a. *Approval.* (1) On or before September 30, 1985, the Division Administrator may approve an increase in the Federal-aid share by 5 per centum for the entire project cost on highway and bridge surfacing, resurfacing, or restoration type projects, if the project:

(a) incorporates bituminous paving matrials which contain an asphalt additive in amounts consistent with standard practice and which has been proven to increase the strength of the materials and prolong the life of the pavement through a systematic evaluation program. This program shall include appropriate laboratory testing and successful in-service performance on at least three projects containing similar traffic, environmental factors, and pavement structure as the proposed project, and/or

(b) incorporates a significant amount of recycled paving materials.

(2) For the purpose of projects approved under Section 142 of STAA, proprietary products or materials meeting the above description have been determined to meet the public interest requirement as set forth in Federal-Aid Highway Program Manual (FHPM) 6–4–1–16, General Materials Requirements, paragraph 7c.

(3) Items of work or projects considered maintenance are not applicable for Federal-aid participation. The FHWA Notice N 5040.19, Resurfacing, Restoring, and Rehabilitation (R-R-R) Work, dated June 28, 1976, sets forth guidance on items of work considered maintenance.

(4) The total Federal-aid share may not exceed 100 per centum for any Federal-aid highway project.

b. *Fiscal Procedures.* (1) The amount of additional Federal funds approved by FHWA will be entered on the form FHWA-37, Project Status Record, and reported as a separate line (number 89). No special appropriation codes will be used for the increased Federal share.

(2) Normal reporting procedures will be followed as prescribed in FHWA Order H 4500.2, Fiscal Management Information System Handbook, except for the following:

(a) line number 89 will be reserved only for reporting the additional Federal funds authorized by section 142 of the STAA of 1982,

(b) line number 89 will be coded the same as the line containing the predominant cost of paving materials, except data entered in the "miles" column will not be repeated on this line, and

(c) an amount equal to the additional Federal funds reported on line number 89 will be deducted from the total cost of the predominant line and entered as the total cost column for line number 89. (The amount in the total cost field cannot be less than the amount in the Federal funds field.)

(3) The Form FHWA PR–2, Project Agreement, will contain the following statement:

> Additional Federal funds of $——— have been approved in accordance with Pub. L. 97–424, Section 142. The Federal-aid participation is——— percent.

5. *Reporting.* All projects covered by this Notice should be reported on Form FHWA 1517, Innovative Technology Report (RCS No. HHO–30–27). This form should be submitted to the Office of Highway Operations, construction and Maintenance Division (HHO–30).

[FR Doc. 83–10555 Filed 4–20–83; 8:45 am]
BILLING CODE 4910–22–M

Federal Highway Administration (FHWA)

Environmental Impact Statement; Cuyahoga County, Ohio

AGENCY: Federal Highway Administration, DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement (EIS) is being prepared for a proposed highway project in Cuyahoga County, Ohio.

FOR FURTHER INFORMATION CONTACT: Mr. John W. McBee, Division Administrator, or Mr. David M. Hall, District Engineer, Federal Highway Administration, 200 North High Street, Columbus, Ohio 43215. Telephone: (614) 469–5148.

SUPPLEMENTARY INFORMATION: The Federal Highway Administration (FHWA), in cooperation with the Ohio Department of Transportation (ODOT) and the City of Cleveland, has been preparing a draft environmental impact statement (EIS) since 1975 on the proposed construction of approximately 1.5 miles of limited access divided highway in the City of Cleveland, Ohio. The proposed facility designated Interstate Route 490, would connect Interstate Routes 90 and 71 on the west with Interstate Route 77 on the east. It would terminate at East 55th Street, a short distance east of Interstate Route 77.

The project represents a connecting link and the interchanges with the Interstates have been constructed. The required right-of-way has been largely acquired and cleared. Residential relocation has been completed.

Because of the long history of planning for this project, the fixing of the termini by construction of the interchanges with the existing Interstate Routes, the near completion of right-of-way acquisition, and the constraints of existing urban development, only one build alternative and the no-build alternative are now under consideration.

The proposed project would provide Cleveland with another route crossing the Cuyahoga River and bypassing the central business district. The proposed facility would link two major north-south freeways and increase the efficiency of Cleveland's free network. Congestion on a number of local streets would be alleviated.

To date, there has been extensive federal, state, local and public involvement with the proposed project. It is envisioned that such involvement will continue throughout further development of the project and, therefore, a formal scoping meeting has not been scheduled.

To insure that the full range of issues related to this proposed action are addressed and that all significant issues are identified, comments or questions concerning this action and the EIS should be addressed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The provisions of OMB Circular No. A-95 regarding state and local clearinghouse review of Federal and federally assisted programs and projects apply to this progam)

Issued on: April 14, 1983.

James J. Steele,
Acting Division Administrator, Columbus, Ohio

Grants and Denials of Applications for Exemptions

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Notice of Grants and Denials of Applications for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in March 1983. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

RENEWAL AND PARTY TO EXEMPTIONS

Application No	Exemption No	Applicant	Regulation(s) affected	Nature of exemption thereof
1862-X	DOT-E 1862	Green Hydraulics, Inc., Los Angeles, CA	49 CFR 173.302(a)(1), 175.3	To authorize the shipment of nitrogen in hydraulic accumulators. (Modes 1, 2, 3, 4.)
2587-P	DOT-E 2587	Welding & Therapy Service, Incorporated, Louisville, KY	49 CFR 173.315(a)(1)	To become a party to Exemption 2587 (Mode 1.)
2708-X	DOT-E 2708	Union Carbide Corporation, Danbury, CT	49 CFR 173.315(a), 173.316	To authorize shipment of a flammable liquefied compressed gas in non-DOT specification cargo tanks. (Mode 1.)
2709-P	DOT-E 2709	United Technologies, Sunnyvale, CA	49 CFR 173.52, 173.93, 177.821, 177.834(L)(1), 177.835(k)	To become a party to Exemption 2709 (Mode 1.)
2805-X	DOT-E 2805	SunOlin Chemical Company, Claymont, DE	49 CFR 172.101, 173.315(a)(1)	To authorize shipment of liquefied ethylene in non-DOT specification insulated cargo tanks. (Mode 1.)
3109-X	DOT-E 3109	Raytheon Company, Lowell, MA	49 CFR 173.301(e), 173.302(a)(1), 175.3	To authorize use of non-DOT pressure vessels for shipment of a nonflammable, nonliquefied compressed gas. (Modes 1, 2, 3, 4, 5.)
3109-X	DOT-E 3109	U.S. Department of Defense, Washington, DC	49 CFR 173.301(e), 173.302(a)(1), 175.3	To authorize use of non-DOT pressure vessels for shipment of a nonflammable, nonliquefied compressed gas. (Modes 1, 2, 3, 4, 5.)
3216-X	DOT-E 3216	Pennwalt Corporation, Philadelphia, PA	49 CFR 173.314(c)	To authorize use of a proposed DOT Specification 110A3000W tank car tank, for transportation of certain flammable compressed gases. (Modes 1, 3.)
3353-X	DOT-E 3353	Kerr-Mcgee Chemical Corporation, Oklahoma City, OK	49 CFR 173.163(a)(7), 173.239a(a)(2)	To authorize shipment of certain oxidizing material, in a non-DOT specification steel or aluminum portable tank. (Modes 1, 2.)
4242-X	DOT-E 4242	U.S. Department of Defense, Washington, DC	49 CFR 173.134, 173.87	To authorize use of a non-DOT specification pressure vessel, for transportation of certain pyrofonc mixture. (Mode 1.)
4453-P	DOT-E 4453	Pacific Powder Company, Tenino, WA	49 CFR 173.114a(h)(3)	To become a party to Exemption 4453 (Mode 1.)
4453-X	DOT-E 4453	Wampum Hardware Company, New Galilee, PA	49 CFR 173.114a(h)(3)	To authorize use of a non-DOT specification bulk, hopper-type tank for transportation of blasting agent, n.o.s., or ammonium nitrate-fuel oil mixture. (Mode 1.)
4453-P	DOT-E 4453	Pacific Motor Transport, Inc., Tenino, WA	49 CFR 173.114a(h)(3)	To become a party to Exemption 4453 (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
4726-X	DOT-E 4726	U.S. Department of Energy, Washington, DC	49 CFR 173.245	To authorize transport of certain liquid metal fluourides, in non-DOT specification seamless monel cylinders, overpacked in a strong wooden box with cushioning material. (Mode 1.)
4884-X	DOT-E 4884	Union Carbide Corporation, Danbury, CT	49 CFR 173.302(a)(1), 175.3, 178.61	To authorize shipment of gas-calibration mixtures of compressed gases, in non-DOT specification steel cylinders complying with DOT Specification 4BW, with certain exceptions. (Modes 1, 2, 3, 4, 5.)
5206-X	DOT-E 5206	Atlas Powder Company, Dallas, TX	49 CFR 173.114a	To authorize privately operated bulk hopper-type units, for transportation of an oxidizing material. (Mode 1.)
5248-X	DOT-E 5248	3M Company, St. Paul, MN	49 CFR 173.389(g), 175.3	To authorize shipment of a certain quantity of polonium-210 in any DOT Specification approved outer Type A packaging. (Modes 1, 2, 4, 5.)
5643-X	DOT-E 5643	Union Carbide Corporation, Danbury, CT	49 CFR 172.101, 173.315(a)(1)	To authorize shipment of a nonflammable gas in vacuum insulated non-DOT specification portable tanks. (Modes 1, 3.)
6113-P	DOT-E 6113	Commonwealth Gas Company, Southborough, MA	49 CFR 172.101, 173.315(a)	To become a party to Exemption 6113. (Mode 1.)
6126-X	DOT-E 6126	Dow Chemical Company, Midland, MI	49 CFR 173.253(a)	To authorize shipment of chloracetyl chloride in DOT Specification 6D/2S or 2SL composite packaging. (Modes 1, 3.)
6218-X	DOT-E 6218	Messer Griesheim Industries, Inc., Valley Forge, PA.	49 CFR 173.315(a)	To authorize shipment of argon or nitrogen pressurized liquid, in insulated non-DOT specification cargo tanks. (Mode 1.)
6218-X	DOT-E 6218	Welding & Therapy Service, Inc., Louisville, KY	49 CFR 173.315(a)	To authorize shipment of argon or nitrogen pressurized liquid, in insulated non-DOT specification cargo tanks. (Mode 1.)
6267-X	DOT-E 6267	Bio-Lab, Incorporated, Conyers, GA	49 CFR 173.217(a)	To authorize transport of certain oxidizers in non-DOT specification double-faced fiberboard boxes. (Modes 1, 2, 3.)
6296-X	DOT-E 6296	Platte Chemical Company, Fremont, NE	49 CFR 173.377(g)	To authorize additional bag packagings, for transportation of certain Class B poisons in DOT Specification 44D multi-wall paper bags. (Modes 1, 2.)
6296X	DOT-E 6296	American Cyanamid Company, Wayne, NJ	49 CFR 173.377(g)	To authorize additional bag packagings, for transportation of certain Class B poisons in DOT Specification 44D multi-wall paper bags. (Modes 1, 2.)
6432-X	DOT-E 6432	Messer Griesheim Industries, Inc., Valley Forge, PA.	49 CFR 173.315(a)	To authorize shipment of liquefied argon, nitrogen and oxygen, in non-DOT Specification vacuum insulated cargo tanks. (Mode 1.)
6464-P	DOT-E 6464	Commonwealth Gas Company, Southborough, MA	49 CFR 172.101, 173.315(a)	To become a party to Exemption 6464. (Mode 1.)
6686-X	DOT-E 6686	Chilton Metal Products Division, Chilton, WI	49 CFR 173.304, 178.65	To authorize use of a modified DOT Specification 39 steel cylinder, for transportation of a certain flammable gas. (Modes 1, 2.)
6762-P	DOT-E 6762	The Keeler Company, Inc., Shillington, PA	49 CFR 173.286(b)(2), 175.3	To become a party to Exemption 6762. (Modes 1, 2, 3, 4.)
6762-P	DOT-E 6762	Suhm Laboratories, Inc., Greendale, WI	49 CFR 173.286(b)(2), 175.3	To become a party to Exemption 6762. (Modes 1, 2, 3, 4.)
6762-X	DOT-E 6762	Green Chemical Company, Inc., Winchester, VA	49 CFR 173.286(b)(2), 175.3	To authorize transport of chemical kits in plastic inside bottles, packed in plastic boxes overpacked in fiberboard boxes. (Modes 1, 2, 3, 4.)
6762-P	DOT-E 6762	United Laboratories, Inc., Addison, IL	49 CFR 173.286(b)(2), 175.3	To become a party to Exemption 6762. (Modes 1, 2, 3, 4.)
6762-P	DOT-E 6762	Oxford Chemicals, Inc., Atlanta, GA	49 CFR 173.286(b)(2), 175.3	To become a party to Exemption 6762. (Modes 1, 2, 3, 4.)
6762-X	DOT-E 6762	Aquaphase Laboratories, Inc., Adrian, MI	49 CFR 173.286(b)(2), 175.3	To authorize transport of chemical kits in plastic inside bottles, packed in plastic boxes overpacked in fiberboard boxes. (Modes 1, 2, 3, 4.)
6773-X	DOT-E 6773	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.314(c)	To authorize shipment of a flammable compressed gas, in a DOT Specification 105A600W tank can. (Mode 2.)
6774-X	DOT-E 6774	HR Textron Inc., Pacoima, CA	49 CFR 173.302.(a)(2), 175.3	To authorize use of non-DOT specification cylinders complying with DOT Specification 3HT, with certain exceptions, for shipment of a nonflammable gas. (Modes 1, 4.)
6874-P	DOT-E 6874	Mitsui & Company (USA), Inc., New York, NY	49 CFR 172.101, 173.370(a)(13)	To become a party to Exemption 6874. (Modes 1, 2, 3.)
7052-P	DOT-E 7052	Leigh Instruments Limited, Corleton Place, Ontario	49 CFR 172.101, 175.3	To become a party to Exemption 7052. (Modes 1, 2, 3, 4.)
7052-P	DOT-E 7052	AMS Hellesens, Soborg, Denmark	49 CFR 172.101, 175.3	To become a party to Exemption 7052. (Modes 1, 2, 3, 4.)
7249-X	DOT-E 7249	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 173.128(a)	To authorize use of containers not otherwise permitted by the Hazardous Materials Regulations, for transportation of certain flammable liquids. (Mode 1.)
7413-X	DOT-E 7413	Chilton Metal Products Division, Chilton, WI	49 CFR 173.302(a), 173.304(a)(1), 175.3, 178.42	To authorize transport of carbon dioxide or nitrogen, in a non-DOT specification brazed steel cylinder. (Modes 1, 2, 4.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
7455-X	DOT-E 7455	E. I. du Pont de Nemours & Company, Inc., Wilmington, DE.	49 CFR 176.177(g), 176.177(h), 176.177(n), 176.177(q), 176.177(r), 176.410(e).	To authorize handling and stowage of explosive material in an anchored and unmanned barge. (Mode 3.)
7495-X	DOT-E 7495	General American Transportation Corporation, Chicago, IL.	49 CFR 173.315(a)(1)	To authorize manufacture, marking and sale of non-DOT specification portable tanks, for transportation of chlorine or sulfur dioxide. (Modes 1, 2, 3.)
7505-X	DOT-E 7505	Platte Chemical Company, Greeley, CO.	49 CFR 173.28(m), 173.346(a)(2), 173.358(a)(2), 173.359(a)(2), 173.359(b)(2).	To authorize use of DOT Specification 17C drums, previously used for shipment of class B poisons and reconditioned (decontaminated) (Mode 1.)
7513-X	DOT-E 7513	MG Burdett Gas Products Company, Incorporated, Reading, PA.	49 CFR 173.315(a)(1)	To authorize shipment of pressurized liquid oxygen, in DOT Specification MC-331 cargo tanks. (Mode 3.)
7543-X	DOT-E 7543	Monsanto Company, St. Louis, MO	49 CFR 173.154.	To authorize shipment of a flammable solid in a DOT Specification 56 portable tank. (Mode 1.)
7625-X	DOT-E 7625	Hydrite Chemical Company, Milwaukee, WI.	49 CFR 173.245, 173.249, 173.263, 173.266, 173.272.	To authorize transport of certain corrosive liquids, in DOT Specification 56 portable tanks. (Mode 1.)
7700-X	DOT-E 7700	U.S. Department of Argiculture, Washington, DC	49 CFR 175.310(d)	To authorize transport of gasoline in the baggage and or passenger compartment of helicopters. (Mode 5.)
7735-X	DOT-E 7735	Rheem Manufacturing Company, Linden, NJ	49 CFR 173.119, 173.264(a), 173.272(g), 173.346, 173.358, 173.359.	To authorize manufacture, marking and sale of DOT Specification 34 containers, for shipment of certain flammable liquids, corrosive materials and class B poisonous liquids. (Modes 1, 2, 3.)
7768-X	DOT-E 7768	Plaze-Drum Corporation, Lockport, IL.	49 CFR 173.154, 173.217, 173.245b, 173.365, 178.19.	To authorize manufacture, marking and sale of non-DOT specification blow-molded, high molecular weight polyethylene drums, with removable head, for shipment of oxidizers, corrosive, flammable and poison B solids. (Modes 1, 2, 3.)
7769-X	DOT-E 7769	Brunswick Corporation, Lincoln, NE	49 CFR 173.302(a)(1), 175.3	To authorize manufacture, marking and sale of non-DOT Specification fiber reinforced plastic full composite cylinder, for transportation of certain nonflammable compressed gas. (Modes 1, 2, 3, 4, 5.)
7849-P	DOT-E 7849	Welding Products of Georgia (HOLOX), Atlanta, GA.	49 CFR 173.315(a)	To become a party to Exemption 7849. (Mode 1.)
7876-P	DOT-E 7876	Micro Image Inc., Orange, CT	49 CFR 173.299(a), 175.3	To become a party to Exemption 7876 (Modes 1, 2, 3, 4.)
7879-X	DOT-E 7879	Gearhart Industries, Inc., Fort Worth, TX	49 CFR 173.245, 175.3, 178.42	To authorize shipment of bromine trifluoride, in non-DOT specifiations seamless cylinders. (Modes 1, 2, 3, 4.)
7957-X	DOT-E 7957	Process Engineering, Incorporated, Plaistow, NH	49 CFR 173.315(a)(1), 173.33(a), 177.824(c)(4), 178.337	To authorize manufacture, marking and sale of non-DOT specification aluminum cargo tanks, for transportation of carbon dioxide, liquefied. (Mode 1.)
7963-X	DOT-E 7963	Stauffer Chemical Company, Westport, CT	49 CFR 173.245, 173.360(a)(5)	To authorize transport of perchloromethyl mercaptan and thiophene-2-acetyl chloride, in monel tanks constructed in accordance with DOT Specification 51, with certain exceptions. (Modes 1, 2, 3.)
7971-P	DOT-E 7971	Walter Kidde, Division of Kidde, Inc., Wilson, NC	49 CFR 173.302, 173.304, 175.3, 178.53	To become a party to Exemption 7971 (Modes 1, 2, 3, 4, 5.)
8083-P	DOT-E 8083	Matson Navigation Company, Honolulu, Hawaii	49 CFR 172.101, Column 7(c) only	To become a party to Exemption 8083 (Mode 3.)
8086-X	DOT-E 8086	Boeing Aerospace Company, Seattle, WA.	49 CFR 172.101, 172.102, 173.118(b), 173.119, 173.206, 173.87.	To authorize transport of a cruise missle containing hazardous materials. (Mode 1.)
8108-X	DOT-E 8108	Allied Chemical, Morristown, NJ	49 CFR 173.24(c)(6), 173.245(a)(27)	To authorize use of a DOT Specification 33A polystyrene case containing four 5-pint glass bottles, for shipment of corrosive liquids. (Modes 1, 2, 3.)
8129-P	DOT-E 8129	CECOS International, Inc., Buffalo, NY	49 CFR 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O	To become a party to Exemption 8129 (Mode 1.)
8129-X	DOT-E 8129	Iowa State University, Ames, IA	49 CFR 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O	To authorize shipment of various waste hazardous materials packed in bottles surrounded by absorbent material overpacked in DOT Specification 37A, 17H, or 6J drums. (Mode 1.)
8129-X	DOT-E 8129	University of Maryland, College Park, MD	49 CFR 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O	To authorize shipment of various waste hazardous materials packed in bottles surrounded by absorbent material overpacked in DOT Specification 37A, 17H, or 6J drums. (Mode 1.)
8129-P	DOT-E 8129	Midwest Research Institute, Kansas City, MO	49 CFR 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To become a party to Exemption 8129. (Mode 1.)
8129-P	DOT-E 8129	ARCO Chemical Company, Newtown, Square, PA	49 CFR 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O	To become a party to Exemption 8129 (Mode 1.)
8129-P	DOT-E 8129	American Scientific Products, McGaw Park, IL	49 CFR 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To become a party to Exemption 8129. (Mode 1.)
8129-X	DOT-E 8129	Triangle Resource Industries, Laurel, MD	49 CFR 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O	To authorize shipment of various waste hazardous materials packed in bottles surrounded by absorbent material overpacked in DOT Specification 37A, 17H, or 6J drums. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8129-X	DOT-E 8129	Kenn-McGee Chemical Corporation, Oklahoma City, OK.	49 CFR 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To authorize shipment of various waste hazardous materials packed in bottles surrounded by absorbent material overpacked in DOT Specification 37A, 17H, or 6J drums. (Mode 1).
8129-P	DOT-E 8129	Lion Technology Inc., Lafayette, NJ	49 CFR 177.834(k), Part 173, Subparts D, E, F, H, Subparts K, L, M, O.	To become a party to Exemption 8129. (Mode 1.)
8156-P	DOT-E 8156	Union Carbide Corporation, Danbury, CT	49 CFR 173.121, 173.302(a)(4), 173.302(f), 173.304(a)(1).	To become a party to Exemption 8156. (Modes 1, 2.)
8156-P	DOT-E 8156	Scientific Gas Products, Inc., South Plainfield, NJ	49 CFR 173.121, 173.302(a)(4), 173.302(f), 173.304(a)(1).	To become a party to Exemption 8156. (Modes 1, 2.)
8184-X	DOT-E 8184	Trojan Corporation, Salt Lake City, UT	49 CFR 173.65	To authorize transport of flake trinitrotoluene in a non-DOT specification multi-wall paper polyethylene jute composite bag with net weight not exceeding 100 pounds. (Modes 1, 2, 3.)
8220-X	DOT-E 8220	Applied Enviornments Corporation, Woodland Hills, CA.	49 CFR 173.320(a), 175.3	To authorize use of non-DOT specification girth welded steel cylinder, for transportation of nonflammable compressed gases. (Modes 1, 2, 4.)
8221-X	DOT-E 8221	Applied Environments Corporation, Woodland Hills, CA.	49 CFR 173.302(a), 175.3	To authorize use of non-DOT specification high pressure cylinders of welded construction for military missile systems use only. (Modes 1, 2, 4.)
8237-X	DOT-E 8237	Sanders Associates, Inc., Nashua, NH	49 CFR 172.101, 173.302(a)(2), 175.3	To authorize transport of a device containing lithium batteries and a cylinder containing compressed nitrogen in a wooden box. (Modes 1, 4.)
8426-X	DOT-E 8426	Martin Tank Manufacturing, Inc., Wilmington, CA	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying with DOT Specification MC-307/312 with certain exception, for transportation of liquid and semi-solid waste materials. (Mode 1.)
8445-X	DOT-E 8445	Rohm and Haas Company, Philidelphia, PA	49 CFR Part 173, Subpart D, E, F, & H	To authorize shipment of various hazardous substances and wastes packed in inside plastic, glass, earthenware or metal containers, overpacked in a DOT Specification removable head steel, fiber or polyethylene drum, only for the purposes of disposal, repackaging or reprocessing. (Mode 1.)
8451-P	DOT-E 8451	Ethyl Corporation, Ferndale, MI	49 CFR 173.65, 173.66(e), 175.3	To become a party to Exemption 8451 (Modes 1, 2, 4.)
8518-X	DOT-E 8518	Pacific Tank and Manufacturing, Long Beach, CA	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize manufacture, marking, and sale of non-DOT Specification cargo tanks complying generally with DOT specification MC-307/312 except for bottom outlet valve variations, for transportation of flammable or corrosive waste liquids or semi-solids. (Mode 1.)
8519-X	DOT-E 8519	Atlantic Container Line, Elizabeth, NJ	49 CFR 176.905(L)	To authorize stowage of motor vehicles containing gasoline, in their fuel tanks, classed as a flammable liquid in the same cargo compartment with other hazardous materials on specially equipped roll-on/roll-off cargo vessels. (Mode 3.)
8520-X	DOT-E 8520	Atlas Powder Company, Dallas, TX	49 CFR 173.114a (b)(6)	To authorize use of a "pipe test" on a material being evaluated as a blasting agent, instead of fire test prescribed in 173.114a(b)(6). (Modes 1, 2, 3, 4.)
8523-X	DOT-E 8523	Dehon Services, Paris, France	49 CFR 173.304, 173.315	To authorize use of non-DOT Specification IMCO Type 5 portable tanks, for transportation of flammable and non-flammable compressed gases. (Modes 1, 2, 3.)
8523-X	DOT-E 8523	Fauvet-Girel, Paris, France	49 CFR 173.304, 173.315	To authorize use of non-DOT Specification IMCO Type 5 portable tanks, for transportation of flammable and nonflammable compressed gases. (Modes 1, 2, 3.)
8526-X	DOT-E 8526	National Starch and Chemical Corporation, Bridgewater, NJ.	49 CFR 177.834(L)(2)(i)	To authorize shipment of flammable liquids and/or flammable gases in temperature controlled equipment. (Mode 1.)
8526-X	DOT-E 8526	PPG Industries, Inc., Pittsburgh, PA	49 CFR 177.834(L)(2)(i)	To authorize shipment of flammable liquids and/or flammable gases in temperature controlled equipment. (Mode 1.)
8550-X	DOT-E 8550	Environmental Sciences Associates, Inc., Bedford, MA.	49 CFR 173.119(m)(6), 175.3	To authorize shipment of a hydrochloric acid/propanol mixture, classed as a flammable liquid, in non-DOT specification one-pint polyethylene bottles, not to exceed 6 bottles to one outside DOT Specification 12B fiberboard box. (Modes 1, 2, 3, 4, 5.)
8551-X	DOT-E 8551	Huber Manufacturing, Incorporated, Gulfport, MS	49 CFR 173.119(a), (m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying generally with DOT Specification MC-307/312 except for bottom outlet valve variations and certain other features for transportation of flammable, corrosive, or poisonous waste liquids or semi-solids. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8554-P	DOT-E 8554	Cordeiro Trucking, Dania, FL	49 CFR 173.114a, 173.93	To become a party to Exemption 8554. (Mode 1.)
8554-P	DOT-E 8554	Floride Explosives, Inc., Hialeah Gardens, FL	49 CFR 173.114a, 173.93	To become a party to Exemption 8554. (Mode 1.)
8558-X	DOT-E 8558	Trojan Corporation, Spanish Fork, UT	49 CFR 173.53	To authorize the transport of a pharmaceutical described as an initiating explosive in a non-DOT specification polyethylene pail, overpacked in a 15 gallon DOT Specification 37A steel drum. (Mode 1.)
8565-X	DOT-E 8565	PPG Industries, Inc., Pittsburgh, PA	49 CFR 173.217(a)(3), 178.224	To authorize shipment of calcium hypochlorite mixture, dry, classed as oxidizer, in a DOT Specification 21C drum having an inner ply consisting of a lamination of polyester film mounted on aluminum foil. (Modes 1, 2, 3.)
8565-X	DOT-E 8565	Pennwalt Corporation, Philadelphia, PA	49 CFR 173.217(a)(3), 178.224	To authorize shipment of calcium hypochlorite mixture, dry, classed as oxidizer, in a DOT Specification 21C drum having an inner ply consisting of a lamination of polyester film mounted on aluminum foil. (Modes 1, 2, 3.)
8569-X	DOT-E 8569	General Dynamics Corporation, Fort Worth, TX	49 CFR 172.101(6)(b), 173.276, 175.3	To authorize shipment of 6.6 gallons of hydrazine, aqueous solution in non-DOT specification F-16 emergency fuel tanks. (Modes 1, 3, 4.)
8569-X	DOT-E 8569	U.S. Department of Defense, Washington, DC	49 CFR 172.101(6)(b), 173.276, 175.3	To authorize shipment of 6.6 gallons of hydrazine, aqueous solution in non-DOT specification F-16 emergency fuel tanks. (Modes 1, 3, 4.)
8571-X	DOT-E 8571	EM Science, Cincinnati, OH	49 CFR 173.119(a)(28), (b)	To authorize shipment of various flammable liquids packaged in a DOT Specification 12A corrugated fiberboard box, with two inside metal containers not over 10 liters capacity each. (Mode 1.)
8592-X	DOT-E 8592	Beech Aircraft Corporation, Boulder, CO	49 CFR 173.315	To authorize use of a non-DOT specification demountable cargo tank, for transportation of flammable gases. (Mode 1.)
8620-X	DOT-E 8620	Polar Tank Trailer, Inc., Holdingford, MN	49 CFR 173.119(a), 173.119(m), 173.245(a), 173.346(a), 178.340-7, 178.342-5, 178.343-5.	To authorize manufacture, marking and sale of non-DOT specification cargo tanks complying generally with DOT Specification MC-307/312 except for bottom outlet valve variations for transportation of flammable or corrosive waste liquids or semi-solids. (Mode 1.)
8627-P	DOT-E 8627	Champion Chemicals, Inc., Houston, TX	49 CFR 173.119, 173.245, 178.253	To become a party to Exemption 8627. (Mode 1.)
8720-X	DOT-E 8720	Applied Environments Corporation, Woodland Hills, CA.	49 CFR 173.302(a), 175.3	To authorize manufacture, marking and sale of non-DOT specification welded high pressure non-refillable cylinders, for shipment of nonflammable and nonliquefied gases. (Modes 1, 2, 4.)
8732-P	DOT-E 8732	ICI Americas Inc., Wilmington, DE	49 CFR 173.245	To become a party to Exemption 8732 (Mode 1.)
8839-X	DOT-E 8839	Poly Processing Company, Inc., Monroe, LA	49 CFR 173.266, 178.19, Part 173, Subpart F	To authorize manufacture, marking and sale of non-DOT specification nationally molded, cross-linked polyethylene portable tanks, for shipment of corrosive liquids and an oxidizer (Modes 1, 2, 3.)
8878-P	DOT-E 8878	Preussag AG Metall, Bosler, West Germany	49 CFR 173.245	To become a party to Exemption 8878. (Mode 1.)
8925-X	DOT-E 8925	Military Sealift Command, Washington, DC	49 CFR 46 CFR 146.29-35(f), 49 CFR, Part 107 Appendix B, Subparagraph 1, Subparagraph 2	To authorize installation and operation of electrical dehumidification equipment in the hold of a vessel (Gulf Shipper) containing Class A, B, and C explosives. (Mode 3.)

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8877-N	DOT-E 8877	PCR, Incorporated, Gainesville, FL	49 CFR 173.119(m)(3), 173.245, 175.3	To authorize shipment of certain materials described as flammable liquids, corrosive, n.o.s. (corrosive to skin only) and corrosive liquids, n.o.s., in DOT-12B65 fiberboard boxes with inside glass bottles having a capacity not to exceed one-gallon or an all-18-gauge DOT-17E steel drum (Modes 1, 2, 3, 4, 5.)
8901-N	DOT-E 8901	Soweco, Inc., Amarillo, TX	49 CFR 173.357	To authorize shipment of chloropicrin, in polyethylene bottles overpacked in non-DOT specification triple-wall, corrugated fiberboard boxes. (Mode 1.)
8954-N	DOT-E 8954	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 173.315, 178.76(b)	To authorize use of non-DOT specification vacuum insulated cargo tanks, for transportation of certain nonflammable gases. (Mode 3.)
8958-N	DOT-E 8958	Goex, Inc., Moosic, PA	49 CFR 172.101, 173.60	To authorize transportation of limited quantities of black powder, classed as a flammable solid, in DOT Specification 12H fiberboard boxes. (Modes 1, 2, 3.)
8967-N	DOT-E 8967	Hercules Incorporated, Wilmington, DE	49 CFR 173.93(a)(11)	To authorize shipment of a solid propellant explosive, in a non-DOT specification fiberboard tube, overpacked in a non-DOT specification palletized metal cage. (Mode 1.)

NEW EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8972-N	DOT-E 8972	Union Carbide Corporation, Danbury, CT	49 CFR 173.247(a)(18)	To authorize shipment of anhydrous thionyl chloride and mixtures thereof with non-hazardous inorganic salt, in DOT Specification 3E stainless steel cylinders. (Mode 1.)
8979-N	DOT-E 8979	Freeman Industries, Inc., Tuckahoe, NY	49 CFR 173.270(a)(2)	To authorize shipment of phosphorous tribromide, in non-DOT specification lead-lined steel drums, overpacked with polyethylene bags which are overpacked in removable-head steel drums. (Mode 1.)
8944-N	DOT-E 8944	Union Carbide Corporation, Danbury, CT	49 CFR 173.302(c)(2), 173.302(c)(3), 173.302(c)(4), 173.34(e)(1), 173.34(e)(3), 173.34(e)(4), 173.34(e)(6), Part 107 Appendix B.	To authorize the retest of DOT Specification 3AAX or 3T cylinders by acoustical emission equipment and procedures. (Mode 1.)

NOTE—The provisions of DOT-E 8944 are not conducive to party status under Section 107.111.

EMERGENCY EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
EE 6064-P	DOT-E 6064	Sodyeco, Inc., Charlotte, NC	49 CFR 173.65(e), 187.24-4(a)	To become a party to Exemption 6064. (Mode 1.)
EE 6468-P	DOT-E 6468	Sodyeco, Inc., Charlotte, NC	49 CFR 173.365	To become a party to Exemption 6068. (Mode 1.)
EE 8303-P	DOT-E 8303	Sodyeco, Inc., Charlotte, NC	49 CFR 172.101, 173.154	To become a party to Exemption 8303. (Mode 1.)
EE 9019-N	DOT-E 9019	Completion Services, Inc. Lafayette, LA	49 CFR 173.118a, 173.119, 173.125, 173.263, 173.264, 173.277, 173.510, 46 CFR 64.9.	To authorixe use of a marine portable tank, for transportation of flammable, corrosive and combustible liquids. (Mode 1.)
EE 9020-N	DOT-E 9020	Vought Corporation, Dallas, TX	49 CFR 173.57, 173.66, 175.3, 175.30	To authorize shipment of rocket ammunition with explosive projectile and separately packaged component parts (Class A explosives). (Mode 4.)
EE 9021-N	DOT-E 9021	American Cylinder Corporation, Glen Burnie, MD.	49 CFR 173.28, 178.65	To authorize one time refilling and recharging of DOT Specification 39 cylinders, for transportation of a compressed gas. (Mode 1.)
EE 9022-N	DOT-E 9022	NL Baroid/NL Industries, Incorporated, Houston, TX.	49 CFR 172.101 column 6(b), 175.30, 175.320(a).	To authorize transport of shaped charges in DOT Specification wooden or fiberboard boxes. (Mode 1.)
EE 9031-N	DOT-E 9031	Raufoss Amunisjonsfabrikker (RA), Oslo, Norway.	49 CFR 173.56, 173.66, 175.30	To authorize shipment of rocket ammunition with explosive projectile and separately packaged explosive projectiles. (Mode 4.)

WITHDRAWALS

Application No.	Applicant	Regulations(s) affected	Nature of exemption thereof
8525-X	Associated Container Transportation (USA), New York, NY.	49 CFR 173.389(o)(1), 173.392(c), 176.700(h)(1), 176.700(h)(2).	To authorize shipment of mineral monazite sand, classed as radioactive material, low specific activity, n.o.s. under modified exclusive use provisions. (Modes 1, 2, 3.)

Denials

8627-P Request by Nalco Chemical Company, Oak Brook, IL to authorize shipment of various flammable liquids on corrosive materials (oil well treating compounds) contained in 6 separate 60 gallon steel tanks firmly mounted on the chassis of a truck denied March 16, 1983.

8807-N Request by Natico, Incorporated, Chicago, IL to reconsider denial of their request to manufacture, mark and sell non-DOT specification tight head 55-gallon steel drums similar to DOT Specification 17E except top and bottom heads are 20 gauge steel secured by 7 ply chime, for shipment of commodities authorized in 17E drums denied March 28, 1983.

8868-N Request by Brea Agricultural Service, Stockton, CA to authorize transport of a corrosive liquid containing sulfuric acid in DOT Specification MC-306, MC-310, MC-311 and MC-312 cargo tanks without phenolic linings denied March 22, 1983.

8956-N Request by Clif Mock Company, Conroe, TX to manufacture, mark and sell certain steel cylinders for transporting samples of liquefied petroleum gas, oil well natural gas, and other petroleum hydrocarbon gases or liquids denied March 8, 1983.

8966-N Request by All Pure Chemical Company, Inc., Tracy, CA to authorize shipment of 12.5% sodium hypochlorite, 31.44% hydrochloric acid and 38.5% sulfuric acid, in polyethylene (PE) bottles, in a corrugated fiberboard box complying with DOT Specification 12B except for handholes in the side pannels of the box denied March 3, 1983.

8974-N Request for Fabricated Metals, Inc., San Leandro, CA to manufacture DOT Specification 56 portable tanks from an aluminum alloy which does not have the mechanical properties specified in 49 CFR 178.251-2(d)(1) denied March 28, 1983.

8989-N Request by C-I-L Inc., North York, Ont., Canada to authorize shipment of an initiating explosive (pentaerythrite tetranitrate) Class A explosive, in fiberboard boxes wet with not less than 25 percent by weight of water with boxes marked "P.E.T.N." denied March 14, 1983.

9008-N Request for Reynolds Manufacturing Company, McAllen, TX to manufacture, mark and sell certain vacuum tanks made to MC-307 without internal valves on each tank outlet denied March 25, 1983.

Note.—Inadvertently omitted from the 47 FR 244 publication of Exemptions issued during December 1982 is the following:

8762-N Appeal by O. I. Corporation, College Station, TX to authorize shipment of chromic acid solution, containing less than 35% chromic acid by weight, classed as corrosive liquid, n.o.s. contained in glass ampules packed in styrofoam containers overpacked in a fiberboard box denied December 6, 1982.

Issued in Washington, DC, on April 12, 1983

J. R. Grothe,

Chief, Exemptions Branch, Office of Hazardous Materials Regulation, Materials Transportation Bureau.

BILLING CODE 4910-60-M

Urban Mass Transportation Administration

Availability of UMTA Circular 5010.1, "Project Management Guidelines for Grantees"

AGENCY: Urban Mass Transportation Administration, DOT.

ACTION: Notice.

SUMMARY: By this notice, the Urban Mass Transportation Administration (UMTA) announces that UMTA Circular 5010.1, "UMTA Project Management Guidelines for Grantees," is available to the public. This circular provides project management guidelines for recipients of grants for mass transportation activities

pursuant to Sections 3, 5, 6, 8, 9, and 10 of the Urban Mass Transportation Act, as amended (49 U.S.C. 1601 et seq.) and sections 103(e)(4) and 142 of Title 23 of the United States Code.

EFFECTIVE DATE: April 21, 1983.

FOR FURTHER INFORMATION CONTACT: Timothy B. Wolgast, Urban Mass Transportation Administration, Office of Administration, 400 7th Street, SW., Washington, D.C. 20590; telephone (202) 426–4022. A copy of UMTA Circular 5010.1 may be obtained from UMTA Regional Offices or by contacting Joseph F. Vocke, Office of Administration, Room 7427, at the above address; telephone (202) 426–4865.

SUPPLEMENTARY INFORMATION:

Significant Features of New Guidelines

UMTA Circular 5010.1 provides grantees with procedures and guidelines to be applied in administering UMTA grants, cooperative agreements, and loans. The guidance incorporates various statutory and regulatory requirements; Office of Management and Budget, and Department of Treasury control agency circulars; and specific UMTA program information which is instrumental in maintaining proper grantee project management responsibilities and practices.

UMTA Circular 5010.1 provides guidance and instructions on three areas: Project Management and Administration; Financial Management; and Payment Procedures. The Project Management and Administration chapter includes information on project reporting, budget revisions and amendments, disposition of project property, record retention, closeout procedures, and other special requirements important to grantees. The circular's Financial Management chapter details responsibilities and procedures on internal controls, cost allocation plans and cost standards, program income, financial reporting, and audit requirements. The Payment Procedures section discusses the various methods and forms used in making cash payments to grantees.

This circular was approved for publication while the 1982 amendments to the Urban Mass Transportation Act of 1964 were being passed by Congress and sent to the President for approval. Therefore, the circular does not include new project management guidelines for provisions contained in Title III of the Surface Transportation Assistance Act of 1982 (Pub. L. 97–424), enacted January 6, 1983. Guidelines for the implementation and management of Title III will be published by UMTA in a separate circular and will be made available in the next few weeks.

Background

On September 11, 1980, UMTA published the information in this circular as a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** (45 FR 60306). This material was intended to be issued as a regulation, but UMTA determined that the necessary program guidance could be more effectively issued in a non-regulatory matter. The NPRM was formally withdrawn on January 25, 1982 (47 FR 3391).

Twenty-six interested parties commented on the NPRM. The comments assisted UMTA in drafting the circular. Some significant comments and UMTA's response follow: (1) Inconsistencies between language in the NPRM and that in OMB Circular A–102, "Uniform Requirements for Assistance to State and Local Governments" (1/81), upon which the NPRM was based, were noted. UNTA has revised the language in all such cases to assure consistency with A–102; (2) Inconsistencies between the NPRM and OMB Circular A–87, "Cost Principles for State and Local Governments" (1/15/81), with respect to travel costs and the submission of a cost allocation plan, were noted. UMTA has eliminated the inconsistency involving travel cost and the requirement to submit a complete cost allocation plan with each application; (3) There were comments requesting the easing of budget revision requirements, such as permitting the transfer of funds between direct and indirect costs. UMTA has revised the circular to allow the transfer of funds budgeted for direct cost items to absorb authorized increases in indirect costs for nonconstruction grants; (4) A commenter requested that UMTA clarify proposed Appendix III, Section 1(b), Payroll and Distribution of Time, as it would have applied to Section 8 technical study grants. The optional format contained in this appendix has been eliminated. Grantees who prefer to use another method, such as the one used in the UMTA regulation on Urban Transportation Planning (49 CFR Part 613, Subpart A&B) may do so; and (5) Concern was expressed about the proposed cash-drawdown procedures in Chapter III, that provided a 3-day limitation in the Letter of Credit procedures. A commenter felt it would make more sense if drawdowns could be requested on a quarterly basis to satisfy cash requirements for vendor payments. The 3-day limitation procedures have been eliminated to parallel the language in Treasury Circular 1075. However, drawdowns should not be made on a quarterly basis, and must be made as close to the disbursing date as possible in accordance with Department of Treasury policy.

Issued on: April 14, 1983.

Arthur E. Teele, Jr.,

Administrator.

BILLING CODE 4910–57–M

DEPARTMENT OF THE TREASURY

Customs Service

[T.D. 83–39]

Decision Denying Domestic Interested Party Petition Requesting Reclassification of Certain Plywood Panels; Petitioner's Desire to Contest the Decision

AGENCY: Customs Service, Treasury.

ACTION: Notice of: (1) Decision on domestic interested party petition, and (2) receipt of notice of petitioner's desire to contest the decision.

SUMMARY: In response to a petition from a domestic interested party requesting that certain plywood panels that have been processed, be reclassified for tariff purposes under the provision for softwood plywood, in item 240.21, Tariff Schedules of the United States (TSUS), Customs invited comments with regard to the correctness of the present classification. After consideration of the comments received and further review of the matter, Customs has advised the petitioner that such plywood panels would continue to be classified as building boards, in item 245.80, TSUS. Upon being informed that its petition had been denied, the petitioner filed a notice of its desire to contest the decision.

FOR FURTHER INFORMATION CONTACT: John G. Hurley, Classification and Value Division, Office of Regulations and Rulings, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–8181).

SUPPLEMENTARY INFORMATION:

Background

On March 4, 1982, a petition was filed under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), by the American Plywood Association, a trade association which represents American manufacturers of softwood plywood, requesting that certain imported plywood panels that have been processed (i.e., tongue and grooved, edge-worked, or shiplapped), be

reclassified as plywood with a face ply of softwood, in item 240.21, Tariff Schedules of the United States (TSU) (19 U.S.C. 1202), presently dutiable at 21 percent ad valorem. Such plywood panels have been classified by Customs under the provision for building boards not specially provided for, whether or not face finished, laminated boards bonded in whole or in part, or impregnated, with synthetic resins, in item 245.80, TSUS, at a lower rate of duty, following Customs ruling 069190 JLJ, dated February 12, 1982.

Specifically, the petitioner alleges that the provision for softwood plywood in TSUS item 240.21, is more specific than the provision for building boards in TSUS item 245.80, and therefore it should govern the classification of the imported panels. It is Customs position that edge-working changes plywood panels, dedicates them to a special use (i.e., as building boards), and thus prevents them from satisfying the definition of plywood in Schedule 2, Part 3, headnote 1(b), TSUS.

A notice of receipt of the petition was published in the **Federal Register** on August 13, 1982 (47 FR 35391), inviting public comment. Written comments were to have been received on or before October 12, 1982. Two comments were received in response to the notice. Both opposed any change in the classification of the panels, supporting Customs position that they are correctly classified as building boards in item 245.80, TSUS.

Decision on Petition and Receipt of Petitioner's Notice of Desire To Contest

In a letter dated December 13, 1982, the petitioner was advised that Customs had decided to continue its practice of classifying such plywood panels in item 245.80, TSUS. In response, by letter dated January 5, 1983, the petitioner filed a notice of its desire to contest the decision in accordance with section 516(c), Tariff Act of 1930, as amended, (19 U.S.C. 1516(c)), and § 175.23, Customs Regulations (19 CFR 175.23).

After careful analysis of the comments received in response to the notice and further review of the matter, Customs remains of the opinion that its practice of classifying the subject panels under item 245.80, TSUS, is correct. This practice will continue provided that no decision of the United States Court of International Trade or the United States Court of Appeals for the Federal Circuit not in harmony with this practice is rendered.

Authority: This notice is being published in accordance with section 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.24, Customs Regulations (19 CFR 175.24).

Drafting Information

The principal author of this document was Jesse V. Vitello, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Dated: March 18, 1983.

Alfred R. De Angelus,

Acting Commissioner of Customs.

BILLING CODE 4820-02-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Motorcycle Import Relief Determination

On April 1, 1983, the President transmitted the following memorandum to the United States Trade Representative setting forth his decision to provide import relief for the heavyweight motorcycle industry.

Frederick L. Montgomery,

Chairman, Trade Policy Staff Committee.

April 1, 1983.

The White House, Washington

Memorandum for the United States Trade Representative

Subject: Motorcycle Import Relief Determination

Pursuant to Section 202(b)(1) of the Trade Act of 1974 (Pub. L. 93-618, 88 Stat. 1978), I have determined the action I will take with respect to the report of the United States International Trade Commission (USITC), transmitted to me on February 1, 1983, concerning the results of its investigation of a petition for import relief filed by the Harley-Davidson Motor Co., Inc., and Harley-Davidson York, Inc., producers of heavyweight motorcycles, provided for in Item 692.50 of the Tariff Schedules of the United States (TSUS).

After considering all relevant aspects of the case, including those set forth in Section 202(c) of the Trade Act of 1974, I have determined that granting import relief is consistent with our national economic interest. Therefore, I will proclaim the USITC five-year import relief remedy with one modification. I will impose tariff increases of 45 percent *ad valorem* in the first year, declining to 35, 20, 15 and 10 percent above scheduled rates in subsequent years. Imposition of these tariff increases should allow the heavyweight motorcycle industry to adjust to the threat of injury caused by increased imports, which have raised inventories to twice their normal level.

To assure small volume producers who have not contributed to that threat of injury continued access to U.S. markets for heavyweight motorcycles, I will modify the USITC remedy by proclaiming tariff-rate quotas of 5,000 units (increasing yearly to 6,000, 7,000, 8,500 and 10,000) for imports of motorcycles manufactured in the Federal Republic of Germany, and 4,000 units (increasing yearly by 1,000) for imports from all other countries except Japan. The additional duties will apply to all imports above the tariff-rate quotas. In order to treat Japan fairly I will also proclaim a tariff-rate quota of 6,000 units (increasing 1,000 yearly) for motorcycles imported from Japan.

I also direct you to keep the issue under close review so that, should the U.S. motorcycle industry no longer need this level of relief, you may, in consultation with the Trade Policy Committee, obtain other necessary advice and propose changes in the terms of relief. If no earlier review is initiated by such conditions, you are to undertake such a review in two years. The objectives of this review would be to assess the effectiveness of import relief and Harley-Davidson's trade adjustment efforts.

Ronald Reagan.

FEDERAL ELECTION COMMISSION

Federal Register No. 525

PREVIOUSLY ANNOUNCED DATE AND TIME: Thursday, April 21, 1983, 10 a.m.

CHANGES IN MEETING: Pursuant to 11 CFR 3.5(d)(1), the Commission determined that Commission business so required, and that no earlier announcement of these changes was possible, and accordingly added the following matters to the agenda for the open meeting for this date:

Whether or not to withdraw nonpartisan communications by corporations or labor organizations—11 CFR 114.3 and 114.4
Letter to House Administration Task Force on Elections—Travel and subsistence reimbursement

DATE AND TIME: Tuesday, April 26, 1983, 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Compliance. Personnel. Litigation. Audits.

DATE AND TIME: Thursday, April 28, 1983, 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C. (fifth floor).

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED:

Setting of dates for future meetings
Correction and approval of minutes
Eligibility reports for candidates to receive Presidential primary matching payments
Draft AO 1983–9: Robert I. Bogin, on behalf of The Curry Exploratory Committee
Finance Committee report
Routine Administrative matters

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Information Officer, telephone: 202–523–4065.

Marjorie W. Emmons,
Secretary of the Commission.

[S–553–83 Filed 4–19–83; 3:32 pm]
BILLING CODE 6715–01–M

2

FEDERAL HOME LOAN BANK BOARD

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 48 FR 16375, Friday, April 15, 1983.

PLACE: Board room, sixth floor, 1700 G Street NW., Washington, D.C.

STATUS: Open meeting.

CONTACT PERSON FOR MORE INFORMATION: Ms. Gravlee (202–377–6970).

CHANGES IN THE MEETING: The following items have been added to the open portion of the Bank Board meeting scheduled Wednesday, April 20, 1983, at 10 a.m.:

Acquistion of non-cash assets
Interstate operations of insured institutions
[No. 33, April 19, 1983]

[S–554–83 Filed 4–19–83; 3:38 pm]
BILLING CODE 6720–01–M

3

FEDERAL MARITIME COMMISSION

TIME AND DATE: 9 a.m., April 27, 1983.

PLACE: Hearing Room One, 1100 L Street NW., Washington, D.C. 20573.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Agreement No. T–4091: Terminal lease between the Board of Trustees of the Galveston Wharves and Trans Freight Lines, Inc.
2. Agreements Nos. 9767–1 and 9925–2: PACE/ACTA Modifications Seeking Intermodal Authority.

CONTACT PERSON FOR MORE INFORMATION: Francis C. Hurney, Secretary (202) 523–5725.

[S–552–83 Filed 4–19–83; 12:27 pm]
BILLING CODE 6730–01–M

Department of Health and Human Services

Public Health Service

National Toxicology Program; Fiscal Year 1983 Annual Plan

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

[NTP–82–119]

National Toxicology Program; Fiscal Year 1983 Annual Plan

The Director of the National Toxicology Program (NTP) announces the availability of the NTP Annual Plan for Fiscal Year 1983 and the quarterly NTP Technical Bulletins, solicits comments on the Annual Plan and urges all interested persons to propose chemicals(s) for testing by NTP.

Background

The National Toxicology Program develops scientific information about potentially toxic and hazardous chemicals which can be used for protecting the health of the American people and for the primary prevention of chemically-induced disease. The NTP centralizes and strengthens the Department of Health and Human Services' (DHHS') activities in toxicology research, testing, and test development/validation efforts and provides the necessary toxicological information needed by health research and regulatory agencies. Four specific goals continue to be emphasized:

- Expand the spectrum of toxicologic information obtained on the chemicals nominated, selected, and being tested;
- Increase the numbers of chemicals tested in various short-term assays, within funding limits;
- Develop, coordinate, and validate a series of tests/protocols more appropriate for regulatory needs;
- Communicate Program plans and results to governmental agencies, the medical and scientific communities, and the public.

To accomplish these four major aims the NTP was formed by bringing together the relevant toxicological programs, people, and resources from the Public Health Service.

The four DHHS agencies whose relevant toxicology programs comprise the NTP are the National Cancer Institute, National Institutes of Health (NIH); National Institute of Environmental Health Sciences, NIH; National Center for Toxicological Research, Food and Drug Administration; and National Institute for Occupational Safety and Health, Centers for Disease Control.

The NTP Executive Committee provides linkage between DHHS research and regulatory agencies to ensure that the toxicology research, testing and test development activities carried out under the aegis of the NTP are responsive to the needs of those agencies and to the needs of the public. This unique and important aspect of the NTP brings together the research agencies doing fundamental biomedical research and the regulatory agencies. The governmental agencies that comprise the NTP Executive Committee are listed in the 1983 Annual Plan.

The NTP Board of Scientific Counselors provides scientific oversight of the NTP. The NTP Board advises the NTP Director and the NTP Executive Committee on scientific content, philosophy, and policy and evaluates the merit and overall quality of the science conducted in the NTP components. The members (enumerated in the 1983 Annual Plan) are appointed by the Secretary of the Department of Health and Human Services.

The program segments of the NTP are grouped into two categories—toxicological research and testing, and coordinative management activities. Individual NTP scientists are identified as leaders of the major program segments and subprogram activities and serve as the focus or contact persons for their particular program activities. Program and project leaders are identified in the 1983 Annual Plan.

The development and approval of the NTP Annual Plan remain central to the effective planning, coordination, and operation of the National Toxicology Program. As NTP Director, Dr. David P. Rall (also the Director of the National Institute of Environmental Health Sciences) reports to the Assistant Secretary for Health.

The National Toxicology Program's fifth annual plan consists of two parts published separately: (1) "NTP Annual Plan for Fiscal Year 1983" (NTP–82–119), describes current year research, testing and validation efforts, resources and past year program accomplishments. (This first part is printed in full following this announcement.) (2) "Review of Current DHHS, DOE and EPA Research Related to Toxicology" (NTP–83–001), lists chemicals being tested by DHHS agencies, the Department of Energy, and the Environmental Protection Agency, and describes toxicology methods currently being developed by these agencies.

Written comments on the FY 1983 Annual Plan are requested and welcome. These should be addressed to Dr. Larry Hart, Assistant to the Director, National Toxicology Program, P.O. Box 12233, Research Triangle Park, NC 27709 (telephone: (919) 541–3971 or FTS 629–3971).

Regarding chemical nomination, NTP urges all those interested in proposing chemical(s) for testing to do so, and at a minimum to give the rationale for the nomination and to recommend the type test(s) to be considered. In addition, it would be desirable (but not essential) to supplement each nomination with the following information, if known.

I. Chemical identification.

II. Production, use, occurrence, and analysis.

III. Toxicology.

IV. Disposition and structure-activity-relations.

V. Ongoing toxicological and environmental studies in government, industry, and academia.

To bridge the yearly gap between Annual Plans, NTP started a quarterly NTP Technical Bulletin in FY 1980 to keep those persons or groups interested in the NTP informed about the NTP's most current and proposed activities. The NTP Technical Bulletins augment the Annual Plans by more timely and frequent announcements of the NTP research activities and specific actions.

To receive the NTP Annual Plan for Fiscal Year 1983; the FY 1983 Review of Current DHHS, DOE, and EPA Research Related to Toxicology; or NTP Technical Bulletins, please indicate which publications you wish to receive and submit this information to: NTP Public Information Office, P.O. Box 12233, Research Triangle Park, NC 27709, (telephone: (919) 541–3991 or FTS 629–3991).

Dated: April 1, 1983.

David P. Rall,

Director, National Toxicology Program.

Note.—All fiscal assumptions are based on the President's proposed FY 1983 budget.

Executive Summary National Toxicology Program Annual Plan for Fiscal Year 1983 [1]

The National Toxicology Program (NTP) will begin its fifth year of operation in FY 1983. The NTP was established in November 1978 as a Department of Health and Human Services (DHHS) cooperative effort to coordinate and manage the Department's program to develop the scientific information necessary to protect the health of the American public from exposure to hazardous chemicals. DHHS Secretary Richard S. Schweiker granted permanent status to the Program in October 1981.

At the present time, the NTP represents a major Federal resource for chemical testing, and represents a principal Federal effort in assessing current methods or developing better methodology for determining toxic potential of chemicals. This interagency program comprises one of the largest scientific data resources in genetic toxicity and animal carcinogenicity. There are also significant toxicology research, testing and test methods development activities ongoing in other Federal agencies. Current information on many of these efforts may be found in the NTP's FY 1983 *Review of Current DHHS, DOE and EPA Research Related to Toxicology.*

Within the framework of its charge to identify those chemicals potentially toxic to humans, as well as to develop and validate new and better integrated test methods, the NTP continues to emphasize four specific goals: (1) expand the spectrum of toxicologic information obtained on the chemicals being tested; (2) increase the numbers of chemicals tested in various short-term assays within funding limits; (3) develop and validate a series of test protocols more appropriate for regulatory needs; and (4) establish a coordinated communications network to collect, evaluate, and disseminate toxicology information generated by the Program.

The NTP's predominant long-term objective centers on the development, validation, and application of better, less expensive, more specific test methodologies. However, chemical testing for toxicology continues to be a central focus and still utilizes the most resources. By broadening the protocols to better characterize the chemical toxicologic profile, the NTP is successfully implementing a comprehensive approach to assessing chemical toxicity which includes carcinogenesis, genetic toxicity, chemical disposition (absorption, distribution, metabolism, and excretion), fertility and reproductive assessment, and major organ toxicity.

Accomplishments of NTP programs during FY 1982 and program plans for FY 1983 are described in the following sections of the FY 1983 Annual Plan. This year, accomplishments and plans are described separately by agency under each scientific and management section. The name of a key staff person is given for each project and program activity. A complete listing of program leaders and contact persons, along with addresses and phone numbers, appears in the Appendix. A bibliography of recent NTP-related publications, arranged alphabetically by the last name of the first author and by type of publication, is also included in the Appendix.

Important Accomplishments of the NTP in FY 1982 Include:

- Implemented a more comprehensive approach to assessing chemical toxicity including genetic toxicity, chemical disposition, fertility and reproductive assessment, major organ toxicity, and carcinogenesis.

[1] Page numbers correspond to the bound version of the plan available from the NTP Public Information Office.

- Focused testing efforts on characterizing toxic properties associated with classes of chemicals with similar structures—e.g., benzidine congener dyes and phthalic acid esters.
- Continued an interagency effort on benzidine and cogener-based dyes wth regard to their chemical disposition and mutagenic, carcinogenic, and chronic toxic effects.
- Initiated studies with selected esters of ortho phthalic acid to assess genetic toxicity, dermal absorption, reproductive toxicity, and carcinogenic potential and mechanisms.
- Incorporated a set of cellular and genetic toxicology assays into prechronic testing phases for all chemicals being considered for long-term testing—gene mutations in bacterial and mammalian cells, chromosome damage, mammalian cell transformations, and DNA damage/repair.
- Completed testing on 288 chemicals in the *Salmonella typhimurium* mutagenesis assay.
- Completed testing on 48 chemicals for heritable genetic effects in *Drosophila melanogaster*, (fruit flies) and completed cytogenetics testing on 65 chemicals using Chinese hamster ovary cells.
- Began evaluating new methods for monitoring mutagenic activity in human lymphocytes and urine.
- Completed peer review of the technical reports for 21 carcinogenesis bioassays.
- Developed a protocol which will significantly modify the histopathology requirements for future two-year bioassays while retaining sensitivity for tumor detection. Addition of an interim kill near 15 months should enhance detection and characterization of non-tumor toxic lesions.
- Proposed enhancing the experimental design of the two-year bioassay (e.g., 4-doses) to provide better data for low-dose toxicology evaluation and for risk assessment while retaining power for detecting a cancer response in rodents.
- Initiated a research program investigating the utility of *in vivo* rodent liver tumor models for evaluating initiation/promotion mechanisms of chemical carcinogenesis.
- Continued long-term studies assessing etiology of cancer in occupational environments and conducted animal bioassays on materials ranging from single chemicals to mixtures using routes by which humans are exposed in the workplace.
- Added evaluation of male and female reproductive dysfunction to the 90–120 day prechronic test phase.
- Continued development of short-term prescreens of chemicals for teratologic effects and fertility assessment.
- Continued a collaborative inter laboratory behavioral teratology initiative.
- Initiated development and evaluation of a new model for percutaneous absorption of chemicals.
- Characterized an animal model (monkey) of human occupationally induced asthma.
- Evaluated pulmonary function indices as being more sensitive to low level chemically-induced lung damage than more traditional morphologic assessments.
- Implemented an immunotoxicology assay panel in prechronic testing phase for selected chemicals.
- Proceeded with implementation of the interagency toxicology data management system (TDMS) at bioassay contractor laboratories.

The NTP's completed, ongoing and planned activities in toxicology research, testing, test methods development and validation efforts, as well as other key program activities, are described in capsule form in the following pages, and in more detail in the main body of the *Annual Plan.*

Cellular and Genetic Toxicology (See pages 32 to 100)

During FY 1982, tests were completed on 288 chemicals in the initial testing phase for chemical mutagens, the *in vitro* microbial assay in *Salmonella typhimurium.* Testing was completed for heritable genetic effects on 48 chemicals in *Drosophila melanogaster* (fruit files) and for cytogenetic effects on 66 chemicals in the *in vitro* mammalian cell culture system (Chinese hamster ovary cells). In FY 1983, testing in *Salmonella* will continue with completion of about 300 chemical tests, with 75 tests completed in *Drosophila* and 100 tests completed in the mammalian cell culture system.

Cellular and genetic toxicology continues to be the largest single area of test methods development and validation in the Program with emphasis being placed on both *in vitro* and *in vivo* systems for measuring somatic mutations, chromosome aberrations, aneuploidy, heritible mutations, cellular transformation, and DNA damage and repair. Among new initiatives are measures for monitoring mutational events in human lymphocytes and urine.

Carcinogenesis Testing (See pages 101 to 136)

During FY 1982, 21 two-year bioassays were completed and the reports containing the data and conclusions were approved by the external peer review panel associated with the NTP Board of Scientific Counselors. In FY 1983, the NTP expects to complete 26 bioassays through peer review, and initiate 16 new starts in the prechronic phase of the bioassay, all with the incorporation of special studies for providing more comprehensive assessment of chemical toxicity.

A major addition to the prechronic phase of the toxicology and carcinogenesis bioassay process was inclusion of a group of five *in vitro* short-term cellular and genetic toxicology assays for measuring gene mutations (bacterial and mammalian cells), chromosome damage, mammalian cell transformation, and DNA damage/repair. A three-year program was initiated to evaluate and clarify the nature of biological responses associated with the two-year bioassay, especially initiation/promotion mechanisms, using selected *in vivo* rodent tumor models. Initiated or continued were a number of new or ongoing long-term carcinogenesis studies concerned with chemicals or mixtures of chemicals which humans may encounter in the workplace.

Toxicologic Characterization (See pages 137 to 141)

The 14-day and 90–120 day experiments with chemicals selected for carcinogenic evaluation provide a comprehensive approach to assessing chemical toxicity which includes genetic toxicity, chemical disposition, effects on reproduction and fertility, and other major organ toxicity. Test efforts are being focused on characterizing toxic properties associated with chemical class rather than chemical-by-chemical assessment. For example, studies are being initiated with selected ortho phthalic acid esters including evaluation of genetic toxicity, reproductive toxicity, dermal absorption, and carcinogenic potential and mechanisms of several esters. Chemical disposition studies are being done on all chemicals selected for long-term bioassays.

Benzidine-Dye Initiative (See pages 142 to 147)

Chemical disposition studies at the National Institute of Environmental Health Sciences (NIEHS), the National Center for Toxicological Research (NCTR), and the National Institute for Occupational Safety and Health (NIOSH) on the benzidine congeners and selected derivatives were largely completed in FY 1982. Since metabolic activation of benzidine and congener derivatives is a prerequisite for production of genetic toxicity, priority was given to developing a protocol for anaerobic metabolism of the derivatives. Short-term *in vivo* toxicity and carcinogenesis studies were initiated. In FY 1983, long term bioassays will begin on the dimethyl- and dimethoxy-benzidine congeners and a derivative of each.

Chemical Pathology (See pages 163 to 177)

The chemical pathology program has increased efforts in the areas of toxicologic and experimental pathology while continuing the major function of detecting and characterizing specific lesions in prechronic and chronic bioassay studies. Modifications in pathology requirements for the bioassay were proposed and revised after peer review and agency and public comment, and are being implemented to orient towards select organs and tissues examined histopathologically at 24 months while retaining the detection potential for neoplasia and increasing the ability to measure non-tumor pathology through use of an interim kill and histopathologic examination after 15 months.

Immunological Toxicology (See pages 182 to 185)

In FY 1982, the comprehensive panel of immunology and host resistance assays was implemented in the prechronic testing phase of the bioassay. A select number of chemicals were examined indepth for effects on the immune system. There will be continuing investigations in FY 1983 aimed at better correlating changes in immune function with altered host resistance, and at development of virus challenge models.

Neurobehavioral Toxicology (See pages 186 to 188)

In-depth neurological studies continued in developing and mature animals to elucidate the effects of chlordecone and 2,4-dichlorophenoxyacetic acid (2,4-D). Studies have been initiated to assess neurotoxicity in animals using naturally occurring home cage

behaviors, such as spontaneous motor activity and eating-related behaviors. Methods development/evaluation of human neurotoxicity tests to be used at the worksite are continuing as well as validation of reflex activity tests in animal and human laboratory studies.

Pulmonary Toxicology (See pages 192 to 195)

A panel of pulmonary function tests was determined to be more sensitive for the detection of lung damage from low levels of specific inhaled pollutants than traditional histopathologic techniques. A model of human occupational asthma developed in the monkey was further characterized, and screening of organic allergens using this non-human primate model will be initiated in FY 1983.

Reproductive and Developmental Toxicology (See pages 198 to 210)

Primary emphasis continued on (1) developing short-term tests in both reproductive toxicology and teratology, including both *in vivo* and *in vitro* teratologic test systems and a continuous breeding assay for fertility assessment, and on (2) using existing methodology to evaluate toxicity. In FY 1982, "conventional" teratology testing was completed on eight chemicals and was in progress on nine others. An interlaboratory behavioral teratology project using known behavioral teratogens continued. A class study remains in progress on the reproductive and developmental toxicology of the glycol ethers.

Resources and Planning Assumptions (See pages 12 to 16)

The President's budget for FY 1983 provides a funding level of $71.4 million. Increasing emphasis on short-term test methods development and validation coupled with a decreased emphasis on standard testing, particularly in the two-year bioassay, will continue. Major portions of these resources must still be placed on chemical testing because of the relatively high costs of the bioassay and because tests started two to three years ago are entering the pathology, data evaluation, report preparation, and peer review phases.

Oversight and Review (See pages 17 to 22)

The Executive Committee provides primary oversight and coordination for the Program, while the Board of Scientific Counselors provides scientific review and evaluation. During the year, the Board reviewed programs in inhalation toxicology and neurobehavioral toxicology, examined proposed modifications in the experimental design and pathology requirements for the two-year bioassay, and provided peer review and priority ranking of 57 chemicals nominated for testing. The Board on two occasions provided special peer review of chronic bioassays for the Food and Drug Administration. A Subcommittee aided by an *ad hoc* panel of experts peer reviewed in public session 21 toxicology and carcinogenesis bioassay reports.

Organization (See pages 25 to 27)

The toxicology Research and Testing Program (TRTP) NIEHS, was established in FY 1981 to integrate the Carcinogenesis Bioassay Program, transferred from the National Cancer Institute (NCI), and the NIEHS toxicology testing and methods development activities. Representing most of the National Institutes of Health (NIH) component of the NTP, the TRTP is composed of six branches: Cellular and Genetic Toxicology, Chemical Pathology, Systemic Toxicology, Carcinogenesis and Toxicology Evaluation, Program Resources, and Program Operations.

Data Management and Analysis (See pages 258 to 264)

Implementation of the Toxicology Data Management System (TDMS) began in FY 1982 with specially designed microprocessors being delivered and put in use for support of bioassay experiments at five contract laboratories. A chemical management and tracking system is being implemented. Possible statistical modifications of the basic experimental design of the two-year carcinogenesis bioassay were peer reviewed and are being revised. These modifications are aimed at improving the information obtained for low dose extrapolation while retaining the detection power of the bioassay.

Chemical Nomination and Chemical Selection (See pages 213 to 238)

During FY 1982, 28 chemicals were nominated for toxicological testing by the NTP, while 151 chemicals representing 10 chemical classes and one use class were nominated for mutagenicity testing. The Board of Scientific Counselors reviewed and made testing recommendations on 57 chemicals. The Executive Committee selected 26 chemicals as the NTP FY 1982 priority chemicals for in-depth toxicologic evaluation, and selected 24 chemicals for the FY 1983 priority list.

Information Generation and Dissemination (See pages 270 to 275)

An NTP/EPA interagency effort was initiated to establish a worldwide clearinghouse on phthalate research activities. A data form was sent to persons involved in phthalate testing or research. Also, information was sought from readers of the NTP Technical Bulletin.

Annual Report on Carcinogens (See pages 276 to 277)

The Third Annual Report on Carcinogens will be published in the first half of FY 1983.

Introduction

The National Toxicology Program (NTP) will begin its fifth year of operation in FY 1983. The NTP was established in November 1978 as a Department of Health and Human Services (DHHS, formerly Department of Health, Education and Welfare) cooperative effort to coordinate and provide information about potentially toxic chemicals to regulatory and research agencies and to strengthen the science base in toxicology. Because the Public Health Service of DHHS is responsible for safeguarding the public's health, and prevention of human exposure to toxic substances is integral to disease prevention, the establishment of the NTP was a logical outgrowth from the need for better coordination and program integration of the DHHS toxicology research and testing activities. Thus, the NTP was envisioned as a means of bringing together the Department's major toxicological research and testing activities—most of which had been developed to support different organizational missions—to mount a coordinated attack on the problems associated with toxic chemicals.

The NTP has realized already some of its potential by generating and disseminating scientific information needed for protecting the population from chemical health hazards. The NTP represents a major Federal resource for chemical testing, and represents a principal Federal effort in evaluating current methods and developing better methodology for assessing toxic potential of chemicals. There are also significant toxicology research, testing and test methods development activities ongoing in other Federal agencies. Current information on many of these efforts may be found in the NTP's FY 1983 *Review of Current DHHS, DOE and EPA Research Related to Toxicology*. The Program is a scientific data resource in genetic toxicity and animal carcinogenicity. Perhaps, most importantly, the NTP has developed an open and objective testing process which is beneficial and useful to other Government agencies, industry, the scientific community and the public.

Two recent organizational changes should increase Program stability and —effectiveness. The Program, on an experimental status since inception, was granted permanent status by DHHS Secretary Richard S. Schweiker in October 1981. This action will enable better integrated long-range planning. Second, the transfer of the NCI carcinogenesis bioassay program, including personnel and resources, to the NIEHS was approved by the Secretary in July 1981. This has enhanced the overall integration, coordination, and management of the NIH component of the NTP.

The NTP consists of the relevant toxicology activities of the National Institutes of Health's National Cancer Institute (NIH/NCI) and National Institute of Environmental Health Sciences (NIH/NIEHS); the Food and Drug Administration's National Center for Toxicological Research (FDA/NCTR); and the Centers for Disease Control's National Institute for Occupational Safety and Health (CDC/NIOSH). Resources for the program originate from the budgets of these agencies. The NTP activities to which these agencies allocate their resources are planned and accomplished as a coordinated effort under the leadership of the Program Director, Dr. David P. Rall, who also is Director of the NIEHS. For purposes of the NTP, he reports to Dr. Edward N. Brandt, Jr., Assistant Secretary for Health, DHHS.

Objectives of the Program—Within the framework of its charge to identify those chemicals potentially toxic to humans, the broad goal of the NTP is to coordinate and strengthen the activities of the Department of Health and Human Services in testing chemicals of public health concern, as well as to develop and validate new and better integrated test methods. Four specific goals are identified:

—Expand the spectrum of toxicologic information obtained on the chemicals nominated, selected, and being tested.
—Increase the numbers of chemicals tested in various short-term assays, within the funding limits.
—Develop, coordinate, and validate a series of tests and protocols more appropriate for regulatory needs.
—Communicate Program plans and results to governmental agencies, the medical and scientific communities, and the public.

During the first four years, the NTP has made considerable progress towards these objectives and related goals. Some of the more significant recent accomplishments are described briefly as follows:

• Although the Program allocates a majority of resources to chemical testing, more priority emphasis is given to development and implementation of new initiatives in areas of toxicology methods development.

• The Program is systematically reviewing and restructuring the sequence and approach to toxicity assessment of chemicals, and implementing major changes in the approach to testing for chemical carcinogenicity by utilizing chemical disposition, genetic toxicity, reproduction and fertility assessment, and major organ toxicity data and modifying the approach to histopathological evaluation of tissues.

• Test efforts are oriented more toward characterizing toxic properties associated with classes of chemicals rather than chemical-by-chemical assessment.

Among proposed and/or near-term research objectives are the following:

• Current methods for assessing carcinogenic potential of chemicals basically provide qualitative information. Better methods are needed to permit a general understanding of the major processes associated with carcinogenic responses and enable quantitative estimates of risk. Approximately three dozen chemicals have strong epidemiologic evidence for carcinogenicity in humans. All chemicals shown to cause cancer in humans also induce cancer in laboratory animals. The NTP proposes an initiative to characterize in animals the specific biological effects of these human carcinogens using current toxicology test methodologies. These data should provide insight on the utility of various methods for detecting or predicting carcinogenic risk. Of long-term value the results would serve as a reference data base to compare the utility of emerging test methods and to design future systems.

• A number of short-term *in vivo* research models which are organ specific have been developed which should help distinguish whether a chemically-induced carcinogenic response is through an initiation or promotion mechanism. A research program was initiated late in FY 1982 to investigate rodent liver tumor models. Investigation of these models will be expanded to include bladder tumor responses.

• With regard to applicability of NIP research results for extrapolation, there will be an intensification of efforts to validate emerging test methodologies with respect to comparability of interlaboratory results and extrapolation to humans.

• Efforts to identify the major processes involved in chemically-induced toxic effects will allow more broadened toxicologic profiles for chemicals. A current example is the FY 1982 initiative to better define the factors involved in rodent liver non-neoplastic and tumor responses which are observed in a majority of positive bioassays.

• Similarly, increased emphases are placed on chemical disposition, effects on reproduction and fertility, neurobehavioral toxicity, and other types of major organ toxicity. For example, evidence is accruing that animal and human male fertility may be a target site for certain chemicals (chlordecone, 1, 2-dibromo-3-chloropropane, 2,5-hexanedione). Current test methods will be refined to determine if the toxic action is mediated through pituitary function, testicular endocrine function, or direct effects on spermatogonia.

• Several methods have been developed to assess heritable genetic damage. Each method has limitations in that the assay detects for effects on only 10 to 18 gene loci. It is proposed to investigate the feasibility of using the same test animals to detect deleterious effects that may be under polygenic influences. Candidate indices for assessment include general tumor response, life span, fertility, and immune system profiles.

• The NTP will continue to expand and improve effects in: (1) Scientific coordination and (2) communication of the results of the Program's research, test methods development and validation, and testing. With respect to scientific coordination, NTP continues to seek additional input from the scientific community, industry, and the public into NTP research and testing activities. For instance, public briefings on chemicals and chemical classes of public health concern will continue. This has been done successfully by bringing together research and regulatory agencies with industry and the public to discuss benzidine-based dyes and phthalate esters.

With respect to enhanced communication, the NTP aims to increase and accelerate public dissemination of research and testing results. For instance, comprehensive technical reports are published, and abbreviated articles on the results (including toxicologic characterization and special studies from the prechronic phases of the long-term bioassay process) are published in recognized archival journals. This permits not only wider availability but also submits the data and interpretations to the most accepted and rigorous peer review system. Further, the NTP Technical Bulletin, published quarterly, will continue to serve as a means to alert the public and scientific community to upcoming NTP meetings and publications as well as to solicit comments on nominated chemicals and research proposals. Additionally, meeting announcements and solicitations for comments will be published in the **Federal Register**.

The Annual Plan separates annual report information (FY 1982) from planned activities (FY 1983 and beyond). In last year's Plan, programs and projects were associated with a contact person. This will be continued, and to further identify the agency responsible for a project or activity, the accomplishments and plans will be described separately by agency under each scientific and management section where appropriate.

The following chapters discuss Program resources, oversight and review, coordination and communication, organization structure, and describe in detail the NTP's ongoing and planned efforts in toxicology research, testing, and test methods development and validation as well as other key program activities such as chemical nomination and selection, information generation and dissemination, and data management and analysis.

Resources and Planning Assumptions

The NTP relies on voluntary allocations from the member DHHS agencies. The resources allocated to the NTP are specified in memoranda of understanding, prepared after each agency receives their funding through the Congressional appropriations process. In July 1981, DHHS Secretary Richard Schweiker transferred the carcinogenesis bioassay program from the NCI to the NIEHS; this action strengthened overall integration, coordination, and management of the NIH component of the NTP, and gave the NTP Director and central staff direct responsibility for about 85 percent of the Program's resources.

The NTP's FY 1982 obligations were $72.9 million. Using the member agencies' current NTP allocations, the President's budget for FY 1983 would provide for a funding level of $71.4 million. The estimated budget for FY 1983, compared with the actual obligations for FYs 1979, 1980, 1981, and 1982, is shown in Figure 1.

Over the first four years of the Program an increasing emphasis has been centered on short-term test methods development and validation coupled with a decreasing emphasis on standard testing, particularly in the long-term bioassay. A second major shift in program emphasis has been to broaden the experimental design protocols through inclusion of various additional toxicology studies for the prechronic phases of the long-term animal bioassay, thereby establishing the prechronic-chronic interface as a major decision point on whether or not to do a long-term bioassay. This has served two purposes: set priorities of the fewer numbers of compounds committed to chronic tests and provide more information on toxic endpoints other than cancer. Modifications to the two-year bioassay were studied and proposed in FY 1982 which would: (1) Enhance the information generated for possible use in risk estimation while retaining the detection power of the bioassay and (2) redefine significantly the list of organs and tissues undergoing histopathology while retaining detection power for cancer and enhancing the ability of the bioassay to detect non-tumor pathologic effects through addition of an interim sacrifice.

Although the Program's emphasis is changing, major resources are still focused on chemical testing, primarily reflecting the relatively high costs of the two-year animal bioassay. However, dollar allocations for testing have increased only slightly from FY

1981 to 1983 (Figure 2). Figure 3 divides the funding levels in FY 1982 for testing, methods development, and test validation for the four major program areas. The continuing large numbers of dollars for testing reflect, in large part, the costs for long-term bioassays initiated prior to NTP involvement. Starting in FY 1982, this investment is gradually scaling down with fewer bioassay starts and more funds being devoted to development of tests as alternatives to the bioassay.

Thus, in the coming years, the NTP will devote more resources and attention to the critical task of test methods development and validation. Emphasis will be placed on: (1) Completing validation of test methods now under development; (2) identifying and defining underdeveloped areas in toxicology, and beginning to develop, within resource limitations, research and test methods in newly identified areas; (3) developing the research tools and knowledge needed to study the problem of chemical mixtures, their interactions, and their toxic effects; (4) developing methodologies to permit low-dose extrapolation from test species to other species, including humans; and (5) continuing incorporation of improvements, in the prechronic and chronic testing phases of the bioassay.

Oversight and Review

Because of the interdisciplinary scientific tasks assigned to the NTP, and the need to integrate the programmatic activities of a variety of agencies, the NTP established two complementary oversight and review groups. The Executive committee and the Board of Scientific Counselors have helped ensure integration of NTP efforts and coordination of activities among the health research and health regulatory agencies, as well as with industry. Through these mechanisms, the NTP is assured that:

- Program planning and balance are designed with input from the health research and health regulatory agencies, as well as from the public, industry, and other non-government groups;
- Testing and test methods development and validation activities are responsive to the needs of the other agencies, are coordinated with those activities undertaken by other agencies and industry, and are complementary to efforts undertaken elsewhere;
- Research and testing efforts receive extensive peer review for scientific adequacy, merit, and relevance;
- Applied research needs are identified and can be targeted;
- Chemicals selected for testing are evaluated thoroughly; and
- Planning and decision-making processes are open, with opportunity provided for public input and comment.

The agencies, other than the NTP members, associated with the Program through the Executive committee also contribute and profit from these NTP oversight and review mechanisms. These agencies are assured of:

- Participation in the nomination, evaluation, and selection of chemicals for testing;
- Involvement in developing test protocols pertinent to their research and regulatory needs;
- Input into science policy issues that impact on their programs and activities;
- A role in overseeing test progress and participating in appropriate and necessary modifications;
- Early access to test results to aid in health and regulatory policy analysis;
- Timely information exchange, not only with the other research and regulatory agencies, but with industry as well; and
- A primary source within Government to serve as the repository for information on testing and test methods development and validation, as well as a source for consultation on issues related to chemical toxicology.

NTP Executive Committee provides primary oversight for the National Toxicology Program. The Executive Committee, composed of the heads of the research and regulatory agencies, serves as NTP's major advisory group and meets about four times a year. The Committee advises the NTP Director on research and testing needs and on selecting and setting priorities for the specific chemicals to be tested. This interagency group also serves as a forum for discussion of science policy issues and provides for timely information exchange among the various agencies as well as with industry and other interested groups. One of the key tasks for the Executive Committee is review and approval of the NTP Annual Plan.

Current members of the Executive Committee are:

Mr. Thorne G. Auchter, Assistant Secretary of Labor for Occupational Safety and Health Administration, Department of Labor
Dr. Edward N. Brandt, Jr., Assistant Secretary for Health, Department of Health and Human Services (non-voting)
Dr. Vincent T. DeVita, Jr., Director, National Cancer Institute
Mrs. Anne Gorsuch, Administrator, Environmental Protection Agency
Dr. Arthur H. Hayes, Jr., Commissioner, Food and Drug Administration (Chairperson)
Dr. James B. Wyngaarden, Director, National Institutes of Health
Dr. J. Donald Millar, Director, National Institute for Occupational Safety and Health
Dr. David P. Rall, Director, National Institute of Environmental Health Sciences
Mrs. Nancy Steorts, Chairman, Consumer Product Safety Commission

The Chairperson is elected by the Committee and serves a one-year term.

Through this interactive and cooperative mechanism, the NTP is assured of a continuing interface with the health research and health regulatory agencies and of receiving input into critical phases of NTP operation, including oversight of program planning and balance.

Board of Scientific Counselors provides scientific oversight. The Board, composed of eight non-governmental scientists appointed by the Secretary of DHHS, reviews the Program for scientific adequacy and merit and helps identify program needs. The Board meets an average of three times a year in sessions open to the public. Additionally, scientists with expertise in particular scientific areas are invited on an *ad hoc* basis to assist and supplement the Board for review of specialized segments of the Program.

Current members of the Board are:

Leila Diamond, Ph. D., Professor, Wistar Institute
Curtis Harper, Ph. D., Associate Professor of Pharmacology, University of North Carolina School of Medicine
Margaret Hitchcock, Ph. D., Assistant Professor of Pharmacology, Yale University Medical School
Jerry B. Hook, Ph. D., Professor and Director, Center for Environmental Toxicology, Michigan State University
Marjorie G. Horning, Ph. D., Professor of Biochemistry, Baylor University College of Medicine
Norton Nelson, Ph. D., Professor of Environmental Medicine, New York University School of Medicine (Chairperson)
James A. Swenberg, D.V.M., Ph. D., Chief, Pathology Department, Chemical Industry Institute of Toxicology
Alice S. Whittemore, Ph. D., Adjunct Professor of Family, Community and Preventive Medicine, Stanford University

The Board of Scientific Counselors held three open meetings during FY 1982. These meetings are summarized as follows:

October 22–23, 1981 Meeting, Cincinnati, Ohio (NIOSH)

The major agenda items included peer review of NTP programs at NIOSH and NIEHS in inhalation toxicology and neurobehavioral toxicology. The Board reviewed and approved concepts for one new initiative and two continuing actitivies in cellular and genetic toxicology. The Board reviewed 26 chemicals which had been nominated for testing and previously evaluated by the NTP interagency Chemical Evaluation Committee; their recommendations and priority rankings were incorporated into the literature summaries sent to the Executive Committee.

March 10–12, 1982 Meeting, Research Triangle Park, NC (NIEHS)

The Board, augmented by an *ad hoc* international group of scientists expert in chemical carcinogensis, mutagenesis, pathology, and biostatistics, met to review NIH/NTP proposed modifications in the experimental design and pathology requirements of the two-year carcinogensis and toxicology bioassay, and the proposed development and utilization of *in vivo* rodent liver tumor models. There was extensive discussion on these issues and the Board endorsed these new directions. Concept approval was given for research and development of the *in vivo* rodent tumor models, as well as for renewal and inclusion of inhalation exposure capabilities in contract activities of the NIH/NTP chemical disposition program.

September 23–24, 1982 Meeting, Research Triangle Park, NC (NIEHS)

An overview was given, as orientation for the three new Board members of the history, organizational structure and objectives of the

NTP as well as information on current activities in chemical testing, methods development and validation. A status report was presented on revisions made in the modified pathology protocol which had been originally reviewed at the March 1982 Board meeting. In part, revisions reflected responses to comments and suggestions from other Federal agencies, academia and industry. There was a discussion of problems encountered when trying to utilize a NCI/NTP historical control data base in analyzing the results of NTP bioassays, and of efforts being made to resolve these problems. A working paper was presented and discussed which dealt with guidelines for combining benign and malignant neoplasms as an aid in determining evidence of carcinogenicity. Seven contract or interagency agreement initiatives dealing with new or continuing cellular and genetic toxicology testing and methods development/validation activities were reviewed for concept by the Board; six were approved. One reproductive and development toxicology initiative was reviewed for concept and approved. The Board reviewed 31 chemicals which had been nominated for testing and previously evaluated by the NTP Chemical Evaluation Committee, and their recommendations and priority rankings were incorporated into the literature summaries sent to the Executive Committee.

Special Reviews for the Bureau of Foods, FDA

The Board met on March 9, 1982 in Washington, DC, at the request of the Bureau of Foods, Food and Drug Administration (FDA), to review the data from the chronic carcinogenesis bioassay of D&C Green No. 5. The Board met again on August 11, 1982 in Washington, DC, to review the data from the chronic carcinogenesis bioassay of FD&C Blue No. 2. These bioassays were submitted to the FDA to support permanent listing of the dyes. The Board was augmented by expert consultants in pathology and biostatistics for each review.

Summary minutes of the three regular and two special Board meetings held in FY 1982 are available on request. (CONTACT PERSON: Dr. L. G. Hart)

Peer Review: Peer review of NTP projects is a multi-level process involving review of project concepts, project proposals, and completed technical bioassay reports. Internally, the NIP Steering Committee (see Organization section) performs an initial review of the NIH/NTP research and testing proposals to determine if these should be developed further. The Board of Scientific Counselors performs external concept peer review for the Program; and reviews all NTP proposals to determine their relevance, need, and priority.

Once grant applications or contract proposals for projects are submitted to the NIH/NTP, they are evaluated for scientific merit by the Environmental Health Sciences Review Committee (ESRC). The ESRC, which was established as part of the NIH-wide peer review process, is composed of 21 members with expertise in pharmacology, toxicology, pathology, biochemistry, mutagenesis, and clinical disciplines.

When projects are completed and technical bioassay reports on the results are prepared, the Technical Rports Review Subcommittee of the Board of Scientific Counselors, supplemented by an *ad hoc* panel of expert reviewers, evaluates the reports for technical and scientific merit. Through this extensive and public review, the NTP is better assured that its program efforts are of acceptable quality and relevance. During FY 1982, the Subcommittee and panel met in open session in December, June, and September. Peer review was completed on 21 carcinogenesis bioassay reports. (See Table 10 in the Carcinogenesis Testing section). Summary minutes of the report reviews are available. (CONTACT PERSON: Dr. L. G. Hart).

The members of the Subcommittee and panel of experts during FY 1982 were as follows:

Technical Reports Review Subcommittee Members

- Dr. Margaret Hitchcock (Chairperson).
- Dr. Curtis Harper.
- Dr. James Swenberg.
- Dr. Alice Whittemore.

Ad Hoc Review Panel Members

- Dr. Norman Breslow, Professor of Biostatistics, Department of Biostatistics, University of Washington.
- Dr. Robert M. Elashoff, Jonsson Comprehensive Cancer Center, University of California at Los Angeles.
- Dr. Joseph H. Highland, School of Engineering and Applied Sciences, Princeton University.
- Dr. J. Michael Holland, Department of Biology, Oak Ridge National Laboratory.
- Dr. Frank Mirer, Assistant Director, Social Security Department, International Union, United Auto Workers.
- Dr. Robert A. Scala, Exxon Corporation.
- Dr. Bernard A. Schwetz, Director, Toxicology Research Laboratory, Dow Chemical Company.
- Dr. Stan D. Vesselinovitch, Professor, Department of Radiology and Pathology, University of Chicago.
- Dr. Mary Vore, Assistant Professor, Pharmacology Department, University of Kentucky, College of Medicine.

Operations Management System—The Secretary, DHHS, established this management tracking system in FY 1980 for the purpose of overseeing specific, major operational achievements. The Operations Management System (OMS) monitors progress and effectiveness of selected program initiatives by measuring actual monthly and quarterly achievements against projected goals set at the beginning of the fiscal year. The carcinogenesis bioassay and mutagenesis testing programs of the NTP, as well as the development of the Annual Report on Carcinogens, continued to be monitored in FY 1982.

In FY 1982, the NTP divided its current OMS carcinogenesis testing initiative into two distinct categories: general toxicologic characterization and two-year bioassays; these more accurately reflect current testing.

Coordination and Communication

Communication of Program activities and results of chemical testing and test development efforts, and coordination of related scientific programs among agencies represent two key elements essential to Program success.

NTP Annual Plan—Central to both elements is the development and approval of the *Annual Plan* to which the DHHS member agencies (NIH, NCTR, and NIOSH) contribute. The *Annual Plan* is the principal instrument for describing the coordination of toxicology research, test development, and chemical testing among the relevant health research and regulatory agencies. This annual document represents NTP's strategy for testing, test methods development and validation, and contains an annual report detailing the NTP's accomplishments in the preceding year. The *Annual Plan* is distributed widely and is also published in the Federal Register. Part II of the *Annual Plan* is printed separately and reviews current DHHS, Environmental Protection Agency (EPA), and Department of Energy (DOE) research related to toxicology, including methods development and chemical testing. To foster greater awareness regarding toxicology research of the Government, chemical toxicology activities in other Federal agencies may be included in future volumes. The *NTP Technical Bulletin*, published four times a year, serves as the major medium for more frequent communication of NTP's past, current, and upcoming activities, including abbreviated experimental results.

Open Meetings—The NTP Open Meetings are one of the ways NTP gives the public the opportunity to provide comment on and receive information about the Program. Specifically, the Open Meeting: (1) Gives the NTP staff a public forum to provide information on current and planned research, test development, and testing activities, (2) allows public comment on these activities and on the *Annual Plan*, and (3) encourages nominations of chemicals for testing. Past meetings have been held in Washington, DC, and most recently in San Diego, in conjunction with the Annual Meeting of the Society of Toxicology. Other sites are being considered for future meetings.

Interagency Coordination—The NTP is an active center for information and scientific collaboration for those individuals or groups concerned with current and common problems of chemical toxicology. As examples, two efforts begun in fiscal year 1981 dealing with chemical classes continue and are illustrative of the role that NTP performs in interagency coordination.

- The Benzidine Dye Initiative was developed to study the metabolism, toxicology, and carcinogenicity of a class of dyes derived from benzidine, 3,3'-dimethylbenzidine (DMB), and 3,3'-dimethylbenzidine (DMOB). The objectives and approaches were formulated by scientists from EPA, CPSC, OSHA, NIH/NTP, NCTR, and NIOSH in response to the needs of the regulatory agencies. The research *per se* is a collaborative effort between NIH/NTP, NCTR, and NIOSH. Through the judicious selection of chemicals for testing a set of basic principles is being established which can be applied to the entire class of

benzidine-based dyes, serve as a model for future chemical class studies, and provide scientific information required for making regulatory decisions. The activities cover three main areas of research and testing: (1) Chemical disposition and metabolism, (2) genetic toxicology, and (3) *in vivo* toxicology and carcinogenicity testing. The fiscal year 1982 accomplishments and future plans are described in the section on the Benzidine Dye Initiative. (CONTACT PERSON: Dr. J. Mennear, NIEHS)

• A key recommendation made at the June 1981 Conference on Phthalates held in Washington, DC, co-sponsored by the Interagency Regulatory Liaison Group (IRLG) and the NTP, was that the NTP should create a clearinghouse of toxicological data on this class of compounds. NTP consulted with scientists from Federal health regulatory and research agencies as well as from the Chemical Manufacturers Association, all of whom supported the clearinghouse and contributed to its development. The Environmental Protection Agency (EPA) was particularly committed to this project because of its involvement in the testing of alkyl phthalates under the Toxic Substances Control Act and together with the NTP sponsored the formation of the Clearinghouse in fiscal year 1982. Persons or organizations planning, conducting, or having completed research on the toxicological effects of these compounds are requested to contact Ms. Joan Chase, NTP/EPA Clearinghouse on Phthalates, Room 3A–06, Landow Building, National Institutes of Health, Bethesda, MD 20205, 301–496–1152, FTS 8–496–1152. In addition, a research program on phthalates was initiated by the NTP aimed at providing information complementary to that from previous NTP studies and efforts completed or ongoing by other groups. These studies are described in more detail in the section on Ortho Phthalic Acid Esters-Safety Evaluation. (CONTACT PERSON: Dr. W. Kluwe, NIEHS)

Interagency and International Liaison—The NTP continues liaison with foreign agency counterparts including the World Health Organization's (WHO's) International Program on Chemical Safety, the International Agency for Research on Cancer, the United Nations Environment Program's (UNEP's) International Registry of Potentially Toxic Chemicals, the International Commission for Protection Against Environmental Mutagens and Carcinogens (ICPEMC), and the National Institute of Hygienic Sciences (Japan).

During fiscal year 1982, as part of the Public Health Service's assistance to the Spanish government for investigating the toxic oil-associated epidemic, the NTP was assigned lead responsibility for providing laboratory testing and consultation with respect to animal toxicological studies of the disease. This work would be conducted in part through existing collaboration with the WHO, and working in cooperation with laboratories of CDC, FDA, and NIH. Additionally, NTP staff persons have served previously in a consultative role after public health disasters involving toxic chemicals, e.g., the dioxin episode in Seveso, Italy, and the polybrominated biphenyl (PBB) disaster in Michigan.

NTP staff continue to participate in interagency liaison groups, including the DHHS Committee to Coordinate Environmental and Related Programs, the Task Force on Environmental Cancer and Heart and Lung Disease, and the Interagency Collaborative Group on Carcinogenesis.

Organization

The NTP is a consortium of independent agencies within the Public Health Service which are linked by common goals: to strengthen the science base in chemical toxicology, develop and validate new or improved toxicological test methods, and evaluate substances or classes of substances that might pose threats to the public health, while eliminating or at least minimizing duplication of effort.

Currently, there are three organizational components of the Program. The National Institutes of Health component in NIEHS represents the majority of the NTP budget, and is under direct administrative and management control by the Director, Deputy Director and central NTP staff located within the NIEHS. The Centers for Disease Control (NIOSH) and Food and Drug Administration (NCTR) components are not under direct NTP management; however, each continues to cooperate and participate fully in overall NTP activities. The NTP Steering Committee, formed in 1980, has strengthened coordination and promoted interagency working relationships within the Program. Composed of the NTP Director and the operating heads of the contributing agencies, along with key support staff, the Committee meets approximately quarterly. The group plans agendas for upcoming NTP meetings, reviews ongoing programs and projects as well as proposed programs, resolves interagency problems, and makes agency allocations for chemicals approved for testing by the Executive Committee. Within the agencies, individual NTP staff members are identified as leaders of the major scientific and program support segments, and serve as the focus for their particular program activities.

The program segments of the NTP can be grouped broadly into two categories—toxicologic research and testing, and coordinative management activities. These activities are described briefly by agency as follows:

NIEHS—The Toxicology Research and Testing Program (TRIP) combines under NIEHS management the chemical toxicity testing efforts transferred from the NCI with the NIEHS testing, test development, and management activities. The TRIP, headed by the NTP Deputy Director, Dr. J. A. Moore, is responsible for all NIH/NTP operations and is composed of six branches:

Cellular and Genetic Toxicology Branch

—Develops and validates a variety of *in vivo* and *in vitro* methods to detect and define effects of chemicals on genetic components.
—Investigates somatic as well as heritable gene damage.
—Studies effects of chemicals on experimental organisms (primarily) and on human populations.

Chemical Pathology Branch

—Provides pathology support to all segments of the Program, especially critical to carcinogenesis bioassays.
—Develops standards for tumor and non-tumor pathology diagnoses and nomenclature.
—Develops clinical chemistry parameters for assessing cellular and organ function.

Systemic Toxicology Branch

—Develops methods for assessing toxic effects involving immune, pulmonary, reproductive and renal function.
—Performs studies to develop basic knowledge of chemical absorption, distribution, metabolism, and excretion.

Carcinogenesis and Toxicology Evaluation Branch

—Principal group for designing, conducting and interpreting carcinogenesis and related studies on chemicals.
—Works closely with other programs to develop data that elucidates general mechanisms that may be involved in a toxic effect.

Program Operations Branch

—Provides logistical support for coordinating and scheduling the contract testing functions, and monitors quality assurance and good laboratory practices at the testing laboratories.

Program Resources Branch

—Serves as resource for chemical acquisition and storage, laboratory animals breeding and allocation, and general laboratory health and safety.

The Program Resources and Program Operations Branches along with information generation and dissemination activities (managed from the Office of the Director, TRIP) and data management and analysis functions (provided by the Data Management and Analysis group of the NIEHS Biometry and Risk Assessment Program) constitute a major segment of *coordinative management* activities which facilitate and support the research and testing efforts and provide information on program plans and progress.

The heads of the six branches along with a few other key staff persons form the TRIP Management Committee. The Committee, chaired by the Director, TRIP, was established to ensure coordination and communication among the NIH components. The committee, which meets at least monthly, is responsible for planning, review and implementation of NIH/NTP activities.

NIOSH—The Division of Biomedical and Behavioral Science has the lead responsibility for the NIOSH occupational toxicology program. The program consists of research concerned with the toxicity of chemicals found in the workplace with emphasis in the areas of carcinogenesis, reproduction and fertility, neurobehavioral effects, cutaneous toxicity, and organ specific effects. Emphasis is given to inhalation and dermal routes of exposure.

NCTR—The National Center for Toxicological Research contributes to the NTP effort, primarily in:

—Chemical Nomination and Selection
—Reproductive and Developmental Toxicity
—Cellular and Genetic Toxicology
—Chemical Disposition
—Chemical Evaluation
—Toxicology Data Management System

Two coordinative mamagement activities, in particular, involve all NTP member agencis: Chemical nomination and selection, and chemical and laboratory test management. The former involves evaluation and priority ranking of chemicals by staff from all the agencies on the Executive Committee and coordination by staff from NCTR and NIEHS. Staff members at each agency are assigned as chemical managers for individual compounds to serve as a focus for the scientific aspects of the studies on that chemical. Laboratory management is carried out by scientists serving as project officers to ensure that each toxicological study is conducted in a proper and timely fashion (see Chemical and Laboratory Test Management section).

Toxicology Research and Testing Overview

Toxicology research and testing activities within the NTP are divided into four major program areas: cellular and genetic toxicology (mutagenesis); carcinogenesis; toxicologic characterization; and fertility and reproduction (reproductive and developmental toxicology). Through coordination and integration of the activities of the member agencies (NIH, NCTR, NIOSH), the NTP develops the capabilities in toxicologic research and testing necessary not only to improve testing of chemicals by means of a comprehensive approach to evaluating chemical toxicity, but also to put greater emphasis on development and validation of new assay methods, as well as to provide better information for risk estimation. Through open and active communication with other Federal agencies and the private sector, the NTP is able to minimize duplication and avoid unnecessary testing.

The NTP has broadened and strengthened the toxicology and carcinogenesis bioassay especially in the prechronic phases to provide information about genetic toxicity, immunotoxicity, renal toxicity, neurobehavioral toxicity, reproductive toxicity and fertility assessment, clinical chemistry, and chemical disposition. The comprehensive toxicologic data obtained are then used to better design long-term studies or to make decisions that further studies may not be necessary. Presumptive information developed may also be used to design and conduct more indepth studies of a chemical's toxic effects on specific target organs or organ systems. This has resulted in major improvements in testing efforts, related mainly to the mandate to guarantee a more complete toxicologic dossier on chemicals selected for study. Further, the NTP is selectively focusing test efforts on characterizing toxic properties associated with chemical class, e.g., benzidine-based dyes, phthalate esters, glycol ethers, etc. The Program is systematically reviewing and restructuring where appropriate the sequence and approach to toxicity assessment of chemicals, and implementing needed changes in the approach to testing for chemical carcinogenicity. This is being accomplished by utilizing chemical disposition and genetic toxicity data and by modifying the approach to histopathological evaluation. These integrated and rational approaches to testing permit a more effective use of the Government's testing resources.

The NTP's major long-term objective remains the development, validation, and application of better, more specific test methodologies. Priority areas are determined by: (1) The identification of novel means by which chemicals may exert a toxic effect, (2) circumstances where current test methods are inadequate, and (3) innovative approaches to existing methods which would provide toxicologic results in a faster or more definitive manner. In FY 1982, the NTP continued development and validation of short-term prescreens for teratogenesis and assessment of effects on fertility and reproduction: initiated a three-year program to develop and validate *in vivo* rodent tumor models for carcinogenesis; initiated development and evaluation of new models for percutaneous absorption of chemicals: began using the immunotoxicology test panel to examine relationships between carcinogenicity and immunotoxicity with chemicals identified as human carcinogens; continued development and validation of tests for better assessment of neurotoxicity in humans; and continued validation of pulmonary function tests as sensitive measures of detecting and characterizing chemically-induced pulmonary toxicity. The largest single area of test methods development and validation continues to be cellular and genetic toxicoloy, where emphasis is being placed on both *in vitro* and *in vivo* test systems for measuring somatic mutations, chromosome aberrations, aneuploidy, heritable mutations, cellular transformations, and DNA damage and repair. New initiatives are evaluating and monitoring mutagenic activity in human lymphocytes and urine.

The major research and testing initiatives for FY 1982 and FY 1983 are briefly summarized below (more detailed descriptions of specific program activities are given in the following sections).

Cellular and Genetic Toxicology—Tests were completed in the *Salmonella typhimurium* assay system for 288 chemicals in FY 1982. Testing for heribtable genetic effects was completed on 48 chemicals in the *Drosophila melanogaster* system and testing for cytogenetic effects was completed on 66 chemicals in cultured mammalian cells (Chinese hamster ovary). Testing will continue yearly at levels of about 300 completions in *Salmonella* and up to 75 to 100 tests completed in *Drosophila* and up to 100 tests completed in cultured mammalian cell systems. At NIEHS, newly initiated and ongoing activities include development and evaluation of an *in vivo* mouse assay for chemically-induced cytogenetic damage; development and validation of a multiple endpoint mutation system in cultured mammalian cells; development of assays for induction of aneuploidy in *Drosophila* and in yeast; an *in vitro* assay in mammalian cells for induced DNA damage; and a dual laboratory evaluation of three mammalian cell transformation systems. The final phase of evaluation for another cell system for chemical transformation, Balb/c 3T3, is in progress.

Other developmental projects include an effort to develop a standardized protocol by which frequencies of chromosome aberrations and sister chromatid exchanges (SCE's) can accurately and reproducibly be measured in human lymphocytes. Efforts to measure germinal mutations in mice include studies with the morphological specific locus assay and the search for electrophoretic variant isozymes resulting from chemical exposure. A new project beginning in FY 1982 is aimed at organ specificity of chemicals. Research with *Salmonella* tester strains, yeast (*Saccharomyces*), and fruit flies (*Drosophila*) is aimed at improving their value as test systems and gaining better understanding of mutational processes including the relationship between DNA damage/repair and mutagenesis.

At NCTR, a standardized protocol for a sequential fertility test method of the heritable translocation assay with empirically determined mis-classification error has been successfully developed for use in evaluating NTP compounds. NCTR and NIEHS are collaborating on a project using the primary hepatocyte DNA repair system to detect potential genotoxicity of up to 24 chemicals. The NIOSH/NTP efforts are concerned with: (1) Monitoring airborne particles from coal liquefaction plants as well as complex mixtures and industrial chemicals found in various workplaces for mutagenic activity, and (2) developing and using suitable assay systems for measuring mutagenic effects in biological samples from workers such as lymphocytes and urine.

Carcinogenesis—The NIEHS/NTP continued to use broadened protocols epecially in prechronic testing to give information on toxicity other than cancer, to help in experimental design, and to assist in determining whether or not to do long-term testing. All chemicals started in prechronic testing during FY 1982 had one or more special studies incorporated in the protocols. During FY 1982, 21 bioassays were completed through peer review. There were 27 new starts in prechronic testing, and a total of 45 bioassays in prechronic and 172 in chronic testing at the end of FY 1982. There are 16 starts projected for the prechronic phase of the bioassay in FY 1983 and 26 bioassays are expected to be completed through peer review in FY 1983.

A major addition to the prechronic phase was inclusion of a group of five *in vitro* short-term cellular and genetic toxicology assays. These assays will measure gene mutations in bacterial and mammalian cells, chromosome damage, mammalian cell transformation, and DNA damage/repair.

Mathematical simulations were used to investigate modifications in bioassay design which might improve use of the bioassay for low-dose extrapolation while retaining power to detect cancer. Modifications were proposed in pathology requirements aimed at greater efficiency while retaining the detection potential for neoplasia and also

increasing the ability to measure non-tumor pathology through use of an interim kill at 15 months into the study. In FY 1983, NTP will complete, summarize, and evaluate the data from a two-laboratory validation of the pulmonary tumor assay in Strain A mice. Initiated in late FY 1982 was a three-year program to evaluate and clarify the nature of carcinogenic responses using selected *in vivo* rodent tumor models. The study will evaluate the ability of selected chemicals to act as initiators, promotors, or complete carcinogens.

The NIOH/NTP efforts included continuation of long-term studies emphasizing the etiology of cancer in occupational evnrionments. Bioassays with materials ranging from single chemicals to complex mixtures of substances collected at the workplace were also conducted. In addition, efforts are underway to develop efficient *in vitro* and *in vivo* methods for identifying cocarcinogens found at the workplace. At NCTR, a number of bioassays were either initiated or are ongoing. Microencapsulation was studied as a mode for dosing by the oral route with volatile or unstable chemicals.

Toxicologic Characterization—In the NIEHS program, major testing initiatives continue to be 14-day, and 90-120 day experiments with chemicals originally nominated and selected for evaluations of carcinogenic potential; during these phases broadened protocols give information on all types of toxicity as well as allow better experimental design of long-term studies. Measures of reproductive dysfunction in rodents were added to the 90-day study—testicular pathology, epididymal weights, sperm counts and morphology in males, and vaginal cytology in females. There has been an expansion of the chemical pathology program especially in the areas of toxicologic and experimental pathology. Chemical disposition studies are now being done on all chemicals selected for long-term bioassays; special projects include benzidine-based and other dyes, halogenated alkyl and aromatic compounds, aromatic amines, and cyclic and inorganic compounds. There is a continuing activity in development and validation of test methodologies for measuring toxic effects of chemicals on several target organ systems. The immunotoxicology assay panel was implemented in prechronic testing and a number of chemicals were examined indepth for effects on the immune system. Standardization and validation of a neurobehavioral test battery used in prechronic studies was completed. In FY 1983, automated procedures will be under development to assess neurotoxicity in animals using naturally occurring home cage behaviors.

Special studies to evaluate the toxicology of chemical classes were underway in FY 1982 and will be continued in FY 1983. For instance, selected members of the psoralen class are being examined with respect to mutagenicity, carcinogenicity, pharmacokinetics and metabolism, and effects on skin enzyme levels in rodents. Studies are being initiated with selected ortho phthalic acid esters including investigations of the genetic toxicity and carcinogenic mechanisms of di(2-ethylhexyl) phthalate, and the reproductive toxicity, dermal absorption, and carcinogenic potential of several esters.

Toxicologic characterization studies at NIOSH in pulmonary toxicology indicated that a panel of pulmonary function tests were more sensitive for the detection of lung damage from levels of inhaled pollutants than traditional histopathologic techniques. There is continuing development and evaluation of human neurotoxicity tests to be used at worksites as well as validation of tests for changes in reflex activity in animal and human laboratory studies. In FY 1982 and 1983, behavioral teratologic effects will be characterized for two classes of chemicals, the glycol ethers and straight-chain carbon compounds. Efforts began to refine, validate, and apply two model systems for measuring dermal absorption of chemicals.

Chemical disposition studies at NIEHS, NCTR, and NIOSH on the benzidine congeners and selected derivatives were largely completed in FY 1982. In genetic toxicology, emphasis was given to developing a protocol for enabling anaerobic metabolism of derivatives, a prerequisite for metabolic activation. Short-term *in vivo* toxicity and carcinogenesis studies were initiated. In FY 1983 long-term bioassays will begin on the dimethyl and dimethoxy congeners of benzidine and a derivative of each.

Fertility and Reproduction—Primary emphasis continues on: (1) Developing short-term tests in both reproductive toxicology and teratology, including both *in vivo* and *in vitro* teratologic test systems and a continuous breeding assay for fertility assessment, and (2) using existing methodology to evaluate toxicity. In the NCTR program in FY 1982, conventional teratology testing was completed on eight chemicals and was in progress on nine others. The interlaboratory behavioral teratology validation initiative continued using known behavioral teratogens. In the NIOSH program, a short-term *in vivo* teratology assay was being validated while *Drosophila* were being evaluated as a potential teratology screening system. Attention was focused on inhalation teratology studies. A chemical class study continued on the reproductive and developmental toxicology of the glycol ethers. In the NIEHS program, fertility assessment using continuous breeding is being evaluated as a test which may take half as long to complete and at half the cost of the three generation study yet may yield comparable information on fertility effects and, perhaps, more information about the affected sex or target organ for chemical insults.

Cellular and Genetic Toxicology

The cellular and genetic toxicology programs at the three NTP agencies in many instances have parallel objectives. The NIEHS through the Cellular and Genetic Toxicology Branch is directly involved in imporvement and validation of short-term tests for mutagens and carcinogens, the application of tests designed to detect and characterize chemicals that may pose carcinogenic or genetic risks to humans, and in basic research on mutagenesis and related genotoxic processes.

The NCTR program is focused on: (1) Modifying the heritable translocation assay (HTA) to imporve the test's precision and reliability while developing an in-house capability for performing HTA studies, and (2) using the primary hepatocyte/DNA repair system to detect potential genotoxicity of selected NTP chemicals.

The NIOSH program is concerned primarily with: (1) Monitoring airborne particles from coal liquefaction plants as well as complex mixtures and industrial chemicals found in workplaces for mutagenic activity, and (2) developing and using suitable assay systems for measuring mutagenic effects in biological samples for workers, such as urine and lymphocytes.

NIEHS; Cellular and Genetic Toxicology Branch

The goal of the Cellular and Genetic Toxicology Branch is to provide and integrated research and testing program using short-term test systems to evaluate the genetic toxicity of selected chemicals. The program is also aimed at developing an understanding of the mechanisms of cellular and genetic toxicity to provide a better basis for further tests system development and interpretation of test results. Emphasis is currently placed on short-term tests that measure mutagenicity and aneuploidy in microbial cells as well as mutagenicity, DNS and cytogenetic damage, and oncogenic transformation in mammalian cells. Test data are used to set priorities for further testing and in the design and interpretation of long-term animal carcinogenicity mutagenicity, and toxicity studies.

An implicit goal of the cellular and genetic toxicology effort is to establish a scheme of short-term testing which can be used to predict chemical carcinogenicity and mutagenicity and thereby reduce the need for *in vivo* assays or assist in setting testing priorities for long-term animal bioassays. However, for short-term tests to be predictive, several criteria must be fulfilled. These include both a knowledge of the reproducibility of individual test results and the relationship of the endpoint measured to carcinogenicity, mutagenicity, or other *in vivo* toxic effects. The application of a group of complementary tests which meet these criteria should ultimately result in an effective system for testing chemicals. An important part of the Branch program is to produce sufficient short-term test data, particularly across chemical classes, and to relate short-term test results to carcinogenic effects in animals and man. Even with the appropriate use of available test systems, some potential carcinogens (or cocarcinogens or tumor promotors) may not be identified, particularly those that do not induce damage leading to observable gene mutations or chromosomal changes. It is therefore important that we continue to develop new methods capable of detecting carcinogens not identified by the assays currently in use and to distinguish chemicals which "promote" tumor development. In order to accomplish these goals, it is important that the program

remains involved in and responsive to basic research developments together with their potential applications.

A substantial portion of Branch resources are committed to studies of chemically-induced mutations. These mutation studies can be divided into two categories: (1) Somatic cell; and (2) germ cell mutation studies. The major difference between the two is that mutations arising in germ cells can be transmitted to subsequent generations, while somatic cell mutations can only be expressed in the affected individual. *In vitro* test systems are considered relevant for somatic mutation because they measure mutagenicity in mitotically dividing cells. However, the information gained from tests using *in vitro* systems also has implications for heritable mutation risk because a chemical that is mutagenic *in vitro* has the potential to be mutagenic in germ cells *in vivo*. (By the same argument, germ cell mutagens are likely to be somatic cell mutagens.)

The portion of the program concerned with assay validation and testing is performed through extramural contracts, and interagency agreements while basic research, test development or modification, and data management and analysis activities are generally performed intramurally.

The key extramural contract activities include microbial (*Salmonella*), *Drosophila*, and mammalian cell mutagenesis testing; *in vitro* cytogenetic testing (chromosome aberrations and sister chromatid exchanges) and the development and evaluation of an *in vivo* mouse assay for chemically-induced cytogenetic damage; development and validation of a multiple endpoint mutation system in cultured mammalian cells; the development of assays for induction of aneuploidy in *Drosophila* and in yeast; an *in vitro* assay in mammalian cells for induced DNA damage; a dual laboratory coded compound evaluation of three mammalian cell transformation systems including Syrian hamster embryo (SHE) cells, SHE cells infected with Simian adenovirus (SA7), and retrovirus infected rat cells (the latter two systems measure chemical enhancement of viral transformation); and the final evaluation of the BALB/c-3T3 transformation assay.

A coordinated effort was initiated in fiscal year 1981 to assess the genetic toxicity of 19 chemicals which were priority candidate bioassay chemicals for 1982. Other developmental projects include an effort to develop a standardized protocol by which the frequencies of chromosome aberrations (CA's) and sister chromatid exchanges (SCE's) can be accurately and reproducibly measured in human lymphocytes with particular emphasis on understanding the sources of variation that may affect the measurement of these endpoints. Efforts to measure chemically-induced germ cell mutations in mice involve both the morphological and biochemical specific locus assays. Other developmental projects include identification of mutagens produced in cooked foods and an attempt to develop an assay for specific sequence transpositions in mammalian cells.

Intramural research efforts involve both prokaryotes and eukaryotes. Studies on *Salmonella typhimurium* tester strains include attempts to increase our understanding of the test system, to improve the sensitivity and efficiency of protocols currently in use and to use the *Salmonella* test as a tool to study *in vitro* and *in vivo* metabolism of mutagenic chemicals. Studies with the yeast *Saccharomyces cerevisiae* are directed at the meiotic process in an effort to better understand the genetic events of meiosis at molecular and enzymological levels; to determine the role of DNA repair mechanisms in mutational processes and to understand meiotic and mitotic recombination and DNA repair processes. Studies in *Drosophila melanogaster* are directed at characterization of the relationship between DNA repair and mutagenesis using mutagen sensitive mutants, many of which are defective in DNA repair. Such repair-defective mutants have also been combined with certain naturally occurring transposable elements to allow the study of interactions that occur in double mutant combinations. Alterations in gene structure and expression, which may result from chemical and physical toxic/carcinogenic agents, are also being analyzed in mammalian cells by recombinant DNA techniques with particular attention to potential gene or sequence transpositions. Finally, a new project has been added that is directed at the organ specificity of chemical carcinogens. Using liver and bladder cells, organ and species specificities of the chemical activation of several carcinogen classes are being investigated. Details of these respective projects are described in the accompanying project reports.

In summary, the Branch is directly involved in improvement and validation of short-term tests for mutagens and carcinogens, the application of tests designed to detect and characterize chemicals that may pose carcinogenic or genetic risks to humans, and in basic research on mutagenesis and related genotoxic processes.

Extramural Program

Fiscal Year 1982 Accomplishments and Fiscal Year 1983 Program Plans

Somatic Mutation and Cellular Transformation

• *In Vitro* Microbial Test Systems

Microbial Mutagenesis Testing—The *Salmonella typhimurium* test developed by Ames has been generally proposed as an initial screening test to identify mutagenic chemicals. *Salmonella typhimurium* tester strains, TA–98, TA–100, TA–1535, and TA–1537, are being used to test environmental and commercial chemicals for mutagenicity using a preincubation modification of the Ames *Salmonella* microsome assay in three laboratories (Case Western Reserve University, Dr. W. Speck; Microbiological Associates, Dr. S. Haworth; and SRI International, Dr. K. Mortelmans). All chemicals are incubated with tester strains in suspension prior to addition to soft agar and plating for detection of induced mutants. Exogenous metabolic activation is provided by liver S–9 preparations from Aroclor 1254-induced Sprague-Dawley rats and Syrian hamsters. All chemicals are tested blind at five doses, in triplicate, in each *Salmonella* strain. Also, all chemicals are retested at least one week following the first test. Results are entered directly into minicomputers at the test laboratories for transfer to the data-base system. Results have been received from these laboratories on a total of 692 test samples to date encompassing 545 unique chemicals. In fiscal year 1982, 308 tests were completed on 288 unique chemicals. These results are listed in Table 1.

Chemicals positive for mutagenicity or producing equivocal responses in *Salmonella* are analyzed for identity and purity and are tested in the *Drosophila* sex-linked recessive lethal test, as are a selected number of negatives. Equivocal chemicals are also tested in the *in vitro* cytogenetics assay along with selected *Salmonella* positives and negatives. Additionally, the *Salmonella* results are used along with other toxicology data by the NTP to assist in making decisions regarding further testing of the chemicals, and by NTP chemical managers to provide additional information pertinent to the evaluation of chronic studies. The *Salmonella* data is also used in the selection of chemicals for additional *in vitro* and *in vivo* genetic toxicology studies.

Numerous requests for information and data on specific chemicals tested have been received from Government personnel and from the private sector. All information requested has been provided, where possible.

FY 1983 Program Plans

In FY 1983, 330 tests are scheduled to be completed in *Salmonella*. Most of the chemicals to be tested will be selected from the listing in Table 2. Undoubtedly, some of these chemicals will not be tested due to unavailability, high cost or for other reasons while other chemicals may be added in response to urgent agency needs. (CONTACT PERSON: Dr. E. Zeiger).

Salmonella/Microsome Testing—Evaluation of Predictive Value of Carcinogenic Potential of Chemicals—This cooperative study, aimed at evaluating and validating microbial mutagenicity assays for their reproducibility and predictive value in assessing carcinogenic potential of chemicals, was completed in FY 1982. An overall evaluation is being compiled on intralaboratory variation, variation among the four laboratories, comparison of activation systems, and comparison with *in vivo* and other microbial test results. This evaluation will be completed in FY 1983. (CONTACT PERSON: Dr. E. Zeiger)

Modification of the Salmonella Test for Chemicals that may be Metabolized to Mutagens under Reductive Conditions—The standard protocols which use *in vivo* metabolic activation for mutagenesis studies are based on the assumption that the substances to be tested require aerobic metabolism for their activation. However, many substances, such as azo-containing dyes (including benzidine dyes), may be metabolized only by reductive pathways. These pathways occur in the mammalian liver *in situ* and in the mammalian gut through the action of the normal gut flora.

Therefore, azo-containing chemicals which may be metabolized to mutaghens *in vivo* may appear to be non-mutagenic when tested using the standard metabolic (aerobic) activation protocols.

The objectives of this contract are the development of *Salmonella* test protocols for detection of chemicals requiring reductive/anaerobic metabolism for expression of mutagenic activity, and the testing of chemicals for mutagenicity using these protocols. Among the chemicals tested will be a series of benzidine congener-based dyes. Urine samples from rats given benzidine dyes will also be tested.

Dr. Charles King, The Michigan Cancer Foundation, is investigating modifications of the *Salmonella* preincubation protocol which permit reductive metabolism followed by oxidative metabolism to measure the mutagenicity of benzidine-containing dyes. In addition, rat cecal flora preparations are being used in an attempt to develop an alternate activation system which is representative of the metabolism that occurs in the gut.

This contract has recently been initiated and the majority of effort so far has been the definition of different metabolic activation systems and the investigations of chemical methods for purification of benzidine-based dyes. The sensitivity of various mutagenicity protocols to benzidine, dimethylbenzidine, dimethoxybenzidine and some model benzidine metabolites in rat urine is being determined in preparation for a survey of urine from rats administered benzidine dyes.

FY 1983 Program Plans

After the protocols have been standardized, a number of benzidine congener-based dyes will be tested. In addition, urine samples from rats administered a number of benzidine congener dyes will be tested for mutagenicity. (CONTACT PERSON: Dr. E. Zeiger)

Estimating Toxicity in Salmonella Mutagenesis Assays—A limitation of the *Salmonella* mutagenicity assay is its limited ability to measure the toxicity of a test chemical. The number of revertants formed is directly related to the dose of the chemical only if the chemical is not toxic to the cells. If the compound is both mutagenic and bactericidal, then the number of revertants observed may be a function of both properties. For a mutagenic compound, high toxicity may distort the mutagenic response of the cells and make potency calculations unreliable. The objective of this work is to develop reliable methods to determine the toxicity of a chemical in the *Salmonella* assay and to develop methods to use this information in the interpretation of results.

Two approaches were taken to estimate the toxicity of a chemical to the cells. In the standard *Salmonella* assay, strains with known point mutations in the histidine operon form colonies upon reversion to prototrophy. The *his*$^+$(mutant) macrocolonies appear against a thin film of *his*$^-$ microcolonies. These microcolonies are attributable to the small quantity of histidine present in the medium. These auxotrophs grow to form microcolonies until histidine is depleted unless the test compound is toxic. The number of *his*$^+$ revertant macrocolonies is related to the mutagenic properties of the chemical. The number and size of the background microcolonies is a function of its toxicity.

In the first approach, the number of microcolonies that survive treatment with a test chemical is being measured with an automatic colony counter. The greater the toxicity, the fewer and larger the colonies. Toxicity data are derived directly from the "mutagenicity plate" and the decision to obtain toxicity information need not be made until after the experiment is performed.

This toxicity assay employs a second plate designed to mimic the environment of the plate in which revertants are counted (mutagenicity plate). Two sets of strains, isogenic to the five *Salmonella* tester strains, have been constructed. One set consists of histidine double mutants unable to revert to histidine independence; these are called "filler cells". These "filler cells" are used to mimic the 10^8 bacteria that are normally plated in the mutagenicity assay. The other set consists of specially constructed *his*$^+$ bacteria that are plated at a concentration of about 500 colony forming units in the presence of the 10^8 "filler cells." The "filler cells" stop growing or die upon depletion of minimal histidine and simulate the background growth of the mutagenicity test. The *his*$^+$ bacteria form colonies simulating histidine revertants. Survival is calculated from the number of *his*$^+$ colonies at the end of the experiment. This "toxicity plate" is run in parallel with the "mutagenicity plate".

The importance of the "filler cells" in the toxicity test was demonstrated in a series of experiments in which the concentration of the "filler cells" was altered. The survival of the *his*$^+$ cells varied with the varying concentrations of the "filler cells". Generally, survival increases with increasing concentrations of "filler cells". This result suggests that measurements of toxicity in which 400 cells are plated and survivors counted may not accurately estimate the toxicity observed on the "mutagenicity plate".

Experiments have been designed to determine whether toxicity greatly affects the number of revertants observed. Preliminary results suggest that below a threshold toxicity the number of revertants are not seriously affected by toxicity. However, above the toxic threshold the number of revertants rapidly decreases. (CONTACT PERSON: Dr. W. Caspary)

• *In Vitro* Mammalian Test Systems

In Vitro Mammalian Cell Mutagenesis—This study was designed to evaluate the L5178Y mouse lymphoma cell system as an *in vitro* assay for detecting mutagenic chemicals. The evaluation includes protocol development, determination of reproducibility of responses under field conditions, development of quality control standards, development of response categories based on mathematical definitions and development of a data management system including statistical support to aid in the interpretation of results.

Two laboratories tested the same compounds under code. Based on this work, a reliable biological assay protocol was established. Cultures are exposed to the test chemical for four hours at preselected doses, then washed and the cells are placed in 20ml of growth medium at a density of $3x10^5$ cells/ml to allow recovery, growth and expression. At the end of the first day of expression the cells are counted. The cells, are then adjusted to a density of $3x10^5$ cells/ml and placed in 20 ml of growth medium. At the end of the second day of expression the cells are counted. Ten milliliters of cells are seeded in soft agar plates with selection medium (trifluorothymidine) and the resistant (mutant) colonies are counted after a ten- to twelve-day incubation period (total mutant counts). To determine the actual number of cells capable of forming colonies, 600 cells from the cell suspension are also cloned in normal (nonselective) agar plates. The colonies are counted after ten to twelve days incubation (total viable clones).

The measured mutant frequency, defined as the mutant count divided by the product of the cloning efficiency and the number of cells plated for mutant count, is the critical experimental parameter to be derived from this assay. The cloning efficiency, which is the probability that a cell grows in the agar plate, is defined as total viable clones/600 cells where 600 cells are plated for viable count.

The assay protocol requires that doses be done in duplicate, positive controls in triplicate, and solvent controls in quadruplicate. Experiments must be repeated to assess the reproducibility of the cellular response, though the doses used may be different in the replicate experiment. Agreement of responses within and between laboratories was greater than 90%.

A major effort was also initiated to establish a data management system for the mouse lymphoma system. This consists of the development of quality control criteria, experimental response categories, test response categories and statistical support to aid the interpretation of data.

The quality control criteria are based on an analysis of over 400 experiments performed at SRI International and Litton Bionetics. Quality control criteria are those minimum criteria that must be met before an experiment is evaluated further for its response. Experiments that meet these minimum criteria may be rejected upon further evaluation.

The response categories are defined in terms of the significance of an individual dose and the significance of the trend of the dose response. For a response to be considered *positive*, both factors have to be significant. A *questionable* response lacks one of these factors. A *not positive* response lacks both factors. Significance is defined in terms of a statistical model developed to aid in the interpretation of the data. The response categories for a test are based on an evaluation of the results of the replicate experiments.

The statistical approach is based on an estimate of the variance of the mutant frequency, the measured parameter obtained from this assay. This estimate is made by developing a mathematical model of the biological protocol. The mathematical model

relates the mutant progenitor frequency (MPF), which is the number of cells with genetic damage at the TK locus after exposure to the test chemical, to the mutant frequency (MF):

$$MF = r_s \times r_c MPF$$

where r_s is the ratio of suspension growth of the mutant and mutant progenitor population to that of the wild type population and r_c is the ratio of cloning efficiencies of these populations. The estimated variance is then applied to making statistical interpretations of the mutation assay data.

Test results for chemicals tested in the L5178Y mouse lymphoma cell system during FY 1982 are given in Table 3. (CONTACT PERSON: Dr. W. Caspary)

Mouse Lymphoma L5178Y Forward Mutation Assay—Based on the results of studies on the mouse lymphoma system, the successful development of a working protocol and an effective data management system, the program issued a new RFP to test chemicals and to build a data base from results of this mammalian mutagenesis assay. Recently, it has been reported that the occurrence of small colonies from mutagen-treated cultures represents the induction of chromosomal damage. At present, however, evidence is not conclusive that measurements of small colonies are necessarily a measure of chromosomal mutation. The ability to measure chromosomal damage with an assay that is demonstrated to measure point mutations would be beneficial and cost effective. The purpose of this contract initiative is to test the ability of the mouse lymphoma cell system as a reliable indicator of gene and chromosomal mutation

FY 1983 Program Plans

It is projected that testing will be completed on 70 chemicals in the L5178Y mouse lymphoma cell system in FY 1983. Most of the chemicals will be selected from the listing in Table 4. (CONTACT PERSON: Dr. W. Caspary)

In Vitro Cytogenetics in Mammalian Cells—Chromosome aberrations (CA's) and sister chromatid exchanges (SCE's) are used as indicators of genotoxic effects of chemical agents. While the literature is extensive on the nature of cytogenetic events and the effects of particular chemicals, there have been few attempts to develop a highly reliable and reproducible system for detecting chemically-induced cytogenetic damage. A protocol using Chinese hamster ovary (CHO) cells has been developed in a dual laboratory study over the past two years. Several coded compounds were examined using this protocol with comparable results obtained in the two laboratories. To enhance the reliability of the system, several control and test experiments are being done to determine the best statistical approach to the data. It is clear that variability within an experiment is very low, thus greatly enhancing the sensitivity of the assays.

An essential feature of this program is the examination of a large number of chemicals. Testing was completed on 67 samples, consisting of 66 unique chemicals, in FY 1982. Results are given in Table 5. The use of the assay has now been extended to a third laboratory.

FY 1983 Program Plans

It is anticipated that testing will be completed on 100 samples. Most of the chemicals to be tested in CHO cells for detection of chromosome aberrations and sister chromatid exchanges will be selected from the listing in Table 6. In addition, the results of previous testing will be published. (CONTACT PERSONS: Dr. E. Zeiger and Dr. M. A. Resnick)

Development and Validation of a Multiple Endpoint Mutation System in Cultured Mammalian Cells—Because they can both produce human genetic disease, two major types of effects of concern in genetic toxicology are gene and chromosome mutations. Genotoxic chemicals usually induce both types of effects but the extent to which gene mutations or chromosome mutations are induced by any individual chemical is not predictable at this time.

Typically, induction of gene mutations in mammalian cells is detected in one of a number of different cell lines and the induction of chromosome mutations is usually detected using the same or different cell lines in laboratories specializing in cytogenetics. As a result, it is difficult to determine the relative frequencies induced and the effective doses. Yet a comparison between gene and chromosome mutations as a function of chemical dose is needed as a reference when moving from results obtained with cells in culture to predicted effects in treated animals. Such an extrapolation is necessary when only one type of mutagenic effect can be measured *in vitro* but it may be important to estimate the sum of both effects.

Two contracts were recently awarded to develop, refine and test a protocol (or series of protocols) using mammalian cells in culture to determine the frequencies of chemically-induced gene and chromosomal mutations. The possibility of determining other genetically-related endpoints such as sister chromatid exchange (SCE), DNA damage and repair, DNA adduct formation and aneuploidy are being considered. Once an acceptable protocol is developed, a number of coded chemicals will be tested.

Allied Corporation (Dr. G. Brewen) is investigating two cell lines, a human epithelial cell, HSBP, and Chinese hamster ovary (CHO) cells; Bioassay Systems Corporation (Dr. K. Loveday) is using a different CHO line. Both laboratories will standardize the culture and treatment conditions for each endpoint. The majority of efforts has been to define the optimum culture and treatment conditions for the different cell lines and to develop protocols for synchronizing the cells. Preliminary experiments have been run to determine the responses of the cells to a standard mutagen.

FY 1983 Program Plans

Optimization of the cell systems will be continued and a number of mutagens will be used to induce gene mutations (at the HGPRT, and possibly the OUA locus), chromosome aberrations (CA's), SCE's and aneuploidy. Measurements of DNA damage and repair and DNA-adduct formation will be made. In addition the effects of liquid holding on the mutagenic and other responses will be determined. (CONTACT PERSON: Dr. E. Zeiger)

In Vitro Mammalian Cell Transformation—For many classes of chemicals there is a high degree of relationship between the ability of the chemical to induce neoplastic transformation in certain mammalian cells in culture and the concomitant induction of tumors *in vivo*. Several cell culture systems including primary cultures, continuous lines, and virus infected cells have been used to detect potentially carcinogenic chemicals. Included among these are the BALB/c3T3 cell line currently being evaluated by the NTP; the C3H10T½ cell line which is being evaluated through the Division of Cancer Cause and Prevention, NCI; and the BHK cell line which is being studied in Europe. Three other systems which have been evaluated to some degree include: primary Syrian hamster embryo (SHE) cells; and two viral mediated transformation systems: SHE cells infected with Simian adenovirus 7 (SA7), and rat cells infected with Rauscher leukemia virus (RLV). However, sufficient across-chemical and across-system data do not exist to permit an evaluation of which system or systems may be most useful and to determine what characteristic advantages or limitations each system may have in the identification of potential carcinogens. Therefore, we have initiated a multiple laboratory coded compound evaluation of these latter transformation assays.

The initial objectives of this project involve the development of a standardized protocol, indetification of the sources of intra-and interlaboratory variability, and establishment of interlaboratory reproducibility of the respective test systems. Results of previous contract supported studies and published results have shown that these assays detect chemical carcinogens. This project is an effort to systematically evaluate and compare the three assays for oncogenic transformation and to determine which system or systems may be most applicable. In the SHE assay, cells are collected, frozen, characterized for their response to known carcinogens, and then exposed to concentrations of a test chemical. The exposures are based upon preliminary tests for toxicity; after 7 to 10 days the treated cultures are examined for foci of transformed cells. In the SHE/SA7 assay, the cells are prepared from pooled 13-day gestation embryos. Transforming virus is obtained from standardized stocks with a defined plaque forming unit/focus forming unit (PFU/FFU) ratio and the cells are infected with virus prior to or after treatmemt with doses of the test chemical. These doses are selected on the basis of acute toxicity. The treated cultures are examined for foci of transformed cells 7 to 10 days after exposure. In the retrovirus infected rat cell system (RLV), infected (2FR450) and uninfected (2FRN) cell lines were recovered from passage 7 frozen cells. The cells are first exposed to chemicals to determine acute toxicity. Subsequently, selected doses are applied and the cells are tested for neoplastic

transformation by the aggregation (survival) assay which detects the preferential ability of transformed cells to survive under the test conditions.

For the first year of this project, the major goals included: (1) Standardization of test protocols; (2) identification of key test reagents and materials; (3) selection of optimal doses of reagents and materials following preliminary testing; (4) acquisition of sufficient quantities of critical reagents (from identical sources by the respective contract laboratories; and (5) testing of representative chemicals, positive and negative for transformation, for toxicity and transformation to establish interlaboratory reproducibility of the method. Each contract laboratory has the responsibility of focusing on key components of the system, e.g., identification of suitable frozen cell pools, identification of optimal serum and medium stocks. Progress has been made in all areas, although some technical aspects require further evaluation before final protocols can be defined. Preliminary toxicity and transformation assays of the standard chemicals are being performed in the test laboratories and the results of these independent tests will be the basis for determining the degree of interlaboratory reproducibility.

FY 1983 Program Plans

One of the major technical issues have been resolved and a standardized test protocol has been adequately developed and validated, all of the laboratories will begin to test coded chemicals. The results of these studies will be used to determine whether *in vitro* transformation systems offer significant advantages in time and cost over animal bioassays for carcinogens. In addition, the systems will be evaluated for their ability to provide information for mechanistic inferences on the toxicity of chemicals. It is important that the use of such test systems include the application of standardized protocols which provide for a high degree of interlaboratory reproducibility and an understanding of the biological limitations of the test systems. (CONTACT PERSON: Dr. R. W. Tennant)

In Vitro Transformation of BALB/c–3T3 Cells—The purpose of this project is to develop and standardize methods for performing *in vitro* transformation assays with BALB/c–3T3 cells. The BALB/c–3T3 neoplastic transformation assays is used to measure the ability of chemical agents to induce alterations in a population of cells (derived from mouse embryo fibroblasts) from a pattern of controlled monolayer growth to one exhibiting foci of disorientation and piled up growth against a background monolayer. Toxicity is used to determine the high dose (10–20% cell survival) at which a chemical will be tested. Dishes for transformation are plated with cells expanded from frozen stock at 10^4 cells per 60 mm Falcon plate. Twenty-four hours later, the test chemicals are added to the appropriate plates in the final volume of 0.1 or 0.2 ml. After a three-day treatment, the medium is removed and the plates are washed and replenished with fresh medium and incubated for an additional four weeks. The medium is changed twice weekly during the incubation period. At the end of the incubation period, the plates are fixed with methanol and stained with 2–3% Giemsa or May-Grumwald-Giemsa and then scored for foci of transformed cells.

A number of factors that affect the quantitative assessments of transformation were examined. The results showed that the survival of cells in mass culture is invariably greater at toxic doses than one would expect from extrapolation of direct cloning data. Also, the number of cells surviving till the end of treatment was dependent on the source of insult and was not reflected in the direct cloning data. These observations suggest that the use of direct cloning data to estimate the number of cells at risk in the transformation assay grossly underestimates the actual population of cells exposed to the test chemical.

A study was conducted to correlate anchorage-independent growth and *in vivo* tumorigenicity with progression of Type III foci in cell passage. It was found that the transformed population (Type III foci) acquired the ability to grow in soft agar at the earliest passage. However, although most Type III cell populations grew tumors in irradiated syngeneic animals, the cell populations did not exhibit quantitative correlation of growth in soft agar with tumorigenicity. Tumorigenicity of transformed populations contrary to growth in soft agar, was dependent on cell passages in culture. This suggests that populations of clone I–13 contain premalignant cells, which develop tumorigenic potential after extensive passage in cluture.

Due to the fact that growth in soft agar was not found to be a consistent marker of oncogenicity for BALB/c–3T3 cells, another proposed marker, basal cathepsin C activity, was examined. However, this marker was not found to correlate with either the ability of populations to grow in soft agar or to grow tumors in animals.

In comparative tests run between cells of the I–13 clone and other cells, there were varied results. Cells from the I–11 clone showed no spontaneous background transformation frequency, but were less sensitive to chemical treatment. Clone I–11 cells also showed little response when their enhancement with promoter was attempted. A comparison of the metabolism of methylcholanthrene (MCA) by I–13 and C3H–10½ cells showed differences in kinetics between the two populations. However, no simple relationship between the rate of MCA metabolism and transformation of cells by MCA could be obtained.

The testing of seventy coded samples has been completed using the BALB/c–3T3 system and the data obtained are currently being analyzed.

Additionally, studies were designed to investigate the effects of various activation systems. Preparations of rat liver 900 x g supernatant fraction (S–9) proved toxic. Experiments with primary rat hepatocytes were designed so that only minimal modifications would be made on the established standard protocol for the transformation assay without metabolic activation. The target BALB/c–3T3 cells were plated at 10^4 cells/plate either prior to or after plating of primary rat hepatocytes. Treatement with chemicals was carried out for 1–3 days. The remainder of the procedure was the same as that used in assays without metabolic activation. None of the procarcinogens tested (N-2-fluorenylacetamide, 2-aminofluorene, dinitrosopiperazine and nitrsos-2,6-dimethylmorpholine) appeared to be activated by the hepatocytes to transform BALB/c–3T3 cells in a consistant manner.

A second approach was designed in which protocols followed were similar to those used in mammalian mutagenesis assays. Two sets of experimental conditions were tested, differing primarily in the density of target cells. Under one condition, BALB/c–3T3 cells were plated at or near confluence. Primary rat hepatocytes were then plated on top of the target cells. This plating condition facilitates maximum contact between BALB/c–3T3 cells and hepatocytes, where the monolayer or BALB/c–3T3 cells serves as a feeder layer for attachment of hepatocytes and maintenance of their metabolic capabilities. Alternatively, BALB/c–3T3 cells were plated at a moderately high density (2×10^5 plate), but still being in the exponential growth stage, they were unable to undergo division during the chemical treatment period. Under both conditions, the cells were trypsinized and replated at a low density (10^4/plate) after the chemical exposure period to allow for development of foci as in a standard transformation assay. The results suggested that for the transformation of BALB/c–3T3 cells, primary rat hepatocytes were not very effective in the activation of carcinogenic nitrosamines. (CONTACT PERSON: Dr. W. Caspary).

• Special Applications—*In Vitro* and *In Vivo* or *In Vitro* Mammalian Testing

Mutagens Formed from the Cooking of Foods—The objectives of this interagency agreement with the Department of Energy at Lawrence Livermore National Laboratory are to identify the mutagens produced in foods cooked under approximately normal household conditions and determine the mechanism(s) of mutagen formation, assess the spectrum of genetic toxicity caused by these mutagens using *in vitro* and *in vivo* short-term tests, devise strategies to limit or prevent mutagen formation and to estimate the normal dietary intake of these mutagens.

Hamburger is fried under normal cooking conditions, extracted and the extracts tested for mutagenicity using the *Salmonella* plate test with S–9 preparations from mice, rats, and hamsters pretreated with various inducers. Extracts exhibiting the highest levels of mutagenicity are separated in an attempt to isolate and identify the mutagenic components. Similar work is being done with other fried meats, fried eggs and beef extracts. Mutagenicity studies are being performed in *Salmonella* and in cultured CHO cells. Metabolism studies are being done *in vitro* using S–9 fraction in the incubation vessel.

A series of extraction procedures have been developed for hamburger which greatly increase the yield of extracted mutagen. The hamburger mutagens require metabolic

activation and revert only those *Salmonella* strains which are reverted by frameshift mutagens. Studies on the kinetics of hamburger mutagen formation showed that the cooking temperature, rate of heat transfer and level of dehydration all affect the level of mutagenicity. Following a Japanese report which identified imidazoquinoline (IQ) and methylimidazoquinoline (MeIQ) as beef mutagens, studies were performed, using preparative TLC followed by GC/MS and HPLC. A number of mutagenic fractions have been identified; the presence of IQ in one of the fractions has not been confirmed. Cold IQ and radiolabelled IQ have been synthesized and chemistry and mutagenicity studies have been initiated. Methyl-imidazoquinoline will be synthesized in the near future. Extracts will be spiked with IQ and its location in the fractions identified.

A number of metabolites of ^{3}H-IQ have been separated from an *in vitro* S–9 system. The metabolism of IQ is mediated by cytochrome P/448. Only one of the metabolites, as yet undefined, is a direct mutagen for TA1538. Purification and identification of these metabolites is underway.

Trp–P–2 and IQ are both potent mutagens in *Salmonella*. Trp–P–2 is a potent mutagen in mammalian cells (CHO), inducing gene mutations, SCE's CA's and micronuclei, but IQ was only weakly positive for these endpoints, and only in repair-deficient CHO cells. These results are in contradiction to the relative *Salmonella* results and studies are underway to resolve this problem. CHO cells will be treated with the direct mutagen metabolite of IQ.

Boiling beef to produce stock results in the formation of a product that is mutagenic to *Salmonella* in the presence of liver S–9. The highest level of mutation is found with extracts prepared at pH4 and pH9. Results from proteolytic digests of beef extracts implied that soluble amino acids or polypeptides could influence the formation of mutagens. Enhancement of mutagenic activity at pH4 is optimal after addition of tryptophan and creatinine PO_4 and results from reactions with components of less than 500 molecular weight in the soluble portion of the beef extract. Addition of ferrous sulfate further stimulates mutagen formation. The mutagens in boiled beef and Difco beef extract have been separated chromatographically and also have been reacted with nitrite. Results are consistent with the presence of at least two mutagenic components, one of which may be IQ.

Extracts of fried eggs were also mutagenic, although the extraction and purification procedure that was optimal for fried beef was not optimal for fried egg. Studies are underway to identify the optimum extraction procedure for fried eggs and to determine why the mutagenic activity of egg extract appeared to be suppressed by the beef extraction procedure. (CONTACT PERSON: Dr. E. Zeiger)

Rapid in Vitro Test Project—This project was designed to provide genetic toxicity data to aid in setting priorities for chemicals to be entered into the long-term carcinogenicity bioassays and for use by NTP experimental disign groups. An *in vitro* testing capability was developed to utilize five broad classes of genetic toxicity assays. Use of NTP resources for implementation of this project was coordinated in a manner that utilized both ongoing and new contracts to perform the assays. One-year interagency agreements were initiated with the Environmental Protection Agency and the National Center for Toxicological Research to perform the following assays among three of the five classes indicated:

Class I: Gene mutations in mammalian cells: The L5178Y mouse lymphoma cell TK$^+$/$^-$ mutation assay

Class II: Mammalian cell transformation assay:

a. The BALB/C–3T3 *in vitro* transformation assay;

b. The enhancement of DNA virus transformation by chemical carcinogens using Syrian hamster embryo (SHE) cells and Simian adenovirus (SA7) assay.

Class III: DNA damage/repair:

a. The *in vitro* unscheduled DNA synthesis (UDS) in rat liver primary cell culture assay;

b. The *in vivo—in vitro* unscheduled DNA synthesis (UDS) in rat liver primary cell culture assay.

Twenty-five to thirty chemicals have been assigned and scheduled for testing in the assays cited above. The chemicals include those 19 chemicals selected in FY 1982 for testing in the prechronic phase of the long-term carcinogenesis bioassay. The testing of these same 19 chemicals has also been coordinated by the project officer in two other classes of genetic toxicity tests which are performed through ongoing Branch contract projects.

These two classes are:

Class IV: Gene mutations in bacteria: The *Salmonella*/microsome test.

Class V: Chromosome damage in mammalian cells: The *in vitro* cytogenetics assay in Chinese hamster ovary (CHO) cells for detection of chromosome aberrations and sister chromatid exchanges.

Results on the 19 bioassay-candidate chemicals are expected to be completed in FY 1982.

FY 1983 Program Plans

Emphasis will continue to be placed on providing genetic toxicity test information in a timely manner on chemicals to be considered for the long-term carcinogenesis bioassays, and for use by NTP experimental design groups. A capacity for testing 25–30 chemicals/year will be implemented through both existing and new contracts, and coordinated so that the test chemicals can be evaluated in the five classes of *in vitro* short-term tests listed above. These five test components comprise a broad range of potential mechanisms of genotoxicity. The choice of these systems does not constitute an "NTP battery" but rather represents a selection of available tests. New test systems will be used to supplement or replace these existing tests when data sufficient to justify such changes become available. The results of this project will provide important and useful information on the genetic toxicity of chemicals of priority interest to the Program. (CONTACT PERSON: Dr. J. W. Spalding)

DNA Damage and Repair—In Vitro Unscheduled DNA Synthesis (UDS) in Rat DNA Liver Primary Cell Culture—The induction of DNA repair measured as unscheduled DNA synthesis (UDS) in non-dividing cells has been shown to be a useful indicator of the genetic toxicity of chemicals. Several different cell types and cell lines, including those of human origin, have been utilized for the measurement of UDS. The UDS assay, which employs primary cultures of rat hepatocytes, offers the advantage of a short-term test using a metabolically competent target cell, thus eliminating the need for exogenous activation preparations or the presence of other cell types.

In vivo—In vitro UDS in Primary Rat Hepatocyte Culture—The *in vivo—in vitro* hepatocyte DNA repair assay Carcinogenesis *1*, 821–825, 1980) represents an important modification and extension of the *in vitro* rat hepatocyte DNA repair assay, since it involves the treatment of whole animals rather than the administration of chemicals directly to cells in culture. The *in vivo—in vitro* assay permits the administration of the test chemical to the animal in a manner analogous to the route of exposure in humans. Direct administration of the chemical to the animal also has the advantage that important factors related to uptake, metabolic activation, distribution, detoxification and elimination which are absent from *in vitro* systems are included. After appropriate treatment intervals, primary hepatocyte cultures are prepared from the treated animals, and the incorporation of ^{3}H-cultured cells serves as an indication of the degree of an induced DNA repair response. While the number of chemicals tested to date in this assay is small, it has been demonstrated that this *in vivo—in vitro* assay is responsive to the genotoxicity of some classes of chemicals, e.g., the nitroaromatics, to which the *in vitro* UDS rat primary hepatocyte culture assay does not respond.

FY 1983 Program Plans

It is planned to evaluate 30 test chemicals per year in both the *in vitro* and *in vivo—in vitro* UDS rat primary hepatocyte culture assays. These assays will provide another test component for the evaluation of chemicals being considered for long-term bioassays and for use by NTP experimental design groups. In addition, the responsiveness of the two DNA damage/repair assays to different classes of chemicals with genotoxic potential will be compared relative to each other and to other assay systems. (CONTACT PERSON: Dr. J. W. Spalding)

• *In Vivo Mammalian Test Systems.*

Rodent Bone Marrow Cytogenetics—Through collaboration between two laboratories, methods are being developed for the routine screening of chemicals for the induction of chromosome aberrations (CA's) and sister chromatid exchanges (SCE's) in mice. It is known that CA and SCE both are endpoints associated with the genetic effects induced by many chemical mutagens and carcinogens. As such, these endpoints are potentially important as predictors of

chemical genotoxicity, particularly when conducted in whole mammals where factors such as metabolism, distribution, excretion, etc., are more reflective of the human situation than are *in vitro* studies. The studies provide direct evidence of genotoxic effects in laboratory mammals, which can be compared to similar effects in exposed humans. Further, the studies are being carried out in the mouse strain ($B6C3F_1$) used in the NTP carcinogenesis bioassay program, and, hence, will permit a more direct comparison of induced somatic-cell genetic effects with carcinogenic effects. In addition to providing a potential screen for carcinogens, comparisons may permit a better understanding of the relationship between induced cytogenetic effects and induced cancer. The primary objectives of this study are to develop and assess a testing protocol for the simultaneous determination of CA and SCE and to test approximately 40 chemicals using the protocol.

Although the basic methods for conducting these tests (*Mutat. Res. 87*, 143–166, 1981; *Mutat. Res. 87*, 17–62, 1981) are available and have been used extensively, there remains a need for an acceptable protocol of demonstrated utility for use in routine testing. The protocol under development will use current technology to apply accepted techniques for determining the frequency of CA and SCE in the bone marrow cells of $B6C3F_1$ mice.

In the preliminary phases of the study, male mice, 8–10 weeks old, are treated by intraperitoneal injection with the test compounds. Chromosomal aberrations are determined in bone marrow cell preparations. Sister chromatid exchange frequencies and cell proliferation kinetics are determined with 5-bromodeoxyuridine (BU) substituted chromosomes. Bone marrow cell proliferation kinetics are being investigated after administration of Mitomycin C, 7, 12-dimethylbenzanthracene, and cyclophosphamide. These same reference mutagens are being used to investigate the effect of the time-of-administration of the test agent relative to BU administration. A computerized data management system has been developed and is being used for storage of experimental details and storage and analysis of data.

It is anticipated that by the end of FY 1982, a testing protocol will be available and can be assessed using coded chemicals in the two laboratories. Following the successful outcome of that assessment, the laboratories will begin screening chemicals for cytogenetic effects.

FY 1983 Program Plans

In FY 1983 the testing protocol will be assessed through testing in both laboratories of five coded chemicals of known cytogenetic activity. Following the successful completion of this phase, ten NTP selected chemicals will be tested for cytogenetic activity. (CONTACT PERSON: Dr. M. D. Shelby)

• Special Applications—Human Genetic Monitoring.

Human Lymphocyte Cytogenetics—Determination of cytogenetic damage in peripheral lymphocytes offers a practical means of detecting exposures of humans to genotoxic agents. The basic technique has been used for many years to detect human exposure to ionizing radiation. It has been applied to a lesser extent in connection with exposures to chemical agents. The protocols for the cytogenetic studies that have been performed on persons exposed to chemical agents have been varied, usually precluding cross comparison of results. They also often have been flawed in one respect or another so that definite conclusions could not be made. Thus, the development of a standard protocol for cytogenetic monitoring is needed, as is background information on the frequencies of chromosome aberrations (CA's), particularly chromatidtype aberrations, and sister chromatid exchanges (SCE's), their variability, and the sources of variability. Such information is needed for the proper design and interpretation of cytogenetic studies of populations exposed to potential chromosome damaging agents. (Guidelines for Studies of Human Populations Exposed to Mutagenic and Reproductive Hazards, Arthur D. Bloom (Ed.) March of Dimes Birth Defects Foundation, 1981, 163 pp.).

A project has been undertaken in which two laboratories are collaborating: (1) To develop and standardize a protocol by which the frequencies of CA's and SCE's in human lymphocytes can be accurately and reproducibly determined; and (2) to investigate the variation of these frequencies as affected by the protocol and, to the extent possible, by the circumstances of the individuals from whom blood samples are obtained.

It has been demonstrated that blood samples can be stored at 4°C, shipped by airfreight and cultured within 24 hours without a significant loss in growth potential of the lymphocytes. A reduced quality of chromosome differentiation for SCE analysis was noted in shipped samples. This appeared to be a result of shipping/handling and not of storage since the phenomenon was not observed in cells maintained at 4°C for 24 hours at the site of collection. Reproducibility of scoring both SCE and CA on common slides has been demonstrated at the two laboratories. Determinations of first, second, and third division cells in 48 hour cultures (the fixation time normally chosen to ensure scoring of first division cells) produced somewhat surprising results in that an average of 16% of cells are in their second mitosis at this time.

FY 1983 Program Plans

Once the protocol has been defined, agreed upon and demonstrated to provide reproducible results in the two participating laboratories, the second phase of the study will begin. Phase two is intended to investigate and to the extent possible, identify sources of variation in the frequencies of CA and SCE. Variables to be investigated include age, sex, and race. Cytogenetic analyses will be conducted on approximately 150 individuals in FY 1983. (CONTACT PERSON: Dr. M. D. Shelby)

Germ Cell Mutation

• Heritable Effects—Nonmammalian Assays.

Drosophila Mutagenesis Testing—Standard sex-linked recessive lethal and reciprocal translocation tests in *Drosophila melanogaster* are being used in three laboratories (Bowling Green State University, Dr. R. Woodruff; Brown University, Dr. S. Zimmering; and University of Wisconsin at Madison, Drs. R. Valencia and S. Abrahamson). Chemicals are selected based on results obtained from previous mutagenicity tests using *Salmonella*. Chemicals are administered in feed for the sex-linked recessive lethal test. If the results are negative, the test is repreated using injection; if the results are again negative, the chemical is considered nonmutagenic in *Drosophila* for the endpoint. If the results are positive, the chemical is tested in the reciprocal translocation test using the means of administration which gave the positive result. In the reciprocal translocation test, sperm is stored to enhance the ability to recover chromosome breaks induced by the chemicals. Results are entered on data forms and transferred to a computerized data base system. Results have been received on a total of 52 test samples to date, which includes 47 unique chemicals. Results for 48 chemicals tested in FY 1982 are shown in Table 7.

FY 1983 Program Plans

Testing will continue on these contracts with testing expected to be completed on 75 chemicals. Most of the chemicals tested in *Drosophila* will be selected from the listings in Table 8. In addition, the results from initial testing will be published. (CONTACT PERSON: Dr. J. Mason)

Aneuploidy Test Systems—Three systems are being developed for the monitoring of chemically-induced aneuploidy, a genetic endpoint not monitored by other mutagenesis test systems. Two of these systems measure germinal or meiotic events in *Drosophila* and the yeast *Saccharomyces cerevisiae*, and a third follows mitotic aneuploidy in yeast. For purposes of comparison, these systems will also have the capability of monitoring chemical effects on recombination and mutation induction. These assay systems in combination with other short-term tests expand the opportunities to evaluate chemically-induced genetic damage. The use of whole animal and single cell systems will allow interspecies comparisons in terms of germinal events. Since the relevance and the mechanism of mitotic and meiotic aneuploidy may differ, development of the two systems within the same organism will prove useful.

FY 1983 Program Plans

The development stages are nearly complete and during the coming year testing of chemicals, known or suspected to induce aneuploidy, for purposes of validation will begin. (CONTACT PERSON: Drs. M. Resnick and J. Mason)

• Heritable Effects—Mammalian Assays.

Mouse Morphological Specific Locus Study—Exposure of humans to mutagenic chemicals poses the risk of induced mutations in germ cells, the transmission of these mutations to subsequent generations and an increase in frequency of genetically determined diseases in the human population. Determining the risk of such

health effects must presently be approached through whole mammal assays since tests involving lower organisms or mammalian cells *in vitro* have the disadvantages of not addressing heritability of induced mutations, germ cell stage specificity, and special metabolic, physiological and transport factors that might exist during the reproductive cell cycle. The morphological specific-locus method is, at present, the most practical and reliable means available in mammals for detecting induced heritable mutations.

The test employs two strains of mice to detect mutations at seven loci that affect visible characteristics (coat color, eye color, and ear shape). In the standard test (Cold Spring Harbor Symp. Quant. Biol. *16*, 327–336, *1951*), C3Hx101 hybrid males homozygous for the wild-type alleles at the seven loci are treated with the test agent. Treated males are mated to T-stock females that are homozygous for recessive mutant alleles at the seven loci. Offspring are expected to be heterozygous at the seven loci and appear as wild-type having inherited dominant wild-type alleles from their fathers. Variant animals will appear if the male germ cell carried a mutant allele (either spontaneous or induced). Offspring are scored at weaning and variants are tested by breeding studies to determine the genetic basis for their variation.

The two basic objectives of this project are: (1) To conduct an in-depth study of chemically-induced mutation processes in mammalian germ cells using N-ethyl-N-nitrosourea (ENU) as a model mutagen; and (2) to investigate five environmentally significant chemicals for germ cell mutagenicity. In the past year, major emphasis has been on the use of ENU to investigate germ cell mutagenesis. A dose response curve has been determined for ENU-induced mutations in spermatogonia at eight doses from 0 to 250 mg/kg. There is a strong indication that the curve is not linear for points below 100 mg/kg, falling below a straight line fit to the control value. Fractionated dose experiments have shown that 10 injections of 10 mg/kg ENU yield a much lower frequency of mutants than a single injection of 100 mg/kg indicating an efficient repair of ENU-induced damage. Experiments are underway to investigate further male post meiotic germ-cell stages, effects on female germ cells, and age effects. Dosimetry studies using tritiated ENU show a much higher level of ethylation in the liver than in the testes. In testicular DNA, there appears to be a linear relationship between dose administered intraperitoneally and ethylation over a dose range from 10 to 100 mg/kg.

Fiscal Year 1983 Program Plans

Major efforts anticipated during the next year are:

(1) The completion of the spermatogonial dose response curve with ENU, i.e., additional data will be obtained at low-dose points;

(2) Experiments to determine the stage sensitivity of male germ cells to ENU will be completed; and

(3) The germ cell mutagenicity of 1,2-dibromo-3-chloropropane and hexamethylphosphoramide will be investigated. (CONTACT PERSON: Dr. M. D. Shelby)

Mouse Biochemical Specific Locus Study—The problem of heritable health risks resulting from exposure to mutagenic chemicals and the use of animal models to investigate this risk was introduced in the report on the mouse morphological specific locus study. The biochemical specific locus assay offers a second animal model by which to investigate the ability of chemicals to induce heritable mutations in mammalian germ cells. The biochemical specific locus assay has two particularly desirable features.

First, the assay detects changes in specific enzymes and offers the opportunity to relate chemically/induced mutations to changes in enzyme structure and function and ultimately to effects on health or fitness. Second, the potential availability of a large number of loci for analysis means that fewer animals than for the morphological specific locus test might be required to obtain a given amount of information.

The objectives of this study are: (1) To investigate chemically-induced mutation processes in mouse germ cells by studying cell stage specificity in both sexes and establishing a dose-response curve in spermatogonia using the mutagen N-ethyl-N-nitrosourea (ENU); and (2) investigating three environmentally significant chemicals for germ cell mutagenicity.

In this assay (Genetics *97*, 113–124, 1981; *Proc. Natl. Acad. Sci.* USA *78*, 3138–3141, 1981), induced mutant frequencies are determined by treating one parent (C57B1/6J or DBA/2J), usually the male, with ENU or a test chemical and then mating to the alternate strain to obtain progeny. Blood and kidney samples are taken from the F_1 progeny and tissue preparations of these samples are subjected to starch gel electrophoresis. After staining, the electrophoretic patterns of 21 proteins are observed on the gels and altered mobility patterns or missing bands are noted as variants. Breeding tests with the animals from which the altered proteins were obtained, along with additional electrophoretic analyses, are used to confirm or refute the mutational basis of the variants. At this early stage of the project, ENU treatments have been carried out and matings begun for: (1) Postmeiotic germ cells in both C57B1/6J and DBA/2J males; (2) the 200 mg/kg spermatogonial dose point; and (3) 250 and 100 mg/kg treatments in females. Insufficient progeny have been screened to draw conclusions from any of these studies. However, among 250 mg/kg treated C57B1/6J females, litters were obtained from matings beyond three weeks post-treatment. The 100 mg/kg females produced litters from matings during the first week following treatment. No electrophoretic variants have been obtained from these 100 mg/kg females but one apparent dominant coat color female mutant was detected among the progeny. The nature of this variant will be determined when she is old enough to mate. A stain specific for the esterase, Es-10, is being adapted for use in the screening system and, if incorporated, will increase the number of loci screened to 22.

Fiscal Year 1983 Program Plans

Several ENU studies initiated in fiscal year 1982 will be completed including those on the spermatogonial dose response curve and male and female germ cell stage sensitivities. Ethylene oxide and ethylene dibromide will be investigated for germ cell mutagenicity. (CONTACT PERSON: Dr. M. D. Shelby)

Mouse Heritable Translocation Testing—The thorough assessment of human genetic risk associated with exposure to mutagenic chemicals is complex and remains subject to many questions. Not only is such an assessment dependent upon extrapolation from results obtained in non-human test organisms but must also take into consideration a variety of genetic events that are known to be induced by chemical mutagens (e.g., gene mutations, chromosomal damage, and aneuploidy). All such events are known to be associated with human genetic disease. Genetic risk assessments are further complicated by the fact that some classes of genetic damage affect the first generation following the occurrence of the damage while in other cases effects may not be manifest for a few or many generations.

Heritable translocations resulting from the exchange of segments between non-homologous chromosomes are known to result in serious human health effects as in Downs and the *cri du chat* syndromes. The fact that serious genetic disease can result from heritable translocations, together with the fact that radiation and a number of chemicals are known to induce heritable translocations in mammalian germ cells, clearly demonstrates the need for testing chemicals for the ability to induce heritable translocations.

The purpose of this study is to gather additional information on the heritable genetic effects of chemicals being tested in the morphological specific locus assay. Six chemicals will be investigated over a two-year period using the same strains; chemicals, and treatment regimens used in the specific locus assay.

Heritable translocations are detected by treating male mice with test chemicals, mating the treated males and then testing F_1 males for fertility. Partially or completely sterile F_1 males are confirmed as translocation carriers by additional matings and cytogenetic analyses (*Mutat. Res. 76*, 191–215, 1980).

FY 1983 Program Plans

A heritable translocation study on inhaled ethylene oxide began in late FY 1982 and will be completed in FY 1983 along with the testing of three additional chemicals. (CONTACT PERSON: Dr. M. D. Shelby)

Collaborative Activities

Proposed International Study on Short-term In Vitro Tests for Detecting Chemical Carcinogens—The NTP is represented on the International Program on Chemical Safety (WHO) *Ad Hoc* Working Group on the Application of Short-Term Tests to Predict Mutagenic and Carcinogenic Potential, and will participate in a proposed international study on short-term *in vitro* and *in vivo* tests.

The objective of the proposed study is to identify and select one or more *in vitro* tests in eukaryotes which, in a battery testing approach, will complement bacterial gene mutation assays by reliably detecting chemical carcinogens that are not readily detected with bacterial systems. This is to be accomplished through the testing of eight selected carcinogens, (hexamethyl-phosphoramide, safrole, ortho-toluidine, benzene, acrylonitrile, di(2-ethylhexyl)phthalate, phenobarbital, and diethylstilbestrol), and two chemicals (benzoin and caprolactam) for which there is good evidence of noncarcinogenicity. It is recognized that such complementary assays cannot be selected strictly on the basis of the proposed study. Therefore, utilization of other major sources of data such as the International Program for the Evaluation of Short-Term Tests for Carcinogens (IPESTTC) and the EPA Gene-Tox Program is anticipated. Since much of the groundwork for the proposed study has been covered in the IPESTTC, and to keep the study to a manageable size, the specific assays will be selected from those: (1) Which were conducted in the IPESTTC; and (2) with additional endpoints which have a demonstrated or anticipated likelihood of detecting the carcinogens under test.

Letters of invitation to participate in the study have gone out to laboratories around the world and most invited participants have responded. Arrangements have been made for the acquisition and shipping of chemicals. The *in vitro* phase of the study is to begin in the summer of 1982 and will require one year to complete. The *in vivo* phase of the study in which two carcinogen/putative noncarcinogen pairs (2-acetylaminofluorene/4-acetylaminofluorene and benzo(a)pyrene/pyrene) will be tested, will begin after the *in vitro* testing phase is underway and should also require approximately one year to complete. (CONTACT PERSON: Dr. M. D. Shelby).

International Collaborative Study on Genetic Drift in the Ames Tester Strains—As part of a thirty-eight laboratory international study, stocks of five *Salmonella typhimurium* tester strains used by the Cellular and Genetic Toxicology Branch were compared with reference cultures for their reponse to the mutagen4-nitroquinoline-N-oxide. This comparison was done using multiple experiments and a standardized protocol.

For the analysis phase of this study, the Branch in concert with the Biometry and Risk Assessment Program is one of three groups analyzing the data generated by the thirty-eight laboratories (the other analysis groups are in England and Italy). In this analysis we are evaluating the in-house vs. reference culture response in each laboratory, and across all laboratories; the day-to-day variation within and between laboratories; laboratory-to-laboratory variability; and the degree of variability within experiments for each laboratory and between laboratories. Preliminary analyses were presented at The Environmental Mutagen Society Annual Meeting in Boston, MA in March, 1982 and at The European Environmental Mutagen Society Meeting in Helsinki, Finland, June, 1982, along with the analyses of the British and Italian investigators.

Preliminary analyses show that disagreements or differences between laboratories are probably due to the way the laboratory performs the test and not to the genetic constitution of the *Salmonella* strains used in the different laboratories. Even when a fixed protocol is used as in this study, the analyses indicate that the performance of the protocol may be as important as the protocol itself. Additional analyses are in progress. These findings have a number of implications for the conduct and interpretation of results from the *Salmonella* test and can aid in the resolution of disagreements between laboratories. (CONTACT PERSON: Dr. F. Zeiger).

Support Activities

Development of a Computerized Data Base Management System for the Cellular and Genetic Toxicology Branch—The NIEHS/NTP testing projects generate large volumes of data and experimental information on all chemicals tested for genetic toxicity. A computerized data base management system is needed to capture this information in an interactive mode in the testing laboratory, store, process, and analyze the data, and provide summary analyses to the experimenter and to the Branch project officers. This system will also allow the staff to follow the course of testing with time in a large number of laboratories regardless of the genetic toxicity test system being used.

The PROPHET system, developed and managed by Bolt, Beranek and Newman under contract to the Division of Research Resources/NIH, was selected for collection and retrieval of *Salmonella, Drosophila* and cytogenetics data. Work has been completed by the contractor on a laboratory data entry terminal to be used for data collection and on the data base structure and software required to store this data in PROPHET. The data entry terminals are in place in the *Salmonella* testing laboratories and are being used to transmit data directly to PROPHET thereby obviating the need for data forms. Once in PROPHET the data is checked for completeness and made available to the Branch project officer in an easily readable form for approval. After approval, the data is stored in readily accessible tables for future reference, and summary management tables are updated with the new information. *Drosophila* and cytogenetics data are being entered into the PROPHET system at NIEHS.

Analytical Techniques required to perform mutagenicity and quality control determinations are being developed by NTP scientists for addition by the contractor into PROPHET. Finally, the contractor has developed additional interactive and batch report generation routines to facilitate the mangement of the mutagenicity results.

Presently work is progressing on the development of an in-house data base management system on the VAX computer. It will contain data from all the testing projects in the Branch and will allow for immediate retrieval and management of the data. (CONTACT PERSON: Mr. R. M. Rowley)

Intramural Program

FY 1982 Accomplishments and FY 1983 Program Plans

Salmonella Mutagenesis Reserch—Research with *Salmonella typhimurium* tester strains can be divided into two major projects: (1) Studies on the *Salmonella* strains and protocols in order to increase understanding of the test and improve the sensitivity and effeciency of the protocols currently in use, and (2) use of the *Salmonella* test as a tool to sutdy the *in vitro* anb *in vivo* metabolism of mutagenic chemicals.

Studies designed to improve understanding of the test include: (1) Kinetics of generation and appearance of spontaneous and induced mutant colonies; (2) factors affecting the mutation response: (3) identification of sources of variability or error in the test; (4) enhancement of the sensitivity of the protocols and improvement of the efficiency of currently used protocals; and (5) characterization of the factors needed to define a positive mutagenic response. Examples of these studies are the development of a rapid plate test for characterization of the phenotypes of the various tester strains; the identification of chemicals which interfere with the appearance of histidine revertant colonies on the plate test in the absence of toxicity as normally measured in the test; and the demonstration that the test can differentiate between the two mutagenic enantiomers of styrene oxide.

We have shown that prostaglandin endoperoxide synthetase (PES) can metabolize dihydrodiol derivatives of polycyclic aromatic hydrocarbons to mutagens and tht this metabolism was more selective than that effected by liver microsomal enzymes. These studies have been extended to the metabolism of aromatic amines where PES was also more selective than liver microsomal enzymes.

The study with purified cytochromes has extended to include rat liver cytochrome P448's synthesized in response to different inducers. The ability of these different cytochromes to metabolize aromatic amines and other substances to mutagens is being studied. (CONTACT PERSON: Dr. E. Zeiger)

Genetic Studies in Drospphila—The characterization of the relationship between DNA repair and mutagenesis in *Drosophila melanogaster* is being studied in several ways. First, X-linked mutagen-sensitive mutants have been isolated and characterized, many being shown to be defective in DNA repair. Two mutants at one locus decrease spontaneous mutation frequency but mutants at nine other loci show no effect. A fine structure map of the *mei-41* locus is being constructed to ascertain the allelism relation ship between *mei-41* and *mus-104*, and to confirm the large size of *mei-41* that has been indicated by mutational analysis. Many *mei-41* alleles are temperature sensitive and are being mapped with the intention of localizing the coding region of the gene. It should be possible to confirm the size of the locus further by the mapping of MR-induced *mei-41* mutations.

Also, DNA repair-defective mutants have been combined with certain maturally occurring transposable elements to allow the study of the interactions which occur in the double mutant combinations. Chromosome transmission is affected.

In addition, a mutant which increases mutation frequency (a mutator) has been identified and mapped. The mutator appears defective in repair of double strand breaks. Its presence results in the recovery of many X-ray induced mutations, most of which appear to be terminal deficinecies. Based on both cytological and genetic evidence, the broken chromosomes which are recovered are considered to be deficient for a telomere. The comparison of the effects of neutrons and high LET particles with X-ray and chemicals is being made to determine their effect on the induction of chromosom damage, mutation and telomore loss in the mutants. (CONTACT PERSON: Dr. J. Mason)

Molecular Mechanisms of Recombination and DNA Repair in Yeast—Meiosis is a fundamental developmental stage which occurs in nearly all eukaryotes. Although there is considerable information on the genetic and morphological changes that take place, relatively little is known about DNA metabolic events, DNA repair, or mechanisms of mutation. The purpose of this research is threefold: (1) To better understand the genetic events of meiosis at the molecular and enzymological level; (2) to determine the role of DNA repair mechanisms in the process of meiosis and in dealing with external insults; and (3) to relate meiotic and mitotic recombination and DNA repair processes. Using the yeast Saccharomyces cerevisiae, we have examined the mitotically Using the yeast *Saccharomyces cerevisiae*, we have examined the mitotically defined excision, postreplication and double-strand break repair pathways in meiosis. There is only one excision-repair pathway available to cells undergoing meiosis; however, in its absence cells lacking this pathway can still tolerate a considerable amount of damage due to an ability to replicate past the damage. We have shown that the damage does not cause recombination; on the contrary it suppresses normal meiotic recombination several-fold implying that unexcised damage can have considerable genetic effects on meiotic cells. In the absence of DNA damage cells undergoing meiosis do not require the excision repair pathway' however, the mitotically defined DNA double-strand break repair pathway is essential at the beginning of meiosis. In mutants lacking the *RAD52* gene product, cells begin to die as they enter meiosis. The enzyme involved is an alkaline deoxyribonuclease and based on physical studies of meiotic DNA, it processes intermediates in molecular recombination.

Studies are underway to characterize the *RAD52* controlled gene products and understand their role in normal meiotic recombination and damage-induced recombination. Recent work has demonstrated that recombinational events associated with DNA double-strand breaks occur in a directed fashion. Further molecular characterizations will be accomplished using various recombinant DNA techniques, immuno-precipitation procedures, 2-D protein gel analysis and mathematical modeling approaches.

Some of the repair processes described above may also be relevant to mutation induction. We are examining the nature of mutagenic events at the molecular level. Replication by yeast crude extracts on DNA templates which have been damaged by various agents is being examined to determine factors which may allow synthesis past damage. During the course of these studies, it should be possible to determine the coding nature of damaged DNA. (CONTACT PERSON: Dr. M. A. Resnick)

Molecular Analysis of Genotoxic/Carcinogenic Events in Mammalian Cells—The mechanism of chemically or physically-induced genetic toxicity/carcinogenesis by gene rearrangement and/or structural alternations and how these events relate to normal cell differentiation processes is of considerable importance in contemporary biomedical research. The ability to detect such events in a sensitive and precise manner, and the ability to identify chemical and physical agents with the potential to cause such effects, are fundamental goals of the Cellular and Genetic Toxicology Branch. This project is aimed at providing basic information concerning such processes and providing data on which reliable assay systems can be based.

The goal of this project is to analyze, by recombinant DNA techniques, sequence transpositions and alternations in gene structure and expression which result from chemical and physical toxic/carcinogenic agents. Molecular clones of the "transposon-like" endogenous ecotropic viral genomes of BALB/c and RFM/Un mice have been constructed and characterized. Subgenomic regions have been subcloned to provide molecular probes to specifically detect the ecotropic provirus and any long terminal repeat (LTR) containing genetic regulatory elements. Detailed analysis of a large population of cloned genomes of the BALB/c endogenous retrovirus has revealed a significant variability in the U3 region of the LTR. These findings are intriguing due to the important multi-functional role of this region, including "transposon-like" integration and regulation of gene transcription. Ongoing and future studies involve the molecular cloning of the reintegrated or transposed proviral genomes when identified in cultured and primary radiation-induced myeloid leukemia cells. Analysis of alterations in gene expression due to the relocation of these elements will be performed using cloned DNA probes from adjacent cellular regions.

The long-range goal of this project is to clarify the role which chemical and physical environmental agents have in initiating the transposition or structural alteration of genes and regulatory elements and how these events result in genetic toxicity. An immediate goal is to identify and characterize transpositions of genetic elements which may be causually related to radiation-induced myeloid leukemia. The initial model will be based on the "transposon-like" endogenous provirus of RFM/Un mice.

Recombinant DNA techniques will be used to generate molecular probes from endogenous retroviral genomes. Primary (germ line provirus) and secondary (transpositions and reintegrations) loci will be molecularly cloned from normal cells and radiation-induced myeloid leukemia cells. Restriction endonuclease mapping, nucleic acid sequencing and characterization of specific RNA transcript will be employed.

FY 1983 Program Plans

Recombinant DNA clones of the endogenous ecotropic viral genomes of BALB/c and RFM/Un mice have been constructed and characterized. Subgenomic regions have been subcloned to provide molecular probes to specifically detect the ecotropic *env* gene and the viral LTR. Detailed mapping of the LTR region of a population of clones has revealed that a particular segment of the "U3" component of the LTR appears to be a 'hyper variable' region. The LTR is known to be involved in "transposon-like" integration and regulation of viral gene transcription and promotion of transcription of adjacent cellular genes. Continued work is to be aimed at the mechanism of generating this diversity and its biological significance. Ongoing and fufure studies will focus on the molecular cloning of the primary and secondary loci and characterization of gene expression patterns in adjacent regions in normal and neoplastic cells. (CONTACT PERSON: Dr. L. R. Boone)

In Vitro Systems to Study Organ and Species Specificities of Chemical Carcinogens—In vitro approaches for studying organ, species, strain and cell-type variations in the metabolic activation of chemical carcinogens have been developed (Carcinogenesis, *2*, 851, 1981; *Banbury Report*, in press; Nature *276*, 277, 1978). Rat, mouse, hamster, bovine and canine species have been most widely used with liver, lung and urinary bladder being the primary organs studied (Carcinogenesis, *2*, 851, 1981; *Envir. Health Perspect.*, in press). Both intact cells and cell homogenates from each tissue are used for metabolic activation as these systems can differ from each other and from *in vivo* activation of the carcinogen (*Environ. Health Perspect.*, in press). Two metabolic activation systems have been coupled with the two target cell systems, Chinese hamster V–79 and *Salmonella typhimurium*, to measure multiple endpoints including cytotoxicity, sister chromatid exchange (SCE) induction and mutation. Measurement of multiple genetic endpoints has proven to provide better predictability of a chemical's genotoxic activity than measurement of any single endpoint (*Mutat. Res.*, in press).

The methodologies for measuring Chinese hamster V–79 cell mutagenesis have been previously reported (PNAS, *75*, 2864, 1978); ouabain and/or 6-thioguanine will be used as the selective agents. *Salmonella* mutagenesis will be measured as described by Ames (*Mutat. Res.*, *31*, 347, 1975), with the modification where intact cells are used for metabolism (*Environ. Health Perspect.*, in press). This project was initiated in FY 1982, and the results to date indicate the following: (1) Intact liver and bladder cells can be used for carcinogen activation with V–79 cells or *Salmonella* as targets: (2) bladder epithelial cells from cows and rats are metabolically

active and can activate hydrocarbons, aromatic amines, and nitrosamines to mutagens: (3) species differences in the metabolic activity of bladder cells appear to exist with preliminary studies indicating cow>rat>dog; (4) for the aromatic amines, *Salmonella* mutagenesis is a more sensitive endpoint while for nitrosamines, V–79 mutagenesis is more sensitive; and (5) the extent of mutagenic activity observed when S–9 or intact cells (from liver or bladder) are used for metabolic activation depends on the chemical and no general pattern has yet emerged.

FT 1983 Program Plans

This project is directed specifically at investigating the role of the liver and bladder in the initation of bladder tumors in various species including humans. Know bladder-specific carcinogens will be studied. Bladder cells and cell homogenates, and liver cells and cell homogenates will be used for metabolic activation with V–79 cells and *Salmonella* as the targets for detecting the production of mutagenic intermediates. Furthermore, by employing both intact cells and cell homogenates for metabolic activation, these two most commonly used metabolic activation systems will be compared.

The studies will provide basic information on the mechanism of initiation of bladder cancer in various species. From such studies, a short-term screening system for detecting bladder carcinogens should emerge. Additionally, by comparing the two most commonly used metabolic activation system, their relative merits can be assessed and hopefully better *in vitro* activation systems can be devised. (CONTACT PERSON: Dr. R. Langenbach)

NCTR Heritable Translocation Assay Program

The initial objectives of the NCTR/NTP Heritable Translocation Assay (HTA) Program have been: (1) To identify components of the test procedure which may be modified to improve test precision and reliability, and then make and evaluate appropriate modifications; and (2) to develop an in-house capability for performing HTA studies which can provide quality data for use in regulatory evaluation of mutagens, specifically those of interest to the National Toxicology Program (NTP). An HTA test capability has now been achieved at the NCTR which can contribute not only to the testing and evaluating of compounds of interest to NTP but also to answering questions related to the extrapolation of animal model data to humans and the identification of significant human health risks.

Experimental Design: Two projects have been implemented: (1) "Selection of stocks of mice for use in HTA studies at the NCTR" (E–243); and (2) "Validation of the NCTR HTA test procedure" (E–244).

The first project (E–243) consists of two phases. The first phase, which was completed in FY 1980, involved comparative evaluation of the breeding performance of six stocks of mice identified by a literature review as potentially appropriate for use in HTA studies. These six stocks are:

0D—CD–1 random bred
0F—(AE×BALB/c) F_1 hybrid
0G—(SEC×C57BL/10) F_1 hybrid
0H—(A*×SEC) F_1 hybrid
0N—(C57BL/6N×C3H) F_1 hybrid
0R—(C57BL/6J×BALB/c) F_1 hybrid

The specific aim of this study was to determine the theoretical misclassification error rate associated with the potential use of any of the above six stocks as "tester" females in a sequential fertility test protocol (Generoso, *et al, Chemical Mutagens*, Vol. 5, 1978). The variability of litter size for "tester" females used in fertility test protocols has been shown to have a significant effect upon the misclassification error rate and, consequently, the overall test error rate. In general, the greater the standard deviation from the mean, the greater the misclassification error, (Bishop and Kodell, *TCM*, Vol. 1, 1980).

Fifty single pair matings of females from each of these stocks with CD–1 males were established for a 10-month mating period and all litters recorded upon birth. The mean and standard deviation of litters 2–4 produced by each female stock were calculated and used in published equations (Bishop and Kodell, *TCM*, Vol. 1, 1980) to determine the theoretical false negative misclassification error (b-error) using our protocol strategy where false positive misclassification errors (a-errors) are controlled below one-half percent by appropriate selection of the "decision value" (Weimann and Lang, *Mutat. Res.*, 1978).

The second phase of this project, where five experiments have been conducted to date, involves comparison of response of the different stocks in Dominant Lethal Tests (DLT). The specific aims of this study were to determine whether the frequency of fetal death induced by selected chemicals differs significantly with the stock of F_o female and/or male used (Generoso, *et al, PNAS*, 1979) and whether (by comparison with HTA data collected in the second project) this difference correlates positively with HTA test results and thereby might be used in selecting F_o stocks for maximizing (or moderating) test sensitivity.

Experiments one and two each consisted of treating 48 0D male mice with isopropylmethane sulfonate (IMS) or ethylmethane sulfonate (EMS), respectively, and mating each male for an appropriate post-treatment interval to three females from either the 0D, 0F, 0G, 0H, 0N or 0R stocks (8 males/24 females/stock). Experiments three, four and five each consisted of treating 16 0D, 16 0N and 16 0R males with IMS, EMS, or triethylene melamine (TEM), respectively, and mating each of them for an appropriate post-treatment interval to three females from either the 0N or 0R stocks (8 males/24 females/male-female stock combination). Concurrent control groups of equal size and design were run for each experiment. Mean fetal death rates were calculated for each stock combination and compared by an analysis of variance and a Duncan's multiple range test after "clustering" by the method of Whorton (*TCM, 1*, p. 353–360, 1981).

The second project (E–244) consists of two positive control HTA studies of basically identical design but using different chemical mutagens, TEM for the first study and cyclophosphamide for the second study. The first study was to have been completed by June 1982.

In each study 120 0D males are treated with the chemical and mated (3 females/male) to females from either the 0N or 0R stock. F_1 males are weaned and then 500 of them are randomly selected for testing by the "sequential fertility test" method (Generoso, *et al, Chemical Mutagens*, Vol. 5, 1978) using our specific decision strategy (Weimann and Lang, *Mutat. Res.*, 1978; Bishop and Kodell, *TCM*, Vol. 1, 1980) to identify probable translocation heterozygotes. Upon completion of the fertility test, all 500 males are screened by the "Cytogenetic Test Method," (Adler, *TCM*, Vol. 1, 1980) for multivalent meiotic chromosomes characteristic of translocation heterozygotes and/or by analysis of banded mitotic chromosomes prepared from stimulated peripheral blood cells (Barren, *et al, Nutat. Res.*, 104, 1982).

Comparison of the translocation frequency detected by our "sequential fertility test" methd with that confirmed by cytogenetic evaluation will be used for empirical determination of the misclassification error for our fertilty test procedure. In addition to validating an HTA test procedure which the NCTR can use in future evaluation of NTP compounds, findings from this project will allow us to identify and correct logistical problems which might be associated with handling such large populations of animals.

FY 1982 Accomplishments

Selection of Stocks of Mice for Use in HTA Studies at the NCTR—A final report and draft manuscript of the results of this experiment have been prepared and submitted for NCTR internal review. Theoretical misclassification errors were calculated for the six stocks of mice. Evaluation of the breeding data on the six stocks of mice resulted in identification of 0N as the preferred stock to use as "tester" female because of the relative minimal probability of F_1 male misclassification (0.0012). Additionally it was observed that the relative order of male stock sensitivity for EMS and TEM was similar. This is in agreement with the results of Generoso *et al, PNAS*, 1979.

Validation of the NCTR HTA Test Procedure—The positive control study with TEM was completed in June 1981. The results of this study are presented in Table 9. Of the 400 F_1 male progeny of untreated F_1 hybrid females mated to CD–1 males injected i.p. with 0.18 mg/kg TEM and screened for translocation heterozygotes (TH's) by both fertility and cytogenetic test methods, 97 were classified suspect TH. Of these, 27 were completely sterile and 54 were partially sterile with both tester stocks. For the (C57BL/6NxC3H) and (C57BL/6JxBALB/c) F_1 hybrid tester stocks, the frequency of cytogenetically normal males which were classified as suspect TH (i.e., false positives) was 0.033 and 0.025, respectively. The frequency of cytogenetically confirmed translocation carriers which were missed by the fertility test with (C57BL6NxC3H) and (C57BL/6JxBALB/c) F_1 hybrids (i.e., false

negatives) was 0.05 and 0.025, respectively. *Thus, a standardized protocol for a sequential fertility test method of the HTA with empirically determined misclassification error has been successfully developed for use in evaluation of NTP compounds at the NCTR.* The mathematical model proposed by Bishop and Kodell (*TCM*, Vol. 1, 1980) is being adjusted based upon the empirical results of this study. A final report and a manuscript describing the overall results of this study are in preparation and expected to be completed in FY 1982. (CONTACT PERSON: Dr. J. B. Bishop)

FY 1983 Program Plans

Selection of Stocks for Use in HTA Studies at the NCTR—All final reports and manuscripts for this experiment were completed in FY 1982. The manuscript will be submitted for publication in FY 1983. No additional dominant lethal studies are planned at this time.

Validation of the NCTR HTA Test Procedure—A final report and manuscript describing the results of this experiment will be completed in FY 1982. The manuscript will be submitted for publication in FY 1983. In addition, at least one additional manuscript, the statistical considerations for adjustment of the mathematical model of Bishop and Kodell, will be prepared in FY 1983.

An experimental protocol designed to assess potential immunodeficiencies in the F_1 animals is being prepared and will be submitted during FY 1982. If funded, this study will be implemented and completed in FY 1983.

In addition, a manuscript will be prepared in FY 1983 which outlines a proposed model for risk assessment with the HTA, reviews available animal model and human epidemiological data that can be used to estimate significant human health effects from translocations, and describes a procedure for incorporating this and future information of a similar nature into the model. (CONTACT PERSON: Dr. J. B. Bishop)

Utilization of the Primary Hepatocyte/DNA Repair System to Detect Potential Genotoxicity of NTP Chemicals

It is known that DNA is the target for various cytotoxic, mutagenic, and carcinogenic chemicals. It is thought that a majority of chemical carcinogens or their metabolites are electrophiles that react with cellular nucleophiles such as nucleic acids and proteins. One result of nucleic acid binding is DNA repair. This is accomplished by excision of the adduct and subsequent polymerization and ligation of the DNA strand. One method for detecting DNA repair is the use of autoradiographic techniques to measure labelled thymidine incorporation into DNA of mammalian cells outside of the normal phase of DNA synthesis (unscheduled DNA synthesis, UDS). A variety of cell systems have been developed to detect UDS, ranging from rodent to human cells in culture, and these systems have been advocated for inclusion into a battery of assays to assess hazardous chemicals. One such system is the primary hepatocyte/DNA repair system. This system is useful because the cells are non-proliferating and inhibition of scheduled DNA synthesis is not required. Further, the cells are capable of metabolically activating many precarcinogens and premutagens to their active forms allowing measurement of UDS in the same cells that activate the test chemicals.

The objective of this cooperative project with NIEHS/NTP is to test 24 coded NTP-selected chemicals in the primary hepatocyte/DNA repair system. The standard protocol uses primary hepatocytes isolated following *in situ* perfusion of rat livers with collagenase; the cells are plated in Willians' medium E and attached to coverslips for 1–2 hours. This attachment allows for selection of only viable cells. The coverslip cultures are incubated either in petri plates or Leighton tubes, depending upon the volatility of the test chemical. The hepatocytes are exposed for 18–24 hours at 37°C to a series of concentrations (dependent upon solubility) of the test chemical in Williams' medium E containing ^{3}H-thymidine. After incubation, the test medium is removed and the cells are washed and fixed; the coverslips are dried and then attached to microscope slides. The slides are dipped in diluted NTB2 autoradiographic emulsion, dried and the emulsion is then exposed at 4°C in the dark for about one week. The cells are stained with Giemsa and the grains in the emulsion over the nuclei and cytoplasm are counted with an electronic counter.

An appropriate positive control agent (2-AAF or 7,12-DMBA) is used to monitor the metabolic state of the hepatocyte preparation. Additionally, the repair capacity is also monitored by using 200–300 erg/mm UV-irradiation. Depending upon the nature of the chemical being evaluated, the negative control is the solvent used to dissolve the chemical and if the solvent is organic, e.g., DMSO, ethanol, or acetone, the final concentration will not exceed one percent. Dosage selection for the UDS assay is based on the cytotoxic information obtained either from the NTP or based on preliminary cytotoxicity testing (e.g., dye exclusion, isotopically labelled leucine incorporation into protein, or morphological evaluations). A concentration which exhibits a cytotoxic response (or the highest soluble concentration, in the absence of cytotoxicity) is selected as the highest concentration for the UDS assay and the remaining four doses are selected over a 2-logarithm range.

The cells are examined microscopically and silver grains representing incorporation of ^{3}H-TdR during UDS are observed and counted using oil immersion (100x) optics. The net nuclear grain count (nuclear grain counts—cytoplasmic grain counts) are determined for 50 randomly selected cells on each coverslip. The mean net nuclear grain count is determined from triplicate coverslips for each treatment condition. The test agent is considered positive if the results demonstrate a concentration-related, statistically significant increase in UDS over negatige control values and/or a reproducible, statistically significant increase in UDS at one concentration. A negative conclusion is reached in the absence of a positive response, as defined above, when the test compound has been tested to cytotoxic levels or to the limits of solubility.

FY 1982 Accomplishments

This project was begun December 31, 1981, and is scheduled to continue to December 31, 1982. Fourteen of the 24 chemicals have been delivered and solubility characteristics have been determined for 10 of these 14 chemicals. In addition, cells have been exposed to six of these chemicals in two separate experiments and have been carried to the nuclear grain counting phase. We are presently counting grains and developing the data on these six chemicals and exposing cells of the other four for which we have solubility data. We expected to complete all but data analysis for the 14 chemicals by the end of July 1982. (CONTACT PERSON: Dr. D. Casciano)

NIOSH

Mutagenic Monitoring for High Risk Workers

Background Information and Objectives: It is known that many chemical agents and mixtures are produced during coal gasification and liquefaction processes (DHS–NIOSH Publication No. 79–113). In the near future, coal gasification and liquefaction may become important energy industries owing to the Nation's attempt to alleviate natural gas and oil shortages. As these industries and plants proliferate, thousands of workers will be employed and, inadvertently, they may be exposed to the by-products associated with these operations. Any of these by-products which are mutagenic may represent a genetic hazard. To protect workers from any potential mutagenic hazard, mutagenic monitoring of plant personnel and the workplace environment are necessary. By monitoring, mutagenic agents may be detected early and identified. Awareness of this potential occupation-related hazard and adoption of proper procedures to safeguard workers from exposure to this class of industrial by-products would benefit directly the health of workers and/or their offspring. The information obtained could also be used in the future to determine whether there is any relationship between the results of mutagenic monitoring and epidemiological findings.

The objectives of this project are to determine whether: (1) The mutagenic activity of air particles form coal liquefaction plants are higher than the activity of particles from the outside environment; (2) mutagenic activities, if any, of urine samples collected from plant workers are higher than those collected from a control population; (3) the frequencies of sister chromatid exchanges (SCE's) and chromosome aberrations (CA's) in peripheral lymphocytes of workers are higher than those of the control group; and (4) there is any relationship among the objectives (1), (2), and (3).

Experimental Design: Two coal liquefaction pilot plants, if possible, will be used for ths study. Air particles from both plants will be collected with high volume samplers by pulling air through glass fiber filters. Solvent extracted organic materials will be tested for mutagenic activity with the *Salmonella*/microsome pre-incubation test and for induction of SCE with the cultured Chinese hamster ovary (CHO) cells assay system. Thirty workers who have been working in the plant for at least one month

and 30 unexposed local individuals near each plant will be selected as a source of blood (10 ml per participants) and urine (400–600 ml) samples.

A questionnaire will be administered to all participants. This questionnaire will be used to elicit the information necessary for matching the control group to the worker group and to properly assess the results of the bioassays.

The collected blood samples will be analyzed for the frequencies of SCE's and CA's. Appropriate numbers of cells will be scored to determined statistically significant increases in SCE and CA frequencies. Urine samples will be concentrated with an XAD–2 column. The solvent eluted concentrates will be tested for mutagenic activity with the *Salmonella*/microsome assay system. All experiments will be repeated one month after concluding the first experiment. A third experiment will be conducted if the results of the first and second experiments are not in qualitative agreement.

FY 1982 Accomplishments

The project protocol developed by the contractor, Litton Bionetics, has been reviewed by outside experts and approved by the NIOSH Human Subject Review Board. The approved protocol is now ready for submission to coal liquefaction plan officials to seek entry permission for the studies.

FY 1983 Program Plan

Sampling of air particles and collection of biological specimens will be completed if entry permission can be obtain before the first quarter of FY 1983. Mutagenic and cytogenic analyses of the collected specimens will be initiated in FY 1983. (CONTACT PERSON: Dr. T. Ong)

All chemicals known to induce cancer in humans cause cancer in laboratory animals with the possible exception of arsenic. Thus, reducing exposure to chemicals known or suspected to cause cancer in humans or animals will reduce chemically-induced cancer in humans. This public health stance of preventive oncology stands as one of the primary goals of the NTP: identify with certainty in well-conducted experiments those chemicals most likely to be hazardous to humans. From a preventive health view, the NTP underscores the concept that chemicals found to cause cancer in animals must be considered capable of causing cancer in humans.

The NTP strives to accomplish this by evaluating those large volume chemicals known to have a high index of human exposure. This scientific appraisal process comprises an integrated toxicological characterization approach: chemical disposition (absorption, distribution, metabolism, excretion), genetic toxicology, fertility and reproductive assessment, systemic toxicology (14-day and 90-120 day exposures), specific studies as needed (immunological, biochemical, and inhalation toxicology), clinical pathology where applicable (hematology, urinalysis, endocrine function, and clinical chemistry), and long-term (two-year) carcinogenesis bioassays.

The "standard" two-year carcinogenesis bioassay remains as the most definitive method for detecting chemical carcinogens in animals. The standard protocol as developed by the NCI typically uses two rodent species (usually Fischer 344 rats and B6C3F$_1$ mice), both sexes, and administration of multiple dose levels (concurrent controls, low dose, and high dose) of a chemical to groups of 50 animals, beginning at weaning and ending after two years. These experiments are designed primarily to determine whether selected chemicals produce cancer in animals.

Chemicals tested in the NTP carcinogenesis bioassay program are chosen primarily on the basis of human exposure, available (or lack of) toxicology data, level of production, and chemical structure. Selection per se is not an indicator of a chemical's carcinogenic potential.

Negative results, in which the test animals do not have a greater incidence of cancer than control animals, do not mean necessarily that a test chemical is not a carcinogen, inasmuch as the experiments are conducted under a limited set of conditions. Positive results demonstrate that a test chemical is carcinogenic for animals under the conditions of the test and indicate that exposure to the chemical is a potential hazard to humans. The determination of the risk to humans from chemicals found to be carcinogenic in animals often requires a wider analysis which at present extends beyond the purview of these studies.

The results of the bioassay also serve as the reference base for the validation of short-term carcinogenesis assays. Two additional objectives have been identified as priority items: (1) To expand the bioassay experimental protocols to extend and better characterize the toxicologic profile of chemicals; and (2) to investigate, develop, and validate accurate, less costly, and more rapid methods for detecting carinogenic potential.

Under the NTP, the carcinogenesis bioassay procedure(s) has been and continues to be changed to meet the objective of a broadened toxicologic characterization of chemicals, and further, to lead or stay abreast of advancing scientific developments. Prior to NTP involvement, the prechronic phases of the bioassay—which include single dose (acute), 14-day repreated dose, and 90- to 120-day repeated dose studies—were conducted to determine gross toxicity and general target organ effects at different dose levels as a primary basis for setting appropriate doses for the two-year bioassay studies. Now, the NTP has begun to gather routinely other information related to target organ effects: chemical disposition, fertility and reproduction, urinalysis, clinical chemistry, and hematology also are obtained from the prechronic studies—especially the 90-day study; certain other specific studies as applicable are included in the chronic two-year studies as well. Once those parameters that may be altered through exposure to the tested chemicals are identified, then suspect chemicals are referred to specific organ system groups for more detailed study of the functional, biochemical, and morphologic effects of the test compounds. Also, wider analysis of the quantitative and comparative absorption, distribution, metabolism, and excretion patterns may be desired. All chemicals selected for chronic bioassay will be profiled for chemical disposition patterns. Further, a group of five *in vitro* short-term cellular and genetic toxicology assays were added to the prechronic phases in FY 1982. All chemicals started on test in FY 1981 and FY 1982 had an expanded design including other select studies. The goal is to ensure that all major toxic effects will be identified for each chemical being considered for long-term bioassays.

These data, together with other prechronic bioassay information, are used by the experimental design groups for preparing appropriate study protocols and are used by staff for assisting in establishing priorities for chemicals queued into the long-term carcinogenesis bioassay. A key decision that must be made at this juncture between the completion of the prechronic phase and the beginning of the chronic study centers directly on whether indeed the lifetime bioassay should be done at all.

With this composite information base, the doses for the chronic study are selected. The high dose, termed the estimated maximum tolerated dose (EMTD), represents the highest dose of a chemical or substance given during a chronic study that can be predicted not to alter the treated animals' normal longevity from toxic effects other than carcinogenicity. The low dose ordinarily equals one-half EMTD. Other empirical factors include weight gain/food consumption data; for instance, a decrease in weight gain near 10–20% (not associated with a tumorigenic response) is often used as a general indication that the EMTD was achieved.

Thus, while the lifetime animal bioassay remains the best procedure for determining the carcinogenic potential of chemicals, NTP does not ordinarily use a standardized design. Rather the design is adapted to the special testing needs identified for the particular chemical. The NTP tailors its testing protocol to each chemical, based on the results from the prechronic testing phases, on available literature, and on structure-activity relationships. These new protocols permit better, more specific information to be generated for the tested compounds, which increases the effectiveness of the tests for potential human risk estimations. Such protocols also will be useful as guidelines for testing undertaken by other agencies and by industry. As examples, the NTP continues to pursue actively other design methodologies—increase the number of dose levels, "unbalanced" distribution of animals among dose groups, interim kills, modified protocols for histopathology, and so on.

While the majority of NIP Long–term bioassays are being managed and conducted by the NIEHS component of the Program, a number are being carried out by the NCTR component and are described in subsequent pages of this section.

Long-term studies by the NIOSH component specifically emphasize study of the etiology of cancer in the occupational environment. A number of long-term carcinogenesis bioassays are in progress on materials ranging from single chemicals to

mixtures administered by various routes analogous to likely routes of human exposure in the workplace.

NIEHS

FY 1982 Accomplishments

Testing—Prechronic and Two-Year Bioassays

During FY 1982, 21 bioassays were completed and the reports of the findings were approved by the *ad hoc* scientific peer review panel associated with the NTP Board of Scientific Counselors (Table 10). Under the conditions of these carcinogenesis bioassays, 12 (57%) were considered positive, 7 (33%) negative, and 2 (10%) equivocal. Since the NIP has become actively involved in the bioassay technical report review process, 59 experimental studies initiated by the NCI or the NTP have been completed and peer reviewed (with final reports issued or in press). Of these, 32 (54%) were positive, 22 (37%) were negative, and 5 (9%) were equivocal for carcinogenicity. Single copies of the NTP Technical Reports are available or will be available (for those in press from the NTP Public Information Office, (P.O.) Box 12233, Research Triangle Park, NC 27709.

There were 27 new chemical starts in the prechronic phases of the bioassay process in FY 1982, and a total of 45 bioassays in the prechronic phases at the end of the fiscal year (Table 11). There were 172 bioassays in the chronic testing phase at the end of the fiscal year (Table 12). This includes bioassays in the histopathology/diagnosis phase.

Since FY 1980, all new bioassays have been under direct NTP management while testing activities initiated prior to FY 1980 continued to proceed through the prime contract mechanism. Direct management and supervision of each chemical test was initiated to enable better monitoring and quality control of the testing program, especially with the inclusion of the various special studies. The process is described in the Chemical and Laboratory Test Management section. In conjunction with NTP initiation of direct arrangements with testing laboratories, a number of scientific support contracts awarded in FY 1980 continued in FY 1981 and FY 1982. These include pathology support, health and safety activities, chemical repositories, chemical analytical services, animal production and literature support.

A gradual phase out of the prime contract began in FY 1982 and is scheduled to be completed in the third quarter of FY 1983. Management of the bioassay subcontractors and support functions now carried out by the prime contractor will be assumed directly by the NTP.

To do the expanded toxicological characterization studies included in bioassays started under the NTP, the NTP continues a contracting mechanism (a master agreement) under which laboratories and their personnel are qualified for standard bioassays and in each of the various special study areas. The pool of qualified laboratories currently stands at 19. (CONTACT PERSON: Dr. M. Vernon)

Other Long-Term Studies—Standard two-year bioassays with six-week-old animals were initiated in FY 1982 concurrently with two bioassays where exposure began *in utero* and continued during the neonatal period. The chemicals being tested are phenytoin and ethylene thiourea; a third bioassay with polybrominated biphenyl mixture (Firemaster FF1) will be initiated in FY 1983. The objective is to determine whether extending long-term chemical exposure of animals to the gestational and neonatal periods will result in altered sensitivity to the induction of carcinogenesis and/or other types of toxic effects. (CONTACT PERSON: Dr. R. Chhabra)

Test Methods Development and Validation

Prechronic Testing Phase—Starting in FY 1982, during the prechronic phase, all chemicals undergo cellular and genetic toxicology testing in at least five *in vitro* short-term assays: (1) Gene mutations in bacteria—*Salmonella typhimurium*/microsome; (2) gene mutations in mammalian cells—mouse lymphoma (L5178Y, thymidine kinase); (3) chromosome damage in mammalian cells—cytogenetic damage and sister chromatid exchange in Chinese hamster ovary (CHO) cells; (4) a mammalian cell transformation assay—(BALB/c-3T3); and (5) a direct measure of DNA damage/repair (which does not necessarily result in mutation or transformation)—unscheduled DNA synthesis (rat hepatocytes). (CONTACT PERSON: Dr. J. W. Spalding)

Animal Bioassay Methodology—The NTP in March 1982 presented to the Board of Scientific Counselors a series of biomathematical simulations aimed at improving the basic experimental design of the two-year bioassay to provide information useful for low-dose extrapolation while retaining the power of the bioassay for detecting carcinogenic effects. Three and four-dose designs were examined. The optimal design involved four groups (control plus low, medium, and high dose). The estimated maximum tolerated dose (EMTD) would be the high dose, the middle dose one-half the EMTD, and the low dose 10-30% of the EMTD. The most appropriate designs are being considered for possible future implementation for long-term carcinogenicity bioassays, and are also discussed in the Data Management and Analysis section. (CONTACT PERSON: Dr. C. Portier)

Two studies planned for initiation in FY 1982, one focusing on the possible influence of the Sendai virus on chemically-induced carcinogenesis in mice, and the other aimed at evaluating strains other than the B6C3F1 mouse for carcinogenesis is bioassays, were deferred due to resource limitations.

Short-Term Carcinogenesis Assays—In-Life portions of the pulmonary tumor studies in Strain A mice at Oak Ridge National Laboratories will be completed by the end of FY 1982

A three-year research program using short term *in vivo* liver carcinogenesis models to help clarify the nature of the hepatocarcinogenic responses frequently associated with two-year rodent bioassays began at the end of FY 1982. A major objective of this program is to assess the ability of selected chemicals to act as initiators, promotes, or complete carcinogens in these models. Initial emphasis is to be directed toward aspects of model development including assessment of chemical dosimetry. The research will include attempts to quantitatively assess response through the use of preneoplastic markers and correlate these results with histomorphologic tumor endpoints. Initial selection of chemicals will focus on those known to induce liver tumors in rodents, taking into account their genetic toxicity. Current program plans estimate 24–36 chemicals will be tested in *in vivo* liver tumor models. (CONTACT PERSON: Dr. R. Maronpot)

FY 1983 Program Plans

Testing—Prechronic and Two-Year Bioassays

During FY 1983, the NTP plans to start 18 chemicals in the prechronic phase of the bioassay process (Table 13). It is expected that 28 two-year bioassays will be completed and the resultant draft reports will be peer reviewed in FY 1983 (Table 14). All new bioassays will include broadened protocols with various special studies integrated into the experimental design. (CONTACT PERSON: Dr. J. Douglas)

Test Methods Development and Validation

Short-Term Caricinogenesis Assays—Final summarization and evaluation of the data from the pulmonary tumor studies in Strain A mice will be completed in FY 1983. These results should help to determine the feasibility of using this short-term assay in carcinogenicity testing of chemicals. (CONTACT PERSON: Dr. R. Maronpot)

NCTR

FY 1982 Accomplishments and FY 1983 Program Plans

Testing—Prechronic and Long-Term Bioassays

Rotenone—Femal Wistar rats were used in an experiment entitled "Tumorigenic Potential of Rotenone and its Specificity for Mammary Tissue", at doses of 2.5 and 25 μM/Kg with 72 animals in each dosed and control group. The 25 μM/Kg doses proved toxic so groups at 5.0 μM/Kg were added. Animals were injected 5 days a week for a period of 8 weeks and monitored for an additional 15 months. The animals were then sacrificed.

Evaluation of gross necropsy data and microscopic pathology data revealed no dosed related lesions, either grossly or microscopically. A final report and manuscript are in preparation. (CONTACT PERSON: Dr. W. Allaben)

Gentian Violet and Sulfamethazine—Gentian violet and sulfamethazine are NTP selected compounds and are being evaluated as comprehensive bioassessment studies. The toxicological investigations are intended to examine the FDA's proposed Sensitivity of Method (SOM) requirements and established tolerances for use as an additive in chicken and swine feed with regard to their subsequent potential toxicity as residues in chickens and pork used for human consumption. Because of this, the

investigation of each chemical includes several phases.

The gentian violet study status is as follows: The 90-days MTD (rat and mouse) subchronic study final report is in progress. Metabolism studies, some under contract, will be completed in FY 1982. The dosing of the mice lifespan was completed in July, 1982. The rat multigeneration study is scheduled for completion in July, 1983.

The sulfamethazine study status is as follows: The 90-day MTD (rat and mouse) final report is in progress. Metabolism studies, some under contract, will be completed in FY 1983. A restarted mouse lifespan study is scheduled to be completed in July, 1984. A restarted rat multigeneration study will be completed in December, 1984. (CONTACT PERSON: Dr. N. Littlefield)

Antihistamines—Bioassays of the antihistamines were initiated following compound identity, and purity tests and stability trials. At present all data from the subchronic phase are being reviewed and final reports are being prepared. Details of the studies are as follows:

Pyrilamine

14-Day Repeated Dose Study: Dose levels used were: Mice—3200, 1600, 800, 400 and 200 ppm (free amine); Rats—6400, 3200, 1600, 800 and 400 ppm (free amine). Pyrilamine maleate was 99.9% pure and found to be sufficiently stable in rodent feed to use feed as the vehicle of administration. All animals gained weight during the experiment with a trend for less gain in the higher two doses in both rats and mice. There were no clinical observations noted that were considered dose related.

Gross pathology of sacrificed rats and mice showed no remarkable lesions for mice and rats. Microscopic pathology revealed no significant findings for mice. In rats there were mild fatty metamorphoses of the liver and mild lymphoid accumulations in the lung distributed equally in control and high dose animals.

90-Day Subchronic Study: Dose levels were: Mice—6000, 3000, 1500, 750 and 375 ppm; Rats—12,000, 6000, 3000, 1500, 750 ppm. The only clinical observations that occurred regulary were hair loss and hunched and skinny appearance occurring only in the 12,000 ppm dose group in rats. There was a general dose related decrease in weight gain throughout the study with much greater effects at the high dose in both rats (12,000 ppm) and mice (6000 ppm). Statistical analyses have not been performed as yet.

Gross pathologic evaluation of rats and mice showed no unusual dose related lesions. Histopathologic evaluation of all tissues has been completed and a final report is in progress. (CONTACT PERSON: Dr. W. Allaben)

Doxylamine

14-Day Repeated Dose Study: Dose levels were: Rats and Mice—2000, 1000, 500, 250, 100 ppm (free amine). Only the highest dose level had any effect on weight gain in either species. Gross pathology of sacrificed animals showed no remarkable lesions.

90-Day Subchronic Study: Dose levels were: Mice—1500, 750, 325, 162 and 80 ppm; Rats—6325, 2530, 1012, 405 and 162 ppm. The subchronic study has been completed and the data are presently being verified and analyzed for preparation of the final report.

Tripelennamine

14-Day Repeated Dose Study: Dose levels used were: Rats and Mice—6000, 2400, 1200, 600, 300, 150 ppm (free amine). Tripelennamine was found to be sufficiently stable in rodent feed to use feed as the vehicle of administration. Gross pathology of sacrificed rats and mice showed no remarkable lesions.

90-Day Subchronic Study: Dose levels were set at: Rats—150, 300, 600, 1200, 2400 ppm; Mice—300, 600, 1200, 2400 and 4800 ppm. A dose response relationship between dose and reduction in weight gain was observed in male and female rats. Less toxicity was observed in mice. Pathology data are presently being evaluated for preparation of a final report. (CONTACT PERSON: Dr. C. D. Jackson)

Thenyldiamine

14-Day Repeated Dose Study: Dose levels used were: Rats and Mice—4000, 2000, 1000, 500, 250 ppm (free amine). A dose dependent decrease in weight gain was observed in rats of both sexes. Gross pathology of sacrificed rats and mice showed no remarkable lesions.

90-Day Subchronic Study: Dose levels were: Rats—125, 250, 500, 1000 and 2000 ppm: Mice—250, 500, 1000, 2000, 4000 ppm. Analysis of generated data collected during the study are being analyzed for final report. (CONTACT PERSON: Mr. G. Cronin)

Methapyrilene (Neutral)

14-Day Repeated Dose Study: Dose levels were: Mice—2000, 4000, 8000, 16000, 24000 ppm (free amine); Rats—400, 800, 1200, 1600, 2000 ppm (free amine). In mice a linear dose-response was observed with 2000 ppm producing a 4% reduction in weight gain and 16000 ppm reducing weight gain by 40% in both males and females. Pathology data are being analyzed at present.

90-Day Subchronic Study: Dose levels were: Mice—500, 1000, 2000 and 8000 ppm; Rats—100, 200, 400, 800, 1200 ppm. All experimental data are presently being analyzed in preparation of the final report. (CONTACT PERSON: Dr. C. D. Jackson)

Methapyrilene (Acid)

14-Day Repeated Dose Study: Dose levels were: Mice—1000, 2000, 4000, 8000, 16000 ppm (free amine); Rats—200, 400, 600, 800 and 1000 ppm (free amine). The drinking water was acidified with HC1 to pH 2.0. All experimental data presently are being analyzed in the preparation of a final report. (CONTACT PERSON: Dr. C. D. Jackson)

Caffeine—Acute Toxicity Studies—At each of five (5) dose levels, six (6) animals per sex per species were given a single dose of caffeine in (a) aqueous sodium (Na^+) benzoate solutions or (b) trioctanoin suspensions. The doses used were: Rats (mg/kg)—50, 100, 200, 400, 800; Mice (mg/kg)—125, 250, 500, 750, 1500. The animals were held for observation for 14 days after dosing. Twice daily checks were performed for observations. Water and feed were given *ad libitum.*

All animals dosed with caffeine/Na^+ benzoate that died did so within 24 hours of dosing. The LD_{50} was calculated to be 400 mg/kg for female and male rats and 180 mg/kg for female and male mice. All animals dosed with caffeine/trioctanoin suspension that died did so within 24 hours after receiving the caffeine dose. The LD_{50} was calculated to be 400 mg/kg for female and male rats and 370 mg/kg for female and male mice.

14-Day Repeated Dose Study—Six animals per sex per species at each of five (5) dose levels were given doeses of caffeine continuously in water for 14 days. Control animals received water only. Dose levels were: Rats (ppm)—0, 100, 200, 400, 800, 1600; Mice (ppm)—0, 50, 100, 200, 400, 800.

90-Day Subchronic Study—Data from acute and 14-day continuous feeding studies were used to establish dose levels for the subchronic study as follows: Rats (ppm) 0, 188, 374, 750, 1500, 3000; Mice (ppm) 0, 94, 188, 375, 750, 1500. The rats went on dose on October 13, 1981 and the mice one week later. The animals were fed Purina 5010M meal throughout the study; caffeine was administered via the drinking water. Both food and water consumption were measured. A final report is being prepared. (CONTACT PERSON: Dr. W. Allaben)

Test Methods Development and Validation

After extensive feasibility studies 1,8-Cineole and cinnamaldehyde were microencapsulated. This cost-saving method allows administration of volatile or unstable chemicals to test animals by the oral route. Animals were on repeated studies during the summer of 1982. (CONTACT PERSON: Dr. H. Schumacher)

The following Table 15 provides information about the testing schedule of different NTP compounds under test at NCTR.

NIOSH

Testing—Long-Term Studies With Emphasis on Occupational Carcinogenesis

The following NTP programs and projects emphasize the study of the etiology of cancer in the occupational environment and include: (1) The assessment of the carcinogenic potential of complex mixtures encountered by workers; (2) modification of carcinogenesis by known and potential promoters and cocarcinogens such as dusts, irritants, heat, and sunlight that may be part of the work environment; and (3) other factors which influence the carcinogenicity of workplace chemicals such as work practices, medications, and personal habits. This combination of applied and basic research is intended to identify needs for epidemiological studies and to elucidate the etiology of the carcinogenic process in various workplace environments.

FY 1982 Accomplishments

A number of long-term carcinogenesis studies, not formally part of the bioassay program, were initiated, completed, or in progress during FY 1982. Studied were materials ranging from single chemicals to mixtures administered by various routes

analogous to likely routes of human exposure in the workplace. Studies included: (1) Synthetic machine oils, (2) pyrolysis effluents from different foundry mold binders, (3) various substitutes for silica sand in foundry molds, (4) interaction of either ethanol or disulfiram with 1,2-dichloroethane, (5) fibrogenicity and pulmonary carcinogenesis, (6) individual chemicals—ethylene oxide, propylene oxide, N,N'-dimethylformamide, (7) mixtures—diesel exhaust, coal dust, fibrous glass, short asbestos fibers, a new postal ink formulation, and two azo dyes (Acid Black 52 and Disperse Yellow 3), and (8) asphalt and coal tar fumes and their interaction with simulated sunlight. (CONTACT PERSON: Dr. B. Johnson)

Inhalation or Intratracheal Studies—The chronic toxicities of ethylene oxide (ETO) and propylene oxide (PO) were evaluated in a two-year inhalation study (7 hours/day, 5 days/week). Eighty male weanling Fischer 344 rats and 12 adult male Cynomolgus monkeys were exposed at 0, 50 and 100 ppm ETO and 100 and 300 ppm PO. The purpose of the rat exposures was to conduct a rodent bioassay while the monkeys were utilized to evaluate effects of these epoxides on major organ systems. Preliminary findings in rats exposed to ETO indicated dose-response effects for decreased body weight gain and survival. The frequency of chromosomal aberrations and prevalence of sister chromatid exchanges in peripheral lymphocytes exhibited dose-response increases in monkeys exposed to ETO. PO decreased weight gain in rats in a dose-response relationship; however, no clastogenic responses to PO were observed. Other results, including histopathology and sperm analyses, are still being analyzed.

An inhalation study is being performed under contract with Litton-Bionetics to determine the long-term biological effects of dimethylformamide (DMF) in rats and mice. A 90-calendar-day study to determine the maximum tolerated dose of DMF for rats and mice was completed in FY 1982. The results of this pilot inhalation study enabled the initiation of a chronic study at 500 ppm and 250 ppm concentrations with the same animal species. Rats and mice will be exposed to DMF for 24 months and allowed to live for an additional six months or until there is 75% mortality in the low dose or control group, whichever comes first. Animals will be exposed to DMF for 6 hours/day, 5 days/week. The animals will be observed for hepatotoxicity, gastrointestinal disorders and development of neoplasms. The metabolic profiles of DMF will be monitored using blood. These indices may result in markers that may be used in mass diagnostic screens for appropriate industrial workers and should provide data applicable to the evaluation of DMF as an agent identified with worker health effects. Occupational lung disease, cancer and neurotoxic illness are of primary concern. Workers overexposed to DMF have exhibited a myriad of symptoms— cyanosis, confusions, dizziness and gastrointestinal disorder leading to colicky pain. DMF has also been incriminated in causing liver and pancreatic damage in humans. Kommineni in 1973 reported that intraperitoneal injections of DMF induced epithelial and nonepithelial neoplasms of the gastrointestinal tract in rats. The observation is of major interest in relation to the supposed conversion of colonic adenomatous polyps to carcinomas in humans.

A study was completed in FY 1982 whose purpose was to determine the type and extent of pulmonary fibrosis induced experimentally in hamsters by intractracheal instillations of quartz, fibrous glass, hydrated alumina, or a 1:1 mixture of quartz and ferric oxide. The objective was to determine a dose of each material which would induce a pronounced pulmonary fibrosis without compromising the life expectancy of the hamster. These and related data would then be used in a subsequent study to assess the role of particulate materials as potential pulmonary cocarcinogens. Four dose levels of each of the materials were administered in 15 weekly intratracheal instillations to groups of 25 hamsters beginning at 11 weeks of age. Survival and microscopic evidence of pulmonary fibrosis were determined and results compared to similar data from a group instilled with saline alone and a cage control group. Dose-related decreases in survival were evident for the groups instilled with the two highest doses of quartz or quartz and ferric oxide. A correlation between the incidence and severity of alveolar septal fibrosis and the dose of instilled material was evident in most groups, being strongest in those groups exposed to quartz or quartz and ferric oxide. These materials induced the most intense pulmonary fibrotic response (CONTACT PERSON: Dr. T. Lewis)

A continuing study assessed the pulmonary and/or systemic effects in rats of three mineral slags, novaculite, and a plagioclase feldspar by intratracheal instillation. The mineral slag testing is a follow-up to previous NIOSH work with coal and copper slags (FY 1973 project VOT–8379). Six groups of Fischer 344 rats (85 per group) were injected with 20 mg of either a mineral slag (two copper, one nickel), novaculite, plagioclase feldspar, or Min-U-Sil (a positive fibrosis control). A seventh group received distilled water (vehicle control). During FY 1981 serial sacrifices of rats in each group were completed at 6 and 12 months post injections. Histologic evaluation of the 6-month rats showed both the Min-U-Sil and novaculite to be fibrogenic. During FY 1982, the 18-month and terminal sacrifices were completed. Histological evaluation of collected tissues is in progress. (CONTACT PERSON: Dr. L. Stettler)

Other Studies—Another FY 1982 project was to determine the effect of fluoride (either ingested or injected) on the ability of mineral fibers (asbestos, chrysotile) to induce mesotheliomas in rats and mice. Experiments with animals have shown that fluorides potentiate the biological activity of quartz (SiO_2). It is reasonable to suggest that fluorides may also potentiate the biological effects of silicates, e.g., chrysotile. Untreated commercial chrysotile, chrysotile pretreated with hydrogen fluoride (HF), and chrysotile in combination with CaF_2 will be injected intraperitoneally into rats and mice. In addition, NaF will be administered in drinking water to other groups of rats and mice injected intraperitioneally with untreated chrysotile. All animals will be sacrificed at 24 months, and their tissues examined grossly and microscopically. The incidence of tumors in each group will be calculated and statistical comparisons made between groups. Results of these studies will be used to reevaluate the existing health standards for various types of asbestos, other mineral fibers and fluroides. During FY 1982 this project was peer reviewed and rewritten to incorporate the ideas and advice from the reviewers. Additional literature was reviewed to obtain information on the rates of reaction of HF on silicates. The experimental phase of the project was initiated. (CONTACT PERSON: Dr. D. Groth)

Test Methods Development and Validation

Short-Term Carcinogenesis Assays—A comprehensive literature review was completed and submitted to CRC Critical Reviews in Toxicology on the available *in vitro* short-term tests for detecting promoter/cocarcinogenic activity. Contracts were awarded to three laboratories to compare results on 25 coded chemicals, including promoters and cocarcinogens, in the V–79 metabolic cooperation system. FY 1983 efforts will include a multiple award contract to study these same chemicals in the 10T½ cell system potentially forming Type III foci. In-house efforts are employing neonatal epidermal cells from four mouse strains in culture to investigate early markers of tumor promotion/cocarcinogenesis, such as ornithine decarboxylase and DNA activities. (CONTACT PERSON: Dr. J. Bohrman)

FY 1983 Program Plans

Testing—Other Long-Term Studies

Two long-term carcinogenesis studies, not formally included in the bioassay program, will be initiated in FY 1983 to examine: (1) The cause of increased risk of oropharyngeal and lung cancer experienced by newsprint pressroom workers, and (2) the cocarcinogenic/promoting activity of roofing asphalt fumes. Other long-term studies ongoing or initiated in FY 1982 will continue. (CONTACT PERSON: Dr. R. Niemeier)

Human Studies

A newly designed project for FY 1983 has as its objective to devise and evaluate innovative control techniques for use by roofers to reduce their risk to the carcinogenic hazards of asphalt and coal tar pitch materials. While certain hazards are subject to permanent controls, many hazards depend upon job site, suggesting the need for worker involvement and use of innovative control techniques at each job site. The purpose of this project is to apply NIOSH-proven methodology in worker training/reinforcement approaches to a more difficult situation and to use this as a model for further applications in carcinogen-exposed working populations. (CONTACT PERSON: Dr. R. Mason)

Toxicologic Characterization

Most chemicals selected for testing by NTP are chosen because the potential exists for human exposure and too little is known about their toxicologic profile. In the toxicologic

characterization program two prinicipal areas of activity are defined: (1) General toxicology which identifies the toxicity of a chemical by species, sex, dose, and essential organ function; and (2) characterization of specific toxicologic effects—immunological, neurobehavioral, pulmonary, fertility and reproductive, and others.

The testing activities of the NIP toxicologic characterization program are composed primarily of intermediate-term (14-day), and subchronic (90–180 day) experiments. These efforts are often in tandem with or the same as the prechronic testing phases of the animal bioassay and have been described in the Carcinogenesis Testing section. All chemicals selected for testing in the two-year bioassay undergo short-term cellular and genetic toxicologic testing to determine potential for inducing gene mutations, chromosome damage, germ cell sensitivity, DNA damage and cellular transformation as well as dose-response information. Also, all are studied to delineate their absorption, metabolism, distribution, and excretion patterns to improve the reliability and precision of dose setting for chronic studies. Routinely gathered, especially in prechronic studies, is information related to target organ effects, fertility and reproduction, urinalysis, clinical chemistry and hematology. Chemical pathology—including tumor pathology, toxicologic pathology, experimental pathology and histology and electron microscopy—is an essential component of toxicologic characterization and is fully described in a separate section of the Plan.

Research activities in toxicologic characterization are concerned primarily with development and validation of better test methods, and with more in-depth characterization of the toxic effects and the mechanisms of effects identified in the various testing phase or by others. Specific disciplinary and target organ areas include: biochemical toxicology and renal toxicology which are described in this section, chemical disposition, chemical pathology, cutaneous toxicology, immunological toxicology, neurobehavioral toxicology and pulmonary toxicology which are described in ensuing sections.

NIEHS

FY 1982 Accomplishments

General Toxicology—Broadened protocols continued to be used which included measurements of organ weights, broadened pathology in acute and subchronic experiments, hematology, selected organ function assessment (including liver, kidney, immunologic, fertility, and neurobehavioral effects), and chemical disposition. Additions to the general toxicology screen during FY 1982 included efforts to develop and evaluate clinical chemistry procedures for organ function assessment. Also added were measures of reproductive dysfunction at the end of the 90-day subchronic phase—testicular pathology, epididymal weights, sperm counts and morphology in male animals and vaginal cytology in female animals. Efforts continue to be implemented to develop toxicity priniciples for certain chemical classes, especially chlorinated dibenzofurans, psoralems (see Cutaneous Toxicology section), phthalates (see section on Ortho Phthalic Acid Esters—Safety Evaluation), and benzidine derivatives (see section on The Benzidine Dye Initiative).

Although not a major FY 1982 accomplishment, the completion and evaluation of the 90-day study results remains a major decision point in the NTP. At this point, results from the 14-day and 90-day studies along with other information may indicate that a two-year bioassy need not be done or that the standard experimental bioassay design should be modified or that detailed special studies (e.g., reproductive toxicology), which would be done separately, are necessary to validate a presumptive toxic effect and to better characterize the toxic potential of the particular chemical. Some select areas that could be included in special studies are metabolism, clinical chemistry (hematology and urinalysis), pharmacokinetis, neuro-behavioral toxicology, organ function, immunology, and endocrinology (these special studies may be integrated into the prechronic or chronic testing phases, or both). The purpose of the special studies varies. These may, for example, focus on target organ toxicity, perhaps unrelated to carcinogenicity, or on problems of comparative toxicology, metabolism, pathology, and physiology which would strengthen an evaluation of the animal selected for the carcinogenesis bioassay. (CONTACT PERSON: Dr. J. Moore)

The acute and chronic toxic effects of 1,2-dibromo-3-chloropropane (DBCP) on the liver, testis, epididymis and stomach of male, F344 rats were studied. Acute injury of the testis and epididymis occurred coincident with depletion of reduced glutathione, although target organ concentrations of reduced glutathione were not generally affected. These data suggested that a threshold for acute DBCP injury existed commensurate with saturation of hepatic detoxication systems. The effects of the purported DBCP metabolites, 3-chloropropan-1,2-oxide (epichlorohydrin) and 3-chloropropan-1,2–diol (α-chlorohydrin), on the testis and epididymis were similar to those of DBCP, suggesting that DBCP may be toxic to the gonads secondary to metabolism to epichlorohydrin or α-chlorohydrin. A single administration of DBCP causes dose-dependent progressive seminiferous tubular atrophy and both immediate and prolonged infertility in male rats. No evidence of dominant lethal mutations was demonstrated with either single or 5 daily exposures. (CONTACT PERSON: Dr. W. M. Kluwe)

Biochemical Toxicology—The objectives of this study are to identify and characterize changes which occur in subspecies of cytochrome P–450 in rat liver after treatment with polychlorinated biphenyls (PCBs), 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD) and other environmental chemicals, and to assess the implications of these changes. Present work includes purification and characterization of a subspecies of cytochrome P–450 from livers of rats treated with 3,4,5,3',4',5'-hexachlorobiphenyl (HCB) and comparison with P–450PB and P–450_{MC} isolated from phenobarbital (PB) and 3-methylcholanthrene (3–MC) treated rats and development of a radioimmune assay to better quantitate amounts of these enzymes in tissues. This work will also attempt to assess the contribution of these cytochrome enzymes to the formation of mutagenic products.

The P-450 system is the principle enzyme system which catalyzes metabolic conversion of foreign chemicals including carcinogens to the ultimate labile carcinogen. Many endogenous compounds (lipids and hormones) are also metabolized by this electron transport system. Present investigations are particularly oriented toward changes in the metabolism of potential carcinogens and mutagens after exposure to environmental chemicals. Changes in lipid metabolism will also be investigated and may be important factors in PCB and TCDD-induced toxicity. (CONTACT PERSON: Dr. J. Goldstein)

FY 1982 Accomplishments

(1) Three subspecies of cytochrome P-450 have been purified (10-19 nmol/mg) from livers of 3–MC, HCB and PB treated rats. Cytochrome P-450_{HCB} differs from the major cytochrome isolated from phenobarbital or 3-MC treated rats in its immunochemical properties, molecular weight (52,000), peptide maps, and spectral properties. Its oxidized spectrum peaks at 392 nm (high spin) and its CO-reduced spectrum at 448 nm. Ouchterlony double-diffusion plates indicate the three proteins are immunologically distinct.

(2) The catalytic activities of the three enzymes have been compared after reconstitution with cytochrome c reductase and lipid. Catalytically, P-450_{HCB} differs from P-450_{PB} and P-450_{MC} in that it has low catalytic activity toward the substrates, benzphetamine, benzo[a]pyrene (aryl hydrocarbon hydroxylase) or ethoxyresorufin. However, it has high catalytic activity toward the precarcinogen, 2-acetylaminofluorene (AAF). Both P-450_{MC} and P-450_{HCB} metabolize AAF, but P-450_{HCB} produces more of the mutagenic N-OH metabolite. P-450_{HCB} also has high activity toward amines such as acetanilide and aniline. Km's and Vmax's for each substrate have been estimated.

(3) Specific antibodies have been developed for P-450_{MC} and P-450_{HCB} by the use of immunoabsorbents. A radioimmunoassay (RIA) has been developed which shows less than 0.50% cross reactivity. This RIA indicates that all 3-MC type inducers tested (3-MC, 3,4,5,3',4',5'-HCB and TCDD) induce both P-450_{MC} and P-450_{HCB} by 50–100 fold. Neither cytochrome is a major constitutive enzyme.

(4) The monospecific antibodies have been titrated against each of the reconstituted catalytic activities. Anti-P-450_{MC} is very active against the catalytic site.

(5) Mutagenesis experiments have been initiated. P-450_{HCB} is more active than the other two P-450s toward AAF (N-hydroxylation). Determination of activity toward other precarcinogens is underway.

Renal Toxicology—The mechanisms of chemical nephrotoxicity, particularly that caused by halogenated aliphatic hydrocarbon compounds, are being studied with the aid of both *in vivo* and *in vitro* techniques. Of major

concern are species differences in toxic response, organ-specific chemical detoxication and toxification reactions, dose-response relationships and acute versus chronic toxic response. Methodology for detecting and quantifying nephrotoxic response to single and to multiple chemical exposures continues to be developed and assessed.

FY 1982 Accomplishments

The acute nephrotoxic effects of the nematocide, 1,2-dibromo-3-chloropropane (DBCP), were dependent on the depletion of hepatic, but not renal, reduced glutathione concentrations. These results suggest that conjugation of DBCP metabolites with hepatic glutathione is a detoxication reaction. The renal effects of DBCP were dissimilar from those caused by its purported metabolites, 3-chloropropan-1,2-diol, 3-chloropropan-1,2-oxide and oxalic acid.

Several indices of renal cell function (e.g., intracellular potassium concentration, gluconeogenesis, accumulation of organic ions, rate of respiration) can be studied *in vitro* using tissues from naive animals incubated in the presence of nephrotoxic chemicals. Using such techniques it was shown that rat renal cells exposed *in vitro* to 1,2-dibromoethane, 1,2-dibromo-3-chloropropane or hexachloro-1,3-butadiene responded similarly to renal cells derived from animals treated *in vivo* with these same chemicals, indicating that *in vitro* exposures can be used to study the nephrotoxic effects of these compounds.

Acute chemical nephrotoxicoses often are manifested as polyuria, glucosuria, proteinuria and enzymuria, suggesting that renal injury can be diagnosed by noninvasive urinalysis techniques. Upon continued treatment with mercuric chloride ($HgCl_2$), however, such functional parameters return to normal ranges despite continued evidence of residual or recurring morphological abnormalities in the kidney. (CONTACT PERSON: Dr. W. M. Kluwe)

FY 1983 Program Plans

General Toxicology—The role of glutathione in detoxication during prolonged exposure to DBCP will be studied. In addition, rats will be treated with multiple doses of DBCP for 70 consecutive days to determine the dose-dependencies, inter-relationships and reversibilities of infertility and tissue injuries. Recovery will be followed for up to 90 days. (CONTACT PERSON: Dr. W. M. Kluwe)

Biochemical Toxicology—Antibody experiments with whole liver microsomes will be used to identify which pathways are mediated by the respective enzymes. Mutagenesis experiments with additional substrates are in progress. RIA experiments will be used to determine whether environmental chemicals affect these enzymes in extrahepatic tissues and in the embryo. The immunoprecipitation and *in vitro* translation of the 3-MC inducible messages will be examined to determine whether these messages are expressed co-ordinately. We will examine and attempt to isolate additional enzymes including the constitutive enzymes from control animals. (CONTACT PERSON: Dr. J. Goldstein)

Renal Toxicology—The mechanisms of chemical nephropathy will be studied, particularly those of halogenated aliphatic hydrocarbon compounds. Comparisons will be made of morphological (light and electron microscopic) and biochemical (e.g., DNA and protein synthesis, enzyme activities) alterations at early times post-exposure to develop cause and effect relationships in toxic response. *In vitro* cell preparations (isolated renal tubules) will be developed both for mechanistic studies in rodents and for rapid inexpensive interspecies comparisons.

Urinalyses will continue to be studied as indicators (qualitative and quantitative) of nephrotoxicity in rodents both in acute and chronic exposure regimens. Of particular interest will be low molecular weight proteinurias.

Existing NTP toxicity reports will be reviewed to associate chemicals with target organs. Assessments will be made of the propensities of chemical classes to injure specific organs, including kidney. Sex and species differences in toxic reponse, and dose-response relationships will also be examined for these chemical classes. For those chemicals with a history of demonstrated human toxicity, response of the rodent models and man will be compared. (CONTACT PERSONS: Dr. W. M. Kluwe)

NIOSH

FY 1982 Accomplishments

General Toxicology—In FY 1982, studies were conducted to evaluate the comparative cardiac toxicity of inhaled amines on a structure-activity basis. Selected amines are being used to determine the effect of chain length and extent of substitution on the amino nitrogen of the amine on subsequent cardiac toxicity. One hundred and twenty day inhalation studies with allylamine and triethylamine were initiated and completed. Data analyses have been initiated.

FY 1982 Program Plans

General Toxicology—In FY 1983 the camparative cardiac toxicity of ethylamine will be evaluated, thereby completing the toxic evaluation of the ethylamines (diethylamine and triethylamine having being studied previously). This effort is part of NIOSH's initiative in cardiovascular disease and evaluates the effects of amines on the heart and blood vessels by monitoring clinical chemistry, electrocardiographic, and gross and histopathologic indices. (CONTACT PERSON: Mr. D. Lynch)

The Benzidine-Dye Initiative

The benzidine-dye initiative is a program designed to study the toxicology and carcinogenicity of a class of dyes which are derived from either benzidine; 3,3'-dimethylbenzidine (DMB) (o-Tolidine), or 3,3'-dimethoxybenzidine (DMOB) (o-Dianisidine). This group of dyes includes some 82 discrete chemicals which are available in the United States. During 1978 the combined domestic production and import volumes of these dyes totaled 4.1 million pounds. Exposure of the general public to these materials is through contact with finished products (paper, fabrics, leather) to which the dyes have been applied, packaged dyes for home use, and the use of arts and crafts products such as spray paints, enamels, and lacquers. The Dyes Environmental and Toxicology Organization (DETO) has estimated that approximately 1,000 workers are exposed to these materials during dye manufacturing and that perhaps as many as 15,000 workers are exposed in the various dye application industries.

Benzidine is recognized as a human carcinogen, causing cancer of the urinary bladder. Both DMB and DMOB have been reported to induce tumors in rats, prompting the International Agency for Research on Cancer to classify these agents as animal carcinogens. There is no evidence to show that either DMB or DMOB are human carcinogens. Earlier research has demonstrated that many benzidine and benzidine congener-based dyes are metabolized to their respective parent aromatic amines by laboratory animals. These observations suggest that the dyes may be animal carcinogens.

Because of the high cost and time required for long-term bioassays, no attempts will be made to routinely test all benzidine and benzidine congener dyes in the NTP bioassay program. Instead, an interdisciplinary chemical class toxicology program was designed and testing begun in FY 1981. The objective of this program is to develop an integrated body of scientific knowledge concerning the pharmacokinetics, genetic toxicology, and the *in vivo* toxicity and carcinogenicity of the benzidine congeners *per se* and selected prototypical dyes. Through the judicious selection of chemicals for testing it will be possible to establish basic principles which can be applied to the entire class of benzidine-based dyes.

This program was developed in response to the needs of the EPA, CPSC, and OSHA. The scientific objectives and approaches were formulated by scientists from the EPA, CPSC, OSHA, NIH/NTP, NCTR, and NIOSH. As designed, the program will provide the scientific information required for making regulatory decisions about the benzidine and benzidine congener-based dyes, serve as a model for future chemical class studies, and conserve program resources. (CONTACT PERSON: Dr. J. Mennear, NIEHS)

FY 1982 Accomplishments

The benzidine-dye initiative involves activities conducted at NIEHS, NCTR, NIOSH, and three contract laboratories. These activities are divided into three discrete yet closely integrated areas of research work: (1) Chemical disposition and metabolism (NIEHS, NCTR, and NIOSH), (2) Genetic toxicology (NIEHS and a contract laboratory), and (3) *in vivo* toxicology and carcinogenicity testing (NIEHS and contract laboratories) (Table 16).

Chemical Disposition Studies—Employing electron-capture gas chromatography and high pressure liquid chromatography methods developed during FY 1981, the metabolism of selected bisazobiphenly dyes was studied in F344 rats. The dyes were administered by gavage and urine was collected and assayed for the parent aromatic amines and their respective metabolites. Nine dyes—four

DMB-based (Direct Red 39, Direct Blue 14, Direct Blue 53, and Direct Orange 6), for DMOB-based (Direct Blue 8, Direct Black 114, Direct Blue 10, and Direct Violet 32), and one dichlorobenzidine-based (Direct Red 46) were studied. The results indicate that the dyes are all significantly metabolized to the parent amines by the rat as evidenced by the presence of the metabolites of the amines in the urine collected after dosing. (CONTACT PERSON: Dr. L. Lowry, NIOSH and Mr. C. Nony, (NCTR)

Detailed metabolism, distribution and excretion studies with ^{14}C-labeled benzidine, DMB, and DMOB were completed. The results of these studies indicate that all three compounds were readily absorbed from the gastronintestinal tract of the rat. These compounds were extensively metabolized and metabolites (n-acetylated derivatives and sulfate and glucuronide conjugates) were excreted in both urine and feces. (CONTACT PERSON: Dr. H. B. Matthews, NIEHS)

Direct Blue 6 (a benzidine-based dye) and Acid Red 114 (a DMB-based dye were synthesized from ^{14}C-labeled parent aromatic amines. The results of absorption, distribution, metabolism and excretion studies showed that neither of these dyes was well absorbed from the gastrointestinal tract. However, both dyes were subject to the azo reductase activity of the intestinal flora with the resulting production of free parent amine which is readily absorbed and metabolized as described above. The nonreduced dye remaining in the gastrointestinal tract is largely excreted unchanged in the feces. (CONTACT PERSON: Dr. H. B. Matthews, NIEHS)

Direct Blue 15, the 3,3'-dimethoxybenzidine congener of Direct Blue 6, has also been found to be susceptible to the azo reductase activity of the gastrointestinal tract. The resulting parent amine is absorbed and metabolized as described earlier. (CONTACT PERSON: Mr. L. Lowry, NIOSH)

The methodology and results of these studies are discussed in greater detail in the Chemcial Disposition section of the Plan.

Genetic Toxicology—Standard protocols employed for the *in vitro* assessment of mutagenic activity routinely provide for the metabolic activation of the agent being tested. For the most part the metabolic activation system catalyzes oxidative metabolism. Some chemicals, such as the benzidine congener dyes, are believed to require both reductive and oxidative metabolism for biologic activity to occur. Reductive metabolism frees the parent aromatic amine (benzidine, DMB or DMOB) from the chromophore and subsequent oxidative metabolism activates the aromatic amine. In the absence of a redutive metabolizing system it is possible that the mutagenic activity of the benzidine congener dyes (if any) would go undetected.

During FY 1982 a contract was awarded to develop *in vitro* test protocols for the detection of chemicals requiring reductive/anaerobic metabolism for the expression of their mutagenic activity. Also, this contract will assess the mutagenic activities of urine samples collected during the dye metabolism studies. (CONTACT PERSON: Dr. E. Zeiger, NIEHS)

Detailed methodology and progress are presented in the Cellular and Genetic Toxicology section of the Plan.

In Vivo Toxicology and Carcinogenicity Testing—Research was initiated on comparative studies of the toxicity and carcinogenicity of DMOB and Direct Blue 15, and DMB and Acid Red 114 in rats. These chemicals are being administered in the drinking water with doses of the parent aromatic amine (DMOB, DMB) selected to be molar equivalents of the amine content of the respective dye. Thus, if the rats completely enzymatically reduced and absorbed the dye administered, they would receive the same amount of parent amine as those animals being treaded with the amine *per se*. This approach will allow us to compare the relative potencies of the dyes and their parent amines. The studies will include 14-day repeated dose studies, 13-week subchronic studies and two-year bioassays. In addition, selected clinical chemistry measurements and urinalyses (for chemical metabolites) will be done.

The 14-day repeated dose studies were completed for all four chemicals and the results were used in the selection of does to be used in the 13-week studies. The rats appeared to tolerate the dyes better than they tolerated equimolar doses of the parent amines. This is probably a reflection of the fact that the dyes are not completely reduced within the gastrointestinal tract (see Chemical Disposition section) and the intact dye remaining is simply excreted in the feces. (CONTACT PERSON: Dr. J. H. Mennear, NIEHS)

Research was initiated on the toxicity of Direct Blue 213, a copper chelate of Direct Blue 15. A hypothesis being tested during this phase of the research effort is that copper chelation protects the azo bonds from reduction by enzymes in the intestinal flora. Since the intact molecule is a highly ionized, water soluble azo derivative, it is not expected to be well absorbed from the gastronintestinal tract. If this is true, it is likely that a two-year bioassay study will not be required. A final decision will be made on this point when both chemical disposition and 13-week subchronic studies are completed. The acute toxicity study (single gavage dose) of Direct Blue 218 was completed and the doses for the 14-day repeated dose study were selected. The results of the acute study did not afford evidence of whether or not the chemical is susceptible to azo reductase, but it did give evidence of absorption of the intact dye molecule. At necropsy the internal organs of both mice and rats were stained blue. (CONTACT PERSON) Dr. J. H. Mennear, NIEHS)

Earlier workers had reported that the administration (dosed feed) of three benzidine derived dyes (Direct Blue 6, Direct Black 38, and Direct Brown 95) produced hepatocellular carcinomas in rats. The carcinomas were diagnosed as early as four weeks. The rapidity of the onset of these tumors suggested that the carcinogenicity was due to more that simple metabolism of the dyes to benzidine. NTP staff are currently reviewing the data and selected pathology slides from this earlier study. During FY 1982 the comparative toxicity and carcinogenicity of Direct Blue 6 and equimolar doses of benzidine were assessed in female rats. The test chemicals were administered in drinking water at concentrations which approximated the daily doses used in the earlier study. Animals were on the treatment regimen for up to 90 days.

Based upon animal survival, body weight gains, clinical chemistry values, and histopathological lesions, the conclusion was reached that benzidine is more toxic than an equimolar dose of Direct Blue 6. This difference in toxicity is probably a reflection of the fact that the dye is not completely reduced to the parent amine and chromophore. Thus, dye treated rats did not receive the same exposure to benzidine as did the animals that were treated with benzidine *per se*. Neither treatment produced hepatocellular carcinomas; however, they both produced severe hepatic lesions (regenerative nodule formation) which were considered to be signs of initial hepatotoxicity and subsequent hepatic regeneration. (CONTACT PERSON: Dr. J. H. Mennear, NIEHS)

FY 1983 Program Plans

Chemical Disposition Studies—The chemical disposition portion of the benzidine dye initiative has been largely completed. The single remaining study will be an assessment of the absorption, distribution, metabolism and excretion of Direct Blue 218. This portion of the project will entail the synthesis of ^{14}C-labeled Direct Blue 218 and conduct of the *in vivo* portions of the experiment. This work will be completed during FY 1983. (CONTACT PERSONS: Dr. C. W. Jameson and Dr. H. B. Matthews, NIEHS)

Genetic Toxicology—During FY 1983 protocols for the anaerobic preincubation of the benzidine congener dyes, followed by aerobic incubation and mutagenicity testing will be developed. This will be followed by the testing to the 13 benzidine congener dyes as well as the three parent amines. Also, urine samples collected during the completed metabolism studies will be tested for mutagenicity. (CONTACT PERSON: Dr. E. Zeiger, NIEHS)

In vivo Toxicology and Carcinogenicity Testing—The two-year bioassays of DMB, DMOB, Direct Blue 15 and Acid Red 114 will be initiated. These studies will be conducted only in rats and will include up to four dose levels of each chemical and interim sacrifices which might allow for an early termination of the studies, depending on the findings. (CONTACT PERSON: Dr. J. H. Mennear, NIEHS)

The 13–week study of the toxicity and carcinogenicity of Direct Blue 213 will be completed during FY 1983. The results of this study will be considered along with the results of the absorption, distribution, metabolism and excretion study on Direct Blue 218 in making a decision on the need for a two-year bioassay on this dye. (CONTACT PERSON: Dr. J. H. Mennear, NIEHS)

Studies will be conducted on the nature and mechanism of hepatic lesions produced by benzidine and Direct Blue 6 in rats. Rats will be treated with benzidine and Direct

Blue 6 for various periods (up to 13-weeks) and histopathological examinations will be made at regular intervals to assess the nature of the early hepatic lesions and to study their progession in order to determine if these lesions can be considered to be preneoplastic in nature. (CONTACT PERSON: Dr. J. H. Mennear, NIEHS)

Chemical Disposition

Knowledge of chemical disposition—the rates and degrees of absorption, tissue distribution, metabolism and excretion of chemicals by intact animals—is fundamental to determination of the mechanisms by which exposure to various chemicals induces toxicity.

The chemical dispositon program involves laboratories at NIEHS, NIOSH and NCTR. New and ongoing activities for the most part fall into one of three general categories: (1) Chemicals and classes of chemicals chosen for toxicology and/or carcinogenesis bioassays which provide an opportunity for a study of structure-activity relationships; (2) chemicals which are benzidine congeners and derived dyes, part of the NTP initiative; and (3) chemicals to which industrial workers are exposed.

NIEHS

The immediate objective of most studies of chemical disposition done in support of the NTP is to determine the effective disposition of candidate chemicals chosen for study in the NTP bioassay or to help explain anomalous results observed in the bioassay. That is, studies of chemical disposition done prior to initiation of the bioassay are designed to determine the rate and degree of absorption and metabolism, tissue distribution and rate and route of clearance of the chemical in question by intact animals. These studies also consider the effect of dose and route of administration on these parameters and are thereby designed to facilitate the choice of optimal doses to be used in the bioassay. Studies of chemical dispositon done after the completion of the bioassay to help explain anomalous results are designed to answer more specific questions. For example, if sex or species related differences were observed in response to the bioassay, studies would be designed to compare the metabolism and disposition of the chemical in question in each sex or species involved.

The long-range goals of chemical disposition studies done under the NTP are to develop and publish data which will permit a better appreciation of those factors which influence the disposition are designed to permit a better assessment of the chemical structure-activity relationships which determine rates of absorption, metabolism, distribution and persistence in tissues and influence rates of clearance from the body. Thus, the ultimate goal of this work is to provide basic information on chemical disposition which will facilitate the extrapolation of laboratory data to man.

Studies of chemical disposition for the NTP are conducted through an inhouse program and four contracts which are administered by in-house personnel. Nomination of chemicals for chemical disposition studies is open to every professional within the NTP and interested individuals outside the NTP. Nominations must be from the list of chemicals chosen for NTP bioassay or closely related chemicals which provide an opportunity for a study of structure-activity relationships. The standard approach to a study of chemical disposition is to use the available literature data, e.g. LD_{50}'s, chemical structure and properties, and anticipated route of human exposure, to design the protocol for the preliminary study, i.e., to set doses and choose the vehicle and route of exposure. In most instances these studies follow the disposition of carbon-14 labeled chemicals in the adult male rat; however, when it is desirable or necessary, studies are designed to use other analytical techniques, other species or ages or female animals.

FY 1982 Accomplishments

Work on the Benzidine Congener Initiative has continued; major findings through FY 1982 are as follows:

(1) The metabolism, distribution and excretion of 3,3'-dimethoxybenzidine-^{14}C (DMOB) have been studied in the rat. This compound was readily absorbed from the gastrointestinal (GI) tract, metabolized and excreted primarily in bile and subsequently in feces. DMOB was metabolized to more than 20 metabolites most of which are excreted in the form of glucuronide and sulphate conjugates. N-acetyl metabolites of DMOB are formed, but they are not as prevalent as was previously observed for benzidine. This work is complete and a manuscript describing it has been completed and submitted for publication.

(2) A disposition study of 3,3'-dimethylbenzidine-^{14}C (DMB) has been completed in the rat. This benzidine congener is also readily absorbed, rapidly metabolized, and excreted almost exclusively in the form of metabolites. Excretion in bile and feces is three times greater than in urine. The metabolites excreted include glucuronide, sulphate and N-acetyl conjugates. A manuscript describing the work has been prepared and submitted for publication.

(3) Direct Blue 6, a benzidine based dye, with a ^{14}C label in the benzindine nucleus has been the subject of a metabolism and disposition study in rat. Results indicate the intact dye is not well adsorbed from the GI tract. The azo linkages binding the ^{14}C-benzidine nucleus to the chromophores are reduced by intestinal microbes releasing significant amounts of free benzidine which is absorbed from the GI tract and metabolized as described previously. That portion of the dose not metabolized is excreted in feces

(4) Acid Red 114, synthesized with as ^{14}C label in the 3,3'-dimethylbenzidine (DMB) nucleus, was metabolized in the rat by azo reduction to release DMB which is further metabolized and excreted as described above. The relatively large Acid Red 114 molecule is not absorbed and most of an oral dose not reduced by intestinal microbes to DMB is excreted intact in the feces.

(5) 3,3'-Dichlorobenzidine-^{14}C was readily absorbed by the rat, extensively metabolized. Greater than 70% of the dose is excreted in bile and feces as mono- and diacetyl-3,3'-dichlorobenzidine, N-glucuronides and hydroxylated metabolites. The parent compound was mutagenic in *Salmonella* in the presence of S-9 fraction and some of the metabolites of this compound appear to be even more mutagenic in this system than the parent compound. The results of this study are being prepared for publication.

Most of the work done as part of the NTP program in Chemical Disposition is more diversified than the Benzidine Congener Initiative and has included studies of halogenated alkyls and aromatics, aromatic amines, and dyes and dye intermediates as well as studies of cyclic and inorganic compounds. Major findings in these studies in FY 1982 are as follows:

(1) Studies of the absorption metabolism and clearance of the sparingly soluble dye intermediate, 1-amino-2,4-dibromoanthraquinone-^{14}C (ADQ), revealed that GI absorption of this compound was highly dose dependent. Based on $^{14}CO_2$ exhaled following ADW administration, GI absorption decreased from approximately 90% at a dose of 2 mg/kg to 21% at 120 mg/kg to approximately 2% at 814 mg/kg. Therefore the total ADQ absorbed at the two higher doses was not significantly different and these results have direct relevance to studies involving chronic administration of ADQ. The absorbed fraction was readily metabolized and excreted in bile and feces. There was no evidence of ADQ accumulation in tissues.

(2) After intravenous (iv) administration of 0.78 mg/kg ^{14}C-cyclohexane to adult male F344 rats, 54% of the dose was excreted in the breath in the first hour, 80% in 24 hours, and 83% in 72 hours. After oral administration at doses of 2000, 1000, 200 and 100 mg/kg, 78, 76, 62 and 63%, respectively, of the dose was expired over 72 hours with the maximum rate of excretion usually from 2–8 hours. Twelve, 15, 29 and 29%, respectively, was excretion in urine, compared to 14% excreted in urine after the iv dose. Greater excretion of polar metabolites in urine following the smaller oral doses is attributed to relatively greater metabolism in liver following absorption from the GI tract. No significant excretion of ^{14}C in feces was observed. Cyclohexane accounted for 93–99% of the radiolabel excreted in breath, but less than 0.1% of that in the urine. A maximum of 0.04–0.4% of the dose was excreted in breath as the more toxic cyclohexa-none and 0.09–0.6% as cyclohexanol. Less than 0.1% of the dose was excreted in the urine as either of these compounds. Cyclohexane was concentrated primarily in adipose tissues, but this accumulation was very transient and total excretion was quite rapid.

(3) The disposition of a commonly used dye, CI Vat Blue 1 (Blue 1), was studied in the rat following oral, dermal and iv-administration. Results indicate Blue 1 was poorly absorbed following both oral and dermal administration, due primarily to extreme insolubility in biological media. The dosage form administered also plays an important role in absorption. For example dermal absorption of Blue 1 was approximately 1.7 $\mu g/cm^2$/week following dermal administration of 550 $\mu g/cm^2$ of dry

dye, and 5.2 μg/cm²/week when applied in a polyethylene glycol based ointment. Disposition studies following iv administration of a small dose, 0.22 mg/kg, indicated slow metabolism and elimination primarily in feces. Blue 1 may have some potential for bioaccumulation with chronic exposure.

(4) The disposition of hexachlorocyclopentadiene-^{14}C (HCP) was studied in the rat following admmistration or oral or iv doses or after inhalation of the vaporized chemical. Following oral administration of HCP to the rat most of the HCP reacted with stomach and gut contents and was never absorbed. Following iv administration, HCP reacted with blood components, primarily hemoglobin, to form unextractable complexes. Following inhalation, HCP reacted with lung tissue in addition to being absored and distributed to most of the major tissues. The reactivity of HCP in biological systems was confirmed *in vitro* by showing that it forms unextractable complexes when incubated with blood, liver or feces. The reactivity of HCP in the GI tract decreasing its absorption versus that observed following inhalation explains why this compound is much more toxic when inhaled than when ingested. The results of this study are being prepared for publication.

(5) The GI absorption of a series of highly insoluble compounds is being studied in the rat. Studies with three pigments, CI Pigment Red 3, CI Pigment Red 23, and CI Pigment Yellow 74, have shown that GI absorption of intact pigments is minimal. Even after large doses, 60–600 mg/kg, tissue levels of these pigments are below the limits of detection, 5 ppb. The effect of microbial action on these chemicals and the possibility of absorption of the resulting metabolites are also being investigated.

(6) Allyl isothiocyanate-^{14} C (AITC), in male and female F344 rats, is readily absorbed, metabolized and excreted in the form of several metabolites. Approximately 60–70% of the dose is excreted in urine and 2–3% in feces within 24 hours in both sexes after either oral or iv administration of AITC. Whole body half-life was less than 24 hours in both sexes. high concentrations of AITC-derived radioactivity were present in blood and lung 15 minutes after, and in liver, muscle, skin and adipose tissue 45 minutes after oral administration. Very small amounts of AITC were present 24 hours after administration. This compound appears to have little or no potential for bioaccumulation in any tissue assayed. The metabolism and disposition of AITC will also be studied in male and female B6C3F$_1$ mice. The results of this study will be compared to those obtained from male and female F344 rats in an attempt to explain differences in AITC-induced urinary bladder tumor formation among sexes and species.

(7) Halogenated biphenyl transport by components of rat blood was studied under both *in vivo* and *in vitro* conditions. Fractionation of plasma components indicate halogenated biphenyls are associated with each major class of plasma proteins but are most concentrated in the lipoproteins. A significant portion of the total halogenated biphenyls in whole blood is also associated with the cellular components. Halogenated biphenyls are readily exchanged between plasma and the cellular components and between lipoproteins and other classes of plasma proteins. Partition experiments indicated that the relative affinity of a biphenyl for each fraction was directly proportional to the lipid solubility of the biphenyl. The major portion of the halogenated biphenyls in blood is not thought to be bound to specific sites on blood proteins but rather is believed to be associated non-specifically with hydrophobic sites on plasma proteins or the cellular components of blood. The rapid transfer of these compounds to tissues is thought to be by partition to similar sites on cellular proteins.

(8) 1,3-diphenylguanidine (DPG), a rubber acclerator, was readily absorbed from the GI tract of male Fischer rats and rapidly distributed throughout the body. Absorption and disposition of DPG were not significantly affected by the route of administration or by the dose over the 1.5 to 150 mol/kg dose range. Most of a dose of DPG was excreted in the urine and feces in approximately equal amounts within 24 hours after oral or iv administration, and greater than 99% was cleared into the urine and feces within 3 days. Approximately 50–80% of the DPG-derived radioactivity excreted in urine was the parent compound, while the remainder was present as one major and two minor metabolites. Close to 90% of the radioactivity excreted in bile was as a single major metabolite. Administration of multiple doses resulted in accumulation of DPG-derived radioactivity in the liver but not in other tissues.

(9) p-Nitroaniline (PNA) was readily absorbed from the GI tract, distributed to all tissues, and rapidly excreted. PNA was excreted in urine as a number of metabolites. Half-life for most tissues was less than 12 hours and little PAN-derived radioactivity remained in the body after 24 hours. Trace levels of PNA persisted in blood, possibly due to reaction with hemoglobin. Metabolites of PNA were excreted primarily as sulphate conjugates in urine and bile. Excretion of parent compound accounted for a small part of the dose.

(10) 4-Chloro-2-nitroaniline (CNA) was almost completely absorbed from the GI tract after oral doses of 0.136, 1.36, and 13.6 mg/kg body wt. The distribution pattern was the same by oral or iv administration. Adipose tissue was the major depot of CNA, with moderate amounts being redistributed to the skin. More than 65% was excreted in the urine in 7 hours. CNA-derived radioactivity excreted in the urine over 3 days was approximately 75%, and in the bile about 12%. CNA was readily metabolized to at least nine metabolites with the major metabolite identified as a sulfate conjugate of the parent compound. This metabolite accounts for 65% of the total dose and is excreted almost exclusively in urine.

(11) The disposition of 2,4-dinitroaniline (DNA) was independent of dose or route of administration when administered orally at doses of 1, 10 or 90 μ mol/kg or by iv injection of 10 μ mol/kg. Absorption from the GI tract was near vomplete throughout the range of oral doses. Excretion in urine accounted for 90% of the dose within 24 hours. Most of the DNA-derived material excreted was in the form of conjugates of various metabolites. There was no evidence to indicate that the parent compound or any of its metabolites were tetained in any of fifteen major tissue assyed.

(12) o-Nitroanisole-^{14} C (ONA) was absorbed following either oral or dermal exposure with the half-life for dermal absorption being approximately 20 hours in rat. After iv administration, ONA was rapidly distributed to all tissues assayed, readily metabolized and eliminated in a biphasic manner with an initial half-life of 1 to 2 hours and a terminal half-life of approximately 4 days. The initial component of the biphasic elimination of ONA accounted for approximately 90% of the dose, and there was little evidence of ONA accumulation or persistance in tissues. ONA distribution and metabolism were independent of route of administration or does in the range of 5–50 mg/kg. However, at an oral dose of 500 mg/kg there was some evidence that the mechanisms responsible for ONA metabolism and/or elimination were saturated. ONA was excreted primarily in urine, 85% and almost exclusively, 99%, as a variety of metabolites. Major metabolites were o-nitrophenyl-sulfate, 63%, and o-nitrophenylglucuronide, 11%. These results are being prepared for publication.

(13) p-Chloroaniline-^{14} C (PCA) was readily absorbed from the GI tract and very rapidly metabolized in the rat. Clearance from tissues was also rapid and virtually all of the PCA excreted was in the form of metabolites. The elimination half-life for PCA-derived radioactivity from most tissues was 1.5 to 3 hours and the major route of elimination was in urine (>80%). The major metabolite of PCA was p-chloroacetanilide. Disposition kinetics for PCA appear to be independent of route of administration and dose in the range studied (0.3 to 30 mg/kg).

(14) 1,2,3-Trichloropropane-^{14}C (TCP) was studied in the rat following oral doses of 0.32, 3.2 and 32 mg/kg and an iv dose of 3.6 mg/kg. No effect of dose on metabolism and disposition of TCP was observed. After iv administration, TCP was the component of the decay curve having the shorter half-life accounting for most of the dose. Highest tissue concentrations were in adipose tissue, but this and all other tissue concentrations were transient and 78% of the dose was excreted within 8 hours following iv administration. Except for 5% of the dose eliminated in the exhaled air as parent compound, TCP was cleared from the body as metabolites. The major route of excretion was urine which accounted for the elimination of 46% of the dose, primarily as glutathione conjugates; 25% of the dose was expired as COOG52, and 23% was eliminated in feces.

(15) p-Nitrotoluene-^{14}C (PNT) was readily absorbed from the GI tract of rats, rapidly metabolized and excreted primarily in urine. There was no effect of dose on absorption, metabolism or excretion at the doses studied, 1, 10 and 100 mg/kg. After iv administration PNT was metabolized rapidly and no parent

compound could be detected in any tissue by 4 hours. PNT metabolites were rapidly cleared from the body and 70% of the dose was excreted in urine by 4 hours. Excretion in feces was minimal, but studies with bile cannulated animals indicate that a significant portion of the dose is eliminated in bile prior to enterohepatic circulation and subsequent elimination in urine. This observation may be relevant in view of the fact that enterohepatic circulation is thought to contribute to the carcinogenicity of dinitrotoluene. Major metabolites of PNT were 4-nitrobenzoic acid and 2-hydroxy-4-nitrotoluene, accounting for 50–60% of the PNT derived radioactivity in urine. Minor metabolites were primarily conjugates and included the glucuronide of p-nitrobenzyl alcohol

(16) Studies of gallium arsenide (GA) disposition have concentrated on methods for the preparation of GA for animal dosing and analysis of these elements in biological media. The proper oxidation state can be maintained if GA is ground under nitrogen to a powder of 1–5 micron particle size. Most forms of GA are insoluble, but *in vitro* studies of GA in the powdered form indicate that it has rapid and substantial solubility in buffered media. A technique has been devised for the analysis of arsenic in tissues in ng quantities using atomic absorption with a sensitivity of 2–5 ppb. Atomic absorption is also used for analysis of gallium, but present limits of the assay are only 1–2 parts per million. Work to improve this assay for use in a study of the disposition of GA in rats is continuing.

(17) A continuing project to study the metabolism of three polychlorinated biphenyl (PCB) isomers in *in vitro* preparations from dog, monkey and human liver is yielding data which corroborates data obtained in previous *in vivo* studies. That is, the species as well as the degree and position of chlorination have profound effects on the rate at which PCBs are metabolized. Enzyme kinetic studies of the metabolism of 4,4'-dichlorobiphenyl (4, 4–DCB) and 2, 3, 6, 2', 3', 6'-hexachloro-biphenyl (2, 3, 6–HCB) by microsomal prepartions from human liver yielded the following values for 4,4–DCB and 2, 3,6-HCB, respectively:

Km = 10 μmolar
Vmax = 5.4 p mol/mg protein/min
Km = 10 μmolar
Vmax = 1.2 p mol/mg protein/min

The major metabolite formed from 4,4-DCB was 3-hydroxy-4,4'-dichlorobiphenyl. The major metabolites formed from 2,3,6-HCB were 4- and 5-hydroxy-2,3,6,2',3',6'-hexachlorobiphenyls. Similar metabolites and kinetic parameters were obtained with microsomal preparations from monkey liver, but neither human nor monkey liver was able to metabolize the third PCB studied, 2,4,5,2',4',5'-hexachlorobiphenyl (2,4,5-HCB). On the other hand, microsomal preparations from dog liver can metabolize 4,4-DCB and 2,3,6-HCB more rapidly than those from human or monkey liver, and dog liver microsomes can metabolize 2,4,5-HCB at an appreciable rate. The results of these studies indicate that the monkey is a better animal model for human metabolism of PCBs than the dog. Efforts to accurately predict rates of *in vivo* metabolism based on results obtained *in vitro* are continuing.

(18) 1,2,3,4,6,7-Hexabromonaphthalene (HBN), in the rat, was imcompletely absorbed from the gut and initially concentrated in the liver. Some of the compound was rapidly metabolized in the liver and excreted via the bile into the feces. The remainder was rapidly distributed to the fat and skin from where in slowly returned to the liver where it persisted. During the first few days after acute exposure, metabolities were excreted in the feces. Almost no radioactivity appeared in the urine. Following this initial excretion, little HBN-derived radioactivity was excreted from 3 to 35 days. The basis for the rapid initial metabolism and excretion of HBN followed by the persistence of the remainder in liver is being investigated.

(19) Studies of the chemical disposition of 2,3,7,8-tetrachlorodibenzofuran (TCDF) demonstrated how the disposition and toxicity of this compound varies with both species and strain of animal exposed. Little metabolism of TCDF can be detected in guinea pigs. When fat is mobilized as an energy source, TCDF is redistributed back to the liver. Upon repeated exposure to low levels of TCDF, no TCDF intoxication occurs until a critical body burden is reached. When this occurs, extensive weight loss and death ensue rapidly. The repeat dose studies indicate that the fat content affects the amount of TCDF needed to reach toxicity. Mature animals have larger fat deposits and have a higher LD_{50} than observed for young animals. The time to death also seems to increase with age while a lower percentage of the body weight seems to be lost before death occurs.

The disposition of TCDF in two mouse strains was affected by their differential content of adipose tissue. C57BL/6J mice had about half as much fat as DBA/2J mice and half of the whole body half-life. The greater amount of adipose tissue in DBA mice served to retain the TCDF and thus decrease its availability for metabolism and excretion. The enhanced size of the fat depot in these animals may in part explain the lessened sensitivity of this strain to the toxicity of halogenated polyaromatics.

(20) The disposition of 1,2,4,6,8,9-hexachlorodibenzofuran (HCDF) has been examined in order to extend the structure/activity relationships for polyhalogenated aromatics. HCDF is incompletely absorbed from the gut, but that portion of the dose which is absorbed was quite persistent, tending to accumulate more in the liver than in the fat. Small amounts of metabolites are excreted in the feces, but overall metabolism is minimal.

(21) Altered pharmacological responses as a result of aging have also been investigated as part of the program in Chemical Disposition. Changes in the disposition of two polychlorinated biphenyls (PCBs) in aging rats have been examined. 2,3,6,2',3',6'-Hexachlorobiphenyl (236-HCB) and 2,4,5,2',4',5'-hexachlorobiphenyl (245-HCB) are symmetrical isomers whose distribution, metabolism, and excretion have been studied previously in young rats. In the present study, senescent rats (22–24 months old) were given a single iv dose of the HCB, sacrificed at times ranging from 1 hour to 21 days, and distribution of the ^{14}C-labeled dose (0.6 mg/kg) was examined in tissues and excreta. The half-lives and pool sizes were increased for both compounds, suggesting a slower rate of metabolism. Increased metabolite/parent compound ratios in the tissues suggested a slower elimination of metabolites in the old rats. The effects of aging seem to be more pronounced for 245-HCB than for 236-HCB. Thus, senescence may more markedly affect the disposition of more persistent PCBs.

Lymphatic tissues and associated cells, including thymus, spleen, and macrophages, were examined for age-related changes in intermediary metabolism. Key enzymes from the hexose monophosphate shunt, the glycolytic pathway, and the Krebs cycle were compared in rats of 6, 12, 18, and 24 months of age. Pyruvate kinase and lactate dehydrogenase decreased in thymus, but increased in spleen. Glucose-6-phosphate dehydrogenase, isocitrate dehydrogenase, and malate dehydrogenase activities all decreased in pulmonary macrophages. These data suggest that the biochemical supports for phagocytosis and cell-mediated immunity are diminished during aging in macrophages and in the thymus, while the humoral immune response mediated by splenic B cells may not be compromised in senescent rats.

FY 1983 Program Plans

The NIH/NTP program in Chemical Disposition will continue to provide metabolism and disposition data for as many chemicals as possible. The immediate goals of this work will be to assist chemical managers in the design and interpretation of NTP bioassays for chronic toxicity. Therefore, the Chemical Disposition Program always remains open to requests for such studies as they are needed. However, a number of studies are planned for the coming year. These plans include basic disposition studies for 1,2-dichloro-5,5'-dimethyl-hydantoin, 2-bromo-4,6-dinitroaniline, benzo(f)quinoline and toluene-2,6-diisocyanate. A comparative study of the metabolism and disposition of triortho-, trimeta- and triparacresylphosphate will be done in the rat and at least one species which is sensitive to the neurotoxicity of triorthocresyl phosphate.

A relatively large study on phthalic acid esters will be conducted to provide an evaluation of the effects of chemical structure on the dermal and gastrointestinal absorption, disposition and clearance of a series of representatives from this chemical class. The chemicals to be studied are phthalic acid, dimethyl-, diethyl-, di-n-butyl-, diisobutyl-, di-n-hexyl-, di-n-octyl-, di(2-ethylhexyl)-, diisodecyl- and butyl benzyl phthalates plus 3 or 4 monoalkyl phthalates. In addition to these studies a comparative metabolism and disposition study in rats and mice will be done for diallyl phthalate. Plans for FY 1983 also call for a comparative metabolism, disposition and covalent binding and how chlorination of the p-phenylenediamine molecule increases its binding to subcellular macromolecules.

The Chemical Disposition Program has lacked the capability to study volatile compounds. Plans for FY 1983 call for

initiation of a new contract or interagency agreement to study the fate of chemicals administered by inhalation or eliminated primarily by exhalation. This contract or interagency agreement will replace a contract which will terminate at the end of FY 1982 so the actual number of contracts will remain at four. However, the contract allowing inhalation studies should significantly increase the capacity of the Chemical Disposition Program to respond to the need for studies of a broader range of chemicals. (CONTACT PERSON: Dr. H. B. Matthews)

NIOSH

FY 1982 Accomplishments

Chemicals Chosen as Part of The NTP Benzidine Congener Initiative—Studies on the metabolism and structure-activity relationships of 9 benzidine congener dyes in the rat were completed by NCTR. All dyes tested (Direct Red 39, Direct Blue 14, Direct Blue 53, Direct Orange 6, Direct Blue 8, Direct Black 114, Direct Blue 10, Direct Violet 32, and Direct Red 46) were metabolized to their respective congeners. This program is associated with activities of the NTP Benzidine Dyes Metabolism Workgroup. (CONTACT PERSON: Dr. L. Lowry, NIOSH, and Mr. C. Nony, NCTR)

Chemicals Chosen with Known or Potential Exposure of Industrial Workers—The metabolism and tissue distribution study in rats of the benzidine congener dyes, Direct Blue 15 and Direct Red 2 (IA 80–34, Metabolism of Azo Dyes to Aromatic Amines, NIOSH-NCTR), was completed during FY 1982. There was extensive metabolism of the dyes with the free benzidine congeners being identified in the urine. A major publication/final report "Metabolism and Distribution of Two ^{14}C-Benzidine-Congener-Based Dyes in Rats as Determined by Gas Chromatography, High-Pressure Liquid Chromatography, and Radioassays" will be published in the Journal of Analytical Toxicology (1982). (CONTACT PERSON: Dr. L. Lowry)

NCTR

FY 1982 Accomplishments

Azo Dyes—The primary thrust of this research was to develop sensitive and specific analytical chemical methodolgy so that valid studies of azo dye metabolism in experimental animals could be conducted. Another goal of this research was the development of an analytical capability to determine parts per billion levels of certain dye metabolites so urine analysis could be used to determine if industrial workers had been exposed to azo dyes.

Prior research was concentrated on the water soluble benzidine-based, tris azo dye, Direct Black 38, and the 3,3'-dichlorobenzidine-based water insoluble compound, Pigment Yellow 12. The development of analytical methodology, the stability and purification of the dye and pigment, and metabolism of these compounds in the hamster are complete and have been published in the literature (Nony 1979, 1980; Bowman 1981, and Lowry 1980).

The methodology for 3,3'-dimethylbenzidene (*o*-tolidine) and 3,3'-dimethoxybenzidene (o-dianisidine) and their mono- and diacetylated derivatives (synthesized at the NCTR) has been completed for assaying rat urine by high-pressure liquid chromatography (concentrations to 50 ppb) or rat, hamster or human urine by electron-capture gas chromatography (concentrations to 1 ppb). This has been reported by Nony (1981, 1982). Results of the metabolism of Direct Red 2 in the rat and hamster also has been reported (Nony 1981, 1982).

The regulatory agencies through the auspices of the National Toxicology Program arranged with the NCTR to participate in a joint initiative to determine whether metabolism of certain azo dyes occurs in Fischer 344 rats and to elucidate structure-activity relationships of the different dyes. The dyes selected for this experiment were Direct Red 39, Direct Blue 8, Direct Blue 14, Direct Blue 53, Direct Red 46, Direct Orange 6, Direct Black 114, Direct Blue 10, and Direct Violet 32. All of these dyes have been analyzed for purity and stability and given as single gavage doses to rats. The urine samples, collected under dry ice, were assayed for corresponding free amines, their mono- and diacetylated derivatives and alkaline hydrolyzable conjugates and reported to the Chairman for Metabolism Studies. As agreed upon by the Interagency Committee, the results were released by the Chairman when the study was completed; a summary of results is reported in Table 17. A technical report by Nony (1982) and papers by Bowman (1982) and Levine (1982) are in press.

An interagency agreement between NIOSH and NCTR that calls for metabolism, absorption and tissue distribution studies in rats using ^{14}C-labelled Direct Red 2 and Direct Blue 15 is complete. A technical report by Oller (1982) and a paper by Bowman (1982) describing the results are in press. No azo dye related NTP work is anticipated in FY 1983. All planned aspects of this program were completed in FY 1982. (CONTACT PERSON: Mr. C. Nony)

Gentian Violet— The metabolism of this triphenylmethane dye, which is added to poultry feed as a preservative, is being elucidated in the chicken (target animal) and in the Fischer 344 rat and B6C3F$_1$ mouse (test animals). Metabolite profiles of extracts of some chicken and rodent tissues have been obtained. Excretion of gentian violet (hexamethyl-p-rosaniline chloride) in rat liver bile has been measured, and initial experiments on microbiological metabolism have been conducted.

The multidose metabolism study with ^{14}C-gentian violet has been conducted with both sexes of Cornish-White Rock broilers. The chickens were dosed orally by gelatin capsule three times daily for seven days. The females and males were administered a total of 1.45 mg and 1.72 mg daily, respectively, based on the amount of gentian violet present in feed at a 15 ppm level. The dose was calculated on the basis of daily feed consumption of 97 g and 115 g for broilers at 6 weeks of age.

Group of five animals per sex were sacrificed starting at six hours after the last dose. Tissues were excised, frozen and stored at −70°C until analysis. The raising, dosing, sacrifice and necropsy of the chickens were performed under an interagency agreement with the Comparative Animal Research Laboratory at Oak Ridge National Laboratory (ORNL). Preparation of doses and analysis of biological samples were handled at the NCTR.

Duplicate samples were cut from partially thawed liver, kidney, breast muscle, thigh muscle, heart and gizzard for weighing and combustion in a tissue oxidizer. The entire skin with adhering fat was homogenized in water before duplicate aliquots were taken for combustion. The total residues were expressed as ppb of ^{14}C-gentian violet equivalents. A notable feature of the preliminary date is the slow depletion of label from the tissues, especially from liver. Excreta were collected and frozen daily from each chicken in the 240-hour sacrifice group. Weighted samples were homogenized in water before aliquots were taken for combustion analysis. Over 90% of the label was recovered in the excreta.

A procedure consisting of extraction, solvent partitioning, alumina and reversed phase high performance liquid chromatography (hplc) has been applied to the preliminary analysis of pooled tissues from the 6-hour sacrifice group to reveal an average of 40% bound residues and extensive metabolism of the ^{14}C-gentian violet. Gentian violet is a minor component of the extractable residue in liver. However, in gizzard gentian violet constitutes up to 70% of the extractable residues. The demethylated products pentamethylpararosaniline, N,N,N',N'-tetramethylpararosaniline, and N,N,N',N''-tetramethylpararosaniline comprise the major identified metabolites in liver, kidney, gizzard, breast, heart, and skin with adhering fat. In the skin extracts, however, there are as yet major unidentified metabolites which account for over 50% of the extractable residue. There seems to be no difference in metabolite profile between sexes in this early sacrifice group.

Although radioactivity from an iv injection of 1 uCi (85 μg) of ^{14}C-gentian violet appears in the bile of anaesthetized Fischer 344 rats within 10 minutes after administration, only 18–26% of the dose is collected over 12 hours. The biliary excretion of a gentian violet dose given by gavage is only 8–9% over a 12-hour period. In each case, at least 10 metabolites were observed with unchanged gentian violet accounting for no more than 10% of the total radioactivity.

We have preliminary indications that several pure cultures of anaerobic bacteria and cultures of mixed microflora from rat intestine reduce gentian violet under conditions of anaerobic incubation. In the most active cultures, the blue color of gentian violet fades within 2 hours of incubation. Extracts of the culture medium when subjected to analysis by hplc are found to contain increasing amounts of the uncharged reduction product, leuco gentian violet. The kinetics of this reaction are under investigation. This product has not yet been identified in tissue extracts of test animals.

Sulfamethazine—Work in progress on the metabolism of sulfamethazine in swine, the

target animal of this study, is being condcuted through an interagency agreement at the Metabolism and Radiation Research Laboratory (MRRL) of the Regional Laboratory of the U.S. Department of Agriculture (USDA) at Fargo, North Dakota. Furthermore, tissue samples for the study of depletion kinetics in edible tissues of swine administered labeled sulfamethazine have been provided to MRRL under an interagency agreement with the Comparative Animal Research Laboratory (CARL) at ORNL. All analyses of swine tissues and excreta are being performed at MRRL.

Combustion analyses of tissues have been completed both for the "steady state" experiments at MRRL and for tissues from the depletion study supplied by CARL. The "steady-state" experiments involve analysis of tissues obtained 8 hours after the last dose from swine fed 115 ppm of ^{14}C-sulfamethazine in two daily meals for 3, 5, or 7 days. Preliminary data on combustion analysis indicate that total radioactivity reaches a plateau in the tissues after five days of dosing.

For the depletion study, tissues from swine fed 115 ppm of ^{14}C-sulfamethazine in two daily meals for 7 days were collected at 8, 24, 48, 120, and 240 hours after the last dose. Values for total radioactivity of tissues for common time points in the steady state and depletion experiments agree well. (CONTACT PERSON: Dr. J. McDonald)

FY 1983 Program Plans

Gentian Violet—It is anticipated that nearly all work on the metabolism of gentian violet will be completed in 1982.

Sulfamethazine—Metabolism studies on rodents are scheduled to begin at NCTR in July 1982. Purification and identification of major metabolites will be completed in FY 1983. Review of the swine metabolism work performed by MRRL will be performed at NCTR In FY 1983 upon receipt of the final report from MRRL supplying details on the identification and depletion of various metabolites of sulfamethazine from swine tissues.

In response to suggestions by Giera *et al.* that the glucopyranosyl derivative of sulfamethazine in swine tissue may be an artifact due to extraction or storage conditions, the proper control experiments will be initiated at MRRL. By spiking unmedicated swine tissues with ^{14}C-sulfamethazine and comparing extracts of aliquots frozen at various time periods with the t=o sample, a quantitative determination can then be made of presumed artifactual formation of the glucopyranosyl derivative of sulfamethazine, earlier identified in swine at MRRL.

The present experimental protocol for the metabolism of sulfamethazine in rodents involves a 7-day dosing period with labeled compounds. To test the effect of possible enzyme induction and alteration by intestinal microflora of the sulfa drug on the metabolite profile in tissues, a preconditioning experiment is being proposed. The total radioactivity in tissues, and sulfamethazine metabolite profiles will be used to evaluate the effect of preconditioning or accumulation of metabolites in comparison to non-pretreated rats.

Because of the recent concern about the production of a transplacental mutagen from the interaction of nitrite with sulfanilamide it is proposed that *in vivo* and *in vitro* studies be undertaken involving the reactions of sulfamethazine with nitrite. Desaminosulfamethazine has been detected in swine tissues, and it now appears from work with the closely chemically-related sulfadiazine that nitrite is involved through formation of the intermediate diazonium ion followed by "reductive deamination."Treatment of sulfanilamide itself with nitrite under simulated acidic gastric conditions leads to the formation of a transplacentally mutagenic triazene resulting from condensation of the intermediate diazonium ion with sulfanilamide.

In vivo studies of the interaction of sulfamethazine with nitrite will comprise a variation of the preconditioning study in which nitrite will be administered to rats in drinking water. It is expected that the desamino-sulfamethazine accumulating in tissues will then be pulse labeled during the 7-day dosage with ^{14}C-sulfamethazine. Nitrite will continually be provided in drinking water during this period. Tissues will then be analyzed for extractable desamino and triazene derivatives. Tissues will be analyzed for bound residues which may be expected to accumulate by interaction of cellular components with the chemically reactive deazonium ion intermediate. The importance of the desamino derives from the fact that the related desaminosulfadiazine is depleted very slowly from swine tissues.

Direct demonstration of the diazonium ion intermediate will be attempted *in vivo* through the use of a diazonium trapping agent such as 2-naphthol. Fischer 344 rats provided with nitrite in drinking water will be gavaged with a mixture of C-sulfamethazine and a trapping agent. Excreta will be collected and analyzed for the azo coupling product. A control will be run without trapping agent to check for any inhibition of labeling of tissues.

The contribution of intestinal microflora to the metabolism of sulfamethazine will be investigated by incubation of substrate in pure cultures and in cultures of mixed inocula from rat intestine. Pathways have recently been proposed for the conversion of 3,4-dichloroaniline to biphenyl, azo, and triazene derivatives through incubation with pure bacterail cultures in the presence of nitrate. The reaction requires reducing conditions. Sulfamethazine, a substituted aniline, will be incubated under anaerobic conditions with pure cultures and rat intestinal inocula in the presence of nitrite to test for similar reactions. Some attention will also be paid to the detection of these possible products in tissues of the test and target animals in the metabolism experiments. Investigations will continue into the possible N-ovidation of sulfamethazine to a reactive metabolite. (CONTACT PERSON: Mr. J. McDonald)

Chemical Pathology

NIEHS

The Chemical Pathology Branch is responsible for monitoring the quality of all aspects of anatomic and clinical pathology associated with studies conducted at NIEHS under the auspices of the National Toxicology Program (NTP). In addition the Branch provides histology, electron microscopy, and collaborative support to the Intramural Research Program (IRP) of the NIEHS. The Branch's research efforts are directed toward evaluating and developing short-term *in vivo* carcinogenesis assays and characterizing and defining specific lesions observed in bioassay studies. To accomplish its mission the Branch is composed of four integrated Sections: Tumor Pathology, Toxicologic Pathology, Experimental Pathology, and Histology and Electron Microscopy.

Tumor Pathology

The Tumor Pathology Section assures that pathology evaluation if NTP chronic bioassays is precise, accurate, and state-of-the-art. The major emphasis in FY 1982 has been on improving the quality of histological sections, standardizing tumor nomenclature and establishing uniform criteria for classification of neoplasms. In a workshop this past year, criteria for proliferative lesions of the pituitary, thyroid and adrenal glands were presented to Program pathologists. In FY 1983, workshops defining diagnostic criteria for lymphoreticular and pancreatic lesions will be held. In addition, there is more Program emphasis on non-neoplastic lesions than in past years.

FY 1982 Accomplishments

Chronic Pathology Studies Reviewed—During FY 1982, pathology reviews of 39 chronic bioassays were held (Table 18). Each chronic bioassays was given a quality assurance (QA) evaluation by an independent pathology laboratory; this included evaluation of the histotechnique, verification of computer tables with the original animal data records, verification of slide and tissue counts and the initial pathology evaluation of all target tissues and all tumors. The QA report with a list of differences of diagnostic opinion between the QA pathologist and the original (bioassay laboratory) pathologist(s) was sent to the Head of the Tumor Pathology Section who reviewed the report and selected members for a Pathology Working Group (PWG). A PWG consists of 4–6 pathologists, some of whom are selected because of research experience with lesions peculiar to the bioassay being evaluated. The PWG pathologists are affiliated with the NTP, industry and academia. The PWG members independently evaluate "blindly" those slides where diagnostic differences of opinion occur and attempt to arrive at a consensus diagnosis. If the consensus diagnosis is different from that of the original pathologist, the appropriate slides are returned to the original pathologist for re-evaluation. The original pathologist's re-evaluation becomes the final data of record. However, if it is significantly different from the PWG consensus, an additional set of pathology data may be included in the NTP Technical Report to reflect the PWG opinion. In most cases this is not necessary.

The PWG also has the responsibility of determining the overall quality of the

histotechnique and the initial pathologist's evaluation. If an undue number of deficiencies are noted, the study may be considered inadequate and a partial or complete pathology re-evaluation may be required before acceptance by the NTP.

The workings of the QA and PWG assure more accurate and uniform pathology arising out of chronic bioassays. PWG members are also helpful in assessing biological potential of chemically-induced lesions. The PWG chairperson submits a pathology narrative on each bioassay to the chemical manager incorporating PWG opinions on induced lesions plus a detailed pathological description of the pertinent lesions. This information is used in writing the NTP Technical Report. (CONTACT PERSON: Dr. G.A. Boorman)

Tumor Nomenclature and Criteria—In March 1981 a workshop on proliferative lesions of the pituitary, thyroid and adrenal glands was held for the Program contractor pathologists. The impetus for this workshop was that in most studies these lesions constitute a frequent source of diagnostic confusion. Speakers included NTP, contractor and academia pathologists. Following the workshop a slide study set of typical lesions with diagnoses and criteria were produced for each laboratory in the Program.

In three studies during FY 1982 pancreatic acinar cell lesions were found that appeared to be treatment related. Since it appears that some of these lesions may have been overlooked in the past because of their subtle nature, a complete review of the pancreases from control animals in six recently completed studies was undertaken with special emphasis on differences between untreated and vehicle control (corn oil) animals. Results of this study will be used for a future workshop for Program pathologists on rodent pancreactic lesions.

Proliferative pulmonary lesions of rats and mice are currently being reviewed for presentation and publication through the ISLAR series. Interest in this series of lesions was stimulated by the recently completed NIEHS inhalation study of asbestos in which a variety of lung tumors were found. (CONTACT PERSON: Dr. G. A. Boorman)

Myelotoxicity/Immunotoxicology—In collaboration with the scientific staff of the NIEHS/NTP Immunotoxicology section the Tumor Pathology section provided pathology support and myelotoxicity evaluation for several mouse studies (Table 19). Myelotoxicity evaluation included bone marrow cellularity, pleuripotent stem cell assay (CFU–S), macrophage granulocyte assays (CFU–GM) plus a measure of erythropoiesis (Fe^{59} uptake). In addition to screening chemicals for myelo/immunotoxicity, efforts included methods development for evaluating and understanding mechanisms of myelotoxicity.

The results of a series of studies involving estrogenic substances (e.g., zearalenone and estradiol) were interpreted as indicating that these substances have a similar "A"-region to diethylstilbestrol (DES), and produce macrophage activation but not the DES myelotoxicity. In other studies estrogenic myelotoxic effects were reversed by progesterone and according to preliminary results an intact thymus may be required for expression of estradiol myelotoxicity.

Mice exposed to chrysotile asbestos had depressed bone marrow parameters at 2, 12 and 26 weeks following a three-day exposure. These mice also had enhanced IgA levels, analogous to humans with radiological evidence of asbestosis. While myelotoxicity has not been widely recognized in asbestos exposed patients, there is evidence that Canadian miners exposed to asbestos have depressed circulating leukocytes possibly due to myelotoxicity. *In vitro* exposure of pulmonary macrophages to asbestos results in prostaglandin E (PGE) release. PGE has a known negative feedback effect on the bone marrow. Based on these studies, the mouse model may prove useful in characterizing the nature of the immune dysfunction that has been reported to occur in asbestos exposed patients.

The subchronic (90-day) bioassay results for the NTP chemical, ochratoxin A, suggested a degree of bone marrow hypocellurarity consistent with myelotoxicity. To better characterize this chemical, it was included in the immunotoxicology program. In this study ochratoxin was shown to depress hematopoietic stem cell proliferation and antibody plaque forming cell response. (CONTACT PERSON: Dr. G. A. Boorman)

Toxicologic Pathology

The Toxocologic Pathology section assures the quality of pathology from acute and subchronic studies in mice and rats, established diagnostic nomenclature for toxicology pathology, and defines organ specific toxic lesions.

FY 1982 Accomplishments

Prechronic Pathology Studies Reviewed—During FY 1982, 63 bioassays were reviewed by the Toxicologic Pathology section (Table 20). Prechronic studies (usually 90-day duration) conducted under the prime contract are quality assessed by the prime contractor and reviewed by the Head of the Toxicologic Pathology section. Repeat dose (14-day) and prechronic studies on chemicals contracted and managed directly by NTP through a master agreement are quality assessed as described in the Tumor Pathology section. Attention is given to quality of histotechnique tissue counts, slide inventory, accuracy of diagnosis, and dosage recommendations for subsequent studies. These findings are then reviewed by the section head. Selected slides are put together for a Pathology Working Group (PWG), consisting of 3 to 4 pathologists and a chairperson, which reviews all discrepancies in diagnoses, major target organs, and selected spontaneously occurring lesions observed in the study. A report is then prepared by the section head describing the results of the PWG and interpretation of the study up to that point. Points addressed in the report include a narrative description of target organ lesions, differences in opinion between the initial pathologist and quality assessment (QA) pathologist, the quality of work performed by both the initial pathologist and the QA pathologist, and an assessment of the quality of histotechnique. Dosage recommendations are suggested based upon the results of the pathology portion of the study.

This extensive review of prechronic studies has resulted in better communication between the NTP and contract laboratory pathologists, more uniformity in the classification of toxic lesions, better clarification of NTP goals, more emphasis on descriptive pathology narratives, better monitoring of the quality of histotechnique at contracting laboratories, and revisions in the master agreement statement of work, where necessary. (CONTACT PERSON: Dr. C. A. Montgomery)

Pathology Data Base for Prechronic Studies—Historically, 90-day studies have not been entered into the computerized Carcinogenesis Bioassay Data System (CBDS) for retrieval purposes. Thirty-one prechronic bioassays have been identified that have been completed and have Individual Animal Data Reports (IADR's) in the repository. Summary tables of the incidence of neoplastic and non-neoplastic lesions from these studies will be generated under the CBDS contract. Pathology data from these 31 chemical studies were selected based on the following criteria:

(1) Positive (chemical effect) prechronic bioassay.

(2) Representation of several different laboratories.

(3) All bioassays were quality assessed.

(4) Very few changes made in the IADR's after review of the study.

Data generated from this project will be used for two specific purposes:

(1) Control animal data will be analyzed for the incidence of spontaneously occurring lesions in various organs, both neoplastic and non-neoplastic;

(2) Dosed animals will be analyzed for target organ specificity and evaluation of toxicologic pathology nomenclature used in prior studies. This latter information will be used to evaluate the Toxicology Data Management System (TDMS) micropathlogy glossary. (CONTACT PERSON: Dr. C. A. Montgomery)

Cause of Death Project—The National Toxicology Program has recently made a firm decision to determine th probable "cause of death" in chemical bioassays. One of the difficulties in this type of judgement is the problem of determining whether a neoplasm actually resulted in death or only contributed to the animal's demise. Pathologists in the Chemical Pathology Branch have recently taken the most common tumors of the Fischer 344 rat and B6C3F_1 hybrid mouse and categorized them based on high risk, low risk, or no risk of causing death. Using this data, members of the Biometry and Risk Assessment Program (NIEHS) will retrospectively examine studies and determine whether our knowledge of Tumor behavior in these rodent species is enough to prognosticate whether these tumors could kill an animal in a given time frame. (CONTACT PERSON: Dr. C. A. Montgomery)

Toxicology Data Management System (TDMS)—In 1981, a major decision was made to implement the Toxicology Data Management System (TDMS) in the NTP bioassay contract laboratories. At that time,

the pathology portion of this system was considered inadequate. The micropathology glossary, as it existed in July 1981, was primarily designed for the specific needs of the National Center for Toxicologic Research. To date, approximately 90% of the micropathology glossary has been rewritten and restructured. The system entails a build-a-block diagnosis concept, using base terms such as inflammation or degeneration with appropriate modifiers to describe these lesions. Lesions may be diagnosed by specific anatomic site down to subtopography. This should result in a more detailed data base of chemically-induced lesions for NTP studies.

The gross pathology portion of TDMS had not been developed prior to October 1981. An *ad hoc* committee composed of pathologists from academia, government, and industry met and developed the gross pathology glossary. Pathology forms and summary reports are nearing completion. TDMS has recently been implemented for the first time at one of the contractor laboratories. Tissues from the bioassay of C. I. Pigment Red 3 were evaluated microscopically using TDMS. It appears at this time that the micropathology glossary is adequate and the hardware, for the most part, is satisfactory.

The TDMS is presently being implemented in seven different laboratories. This will result in the establishment of a new data base for naturally occurring and chemically-induced lesions of the Fischer 344 rat and $B6C3F_1$ mouse. Retrieval of such data is not anticipated for at least one year. (CONTACT PERSON: Dr. C. A. Montgomery)

Experimental Pathology

The Experimental Pathology section develops and validates animal models for chemical toxicity and carcinogenicity, investigates the pathogenesis of lesions observed in toxicity and carcinogenicity studies, and develops and standardizes clinical pathology procedures for use in rodent studies.

Fiscal Year 1982 Accomplishments

Strain A Mouse Pulmonary Tumor Validation Study—During fiscal year 1982 data from strain A mouse bioassays for 60 chemicals were examined to determine if this short-term bioassay would identify carcinogenic chemicals. The initial conclusion is that the strain A mouse pulmonary adenoma model has limited utility for identifying chemicals which were carcinogenic in conventional rat and/or mouse two-year bioassays. Furthermore, there was poor agreement in strain A bioassay results on the same chemicals tested in two separate laboratories. The initial conclusions regarding this validation exercise were comprehensively reviewed when remaining test data were made available in September 1982. (CONTACT PERSON: Dr. R. R. Maronpot)

Hepatocarcinogenesis Research—A study is currently underway utilizing a short-term rat liver tumor model to investigate the 2-hit hypothesis of carcinogenesis. Following a single intraperitoneal dose of diethylnitrosamine (DEN), the population of initiated hepatocytes is expanded by promotion for two months with dietary phenobarbital. After a second dose of DEN, an expanded population of cells with prior initiation (1-hit) will be available for a second initiation (2nd-hit) ultimately resulting in a greater production of liver neoplasms, if the 2-hit hypothesis of carcinogenesis is operative. Stereologic measurements of phenotypically altered (γ-glutamyl transpeptidase positive) preneoplastic foci will be made in addition to documentation of hepatocellular neoplasms. In-life portions of this study were completed in October 1982. (CONTACT PERSON: Dr. R. R. Maronpot)

Pathogenesis of Furfuryl Alcohol Toxicity—As a result of unusual liver lesions observed in $B6C3F_1$ mice in the prechronic furfuryl alcohol study, a special study to investigate the pathogenesis of these lesions was carried out. Following a single intraperitoneal injection of furfuryl alcohol (3 dose levels), male and female $B6C3F_1$ mice were killed at several intervals. Liver, kidney, lung, heart and tissues were fixed for microscopic and ultrastructural study. Sera from these mice were submitted for clinical chemistry measurements and ultimate correlation with morphologic findings. Livers from mice in the furan study (3 dose levels) were also similarly tested for comparison with toxicity patterns and lesion progression elicited by furfuryl alcohol. Microscopic evaluation of tissues is underway. In addition to liver lesions, kidney lesions and unusual peribronchial lung lesions are being documented in treated rats. Completion of microscopic tissue evaluation and subsequent ultrastructural studies will be completed during the next year. (CONTACT PERSON: Dr. R. R. Maronpot)

Ultrastructural Study of Lung Lesions Found in the Prechronic 2,3-Dibromo-1-propanol Study—Enlarged bronchiolar lining cells were observed in several treated and control mice in the 2,3-dibromo-1-propanol prechronic study. Since this observation has been made in other mouse toxicity studies, it was important to identify these enlarged bronchiolar cells. Paraffin blocks of affected lungs from six mice were retrieved from the NTP tissue archives and processed for transmission electron microscopic examination. In most instances affected bronchioles were lined by contiguous Clara cells. (CONTACT PERSON: Dr. R. R. Maronpot)

Fibrogenic and Carcinogenic Potential of Asbestos and Man-made Mineral Fibers—A joint study on the fibrogenic and carcinogenic potential of chrysotile asbestos and man-made mineral fibers was conducted in conjunction with the Pneumoconiosis Research Unit, Medical Research Council (MRC), Penarth, Wales, United Kingdom. An additional objective of the study was to determine the comparability of results using the same protocol at two geographically different locations.

The basic protocol consisted of the exposure of male and female F344 rats to the fibers (inhalation chamber) for 6 hours/day, 5 days/week for 12 months. The rats were then held for lifetime observations. Interim kills were conducted after 3 and 12 months exposure and 12 months postexposure. Fibers studied at both facilities were UICC chrysotile B asbestos and microglass fiber (JM-100). In addition, short and long range (fiber length) chrysotile asbestos was studied at NIEHS while various types of rock wools were evaluated at MRC. The results of this joint study were similar at both facilities. Fibrosis and neoplasia occurred with the asbestos fibers but not with the microglass fibers. (CONTACT PERSON: Dr. E. E. McConnell)

Clinical Pathology Studies—Several clinical pathology base-line studies were carried out to provide data useful in the design and interpretation of clinical pathology portions of NTP toxicity studies. These base-line studies included: sequential bleeding, effect of decreased body weight gain on hematologic measurements in rats, effects of fasting and water deprivation on hematologic and clinical chemistry measurements in rats, effects of freezing and frozen storage of rat sera on clinical chemistry values, comparison of reticulocyte counts in young vs. old Fischer 344/N rats, and within-day and between-day precision studies for commonly measured analyses. (CONTACT PERSON: Dr. R. R. Maronpot)

Histology and Electron Microscopy

The Histology and Electron Microscopy Section is primarily a support facility providing services to both the Intramural Research Program (80%) and Toxicology Research and Testing Program (20%). The histology laboratory provides basic cutting and staining services and has limited capability for special stains and techniques. The electron microscopy laboratory also provides routine cutting and staining services. In addition it provides technical help in the use of electron microscopy and interpretation of these observations.

FY 1982 Accomplishments

During FY 1982 the histology laboratory supported 41 NIEHS scientists. In pursuing this effort the laboratory sectioned and stained a total of 28,464 tissues.

The electron microscopy laboratory supported 24 NIEHS scientists in their needs for ultrastructural examination of animal materials. (CONTACT PERSON: Mr. F. A. Talley)

Chemical Pathology

Other FY 1982 Accomplishments

The Chemical Pathology Branch developed a protocol which will significantly modify the amount of microscopic pathology required on future chronic bioassays. The current procedure requires that 42 sections from 32 tissues be examined microscopically from all animals that die during the bioassay and from those that survive the 104-week treatment period. Analyses of the results from previous NCI and NTP bioassays indicated that significant reductions in the number of tissues examined could be implemented without compromising the ability to detect chemically-induced tumors. Further, the quality of the toxicologic pathology could be markedly improved through examination of some animals at a time period earlier than 24 months, when normal aging lesions often interfere with the

detection and interpretation of chemical related lesions.

Based on discussions with the NTP Board of Scientific Counselors and expert consultants, NTP developed the following protocol:

1. *Interim evaluation*—Ten animals/dose/sex/species will be added to the design protocol. At 15 months into the chronic study, these animals will be sacrificed and evaluated as follows: (1) Organ Weights—liver, kidney, brain; (2) Chemical Pathology—including complete blood count and selected serum chemistry; (3) Complete necropsy of all animals; and (4) Complete histopathology (32 tissues) of the high dose and control groups, tracking to lower dose groups where indicated (same procedure used for the 90-day prechronic studies).

2. *Necropsy Evaluation*—All animals from all dose groups which die or are killed during and at the end of the experiment receive a complete necropsy examination. All tissues from animals from all dose groups will be preserved for possible histopathologic examination (same procedure as currently done).

3. *Histopathologic Examination*—Interim deaths (before 21 months of study) are subjected to a complete histopathologic examination (no change from current protocol). The remaining animals in the high dose and control groups receive an essential, yet limited, histopathologic examination (see below). Only selected tissues from animals in the lower dose groups will be examined histopathologically.

4. *Essential Histopathology*—Sixteen (female) or eighteen (male) organs or tissues (21–23 sections) from the remaining animals from the high dose and control groups are prepared and examined microscopically. Included are:

Liver—left and right anterior lobe	Urinary bladder
Kidney—left and right	Spleen
Lung	Thyroid and Parathyroid glands
Brain—3 sections	Adrenal gland—left and right
Pituitary gland	Ovary/uterus
Pancreas	Testis/epididymis
Heart	Prostrate/seminal vesicles
Stomach	Lymph node—submandibular

Additional tissues examined microscopically include: Nasal cavity and turbinates (inhalation studies, 3 sections), skin (dermal study), all gross lesions detected at necropsy, and target organs identified in prechronic studies or in animals which died or where sacrificed during the two-year bioassay.

5. *Extended Histopathology*—Once the 16 or 18 organs are examined microscopically and pathologic effects are identified, tissues from all animals in lower dose groups are examined using the following convention: all gross lesions detected at necropsy; organs in which neoplasms were found significantly increased ($p < 0.10$) compared to controls; organs in which rare tumors were found even if the comparison with controls does not achieve the $p < 0.10$ level; and organs in which toxic lesions were observed.

6. *General Guidelines*—If the survival rate of the animals at the highest dose is decreased by 15% or more compared to survival of concurrent controls because of toxicity, then the next lower dose is used as the baseline for pursuing lesions examined microscopically in the high dose animals. If the decrease in survival is due to tumor related, deaths this caveat does not apply. Additional tissues will be examined at lower doses as deemed appropriate. Necropsy, trimming, and staining procedures are the same as those established in the current protocol.

When possible the pathologist should establish a *probable* cause of death. In animals with neoplasia, the pathologist should determine if the neoplasm could have been a *contributing factor* in the cause of death.

It is felt that the modified protocol will yield equivalent pertinent information to the previous protocol with regard to carcinogenic potential of a chemical. The inclusion of an interim kill at 15 months should permit a better delineation of chronic toxicity. The Quality Assurance review and the Pathology Working Group exercises will be conducted as currently practiced and should reveal deficiencies in pathologic interpretation. This new protocol is straight-forward and should be easily implemented in contractor pathology laboratories although a higher level of management on the part of the pathologist will be required. (CONTACT PERSON: Dr. E. E. McConnell)

FY 1983 Program Plans

Pathology Review and Workshop Activites—In FY 1983 Quality Assurance and Pathology Working Group functions will be continued for prechronic and chronic bioassays to maintain a uniform high quality of pathology for the Program. This workload will increase significantly over that of FY 1982 since a large number of bioassays are scheduled for completion during the next twelve months. A workshop dealing with rodent leukemias and lymphomas was held for contract laboratory pathologists in November 1982. The subject matter for a similar workshop in the spring of 1983 will be selected based upon Program needs.

Tumor Combination and Interpretation Guidelines—Uniform guidelines for combining and interpreting tumors which occur in chronic bioassays will be established in FY 1983 based upon imput from NTP pathologists and the NTP Board of Scientific Counselors. For specific organs where there is clear evidence of tumor progression, the benign and malignant tumors will be tabulated separately for statistical purposes and may be combined to more clearly delineate the carcinogenic potential of a given chemical. Guidelines for combining of tumors will also be established for biologically similar tumors that occur in the same organ such as fibromas and fibroadenomas of the rat mammary gland. Similarly, ground rules for documenting tumor multiplicity in a given organ and in paired organs will be established in FY 1983. Once these guidelines are established, recommendations will be made for how the various separate, combined and mutiple tumor frequencies should be interpreted for purposes of judging the evidence of carcinogenicity. (CONTACT PERSON: Dr. E. E. McConnell)

Investigation of Use of Plastic Embedded Thin Sections—During FY 1983 the feasibility and utility of using one-micron sections from plastic embedded tissues for better characterization of subtle renal and hepatic lesions will be determined.

Investigation of Morphometric Analysis of Teased Nerve Preparations—Since routine histologic procedures are relatively insensitive for assessing structural alterations in peripheral nerves, special procedures may be indicated for chemicals which are suspected of producing peripheral neuropathy. Morphometric analysis of tested nerve preparations and use of one-micron cross sections of nerves should permit detection of early structural alterations. Use of these special procedures will be investigated during FY 1983.

Study of the Pathogenesis of Furan-Inducted Liver Lesions—Using a sequential kill protocol, the development of furan-induced liver lesions in the rats will be investigated. This in-house study will include light microscopy, histochemistry, and clinical chemistry. Furan causes toxic liver changes with subsequent nodular regenerative hyperplasia. This regenerative hyperplasia has been interpreted by some pathologists to represent neoplasia. The proposed furan study will be designed to clarify the biological significance of the liver lesions. (CONTACT PERSON: Dr. R. R. Maronpot)

Baseline Clinical Pathology Studies—Clinical pathology studies to generate information useful in the design and interpretation of rodent toxicity bioassays will be continued during FY 1983. In addition, clinical pathology protocol guidelines and standard operating procedures will be developed for use in NTP contract laboratories.

Investigation of Mechanisms of Carcinogenesis—Through contactual mechanisms, an effort will be mounted to clarify the nature of the rodent liver tumor response frequently observed in two-year bioassays. Following refinement of short-term rat in vivo liver tumor models, selected chemicals will be tested for initiating and promoting activity. This is primarily a research rather than a testing effort.

During FY 1983 a collaborative in-house study using a short-term *in vivo* rat urinary bladder tumor model will be started to investigate the urinary bladder carcinogenic response associated with recently bioassayed chemicals. (CONTACT PERSON: Dr. R. R. Maronpot)

Evaluation of the Reduced Pathology Protocol for Bioassays—During FY 1983 results of the implementation of the modified pathology protocol for bioassays will undergo initial evaluation. Since final evaluation will require the completion of several chronic bioassays, the impact of this Program decision will not be realized for 3 to 5 years.

Cutaneous Toxicology

A common target for injury and disease, the skin serves as a route of entry for toxic chemicals present in drugs, cosmetics, the workplace and other environments. Within

NTP, research activities are focused on toxicologic assessments of the potential of chemicals for producing skin irritation, sensitization, and tumors, and on the ability of chemicals to enter the body through the skin. The latter aspect is of increasing concern where exposures may occur to chemicals which affect reproduction, growth and development, chemical carcinogenesis and neurotoxicity. Also being evaluated are the effects of repeated mechanical trauma to the skin. Chronic trauma is associated with disfigurement and breakdown in the barrier function of the skin.

FY 1982 Accomplishments

A working group was formed to identify and coordinate research activities within NTP and to determine future research needs. Interaction was initiated with the DHHS Ad Hoc Interagency Dermatology Working Group as a means of obtaining input from Government agencies outside of NTP and incorporating this information into future NTP planning and research activities. These activities will also serve to identify experts within and outside of NTP to participate in peer review of projects and manuscripts.

NIOSH

Research within NIOSH is focused on studying the extent and rate of dermal absorption of chemicals, and on evaluating the effects on the skin of chemicals found in the workplace. During the past year, design, construction and testing began on two methods for studying *in vivo* percutaneous absorption using small laboratory animals (hairless mouse). The methods involve a body-only exposure system to study the dermal absorption of gases and vapors and a second system for quantitatively assessing the rate and extent of absorption of volatile liquids which contact the skin. Initial experiments are being accomplished using benzene and carbon disulfide.

As part of NIOSH's Health Hazard Evaluation Program, Azamine T810, a tertiary amine used during solvent extraction of vanadium oxides, was evaluated for its ability to produce skin irritation and sensitization. When applied under a patch for 24 hours, the substance was found to be irritating to rabbit skin at concentrations as low as 0.1% (in 95% ethanol). When applied daily for twenty days to nonoccluded sites on the backs of guinea pigs the test substance was shown to be irritating at concentrations as low as 0.5% but not at 0.1%. Skin sensitization was not observed even at concentrations which were irritating to the skin.

To identify job categories and workers affected by chronic repeated mechanical insults to the skin, a report is being developed, under contract, which will provide an estimate of the extent of the problem. Potentially, the report will be used to focus on worker populations where a combination of skin trauma and chemical exposures may lead to increased disease or illness. (CONTACT PERSON: Dr. A. Susten)

NIEHS

NIEHS is investigating the carcinogenic and toxicologic properties of a number of chemicals following chronic applications to the skin of the Fischer 344 rat and B6C3F1 mouse (Table 21). The ability of the flame retardant 2,2-bis(bromomethyl)-1, 3-propandiol (BMP) to be absorbed through the skin is being evaluated as part of that toxicologic protocol. Results will be compared with levels obtained during feeding studies.

The toxicologic properties of the psoralens with and without ultraviolet light are being studies in the Fischer 344 rat and HRA/skin hairless mouse. The FDA has recommended the study of psoralens because psoralen plus ultraviolet light (320–380 nm), commonly referred to as PUVA therapy, is a widely used treatment for psoriasis in clinical studies conducted by FDA, and systemic animal toxicology has not been performed. It is estimated that 1–3% of the world's population suffers from psoriasis, and in 1978 an estimated 35,000 Americans received this treatment.

The NTP program is investigating a variety of psoralens with different chemical formulas including the most widely used psoralen, 8-methoxypsoralen. These studies include mutagenicity, pharmacokinetics and metabolism, long-term bioassays, and effects of treatment on skin enzyme levels. During the past year the NTP has determined the dark and light DNA binding parameters of 8-methoxypsoralen and other related psoralens. This information will be correlated with the toxic response of animals to the psoralens, in order to determine the relationship between DNA interaction and mutagenicity and/or carcinogenicity.

As part of the psoralen program, the NTP sponsored a conference on the "Photobiologic, Toxicologic and Pharmacologic Aspects of Psoralens" on March 1–3, 1982 at NIEHS, Research Triangle Park, NC. The conference discussed various aspects of psoralens including: photobiologic properties; pharmacokinetics and pharmacodynamics; mutagenicity; carcinogenic and immunologic aspects of psoralen (PUVA) therapy; safety and therapeutic effectiveness; and the analytic aspects of psoralen activity. The proceedings of this conference will be published as a monograph by the *Journal of the National Cancer Institute*. (CONTACT PERSON: Dr J K. Dunnick)

FY 1983 Program Plans

NIOSH

Testing and validation of the two percutaneous absorption systems will continue. Due to the interest in the adverse reproductive effects of certain glycol ethers, the rates of dermal absorption of two glycol ethers, (ethylene glycol monoethyl ether and ethylene glycol monomethly ether), will be evaluated. Data from these studies will be correlated with the toxicologic and tissue distribution profiles currently being conducted by NIOSH. (CONTACT PERSON: Dr. A. Susten)

As a part of the chronic trauma initiative, a small workshop is planned for the spring of 1983. The workshop will bring together a number of international experts to discuss problems related to chronic mechanical trauma to the skin and provide insight into controlling or reducting these work-related hazards.

NIEHS

Research activities under the psoralen program will continue. Additional compounds to be tested by the skin route will be selected and tested. (CONTACT PERSON: Dr. J. K. Dunnick)

Immunological Toxicology

The immune system imparts host defenses, maintenance of homeostasis and surveillance, most notably against infectious agents or tumor development. Three classes of undesirable effects may potentially occur when the immune system is perturbed by advertent (e.g., drugs) or inadvertent (e.g., environmental pollutants) exposure to chemicals and include: (1) Those which result in immunodeficiency or suppression; (2) those which result in alteration of host defense mechanisms; and (3) those which result in induction of hypersensitivity or allergy either nonspecifically or directly against the chemical antagonist.

NIEHS

The primary objectives of the NIEHS immunotoxicology program are to select, refine and validate a panel of immunology and host resistance procedures to define immunotoxicity of chemicals and to correlate changes in immune function with changes in host resistance. The comprehensive assay panel which has been developed evaluates: (1) Host resistance to bacterial, parasitic and tumor cell challenges; (2) cell mediated immune functions; (3) humoral mediated immune functions; (4) macrophage functions; (5) natural killer cell activity; and (6) myelotoxicity.

In addition selected chemicals of environmental concern are being examined using this panel. Most of these chemicals are known or suspected human carcinogens and are examined to determine: (1) The carcinogenic-immunotoxic relationship; (2) structure-activity relationship; and (3) mechanism(s) of immunotoxicity. These studies are ultimately designed to better define immunotoxicity, determine no effect levels and obtain a data base for accurate assessment of human health risk.

FY 1982 Accomplishments

During FY 1982 several chemicals were examined for immunotoxicity in NTP intramural laboratories using our comprehensive panel. B6C3F1 mice were exposed to mercuric chloride for 7 weeks in drinking water. Specific immunotoxic and biochemical alterations occurred in lymphoid organs of mice at dosages of mercury which did not induce other signs of toxicity such as altered liver enzymes, body weight or histopathology. The immunological defects were consistent with altered T-cell function as evidenced by deceases in both T-cell mitogen, mixed leukocyte responses, and T-cell mediated host resistance parameters. There was a particular association between the T-cell defects and inhibition of thymic pyruvate kinase, the rate limiting enzyme for glycolysis. The differences in the pattern of enzyme responses among lymphoid organs

implied that two mechanisms of mercury toxicity were operative—one at high concentrations that caused physiochemical enzyme inhibition and another at low concentrations that caused indirect enzyme inhibition. *In vitro* studies have established that mercury-induced immunotoxicity is due to binding of intracellular sulfhydryl groups since addition of cell-penetrating but not cell-impermeable sulfhydryl-containing compounds are capable of protecting the lymphocytes from mercury-induced suppression.

Several inhalation studies were also conducted in FY 1982 to determine the potential of inhaled pollutants to affect systemic immunity. The effects of chrysotile asbestos exposure on immune and bone marrow parameters were examined in mice at 2, 12, and 26 weeks following a 3-day exposure. Proliferation of bone marrow hematopoietic stem cells was decreased at all time periods. In general, immune alterations were not present in mice at one and three months following exposure but selected effects were found at five months. This correlated with histopathological findings where evidence of asbestos-related centriacinar pulmonary fibrosis and histiocytosis was first found at five months. Immune alterations included elevated numbers and enhanced activity of pulmonary alveolar macrophages and, as reported to occur in humans who develop asbestosis, increased antibody response and serum immunoglobulin (IgA) levels. These studies indicated that inhalation of asbestos fibers can produce delayed systemic immune alterations in mice. This mouse model should prove useful in characterizing the nature of immune dysfunction that has been reported to occur in asbestos exposed humans.

In other studies mice were exposed by inhalation to 1000 ppm of vinyl chloride for 30 days. Liver pathology (accentuation of the hepatic lobular patterns) was observed in treated mice which was consistent with known effects of high dose vinylchloride exposure. However, vinyl chloride exposure failed to alter immune function or host resistance.

In earlier studies, we reported that female mice treated with diethylstilbestrol (DES) developed severe thymic atrophy, profound suppression of lymphocyte function and activation of resident macrophages. A similar degree of effect can be obtained by treating mice with 17-β-estradiol at concentrations 10-fold higher than with DES. Administration of estrogenic mycotoxins (e.g., zearalenone) which possess "A"-region similarities to DES and estradiol induce a similar degree of macrophage activation as DES or estradiol, on a molar basis, without the concommitant suppression of lymphocyte responses or myelotoxicity. This functional disassociation can also be evident when examining response kinetics and functional inhibition by progesterone and various anti-estrogens. Furthermore, macrophage activation but not lymphocyte suppression can be reversed by thymectomy in adult animals prior to chemical treatment. These studies indicated a direct relationship exists between estrogenicity and suppression of lymphocyte activation. Thymic factors, however, appear related to macrophage activation which probably occurs through indirect mechanisms.

Several chemicals examined in FY 1982 were of interest because they appeared to have selective effects on the immune system. Systemic exposure to polyvinylpyrrolidone, like many maleic anhydride-vinyl ether copolymers, activated peritoneal macrophages, induced interferon, and enhanced antitumor activity in the B16F10 transplantable tumor model, but only at high doses. In preliminary studies, ochratoxin (from *Aspergillus ochraceus*) selectively affected hematopoietic stem cell proliferation and antibody plaque forming cell responses. Ochratoxin-producing fungi are widespread in nature and are termed the "storage fungi." (CONTACT PERSON: Dr. M. Luster)

Several of the procedures selected by the immunotoxicology program are being employed by contract laboratories to examine suspect immunotoxic chemicals. The abbreviated assay panel has been implemented in the prechronic testing phase of NTP's chemical bioassay program. These procedure are only performed in those bioassay contract laboratories which have demonstrated competence by the performance criteria specified in the immune assessment protocol and which have prior approval of the immunotoxicology program. (CONTACT PERSON: Dr. M. Luster)

In FY 1982, NTP held a conference/wordshop at NIEHS entitled "Immunologic Hypersensitivity Resulting from Exposure to Environmenal Agents." A multi-disciplinary group of over 85 scientists and clinicians were brought together for this conference. The objectives of this program were as follows:

(1) To evaluate the present state of knowledge regarding the role of environmental pollutants in allergic and sensitivity reactions;

(2) To discuss animal models and clinical methods for detecting hypersensitivity to environmental chemicals;

(3) To discuss epidemiological and clinical data regarding the extent of environmental and occupationally-induced allergy and hypersensitivity reactions; and

(4) To identify research needs in this important area of immunotoxicology. (CONTACT PERSON: Dr. M. Luster)

A collaborative agreement for immunotoxicology methods development and validation is in progress between NTP participating agencies. During the past year the Microbiology Division of the FDA has been involved in the quantitation of lymphokines, particularly interferon, as well as evaluating *in vitro* antibody assays for examining immunotoxic chemicals. These assays are being correlated with host resistance challenge models being used at NIEHS. (CONTACT PERSON: Dr. M. Luster)

In February 1981 two research and development contracts were awarded to the Medical College of Virginia and the Illinois Institute of Technology Research Institute. In FY 1982 the contract laboratories validated and further refined the immunological procedures used to examine suspect immunotoxic chemicals. Furthermore, substantial progress has been made in developing sensitive and reproducible host resistance assays using prototype immunotoxicants, including diethylstibestrol, cyclophosphamide and dexamethasone.

FY 1983 Program Plan

Emphasis in the NTP immunotoxicology program will continue on methods development and validation, correlations between changes in immune function parameters and altered host resistance, development of virus challenge models, and examination of the mechanisms of immunotoxicity for the projects described. NTP contract laboratories will continue the interlaboratory immunology methods validation. (CONTACT PERSON: Dr. M. Luster)

NIOSH

FY 1982 Accomplishments

A study was initiated in FY 1982 to determine if inhaled isobutylnitrite will induce suppression of the immune system in a widely used inbred mouse model. Male and female BALB/c mice were exposed to the maximum tolerated concentration of isobutylnitrite vapor (6 hr/day, 5 days/wk for 12 weeks) to evaluate effects of this chemical on the immune system. Mice will be sacrificed after 3, 6, and 12 weeks of exposure. The immunosuppressive effects of isobutylnitrite will be evaluated at each sacrifice using both *in vivo* and *in vitro* tests. Data generated in this study will have a significant impact on recently reported occurrences of immunosuppression expressed as opportunistic infections and Kaposi's sarcoma in persons who have used alkylnitrites, including isobutylnitrite, as chemicals of abuse. (CONTACT PERSON: Mr. D. Lynch)

Neurobehavioral Toxicology

The central nervous system has evolved as a highly specialized organ designed to accept signals from the internal and external environments and to initiate metabolic and behavioral responses of the total organism appropriate to its survival. The complex structure and function of the brain and the need for it to be simultaneously protected from and responsive to the environment make this organ uniquely susceptible to environmental insults. Behavioral and neurologic alterations in response to environmental pullutants often represent the earliest manifestations of toxicity in animals. Thus, neurobehavioral test systems must be developed further and chemicals must be tested for neurobehavioral effects.

The NTP neurobehavioral program involves the formation of a strategy for the development, standardization, and validation of neuobehavioral screening tests. Such a test battery would provide a general indication of the presence of neurotoxicity and would possibly indicate the type of nature of neurotoxicity in terms of neurobehavioral function that may be affected. Known representative neurotoxicants are studied using the test battery to determine the level of sensitivity and selectivity of each component test. This battery with continuing refinements is used as part of the general

toxicology screen and in the prechronic phase of the two-year toxicology and carcinogenesis bioassay. Additionally, there will be continued development and evaluation of human neurotoxicity tests to be used at the worksite or in the laboratory.

An additional objective is the development of a test capability for more extensive in-depth toxicological characterization of selected chemicals either identified in preliminary neurobehavioral screening or which are of public health concern, and including behavioral teratologic evaluation.

NIEHS

FY 1982 Accomplishments

Neurobehavioral test battery—The NIEHS laboratory completed the standardization and validation phase for a neurobehavioral test battery to be used in subchronic studies with rats. The results of this work have been submitted for publication. The battery was designed to detect the presence of sensorimotor deficits, to provide information concerning the neurobehavorial function that is affected, and to yield an estimation of relative overall toxicity for several chemical agents. The test battery was validated using known neurotoxicants (acrylamide, arsenic trioxide, chlordecone, monosodium salicylate, methyl mercury, lead acetate, tetraethyl tin, and triethyl lead). (CONTACT PERSON: Dr. H. Tilson)

Neurobehavioral Effects—Mature Animals—In research on the neurological effects of 2,4-dichlorophenoxyacetic acid (2,4,-D), rats exposed repeatedly to various doses of 2,4-D were found to display a progressive alteration in neuromuscular function. The effect was dose- and time-related and followed either subcutaneous or oral administration. The neurological effects of 2,4-D were reversible. Other signs of neurotoxicity (i.e., tremor, convulsions, hyperexcitability, etc.) were not observed.

Research on chlordecone (Kepone®) continued during FY 1982. Chlordecone is a polycyclic chlorinated hydrocarbon insecticide known to produce hyperexcitability, tremor, and cognitive deficits. One of the most prominent effects of chlordecone toxicity is tremor. An animal model was developed to study the mechnanism of this neurological effect. Chlordecone-induced tremor in rats was quantified and found to be dose- and time-related. Subsequent experiments with pharmacological challenges have suggested that chlordecone-induced tremor has spinal and supraspinal origins. More importantly, chlordecone-induced tremor appears to be mediated, at least in part, by gabaminergic mechanisms. Addtional studies are underway to determine more precisely the site of action of chlordecone.

Other studies done with chlordecone in mature animals have indicated that it has marked neurohumoral effects. Exposure to chlordecone was found to disturb the balance of the hypothalamic-pituitary-adrenal axis, possibly by producing a massive release of steroids which elicits associated feedback mechanisms. (CONTACT PERSON: Dr. H. Tilson)

Neurobehavioral Effects-Developmental Period—Research in FY 1982 continued to emphasize the effects of chlordecone on developing animals. Perinatal or neonatal exposure to chlordecone was found to produce a decrease in serum and adrenal steriods when measured in exposed animals during adulthood. These changes in neurohumoral status appear to be associated with alterations in behavioral reactivity as measured by several neurobehavioral procedures. (CONTACT PERSON: Dr. H. Tilson)

FY 1983 Program Plans

Research planned or proposed in FY 1983 will continue to emphasize chlordecone. Experiments to localize the site of tremor induced by chlordecone are currently underway. In addition, more studies on the nature and extent of neurobehavioral dysfunctions following developmental exposure are planned.

Work has been initiated to develop automated procedures to assess toxicity in animals using naturally occuring domiciliary behaviors, such as spontaneous motor activity and ingestive related behaviors. One of the first signs of chemical toxicity is loss of body weight and alterations in locomotor movements, and it is predicted that alterations in the diurnal cycle or pattern of home cage behaviors may precede overt signs of toxicity. Over the next three years, plans are to develop a monitoring system and evaluate six chemicals (acrylamide, arsenic, chlordecone, methyl mercury, tetraethyl tin, and triethyl lead) in a chronic repeated dosing paradigm. (CONTACT PERSON: Dr H. Tilson)

NIOSH

FY 1982 Accomplishments

Human Studies—During FY 1982, NIOSH conducted on-site testing of persons employed as structural fumigators who were using methyl bromide as a fumigant. A total of 156 fumigators and unexposed control persons from 36 companies and two California state agencies participated in a two-hour test battery at 11 sites in California Symptoms of acute and subchronic methyl bromide poisoning that were assessed included neuromotor (coordination, weakness, tremor), sensory (vertigo, paresthesia, vision) and cognitive effects.

In addition, a review of test methods used to characterize neurotoxicity in human worker populations and a critical review of previous worksite studies were completed and will be published as chapter in upcoming books on neurotoxicology.

Animal Studies—Behavioral studies were completed which compared animals exposed to triorthocresyl phosphate and acrylamide. New methods of neurobehavioral evaluation were evaluated in these studies. Classical teratological studies of four glycol ethers were completed in preparation for behavioral teratological studies intended to characterize the structure activity relationships within this class of chemicals. (CONTACT PERSON: Dr. W. K. Anger)

FY 1983 Program Plans

NIOSH proposes to continue evaluation and development of human neurotoxicity tests to be used at the worksite as well as validation of tests of reflex activity in animal and human laboratory studies. A new 4-person human test laboratory for experimental inhalation exposures will be brought on line to test for acute effects of methyl ethyl ketone, methyl isobutyl ketone, and acetone. The data obtained will be used to develop more accurate Short Term Exposure Limits (STELS).

Workers using carbon tetrachloride/carbon disulfide mixtures for commodity fumigation will be evaluated with neurobehaviorial tests at the worksite (pending the results of a contract effort characterizing the extent of exposures and work patters in such jobs).

Work in behaviorial teratology will complete characterization of structure activity relationships of cellosolves with a behaviorial/neurochemical analysis of ethylene glycol monomethyl ether. Animal experiments will also be directed toward developing structure/activity relationships of straight-chain carbon compounds using tests of reflex response following acute and subchronic exposures to select compounds. (CONTACT PERSON: Dr. W. K. Anger)

In 1983, NIOSH will co-sponsor, with the World Health Organization (WHO), an international workshop on the subject of neurotoxicology. The meeting will be held in Cincinnati, Ohio, and will emphasize the needs of developing countries. The product of the workshop will be a WHO monograph that describes the current state of knowledge in neurotoxicology, with recommended actions that will prevent working populations from experiencing illness due to neurotoxic chemicals.

ORTHO Phthalic Acid Esters—Safety Evaluation

The results of two-year bioassays recently reported by the National Toxicology Program (NTP) have identified di(2-ethylhexyl)phthalate (DEHP) and di(2 ethylhexyl)adipate (DEHA) as hepatocarcinogens in rodents. A third compound tested by the NTP, butyl benzyl phthalate (BBP), increased the incidence of myelogenous leukemia in female rats, an effect judged to be of equivocal biological significance. BBP was not demonstrated to be carcinogenic in mice, while the test in male rats was inadequate because of early BBP induced deaths. The detection of carcinogenic effects of DEHP and DEHA in rodents has stimulated interest in the chronic toxic potentials of phthalate esters and related chemicals, many of which are used in plastics or for other purposes that results in extensive human exposures. Recognizing the technical and economic importance of phthalates and the limited scientific basis for extrapolating rodent bioassay data to human health effects, the NTP continues to study the deleterious effects of DEHP and to probe the mechanisms of action of phthalates. In addition, the NTP continues to evaluate the toxic potentials of several other phthalate esters, both individually and in a comparative manner.

The NTP is aware of the testing of phthalate esters currently being conducted by several independent, governmental and private organizations, including a

comprehensive class study by the Chemical Manufacturers Association.[1] Some of these programs were discussed publicly at the recent Conference on Phthalates.[2] The sets of studies described herein are intended to be complementary both to previous NTP studies and to the endeavors of other groups. Of primary interest to the NTP at the present time is an assessment of the mechanisms, dose response relationships and species-dependencies of toxic responses to DEHP, parameters relevant to predicting human response to various levels of DEHP exposure. Of secondary interest are structure-activity correlates that would indicate the relative propensities of similar chemicals to produce "DEHP-like" toxic effects.

The major areas of planned study—DEHP genotoxicity, mechanisms of DEHP carcinogenicity, reporductive toxicity, characteristics of dermal absorption and the carcinogenic potentials of diallyl-, diethyl- and butyl benzyl phthalates—are described below.

Genotoxic Potential—The lack of mutagenic response of DEHP in several systems indicates little value for such tests in predicting the carcinogenic potentials of other phthalates in rodent bioassays. One plausible theory of DEHP carcinogenicity is that DEHP-induced proliferation of hepatic peroxisomes (a subcellular organelle) results in the increased presence of hydrogen peroxide or hydroxy radicals. Such reactive molecules could injure both genetic and non-genetic cellular materials. Peroxisomes are not present in 9,000xg liver supernatant fractions (S9) or other mammalian activating systems commonly used in mutagenicity assays. Moreover, the DEHP-induced peroxisomes may differ functionally from normal peroxisomes. The following experiments, therefore, have been designed to incorporate peroxisomal influences into an assessment of the genotoxic potential of DEHP:

(1) Measurement *in vitro* of unscheduled DNA synthesis after single and repeated *in vivo* exposures of female rats to DEHP using the *in vivo/in vitro* hepatocyte primary culture [HPC] unscheduled DNA synthesis [UDS] assay;

(2) Cytogenetic analysis (chromosomal aberrations and sister chromatid exchanges in bone marrow) in $B6C3F_1$ mice after repeated (approximately two weeks) treatment with DEHP;

(3) *In vitro* cytogenetic analysis (Chinese hamster ovary cells) in the presence of a DEHP-induced peroxisome-enriched liver fraction.

Mechanisms of Carcinogenicity—In the absence of a probable mechanism of carcinogenic action it is prudent to assume a linear relationship between chemical dose and the occurrence of tumors. Development of neoplasia, however, can also be influenced by chemical effects other than direct malignant transformation, and such effects may occur at exposure levels that greatly alter normal anatomical, biochemical or physiological interrelationships. Recognized biological effects of DEHP, in addition to hepatocarcinogenicity, include hypolipidemia, enzyme inhibition, peroxisome proliferation and pituitary hypertrophy (male rats only). The relationships of these effects to the toxic manifestations are unknown. To study the dependencies of toxic response on biochemical or physiological abnormalities, the NTP will conduct a subchronic feeding study in rats and mice at various doses of DEHP, including those which have produced liver tumors. Among the parameters measured will be circulating concentrations of several pituitary hormones, serum lipids, peroxisomes (visual enumeration and enzyme activities), and oxidative injury to the liver. Dose-dependent damage to DNA *in vivo* will be assessed if studies in the HPC/UDS system (see Genotoxic Potential) indicate the DEHP can produce this type of lesion.

The NTP will also attempt to reproduce the hepatic effects of DEHP, *in vitro* with cultured hepatocytes, and to use this system for interspecies comparisons.

Reproductive Toxicity—The teratogenic actions of dietary DEHP in rats and mice will be defined, as well as the potential for neonatally-administered DEHP to produce morphological or behavioral abnormalities. Further studies in a single species will define structure-activity relationships and evaluate possible mechanisms of action.

The chemosterilizing effects of DEHP and the potential for dominant lethal mutations in germ cells will be studied in male rats and mice administered multiple doses in the diet. The relationships of zinc and possible endocrinological abnormalities to the development of the gonadal lesions will be evaluated.

Dermal Absorption—A paucity of information on the rate and extent of dermal absorption of phthalate esters complicates the extrapolation of toxic response data from feeding or gavage studies to dermal exposures. Therefore, the NTP will conduct a cursory study of dermal absorption by monitoring urinary and fecal excretion of radioactivity following dermal application of radiolabelled phthalate esters. The excretion of intravenously-administered compounds will be measured for comparative purposes. Structure-absorption characteristics will be evaluated by the use of the following phthalates:

phthalic acid	di-n-hexyl phthalate
dimethyl phthalate	di-n-octyl phthalate
diethyl phthalate	di(2-ethylhexyl)phthalate
di-n-butyl phthalate	diisodecyl phthalate
diisobutyl phthalate	butyl benzyl phthalate

In addition, the dermal absorption of mono(2-ethylhexyl)phthalate, mono-n-butylphthalate and benzyl phthalate will be studied to determine the effects of ester hydrolysis on skin absorption.

Carcinogenicity Bioassays

1. Butyl benzyl phthalate (BBP)—The subchronic feeding study in male Fischer 344 rats will be repeated with emphasis on determining the cause of early deaths in the previous study, and on an assessment of reproductive function. The dose-dependent disposition and metabolism of BBP in rats will be studied to more appropriately correlate toxicity with pharmacokinetics and to ascertain amounts of the metabolites, n-butanol and benzyl alcohol, released (the latter chemical is currently in a chronic bioassay).

A chronic carcinogenicity bioassay of BBP in male rats will be initiated subsequent to an adequate subchronic study.

2. Diallylphthalate—A chronic bioassay in mice is currently being interpreted, while that in rats is nearing completion. Pharmacokinetic studies in mice and rats will be conducted to assess the possible implications of metabolism of diallylphthalate to known carcinogens or mutagens (allyl alcohol, acrolein, various epoxides) and to provide a reasonable basis for species differences in toxic responses.

3. Diethylphthalate—A chronic carcinogenicity bioassay by dermal exposure will be initiated. Tests for initiation and promotion of skin tumorigenesis may be included in this assessment.

Pulmonary Toxicology

It is widely recognized that inhalation is the most important means of toxic exposure both occupationally and environmentally. This importance is evident when consideration is given to the uniquely extensive surface area ($80m^2$ in man) of the pulmonary system that is brought into intimate contact with any agent having a positive vapor pressure or in an aerosolized state. As a result, the lung is frequently the target or organ of entry for a wide variety of air-borne toxicants. Currently, epidemiologists are finding that pulmonary dysfunction is a principal predictor of mortality resulting from pulmonary and non-pulmonary disease. It is reasoned that pulmonary dysfunction leads to increased accumlation of toxicants and thereby acts as initiator, promotor, or cofactor in the pathogenesis of numerous diseases. Hence, the evaluation of toxicants by the inhalation route of exposue and the toxicologic evaluation of the structure and function of the lung are of critical importance.

One of the objectives of the NTP program in Pulmonary Toxicology is to compare pulmonary function and pathologic indices as predictors of pulmonary function in animal species—tests of mechanical properties, gaseous distribution, static and dynamic lung volumes, distribution of inspired air, and more recently, ventilatory performance. A key issue in the decision to perform pulmonary fuction testing for detection of toxicity to the lung from inhaled substances is whether such tests provide any additional toxicologic information beyond the pathologic evaluation of lung injury. Pulmonary function tests must be reproducible, sensitive, specific, and capable of large-scale utilization if they are to be used effectively in the diagnosis of early and subtle pulmonary lesions in experimental animal models for chemically-induced pulmonary disease in humans.

NIOSH

FY 1982 Accomplishments

Effects of Chemical on the Pulmonary System—In FY 1982 studies continued at the Brookhaven National Laboratory (BNL) assessing the potential role of pulmonary fuction tests in the evaluation of airborne agent toxicity and relating fuctional changes to observed pathologic and lung compositional changes. Two further products from the study of the effect of subchronic multidose ozone exposure in rats were delivered. A "Statistical Addendum to: Sixty-two Exposure Day Study in Fischer 344 Rats Exposed to Three Concentrations of Ozone (BNL Informal Report No. 29084)" was completed. Secondly, results of the study were presented at an International Oxidants Conference (Pinehurst, NC, March 14–18, 1982). The data presented centered on the pulmonary functional, structural, and compositional findings of the BNL-NTP study.

A final report was received from BNL describing biologic responses in Fischer 344 rats exposed at 0.0, 04, 1.2 or 4.0 ppm acrolein for 6 hours/day, 5 days/week for 62 days. Responses were dramatic at 4.0 ppm—32 of 57 exposed males died, weight gain was depressed, bronchiolar epithelial sloughing and necrotic lesions were observed, focal pulmonary edema was present, increased lung dry weights, and substantial decrements in pulmonary function occurred. While the pulmonary function of the 4.0 ppm group suggested an obstructive lesion, the data from the 0.4 group indicated a restrictive lung lesion; pulmonary function of the 1.2 ppm grup was between that of the low and high-dose groups and was nearly identical to that of control animals.These data suggested the development of two functional lesions exhibiting distinctly different effects on the pulmonary function measurements. The physiologic impairment in animals exposed to 0.4 ppm was not morphologically evident upon histopathologic examination. Increases in lung weight were due to increased cellularity, lung connective tissue, elastin and hydroxyproline content. No reproductive or clastogenic responses occurred under these acrolein exposure conditions. These data were presented in three poster sessions at the 1982 society of Toxicology meeting in Boston, Mass. (Feb. 22–26, 1982).

Data analyses are underway on rats exposed intermittently at 0.0, 0.5, 1.5 and 5.0 ppm chlorine. Pathologic examinations show that these subchronic exposures did not result in significant exposure-related respiratory lesions in Fischer 344 rats. subtle tracheal changes including loss of cilia and focal erosion of the epithelium were observed in the 5.0 ppm group. Such changes will be examined further to determine if they are related to chlorine exposure in a dose dependent manner.

Exposure of rats to silica dust (MIN-U-SIL 5) was initated on Feb. 1, 1982. The dust atmospheres were generated by fluidizing bed generators. Groups of Fischer 344 rats were exposed to either filtered air, 2, 10, or 20 mg SiO_2m^3 for 6 hours daily, 5 days per week. Exposures were for 127 workdays with interim and final pulmonary function testing; a portion of the rats are being held for six months following exposure and then will be assessed (CONTACT PERSON: Dr. T. Lewis)

Chronic effects of ethylene oxide and propylene oxide on pulmonary fuction parameters of monkeys were evaluated. Some individual subjects showed mechanical and ventilatory dysfunction. The data are currently being analyzed statistically. (CONTACT PERSON: Mr. W. Moorman)

Comprehensive pulmonary function testing is being conducted in both monkeys and rats chronically exposed to diesel exhaust, coal dust and an equal mixture of the two. Preliminary findings denote several physiologic responses characteristic of chronic obstructive airway disease (coal dust exposures) and restrictive lung disease (diesel particulate exposures). These data are being analyzed statistically to validate these observations. Two species are being studied to assess the potential differences which may relate to the anatomical and physiological features unique to each specie. (CONTACT PERSON: Dr. T. Lewis)

The two most common methods of producing forced vital capacity maneuvers in anesthetized subjects will be compared for sensitivity in detecting obstructive impairment in rats. Initially, flow and volume differences will be evaluated in control rats to characterize specific differences relatable to the test methods. Then, rats serially impaired with elastase (at IT 6 units and 12 units) will be tested by each test method. Evaluation of method defferences and sensitivity will lead to better animal model systems for obstructive lung disease in man. (CONTACT PERSON: Mr. W. Moorman)

Animal Model of Occupational Asthma—During FY 1982, a monkey model of human occupational asthma, first developed in 1980, was further characterized. Efforts included the evaluation of dose-response relationships of exposure and the significance of co-asthmagenic irritant/oxidant exposures on the severity and incidence of the disease. The significance of pre-exposure airway status was evaluated by methacholine dose-response investigations. The primate model was used for passive cutaneous anaphylactic evaluations identifying a heretofore unidentified sensitivity to palladium in platinum refinery workers. Current research is directed towards assessing the fact that pharmacologic (versus immunologic) hypersensitivity may play an important role in the development of clinical symptoms in the occupational setting. During FY 1982, a paper was presented before the Federation of American Societies for Experimental Biology entitled "Passive Transfer in the Monkey of Human Immediate Hypersensitivity to Complex Salts of Platinum and Palladium". (CONTACT PERSON: Mr. W. Moorman)

Other Studies—A draft final report has been prepared which characterized toxicological effects of fibrous glass in rats and monkeys during long-term inhalation exposure. Four fiber geometries were evaluated with varying diameters and fiber lengths. Findings indicate minimal physiologic changes and no fibrogenic or carcinogenic pulmonary responses. The most severe pulmonary lesions were observed in the group exposed to short length microfibers. A significantly increased incidence of Fischer rat leukemia was also observed among all fiber exposed rats. (CONTACT PERSON: Mr. W. Moorman)

FY Program Plans

Effects of Chemicals on the Pulmonary System—Experiments to assess the relative sensitivities and specificities of pulmonary pathology and pulmonary physiology will be continued in FY 1983. Data collection and analysis will continue on the crystalline quartz study. Other compounds for study include (1) Cadmium chloride and (2) tungsten carbide, with and without concomitant inhaled cobalt exposures.

Evaluation of pulmonary function in rats and monkeys exposed to diesel exhaust, coal dust and combined diesel exhaust/coal dust at airborne concentrations of 2 mg/m^3 respirable dust will continue. These studies, coupled with epidemiological and industrial hygiene surveys of coal mines utilizing diesel equipment, will provide a compreshensive and integrated assessment of respiratory and other health hazards posed by diesel exhaust emissions. (CONTACT PERSON: Dr. T. Lewis

Animal Model of Occupational Asthma—There will be further assessment of the allergic and pharmacologic aspects of occupational lung disease. Exposures to vanadium pentoxide in combination with ozone will be performed to investigate the potential of V_2O_5 to induce asthma. Screening of organic allergens, e.g., those of agricultural origin, for activity in the model will be initiated. (CONTACT PERSON: Mr. W. Moorman)

NIEHS

The research program of the inhalation toxicology group of the NIEHS/NTP is divided into three areas: (1) Studies in cardiac toxicology using isolated perfused hearts and other cardiac tissues, (2) studies of the carcinogenic potential of simultaneous exposure to nitrogen dioxide and nitrosatable amines, and (3) a project identified as the inhalation toxicology of environmental chemicals, which currently includes a study of the effects of exposure profiles with time-varying concentrations on expressions of inhalation toxicology as well as a study of the vascular toxicology of carbon disulfide. (CONTACT PERSON: Dr. E. Van Stee)

Reproductive and Developmental Toxicology

The number of chemicals being evaluated for effects on reproductive function and development has increased significantly during FY 1982. This increase is due to the development of several new shorter-term test procedures that are being evaluated as potential screening tests. In one case, this has involved incorporation of reproductive endpoints into the prechronic bioassay to obtain additional information on animals already being studied for spectrum of toxic effects. This approach allows the testing of a much larger number of chemicals and priority-setting for more in-depth study of those chemicals which present a significant risk for human exposure. Thus, resources within the program are being used most efficiently, and eventually will provide for the ability to address questions about the magnitude of problems in reproductive and

developmental toxicology and about mechanisms of action.

FY 1982 Accomplishments

The Coordinating Group, made up of representatives from NCTR, NIEHS and NIOSH, met quarterly to review activities within the individual groups regarding reproductive and developmental toxicology, to select appropriate chemicals for evaluation of new test procedures, and to plan further efforts for addressing the needs in this program area. Information on studies which are completed or underway is currently being entered into the NTP computer tracking system.

The shorter-term testing approaches developed in FY 1981 for both reproductive and developmenal toxicology are now being evaluated. These include Fertility Assessment by Continuous Breeding, the Sperm Morphology and Vaginal Cytology Assay, the Short-Term *In Vivo* Reproductive Toxicity Assay, and *In Vitro* Teratology Test Development.

NCTR Accomplishments

Conventional Teratology Testing—The routine teratologic evaluation of chemicals has continued on contract in FY 1982 and a number of studies were completed or are still in progress. Testing is in progress on 9 chemicals, and evaluations were completed on 8 chemicals (Table 22). Data on the sulfamethazine study which showed teratogenic effects at doses below those producing maternal toxicity were presented at the Teratology Society meeting in June, 1982. A few of the conventional teratology studies are being followed up with postnatal functional studies, including a behavioral teratology study on diphenhydramine hydrochloride and behavioral and reproductive function studies in mice and rats on di(2-ethylhexyl) phthalate. Chemical selection for FY 1983 is in progress. (CONTACT PERSON: Dr. C. Kimmel)

Collaborative Behavioral Teratology Study—Methods are being evaluated for the behavioral assessment of postnatal animals following prenatal chemical exposure. A standardized protocol is being tested in the collaborative behavioral teratology study. The six behavioral tests in the protocol are being evaluated for reliability within and between five separate laboratories (two academic, two private, one government). The sensitivity of the tests is also being evaluated following exposure to two known positive behavioral teratogens (d-amphetamine sulfate and methylmercuric chloride). The laboratories began the study on d=amphetamine in October, 1981, and completed this study in July, 1982. The methylmercury study began in July, 1982. The intramural pilot study on d=amphetamine is completed and results were presented at the Teratology Society meeting, June, 1982. (CONTACT PERSON: Dr. C. Kimmel)

In Vitro Teratology Test Development—The proceedings of the consensus Workshop in *In Vitro* Teratogenesis Testing will be published as a separate issue of *Teratogenesis, Carcinogenesis, and Mutagenesis* (982). The proceedings include an overview of the workgroup discussions as well as a description of individual assay systems. The specific questions that were addressed and discussed at the workshop focused on validation criteria, and the overview focuses on the current state of our knowledge relative to the development of *in vitro* tests as indicators of teratogenic potential. The definition and discussion of many points including acceptable endpoints, developmental relevance, metabolism and test design are now more clearly defined and will serve as as guide to the future validation process of all *in vitro* assays. One outcome of the workshop was to establish a panel to develop a list of agents that could be used in validation studies. This panel met during the summer of 1982. When the list of agents is agreed upon, attempts to create a central repository for these agents will be initiated. (CONTACT PERSON: Dr. C. Kimmel)

NIOSH Accomplishments

Inhalation Teratology Testing—Inhalation teratology studies in rats and rabbits were completed with n-Butyl acetate, ethylene oxide and propylene oxide (Table 23). Ethylene oxide exposures had no toxic effects on maternal rabbits, and there were no adverse effects on the growth and development of fetal rabbits. Ethylene oxide at 150 ppm was maternally toxic and fetotoxic in rats. There was no evidence of a teratogenic effect. Propylene oxide at 500 ppm was maternally toxic for rabbits, but embryotoxicity was not seen. Maternal rats were severely affected by 500 ppm propylene oxide and embryotoxic effects were noted in exposed litters. Also observed was a reduction in the number of corpora lutea in rats exposed to 500 ppm propylene oxide for 3 weeks before breeding. n-Butyl acetate at 1,500 ppm was toxic for maternal rats, but maternal rabbits were essentially unaffected. Fetotoxicity was observed in both species. (CONTACT PERSON: Mr. B. Hardin)

Short term In Vivo Reproductive Toxicity Assay—This mouse reproductive test is being evaluated under four contracts awarded in FY 1981. A total of 30 chemicals (Table 24) were screened in this test system Contracts were developed to continue application of this system with the evaluation approximately 25 chemicals to be selected from NIOSH and NTP priority lists. (CONTACT PERSON: Mr. R. Schuler)

Reproductive and Developmental Toxicity of Glycol Ethers—Investigations of the reproductive and developmental toxicity of the glycol ethers were continued in FY 1982. In addition to the short-term *in vitro* reproductive toxicity assay (see above and Table 24), the teratogenicity in rats of ethylene glycol (EG) monoethly ether was investigated by cutaneous exposure (Table 25). Undiluted EG monoethyl ether, in volumes of 0.25 or 0.50 ml, was applied 4-times daily on days 7–16 of gestation to the shaved interscapular region of rats. In the control, 0.25 ml and 0.50 ml groups 0%, 48% and 100%, respectively, of the litters were totally resorbed. Among live fetuses in the 0.25 ml group, there was a statistically significant increase in the incidence of cardiovascular defects, enlarged lateral ventricles, and of various skeletal variations, including incomplete ossification and 14th ribs.

Contracts were developed to evaluate the 15 glycol ethers listed in Table 24 for male reproductive/mutagenic potential in three test systems: mouse dominant lethal, mouse sperm head morphology, and *Drosophila* sex-linked recessive lethal tests. A contract was also developed for inhalation teratology tests in mice and rats using three glycol ethers selected as probable reproductive toxicants on the basis of results in the short-term *in vivo* reproductive toxicity assay (see above). (CONTACT PERSON: Mr. B. Hardin)

Since previous in-house research at NIOSH demonstrated behavioral and neurochemical alterations in offspring of rats exposed to 100 ppm of EG monoethyl ether, three structurally related glycol ethers were screened for teratogenic effects (Table 25). It was found that EG monomethyl ether was teratogenic at 50 and 100 ppm. EG monoethyl ether acetate was equivalent in teratogenicity to EG monoethyl ether with congenital malformations at 390 ppm; 130 ppm appeared to be near the teratogenic threshold, producing a single defect. EG monobutyl ether was not teratogenic at 200 ppm but was maternally toxic at higher concentrations. (CONTACT PERSON: Mr. B. K. Nelson)

Short-Term Test Methods Development in Drosophila—Development of a standard test protocol and scoring methodology was completed for use of the fruit fly (*Drosophila melanogaster*) as an "*in vitro* " teratogenesis test system. Validation studies are in progress involving tests with known mammalian teratogens. Test chemicals are incorporated into the medium on which untreated flies deposit eggs. Emerging adults are scored, according to the standard methodology, for morphologic defects resulting from larval exposure to the test chemicals. (CONTACT PERSON: Mr. R. Schuler)

Reproductive Effects–Testing—Testing was completed and results compiled on 20 priority chemicals (Table 26) being screened for potential reproductive effects using *in vivo* and *in vitro* test systems: *Drosophila* sex-linked recessive lethal (SLR), rat dominant lethal (DL), mouse sperm head morphology (SHM), rat bone marrow cytogenetics (BMC), and unscheduled DNA synthesis (UDS) in cultured human fibroblasts. (CONTACT PERSON: Dr. R. Niemeier)

NIEHS Accomplishments

Fertility Assessment by Continuous Breeding—Two contracts were awarded in fiscal year 1982 to evaluate this testing system. Eight tests were scheduled at each of the two testing laboratories. These first 16 tests started in fiscal year 1982 and will be completed in fiscal year 1983 (Table 27). Sixteen new tests will begin in fiscal year 1983. Chemicals for fiscal year 1983 testing will be selected in late fiscal year 1982.

Like the multigeneration assays, the continuous breeding protocol uses a prolonged chemical exposure. However, while the multigeneration study tests mating at a specified and limited time, in this new test system male and female mice are housed in breeding pairs continuously for 100 days. This allows the generation of an index of cumulative fertility for each breeding pair. In

the first 100 days the offspring are counted and then discarded, to allow continuous mating of the pairs. Between 100 and 120 days, offspring are saved for fertility evaluation, but they are studied only when the parents are unaffected. When the chemical is toxic to reproductive function, the affected animals (parents or offspring) are necropsied and the reproductive organs are examined carefully to identify target organs. (CONTACT PERSON: Dr. J. Lamb)

Sperm Morphology and Vaginal Cytology Evaluation—A contract was awarded in fiscal year 1982 to centralize slide evaluation and data collection of the reproductive toxicology special studies for the bioassay program. In the bioassay program, approximately 25 new chemicals per year are being tested for prechronic toxicity in both rats and mice (Table 28). Many of the animals already selected for prechronic tests are being used and the effect of 90-day chemical exposure on sperm number and morphology and vaginal cyclicity is being studied.

For male rats and mice, a protocol has been designed which calls for special collection of reproductive organs at the scheduled 90-day necropsy. The bioassay laboratories have been instructed in how to collect and measure epididymal sperm concentrations and sperm motility. The bioassay laboratories prepare slides for sperm morphology and send them to an NTP-designated laboratory. Since one laboratory is reading all of the sperm morphology slides, findings can be compared from different bioassay laboratories. This NTP-designated laboratory also gives technical direction to the bioassay laboratories.

In the females, vaginal cyclicity is being evaluated in addition to the routine histopathological studies. This was chosen because a large number of chemicals, representing a wide range of chemical structures, have been shown to possess hormonal activity. Vaginal cyclicity would most likely be affected by estrogens or antiestrogens acting on the female genital tract and by chemicals acting on the ovaries, pituitary or hypothalamus. The vaginal cytology slides are prepared by the bioassay laboratories and sent to the same NTP-designated laboratory which reads the slides and assembles the data. While these prescreens do not necessarily identify the target organ, they do indicate which compounds deserve closer scrutiny. (CONTACT PERSON: D. J. Lamb)

Effects of Chemicals on Male and Female Fertility—In-house research studies have continued on the influence of 1,2-dibromo-3-chloropropane (DBCP) on male fertility. These studies are assessing the etiology of testicular lesions in rats exposed to DBCP and the reversibility of the lesions. Studies have also progressed using chlordecone (Kepone) as a model compound causing reproductive toxicity in females. These studies have focused on the response of the female Fischer-344 rat endocrine system to chlordecone. The reproductive toxicity of chlordecone has been attributed to its estrogenic potential. Studies comparing chlordecone to the estrogen diethylstilbestrol (DES) have shown that the compounds do share some chemical activities in the rat uterus and pituitary but chlordecone does not mimic all *in vivo* estrogenic properties of DES, especially in the pituitary. (CONTACT PERSON: Dr. J. Lamb)

FY 1983 Program Plans

The Coordinating Group will continue to meet quarterly to integrate activities among the three participating agencies. Results from the shorter-term tests will be studied to determine which chemicals should be tested further. The NTP tracking system will be used to generate individual chemical reports on the status and results of reproductive and developmental toxicology studies. Efforts will be made to interact more closely with chemical managers in order to assure thorough evaluation of chemicals that are selected for testing by NTP.

NCTR Plans

Conventional Teratology Testing—Current studies will be completed in FY 1983 and a number of new studies will be undertaken. Bisphenol A has been selected for testing, and other chemicals tested will be based on the outcome of any of the shorter-term test procedures or on the basis of NTP priorities. Additional postnatal studies may also be undertaken, depending on the outcome of the conventional teratology studies or on other considerations. (CONTACT PERSON: Dr. C. Kimmel)

Collaborative Behavioral Teratology Study—The second year of the study which involves methylmercury exposure will be completed in FY 1983. Summarization and analysis of the data will continue into FY 1984. (CONTACT PERSON: Dr. C. Kimmel)

In Vitro Teratology Test Development—For *in vitro* teratology testing, three areas of activity will be pursued: (1) Development of a repository for agents that make up the list of compounds to be used for validation; (2) initial validation studies of various systems depending on availability of research support; and (3) investigation of a literature review system for maintaining an update of advances in *in vitro* teratology testing. (CONTACT PERSON: Dr. G. Kimmel)

NIOSH Plans

Short-Term In Vivo Reproductive Toxicity Assay—Testing will continue under contracts developed and awarded in FY 1982. Approximately 25 chemicals selected from NIOSH and NTP lists will be evaluated in this test to determine which, if any, should be more thoroughly investigated in more conventional test systems. (CONTACT PERSON: Mr. R. Schuler)

Reproductive Toxicity of Glycol Ethers—Contracts developed in FY 1982 to test the male reproductive/mutagenic effects of 15 glycol ethers will be monitored. The FY 1982 contract for inhalation teratologic evaluations of three glycol ethers will also be monitored. Follow-up investigations will be initiated as appropriate. (CONTACT PERSON: Mr. B. Hardin)

Effects of Glycol Ethers on Postnatal Development—Based upon the results of the screening studies on glycol ethers in FY 1982, the solvent, EG monomethyl ether, will be evaluated following gestational exposure at sub-teratogenic exposure levels for behavioral and neurochemical effects in offspring which, also, will be evaluated following paternal exposure to EG monomethyl ether. (CONTACT PERSON: Mr. B. K. Nelson)

Short-Term Methods Development in Drosophila—Feasibility and validation studies will continue to establish the potential of *Drosophila* as an *in vitro* teratogenesis screening system. In addition to the continuation of in-house efforts, a contract will be developed to investigate the reproducibility of test results in other laboratories and to increase the number of known teratogenic and non-teratogenic chemicals tested. (CONTACT PERSON: Dr. R. Schuler)

NIEHS Plans

Fertility Assessment Using Continuous Breeding—When compared to the three generation study, the continuous breeding protocol takes less than half as long to complete and is less than half as expensive to perform, but may prove to yield comparable information on fertility and give even more information about the affected sex or target organs. The two test validation contracts are using several chemicals which have been tested in multigeneration test systems (Table 27), and each laboratory can test eight chemicals per year. In the first four of the same chemicals are being tested in the two laboratories. Thus, the test system is being evaluated versus another test system as well as being evaluated in an interlaboratory comparison study. The protocol will be modified, if needed, at the end of the first year. In the second year, evaluation will continue and testing will begin on two chemical classes which have been identified by the NTP for major testing initiatives, the phthalate esters and the glycol ethers. (CONTACT PERSON: Dr. J. Lamb)

Sperm Morphology and Vaginal Cytology Evaluation—The specimen collection and data evaluation began on the first 24 selected chemicals in FY 1982 and will continue into FY 1983. Approximately 15 of the new bioassay chemicals will be added to the list in FY 1983. The protocol will be modified as necessary to improve the data quality or cost effectiveness. (CONTACT PERSON: Dr. J. Lamb)

Effects of Chemicals on Male and Female Fertility—Studies are continuing on the toxicity of DBCP in male rats. Further investigations are planned in FY 1983 on the effects of DBCP and several other testicular toxicants. These investigations will evaluate the morphological response of the testis to selected toxicants acting on different cellular compartments in the testis. We intend to follow up the morphological findings with specialized biochemical assays of Sertoli cell function and of Androgen Binding Protein (ABP) secretion by Sertoli cells.

In vivo studies have demonstrated that chlordecone does not always parallel the estrogen action of DES in female rat pituitaries. A pituitary cell culture system has been established to compare pituitary cell function after *in vivo* exposure to DES and chlordecone. The effects of direct *in vitro* incubation of pituitary cells with DES and chlordecone and other chemicals will also be

evaluated. This cell culture system may prove valuable as a screen for certain toxicants of the endocrine system. (CONTACT PERSON: Dr. J. Lamb)

Coordinative Management Activities

Chemical Nomination and Chemical Selection

The chemical nomination and selection process remains integral to the effective long-term operation of the NTP with respect to both the testing of chemicals using current methodologies and the validation of new methodologies.

The following discussion briefly summarizes the current NTP chemical nomination and selection process. The process is shown schematically in Figure 4. (CONTACT PERSON: Dr. D. Canter)

NTP Chemical Nomination—Member agencies of the National Toxicology Program and other sources (other Federal agencies, state agencies, the public, labor, industry) submit to the NTP nominations of chemicals for various types of toxicologic testing. The nominating source should submit the name of the chemical and the particular toxicologic tests desired; the rationale for the nomination; and the available background data on production, use, exposure, environmental occurrence, and extent of toxicologic characterization in a supporting summary document (Table 29). However, all nominations are considered regardless of the depth of the information submitted. Nominations should be addressed to: Chemical Nominations, National Toxicology Program, Room 2B–55, Building 31, National Institutes of Health, Bethesda, Maryland 20205.

All nominated chemicals are first referred to the NTP chemical selection coordinator for review to determine which chemicals have been tested, are already on test or scheduled for test, or have been previously considered and rejected for testing by the NTP or its predecessors. This involves preliminary examination of the nominations with minimal searches of existing on-line data bases and reference books. The nominations and background information are then forwarded to the Chemical Review staff at the National Center for Toxicological Research (NCTR) who examine the available literature, assess the relevant data, and prepare draft Executive Summaries of this information. (Executive Summaries are not prepared for chemicals nominated solely for mutagenicity testing.) Included in each draft Executive Summary are these sections: Chemical Identification, Surveillance Index (production, use, occurrence, analysis), Toxicological Effects, and Source of and Reason for Nomination. (CONTACT PERSON: Dr. L. Fishbein)

Evaluation of Nominated Chemicals—The Chemical Review staff sends the draft Executive Summaries to the Chemical Evaluation Committee (CEC), composed of representatives from the Consumer Product Safety Commission (CPSC), Environmental Protection Agency (EPA), Food and Drug Administration (FDA), Occupational Safety and Health Administration (OSHA), National Cancer Institute (NCI), National Institute of Environmental Health Sciences (NIEHS), National Institute for Occupational Safety and Health (NIOSH), National Center for Toxicological Research (NCTR), and National Toxicology Program (NTP). The CEC evaluates the draft Executive Summaries and recommends the types of testing to be performed. Primary and secondary reviewers are assigned to each chemical after consideration of the nature of exposure so that, to the extent possible, appropriate regulatory concerns will be addressed. Members are requested to search data bases unique to their agencies for further information on the nominated chemicals (and structurally related compounds) to improve the evaluation process.

At the CEC meeting the primary reviewer for each chemical summarizes the data on that chemical and makes recommendations for testing. The secondary reviewer presents additional information, where available, and also discusses the merits of testing the compound. Following a general discussion, the Committee votes on the recommended types of testing and assigns priorities for types of testing. The recommendations are based upon whether the chemical satisfies one or more of the eight NTP chemical selection principles (Table 30). Following the meeting, the Chemical Review Staff revises the Executive Summaries as needed and adds a section on the CEC testing recommendations.

Public Comment—A **Federal Register** notice is published which lists the chemicals reviewed by the CEC and the recommended types of testing. Also, the notice solicits comments from interested parties as well as information on completed, ongoing, and planned testing in the private sector. Responses are requested within 30 days of the date of publication. The list of chemicals is also published in the *NTP Technical Bulletin* along with a request for comments. These steps are taken to enable other individuals and groups to provide data useful to the NTP chemical evaluation process.

Peer Review—The revised Executive Summaries and public comments on the nominated chemicals are then forwarded to the NTP Board of Scientific Counselors for review. The Board subsequently meets to evaluate these data and to make testing recommendations based on the available information.

Chemical Selection—The Chemical Review Staff then incorporates both the Board's ratings and comments and pertinent public input into final Executive Summaries which are submitted to the NTP Executive Committee. The Committee decides whether to test, defer, or delete each of the nominated chemicals for the various types of testing. Executive Committee decisions are published in the *NTP Technical Bulletin*. The Committee also recommends priorities for testing and test development/validation to the NTP.

Following Executive Committee action, the NTP Steering Committee (see Organization section) meets to refer the chemicals to one or more of the three organizational units participating in the NTP: NIEHS, NIOSH, and NCTR. Following referral of the chemical to a participating unit, a chemical manager is assigned who evaluates both the data developed during the NTP chemical evaluation process and other information retrieved from detailed searches of the published literature. The manager also consults with industrial sources on such issues as planned or ongoing testing and availability of the chemical for testing. The manager then presents a proposal to the Toxicology Design Committee (TDC) either to perform appropriate toxicologic testing or to delete the chemical from consideration for testing. The TDC, which consists of research scientists from NIEHS and NTP, assesses the proposal and either develops a final protocol for testing or returns the chemical to the Executive Committee with a recommendation not to pursue testing. The recommendation may be based upon technical difficulties in testing, budgetary reasons, or the existence of adequate outside testing.

All chemicals selected as a result of this process are then tested as time and resources permit.

Results of toxicological testing of selected chemicals are routinely reviewed to determine whether further types of testing are appropriate. Candidates for additional testing are then submitted to the NTP chemical nomination and selection process for evaluation and decision making.

FY 1982 Accomplishments

NTP Chemical Nomination—During FY 1982, 31 chemicals and black newsprint inks were nominated for toxicologic testing by the NTP. Table 31 lists the nominated chemicals, their CAS numbers, the source of the nominations and the recommended tests. In addition, 151 chemicals representing 10 chemical classes (acetyl amides, amides, aniline derivaties, aminophenols, aminimides, nitriles, chlorohydrins, bromohydrins, alkyltins, and peroxides and hydroperoxides) and one use class (corrosion inhibitors) were nominated solely for mutagenicity testing in the *Salmonella* assay.

As of June 1, 1982, draft Executive Summaries for 36 nominated chemicals were prepared and submitted to the Chemical Evaluation Committee for its use in recommending chemicals which should be tested and for which types of toxic effects. The total number of Executive Summaries submitted to NTP to date is 410.

Evaluation of Nominated Chemicals—During FY 1982, the Chemical Evaluation Committee reviewed 47 chemicals previously nominated to the Program. On December 9, 1981, the CEC evaluated 15 chemicals; on March 3, 1982, 16 chemicals; and on July 15, 1982, 16 chemicals. Of these, seven chemicals were recommended for chronic carcinogenicity testing, two for subchronic studies, two for reproductive effects testing, one for nurotoxicity studies, and 17 for one or more tests for mutagenicity. Table 32 lists the 47 chemicals and the testing recommendations.

Ninety two chemicals nominated in FY 1981 for mutagenicity testing in the *Salmonella* assay by NIOSH, on the basis of occupational exposure, were approved for such testing. In addition, the 151 chemicals nominated for testing in the *Salmonella* assay as representatives of particular classes of

chemicals were selected for testing, as well as two additional alkyl nitrile compounds referred to the Program by the Interagency Testing Committee.

Public Comment—To solicit public input into the chemical nomination and selection process, **Federal Register** notices were published on the chemicals evaluated for in-depth toxicologic testing at the December, 1981, and March, 1982, CEC meetings. These notices requested both comments and the submission of relevant data.

As a result of these notices, information on production and/or toxicology data were submitted by interested parties on the following chemicals: carminic acid, 2-ethylhexanol, fumaric acid, linoleic acid, linolenic acid, potassium iodide, and vitamin E. Addenda to the Executive Summaries of these compounds were prepared for use by the Board of Scientific Counselors at its review of nominated chemicals in September, 1982.

Peer Review—In October 1981, the NTP Board of Scientific Counselors reviewed the 26 chemicals evaluated by the CEC at their April 6 and May 19, 1981 meetings. Approved recommendations, priority for testing, and additional remarks and/or caveats are summarized in Table 33. The Board reviewed the 31 chemicals evaluated by the CEC at the December, 1981 and March, 1982 meetings and made testing recommendations of its own at its September, 1982 meeting (Table 34).

Chemical Selection—In October, 1981, the NTP Executive Committee selected 26 chemicals as the NTP FY 1982 priority chemicals for in-depth toxicologic evaluation. The research and regulatory agencies participated in the selection of the chemicals which are listed in Table 35.

In July 1982, the Executive Committee selected 24 compounds as the FY 1983 priority chemicals for in-depth toxicologic evaluation (Table 36).

FY 1983 Program Plans

Evaluation of Nominated Chemicals—The Chemical Evaluation Committee expects to review approximately 30 compounds nominated for toxicology testing during FY 1983 and to select up to 300 compounds for mutagenicity testing in the *Salmonella* assay

Public Comment—A **Federal Register** notice will be published in October, 1982 to solicit input on the 16 chemicals evaluated by the CEC in July, 1982. Notices will be published on chemicals evaluated during FY 1983

Peer Review—At its first meeting in FY 1983, the Board of Scientific Counselors will review the 16 chemicals evaluated at the July 15, 1982 CEC meeting. Additional chemicals evaluated by the CEC in FY 1983 will be reviewed by the Board later in the year

Chemical Selection—The Executive Committee will select up to 20 compounds as the FY 1984 priority chemicals for in-depth toxicologic evaluation.

Identification of Toxic and Potentially Toxic Chemicals for Consideration by the National Toxicology Program—"Testing Needs Study"—The National Academy of Sciences (NAS) was awarded a three-year contract to address two major issues: (1) The percentage of those chemicals to which man may be exposed, either directly or through the environment, that might have public health considerations; and (2) the development and testing of an approach for consideration by NTP that will integrate the intensity of selected toxicity data elements, including absense of any data that might be used by NTP to set priorities among chemicals that would be candidates for toxicity testing.

The NAS-NRC initial report, "Strategies to determine Needs and Priorities for Toxicity Testing, Volume 1, Design," may be obtained from the National Academy Press, Publications Office, 2101 Constitution Ave., N.W., Washington, D.C. 20418 for the sum of $11.39 per copy. This report outlines the procedures and then uses them to obtain a random sample of 100 chemicals selected from a larger population of pesticides, cosmetics, drugs, food additives and other chemicals in commerce. Of these 100 chemicals, 85 of them are listed in the NAS-NRC report, 15 were subsequently added. For each of these 100 randomly-selected chemicals there is some toxicity information available. An in-depth assessment of the quality of these individual data bases will be conducted and the results reported in the second report from the NAS-NRC. This second report will discuss further development of the priority-setting scheme for consideration by NTP for possible use in the ranking of chemicals submitted for NTP consideration for testing. (CONTACT PERSON: Dr. R. E. Shapiro, NIEHS)

Chemical and Laboratory Test Management

Once a chemical has been selected for extensive testing and referred to the particular program area, a Chemical Manager is assigned to ensure that the chemical receives a complete scientific evaluation. The Chemical Manager follows the progress of the chemical through each of the various testing phases and has the responsibility to: (1) Know and understand the relevant scientific literature; (2) present draft protocol designs to the Toxicology Design Committee to ensure that testing is designed to measure relevant endpoints; (3) keep up-to-date on the experiment's progress and maintain current awareness; (4) provide liaison with groups doing special studies on the chemical; (5) assist in data evaluation; (6) draft the technical bioassay report; (7) be available to present test results at the Technical Reports Review Subcommittee meetings; (8) prepare the final technical report and journal manuscripts; and (9) respond to requests for information on that chemical after obtaining clearance from the agency which regulates the chemical. The Chemical Manager also maintains liaison with the party (Government, public, industry) who nominated the chemical and with the industry that manufactures or uses the chemical.

As an adjunct, the Pathology Working Group, the Data Analysis Group, and the Quality Assurance-Good Laboratory Practices Section perform quality control functions. These groups ensure that an independent pathology laboratory examines all target organ slides and 10 percent of all others, that studies are designed properly with regard to statistical requirements, and that the bioassay reports accurately reflect the data found.

Project Officers are responsible for monitoring the overall operations of the commercial laboratories performing prechronic and long-term studies for the Program and for ensuring that good laboratory practices are being followed. To ensure that the tests are well conducted in an efficacious manner (scientifically, cost-wise, and timely), these scientists inititate: (1) Annual program reviews by peer groups of scientists, (2) quarterly site visits, (3) *ad hoc* visits by experts in various scientific disciplines as needed, (4) communication with the laboratory and principal investigator through periodic reports and telephone calls, and (5) interaction with NTP contract specialists. (CONTACT PERSON: Dr. J. Douglas)

Quality Maintenance Procedures in the NTP—Because attainment and maintenance of quality in NTP scientific programs is essential to the validity, credibility and reproducibility of the results obtained, the following detailed description of quality procedures in the NTP is provided.

"Quality " is a virtue greatly desired but not attained without considerable thought, effort and constant vigilance of all concerned. It is define by Webster as "a distinguishing attribute". There are three procedures for providing quality which are often referred to interchangeably; however, these three aspects are different in their approach to ensuring quality. Since NTP uses all three of these parameters as active parts in providing a quality program, it is important to understand each and how they work together. These three aspects are as follows:

1. Quality Control (QC) is defined by Webster as "an aggregrate of activities designed to ensure quality of a manufactured product." For NTP the ultimate product is the final report on the laboratory study.

2. Quality Assessment (QAS) can be defined as determining the importance, size or *value* of quality. Assessment is defined by Webster as "appriaisal", therefore, QAS is the appraisal of quality. In NTP, we assess the quality of the laboratory by the quality of the facilities, equipment, personnel and ultimately the quality of the work it produces.

3. Quality Assurance (QA) is the culmination of QC and QAS. Webster defined assurance as "freedom from doubt, confidence of mind or matter * * *." Today, Quality Assurance generally refers to those aspects related to Good Laboratory Practices (GLP) Regulations as defined by the Flood and Drug Administration (part 58—Good Laboratory Practices for Nonclinical Laboratory Studies).

Since quality cannot be added on at the end, it must be built into each aspect of the program. This means the first parameter of quality is the NTP personnel. This includes the management, the chemical managers, the scientific discipline leaders, and the project officers.

The second parameter of NTP quality is the contract laboratory engaged to carry out toxicological studies. Through contractual

procedures, a group of qualified laboratories is established under a master agreement for the Bioassay Program. Only these qualified laboratories are allowed to bid on most of the bioassay packages of studies to be assigned to contract laboratories. Qualification (QAS) is established through a peer review of proposals by outside experts from academia and industry and site visits by NTP discipline leaders.

Various NTP internal controls (QC) are in place to ensure the best possible experimental design for the study. The Chemical Manager is responsible for identifying the parameters to be included in the toxicology experimental design. This is done by literature survey and conferring with various discipline leaders within the NTP program, with scientists expert in regulatory needs regarding the toxicity data required for a specific chemical, and with experts in academia and industry. All this information is peer reviewed (QC) by the Toxicology Design Committee made up of NTP colleagues with diverse backgrounds and interests. Each aspect of the study is scrutinized for logic, need and value added before approval by the Committee. This final experimental design is used to prepare a protocol for review by NTP management prior to assembly of material for competition among the approved laboratories. QC is performed to assure that the protocol package is consistent with the current statement of work and procedures for specific toxicologic parameters to be determined. The bid packages are assembled based on special requirements of each protocol and sent to laboratories qualified for specific dose administration routes (dosed feed, dosed water, gavage, skin painting, inhalation) and specific toxicological effects (immunotoxicology, enzymology, etc). Each of these QC steps is important in ensuring a successful study.

Prior to initiation of a study at any laboratory a series of QC events occur to assure the quality of the study. These result in providing high quality resources for the NTP program, that is, animals and chemicals. To provide high quality rodents of uniform genetic background, NTP provides the contract breeding facility with known NIH breeding stock to be used in rederiving their breeder stock in isolators. All rederived rats and mice are inoculated with "bacterial cocktail" to obtain uniformity between animal sources. Each production colony is monitored for parasites and serum titers for a variety of rodent viruses. The genetic quality of these animals is monitored on a routine basis to ensure genetic uniformity. Retired breeders are also examined grossly and selected tissues reviewed microscopically to determine the overall state of health.

Also prior to initiation of a bioassay, the chemical is procured by our contract analytical laboratory. As a part of QC, the analytical laboratory determines the identity, purity, stability under various storage conditions, solubility, procedures for homogenous mixing for dosed feed studies, vehicle and mixing procedures for drinking water, gavage and skin painting studies and the best procedure for analysis based on the equipment available at the bioassay laboratories and the dose levels anticipated for testing. For inhalation the bioassay laboratory, in conjunction with the analytical contractor, undertakes an extensive study to determine the best way of producing an atmosphere containing the chemical which depends upon the nature of the chemical (particulate, gas or aerosol mist). The chamber concentration is monitored throughout the exposure period on a daily basis.

QC and QAS activities for analytical chemistry continue throughout the study. The bioassay laboratory determines the purity of the bulk chemical on receipt and every four months while on study. Each bioassay laboratory analyzes dose preparation regularly and in addition, referee analysis is carried out by an independent analytical contractor twice yearly on paired samples to assure the dose preparations are properly prepared and analyzed. This is done for each chemical at regular intervals starting with the first preparation for the subchronic study.

NTP monitoring of contract research can be considered QAS. This monitoring takes several forms on the bioassay. The first line of monitoring is the project officer who makes an initial visit to the laboratory to determine readiness to start the study and quarterly site visits thereafter. These visits include very technical, as well as financial, aspect of the contract. If problem areas develop, specific discipline leaders—chemistry, pathology, health and safety, animal care, specific toxic effects and quality assurance—are consulted and, if required, they will make a special site visit to the laboratory. In addition to the quarterly site visits, an annual program review is held in which all discipline leaders visit the contract laboratories. These have proved very useful in detecting and solving problems (QAS and QC).

Monitoring also occurs through review of the monthly status reports from the laboratories. These reports have been structured to allow review by the project officer, the discipline leaders, chemical managers and management. This allows early detection of problem areas and a resolution of these problems and serves as both QAS and QC.

QAS and QA activities are a major part of the pathology program for NTP. All contract pathologist must be approved (QAS) before they can participate in the bioassay program. As a bioassay progresses, random slides are reviewed for QAS of the histological preparation of tissues. Workshops are held to standardize pathological diagnostic terms so that specific terms are used to describe the same toxic effect (QC).

When a subchronic or chronic study is completed, all slides and diagnoses are sent to a contract laboratory for QAS. They determine if all slides are present and contain all the required tissues and assess the quality of the slides. In addition, all masses and all target tissues are examined as well as all tissues from 10% of the animals selected at random. As a further QA and QAS step, slides showing differences in diagnostic opinion between original pathologist and QA pathologist are examined for specific organ or toxic effects by a Pathology Working Group (PEG) consisting of both NTP pathologists and outside expert pathologists from industry or academia. This review leads to a consensus diagnosis of toxic effects.

Hematology, urinalysis and clinical chemistry studies also have a QAS procedure. Prior to performing these procedures for a study, a new laboratory must demonstrate they can carry out the studies and obtain reproducible results. Many of our bioassay laboratories participate in a proficiency testing program.

The animal health is monitored (QAS) at regular intervals throughout the bioassay by collecting sera from sentinel animals housed under the same conditions as the test animal. This sera is tested for antibody titers to a variety of rodent viruses. If tests indicate an infection, cultures are made and histopathological examinations carried out to determine the cause. Monitoring of the condition will continue as long as needed.

The bioassay laboratory personnel are responsible for an active QC program to assure all data is collected correctly, calculations are correct, and the environmental conditions meet program requirements. All facilities are equipped with emergency power to ensure adequate temperature control even during power outage. All data entered into the Chemical Bioassay Data System (CBDS) or the Toxicology Data Management System (TDMS) are totally validated for correctness of input.

Quality Assurance (QA) is primarily the responsibility of the Quality Assurance Unit (QAU) established at each facility to meet the requirements of GLP compliance. The QUA personnel must have no conflicting interest with the programs to be reviewed. They must be qualified in a diversity of disciplines to meet the needs of the laboratory. It is their responsibility to inspect and audit the various critical phases of each study carried out under GLP compliance. Critical phases have been defined as those which have the potential for invalidating the study if done incorrectly or not in a timely fashion. The working protocol is the initial critical phase as it represents the principal investigator's interpretation of what is to be done by the contract laboratory. It is the responsibility of the project officer to check each working protocol prepared by the laboratory against the protocol prepared by the chemical manager and to approve the laboratory working protocol prior to the start of the study. Any changes or deviations from this protocol must be documented. Other critical phases of a bioassay consist of animal identity, chemical analysis, dosing, special toxicology studies, necropsy, data collection and report preparation. The less critical phases are considered to be randomization, clinical signs, animal weights, tissue weights, cage and rack changing, and environmental conditions. Although these are critical to obtaining a good study, errors generally do not invalidate a study.

During 1981, the NTP–QA program leader and QA manager for the bioassay prime contractor, Tracor Jitco, made a concerted effort to bring all bioassay laboratories into compliance with FDA–GLPs. Currently, the

machinery is in place for compliance by all bioassay laboratories and extensive audits of data are being carried out on selected studies. The contracts have been modified to require GLP compliance. A final report is prepared by the principal investigator and audited by QAU at the laboratories are being made by the NTP–QA laboratory prior to submission to NTP. Annual visits to all bioassay program leader. These visits include an inspection of the QAU organization, capabilities and activities. Generally, at least one inspection is made of some technical procedure and data are audited. The Standard Operating Procedures for various technical activities are reviewed. A facility inspection is made. The personnel training files and safety procedure are reviewed. When problems are found, followup visits or responses to action items are required. The discipline leaders, project officers and chemical managers are informed of the findings of the QA site visits.

In September, 1981, a QA workshop was held for the bioassay laboratory prinicpal investigators and QAU managers. All NTP and Tracor Jitco discipline leaders and project officers attended. The theme of this workshop was to define the duties of each members of the team—NTP, Tracor Jitco, and the contract laboratory.

The next problem in the area of QA is the implementation of GLP compliance and monitoring of the bioassay data collected on the Toxicology Data Management System (TDMS). The NTP QA program leader is investigating the design of procedures to assure the quality of this computer collected data in collaboration with other members of the team responsible for implementation of TDMS and will work with the bioassay laboratories in their QAU efforts.

One final step remains to be discussed in the GLP compliance program for bioassays—that is—the archiving of the raw data. NTP provides an archives for secured storage of the raw data and a repository for the slides, wet tissues and tissue blocks. The laboratories will be required to inventory all raw data sent to the archives and arrange them according to a format designed for easy access. Consideration is being given to microfilming this material for long-term storage. All data and slides are available for examination at the repository and archives but these data cannot be removed from the archives. Fire protection is provided for raw data and laboratory reports.

During 1982 a program was initiated to bring other aspects of NTP testing and validation studies under GLP compliance. This has required the site visiting of a variety of studies including teratology and cellular and genetic toxicology screening and validation testing. The immunotoxicology and pharmacokinetics programs will also be site visited. Collaboration has been established with the NIOSH Quality Assurance manager and four NIOSH/NTP teratogenesis validation studies have been site visited. In collaboration with the project officer at NCTR, five contracts for the validation of behavioral toxicology testing procedures have been site visited in preparation for GLP compliance during the next contract year.

Through establishment of GLP compliance NTP is making every effort to establish a level of quality which will provide "freedom from doubt" as Webster defines "assurance". (CONTACT PERSON: Dr. C. Whitmire)

Chemistry Resources

The chemistry program serves as a central resource for all testings and research activities of the NTP. Maintained to assure chemical quality and to minimize testing results variability due to external sources, the chemistry needs are facilitated via integrated contract mechanisms and cooperation and interaction with other NTP operations. The chemistry capabilities provide for procurement, chemical analysis, analytical methods development, purification and synthesis of test chemicals. In addition, a chemical repository resource has been established for the receipt, handling, long-term storage, shipment and preparation of chemical safety data handling sheets for approximately 3,000 chemicals. (See section on Chemical Repositories).

Capabilities are provided for analysis of bulk chemicals, chemicals in test vehicles, methods development for quality assurance, including purity, stability (both bulk chemical and chemical/vehicle mixtures) and concentration determinations, chemical residue analysis for body tissues and fluids and special handling for residual and reprocured chemicals. In addition, capabilities exist for purification, derivatization and synthesis of test chemicals. Trace level analysis of test chemicals for potential contaminants are available, when required, as well as provisions for percent level purity, stability and recovery analyses. Trace level chemical analysis may be necessary when known toxic impurities are suspected to be present in the test material. There may also be a requirement for trace analysis when toxicity tests of chemical mixtures or impure chemicals are positive and it is necessary to identify specific components that may be associated with the observed toxic effect.

NIEHS

FY 1882 Accomplishment

The analytical services support contract established in FY 1980 continued to support a large number of NTP programs. As in the past, the majority of the work was in support of the carcinogenesis bioassay program. Nineteen chemicals which started carcinogenesis bioassays in FY 1982 were procured, analyzed and shipped to the respective bioassay laboratories for testing. In addition, 14 of the 15 chemicals recently approved to start prechronic studies in FY 1983 have either been procured and analyzed or are currently in the procurement process.

The chemistry performed at the bioassay laboratories is constantly monitored by review of the monthly reports received from the laboratories and by annual chemistry discipline site visits to all bioassay laboratories. In some instances, it has been necessary to visit a laboratory more often than the regular annual visit to address chemistry related problems associated with the bioassay studies. During FY 1982, with the exception of procurement delays on several chemicals, There were no major chemistry related problems at any of the bioassay laboratories.

The analytical chemistry resources continued to support the NTP teratology program. During FY 1982, five new chemicals were obtained for teratology studies (Table 37). These chemicals were procured and analyzed in a similar manner to that of the chemicals for the carcinogenesis program, including complete purity and identity assays and methods development for bulk chemical stability and chemical/vehicle mixing, stability and concentration assay methods. In addition, interim bulk chemical reanalysis for purity was provided for all chemicals and tissue residue analysis for one chemical was provided for the teratology studies. All information generated during the analyses of these chemicals was provided to the teratology program leader and the contract laboratory. Also, technical input in the area of chemistry was given to the teratology program by means of the site visits to the teratology contract laboratory.

The chemistry resources initiated support of a reproductive toxicology program contract initiative started in FY 1982. Twelve chemicals were obtained (Table 38) for study in the program and distributed to the contract laboratories. These chemicals were procured and analyzed in a similar manner to those obtained for the teratology program. In addition, the chemistry resource provides routine dose analysis for all chemicals on test in the program as well as interim bulk chemical reanalysis for purity. All information generated during the analysis of these chemicals is provided to the project officer and contract laboratories. Technical input in the area of chemistry is provided by constant communication with both the project officer and contract laboratories.

The chemistry resources have also initiated support of the NTP's immunology program contract research by providing analytical chemistry services for the four chemicals currently on study under this initiative (Table 39). These services include bulk chemical analysis for purity and identity; methods development for bulk chemical stability and chemical/vehicle mixing, stability and concentration assay methods. Support in the area of routine dose analysis, interim bulk chemical reanalysis for purity and tissue residue analysis is also provided.

The chemistry resources continue to support the NTP psoralen initiative. Four chemicals (Table 40) were obtained from various sources and analyzed for identity and purity. In addition, routine dosed feed analysis on samples received from the contract laboratories is provided.

Another major initiative accomplished in FY 1982 was the completion of the routine chemical services performed in support of NTP studies at the NCTR. This activity was undertaken in order to allow NCTR chemists the opportunity to participate in the NTP's Benzidine Congener Dye Initiative. The services provided for the NCTR included surveillance of incoming supplies for experimental animals such as: feed, potable water, bedding and cardboard feeder boxes and certification that the dosed feed for the NTP studies of sulfamethazine and hexamethyl-p-rosaniline (gentian violet) contained the correct concentration of the

chemical. The chemical support provided by the chemistry resources was for an 18-month period and NCTR took back responsibility for these analyses in February 1982.

Continued support was provided to several NTP investigators in the area of chemical synthesis, tissue residue, bulk chemical and dose mixture analyses (Table 41). During FY 1982, tissue or body fluid residue analysis was performed on samples from a reproductive toxicology study of chlordecone (kepone) and diethylstilbestrol, teratology studies of di(2-ethylhexyl)phthalate, immunology studies of cadmium chloride and bioassays studies of chloramphenicol and titanocene dichloride.

The chemistry program also provides primary repository assistance to the genetic toxicology and carcinogenesis testing programs. The two repositories, which operate under similar standard operating procedures, have undertaken numerous joint projects that demonstrate the functional integration of the two programs. (CONTACT PERSON: Dr. C. W. Jameson)

FY 1983 Program Plans

During FY 1983, the chemistry resource will continue to support the carcinogenesis testing program by procuring and analyzing all new bioassay chemicals. The chemistry resource will also continue to support the teratology, reproductive toxicology, immunology and psoralen contract efforts and begin support of the short-term *in vivo* rat liver tumor model program which will initiate contract efforts in FY 1983. Continued collaboration with in-house investigators will be maintained, especially in the areas of reproductive toxicology and immunology. Continued effort for developing analytical chemistry services support for in-house NTP studies will be pursued. (CONTACT PERSON: Dr. C. W. Jameson)
